Mr. President, when I observe the usurpation of power in the public-land States by the executive departments and by Congress, I am impelled by a sense of duty to call to the attention of Senators, and as far as I can the attention of the country, to the injustice under which the people of the West are suffering. The unbridled and, as I think, unconstitutional exercise of Federal power over matters in which the State alone has jurisdiction and sovereignty utterly destroys the hope of further development of some of the Western States and threatens their future existence as solvent Commonwealths.

I want in the outset, on this part of the subject, to say that I am as strongly in favor of the conservation of State and National resources as any man here or elsewhere. But I desire sensible conservation. I want to "render unto Cæsar the things that are Cæsar's," but not all that imperial Cæsar might claim. I want the General Government to be free and untrammeled in

the just use of all its powers. I want my State and yours equally free in the same use of the powers rightfully belonging to them. But Congress should remember, in dealing with the Western States, that if it has a giant's power it is tyrannous to use it like a giant. I think I can show that Congress has tyrannically used powers which are doubtful, and the Interior Department has exercised unjustly powers that it never had at all, and by rules, regulations, and orders dedicated our lands to silence and desolation. I have neither the time nor inclination to go into details, but I will stop long enough to assert that the *reversal of the rulings of more than half a century in the matter of mining locations alone* did, and is doing, more harm to one industry than all the good that that department has done the mining States in all their history. Why it was made no man in the West knows. That ruling is born of ignorance, profound ignorance, of the geological conditions in which the precious and semiprecious metals are found—ignorance or carelessness of the vast expense and labor involved in their output—and the manifold and widely distributed blessings attending their successful development. If Congress does not give relief, a blighting paralysis will strike the most beneficent industry, agriculture alone excepted, that the world has ever known. The same department—I do not in this allude to the present Secretary—a few years ago successfully urged on Congress the passage of a law giving the land-grant railroads scrip for the worthless and denuded lands held by the corporation in order to turn them into a forest reserve, and was by this the means of putting vast tracts of the best timbered lands in all the West in the hands of lumber barons, and doomed the forest to destruction the day the scrip was issued.

I make no claim of corruption against the department or the then Secretary, but cite the incident merely to show that the department when dealing with the subject nearest its heart and hope was not then less infallible than the present Secretary has shown himself to be in the matter of mining claims.

I did not take the floor to indulge in criticism, but for a much more serious purpose, and that is to demonstrate by the decisions of the Supreme Court that unjust exactions and burdens are laid on the public-land States by Federal power, or alleged power, that it does not impose on other States, and does not assert the power to impose them on other States, claiming to find warrant for these exactions in the title the Government has to the public lands.

I make the claim that the Government holds the public lands as a private proprietor and not as a sovereign. I doubt if under the Constitution the title is as complete and full for all purposes as an individual holds under a fee-simple title, for the reason, as I have shown, that these public lands are held under and subject to a trust for the use of the State and the citizens thereof. (Shively *v.* Bowlby, 152 U. S.)

I further claim that the running nonnavigable waters of every State are subject to the sovereign will of the State, and unaffected by the trust title the Government holds to the lands through which they flow, and especially so in those States where riparian rights no longer obtain or never did exist.

I further maintain that the Federal power over navigable waters within a State, as well as its interest in the public lands, is and must of necessity be found among the express grants in the Federal Constitution, and the terms of the grant—its language—measures the full power that can rightfully be exercised by the Federal Government over these subjects.

It follows, then, that the rules and regulations which Congress can make for protection of such proprietary title as the Government has can not interfere with the sovereign power of the State to build roads demanded by the necessity of the State—to dig a canal for the purposes of irrigation in some desert county or district of a State—nor can the Federal Government lay any tax or royalty on the State for the use of any lands within its borders for such essential public purposes. If Congress can prevent Arizona from building a necessary road over any lands within the State, then it can prevent any other State from doing the same thing, or else the equal sovereignty of the States is violated and the constitutional mandate in that particular nullified.

You can not set up title to the lands as a plea against sovereignty of the State. You can not, by your right to protect, regulate, and ultimately sell lands within a State, nullify the clause of the Constitution guaranteeing equality of all the States. Your limited title must succumb to the edict of the Constitution. The Government holds no higher or broader title to any acre of the public lands than it transfers to the individual by its patent. Yet no individual could successfully prevent the use of his land for necessary purposes of the State, nor can the Federal Government constitutionally or conscientiously do so.

The power of the Federal Government over the public lands is found in section 3 of Article IV of the Constitution, which declares that—

> The Congress shall have power to dispose of, and make all needful rules and regulations respecting the Territory or other property belonging to the United States.

This language gives no more than a proprietary interest in the public lands to the Federal Government. It can take care of them, use them and sell them, but neither in its supervision, by rules and regulations, nor by sale can the sovereignty which the State holds be usurped or nullified. Over the sovereign right of the State to build a public road the Congress has no more right to hinder in Arizona than it has in Texas. It can lay no toll or tax or royalty on any State or any subdivision of any State in any matter of State sovereignty whatever. The ownership of public lands within a State does not affect in any manner the full exercise of the States' inherent sovereignty.

The people of Texas, or the State of Texas, if you please, in whose borders no acre of public land was ever known, has no more power over the running waters in the State than every other State possesses over their respective streams. Yet, who will claim that Congress can invade the State of Texas and lay tribute or toll on water power developed on such streams? The full ownership of the nonnavigable waters does not lie in the ownership of the landholders along its banks, nor in all of them combined. Riparian right is not a title, and whatever easement or use it carried with it, does not affect in any way those States which *do not recognize riparian proprietorship at all.* The jurisdiction over this question has always been recognized as being in the State, as was said by the Supreme Court in the Water Power Company against Water Commissioner, One hundred and sixty-eighth United States, and citing with approval the same rule laid down in the leading case of Shively against Bowlby, in One hundred and fifty-second United States.

Riparian rights have not and never have been recognized in Arizona. The ownership of land does not affect title to the waters of the State. Whether private persons, or the Government itself, owns all the land along the stream, the right of the people under the laws of the State are not affected. Any citizen can still acquire title to the unappropriated waters in any stream by diverting any amount necessary and subjecting it to any beneficial use named in the statutes of the State. Arizona was admitted to the Union under a constitution which declared that the unappropriated waters in the State belonged to the people, and was subject to appropriation for the beneficial purposes mentioned. This act of admission confirmed the title to the waters in the State beyond all further controversy, and over these flowing streams Congress has no jurisdiction whatever. Nevertheless, the Department of the Interior claims under act of Congress and in exercising full power over this subject and laying what toll rentals and other conditions it pleases on the use of these waters by the State or any citizen of the State. If these exactions are not demanded under a claim of title to the waters they are extorted by claiming title to the land and prohibiting thereby the use or occupancy of any land necessary to the use of the water.

Appealing to the power of eminent domain, we could force any private owner holding title from the Government—being as full in all respects as the Government holds—to permit the use of the necessary land for the great public good. Thus, like that miserable dog in the manger, the department, being unable to devour our substance, proceeds to prevent our use of it. Under a pretense of suppressing monopoly, such restrictions in title and reservation of control, and such tolls are imposed, that no sensible man will invest in many enterprises so essential to the prosperity of the State and the betterment of its people.

The people of Arizona, in all matters within the jurisdiction of the State, can be trusted much further than they can trust the Federal Government in preventing monopoly, and also in destroying it, when found to exist, within its borders.

The Federal Government is no wiser or better than the States composing it. Where the States fail to meet wisely the problems and responsibilities which confront them, the Federal Government will be found in no such moral condition as to attempt the solution of these problems or assume the responsibilities for the people of the States. In our very creation it was wisely otherwise ordained. I have no fear of Arizona wasting her resources, or giving them over to the mercy of monopoly. Her legislature—and if it fail to act—her people can under the referendum prevent any franchise that savors of monopoly, by reserving the right of fixing tolls and charges and rates in all cases where the public is concerned.

If the General Government can lay a duty, or toll, or charge, or tax on the use of the resources of the State by its citizens, or the State itself, surely it can lay no just claim to the revenue

derived and cover it into the general fund of the United States Treasury, but the money so obtained should in equity be turned into the treasury of the State, so that it might supply in a small degree the enormous amount of taxes you have kept from our Treasury by reason of the enormous amount of the most valuable lands in the State which you have covered by reservations. You prevent us from collecting taxes on the property you have taken from us, as you allege for the general good of the United States, and proceed to collect from us and cover into the United States Treasury taxes on the use of resources clearly belonging to us and on which you have no moral right to lay your hand under any pretense whatever.

Where does the Federal Government find its charter to reserve "power sites" on nonnavigable streams in the public-land States? As I have shown, these waters belong to the States and can be used by the State for State purposes. The State has the right to fix such charges as it sees fit on the public carrier of electric power and fix what rate such carrier shall deliver it to the consumer. The cost of the enterprise, together with a reasonable profit on the business, is, of course, paid at last by the consumer. What right, I ask, has Massachusetts, Connecticut, or Virginia, or all the States combined, to lay any burden on the consumers of electric power generated by water owned by Arizona? Any money obtainable from such source for the right to generate the power belongs to the treasury of Arizona alone.

The great irrigation enterprises of the Government stand on a different footing, for in those cases the Government advances the money and requires its repayment by the people using the water, and let us here pause long enough to express the hope *that no more will be required of the water users than the necessary cost of the various enterprises.* But of this I will have more to say when proper occasion arises.

Mr. President, I pray further indulgence of the Senate for the purpose of examining certain decisions of the Supreme Court on the question of the State's absolute ownership and control of all nonnavigable waters within the States, and that the ownership by the Federal Government of the public lands does not affect the State ownership of the water.

And this ownership of water being reserved from the grant to the Federal Government, remained, as I have before shown, in the original States, and such ownership must remain in any State subsequently admitted in order to preserve the equality of the States prescribed in the Constitution. I think it was in Withers against Buckley where the court said:

> Could such an intention be ascribed to Congress, the right to enforce it may be confidently denied. Clearly, Congress could exact of the new State the surrender of no attribute inherent in her character as a sovereign independent State, or indispensable to her equality with her sister States, necessarily implied and guaranteed by the very nature of the Federal compact. Obviously, and it may be said primarily, among the incidents of that equality, is the right to make improvements in the rivers, watercourses, and highways situated within the State.
>
> * * * * * * *
>
> On her admission she at once became entitled to and possessed of all the rights of dominion and sovereignty which belonged to the original States. She was admitted and could be admitted only on the same footing with them. The language of the resolution admitting her is "on an equal footing with the original States *in all respects whatever.*" (3 Stat., 536.) Equality of constitutional right and power is the condition of all the States of the Union, old and new.

At this very moment we are heavily taxing our overtaxed people for the purpose of building great public highways within the State and for keeping our other roads in passable repair. Can any man who knows the spirit of the Constitution or the jealousy with which the local rights and powers of the States were guarded by the makers dare here assert that any State then existing, or thereafter created, could be compelled to ask Congress for a right of way in order to build a road over any land in a State not held and used by the Government for pure Federal purposes? The mere power to "dispose of and make needful regulations respecting the territory or other property of the United States" can not be so construed as to rob the State of one of the most essential prerogatives of its sovereignty. Otherwise citizens of a county in many of our States could not reach their country seat to serve as jurors or witnesses if Congress saw fit to exclude them from passing across lands claimed by the United States. If the sheriff can not go with his warrant wherever he pleases under the State laws, then no sovereignty is left in the State. And the sheriff with his summons in his pocket is no more essential to such State sovereignty than a right of way for public roads, canals, and so forth, across the lands within the State. In these matters the Government's title to the land must of necessity be subrogated to the greater right of the State to protect and maintain its own government.

Mr. President, I am not claiming that the Supreme Court has decided this particular question, but I am not afraid to hope that when the question comes squarely before it that it will decide it according to my contention, but probably not on account of it.

But let us recur to what the Supreme Court has said. In Huse against Glover (119) we find this language used in deciding the question of State or United States jurisdiction on the Illinois River, and in support of the position taken cites the cases appended to the quotation:

> The private inconvenience must yield to the public good. The opening of a new highway, or the improvement of an old one, the building of a railroad, and many other works, in which the public is interested, may materially diminish business in certain quarters and increase it in others; yet, for the loss resulting the sufferers have no legal ground of complaint. How the highways of a State, whether on land or by water, shall be best improved for the public good *is a matter for State determination*, subject always to the right of Congress to interpose in the cases mentioned. (Spooner *v.* McConnell, 1 McLean, 337; Kellogg *v.* Union Co., 12 Conn., 7; Thames Bank *v.* Lovell, 18 Conn., 500; S. C., 46 Am. Dec., 332; McIlreynolds *v.* Smallhouse, 8 Bush, 447.)

The cases mentioned were where the State's action by the judgment of Congress is deemed to encroach upon navigation. Earlier in my remarks I asserted that the State could, under its laws of eminent domain, at once seize land of any citizen who had a title just issued by the Government, and from that I attempted to demonstrate the injustice of the Government merely by reason of its title to land, exercising powers destructive of the State's sovereignty.

I find that in the case of United States against Chicago, page 17, the Supreme Court says: "It is not questioned that the land within a State purchased by the United States as a mere proprietor"—and permit me to say it holds the public lands by no other or superior title—"and not reserved or appropriated to any special purpose"—and, I presume, the court means any special Federal, or United States, purpose—"may be liable to condemnation for streets or highways like the lands of other proprietors, under the rights of eminent domain."

Judge Sawyer, in the case of The People against Shawver, reported in Thirtieth California, said:

> That the relation of the United States to the public lands since the admission of California is simply proprietary * * * like any citizen who owns land and not that of municipal sovereignty.

Mr. Justice Bradley, in the Shively against Bowlby case, One hundred and fifty-second United States, if he means what he says, reaches the full limit of my contention in the declaration that—

> Upon the acquisition of territory by the United States, whether by cession of one of the States or by treaty with a foreign country, or by discovery and settlement, the same title and dominion passed to the United States for the benefit of the whole people and *in trust for the several States to be ultimately created out of the territory.*

The Supreme Court of California, in its early days presided over by jurists whose learning and ability adorned the high position they held, decided time and again that the admission of any State into the Union conferred all sovereignty for all internal purposes on the State except such powers as are expressly conferred by the Constitution on the Federal Government, and that the United States had no interest in or power over the public lands other than any other proprietor would have over his own lands, which decisions have been as often sustained by the Supreme Court of the United States.

As to the waters of a State, whether navigable or nonnavigable, the United States has no right or title whatever except to improve the navigable waters and to prevent any obstruction of the commerce carried thereon, and any assumption of any other power is unwarranted.

Pursuing that argument one step farther, we find Justice Holmes, in Hudson Co. *v.* McCaster (209 U. S.), using this significant language:

> It appears to us that few public interests are more obvious, indisputable, and independent of particular theory than the interest of the public, of a State, to maintain the rivers that are wholly within it substantially undiminished except by such drafts upon them as the guardian of the public welfare may permit for the purpose of turning them to a more perfect use. This public interest is omnipresent wherever there is a State and grows more pressing as population grows. It is fundamental. Riparian rights have no deeper roots.

In concluding this part of my argument I will, Mr. President, content myself with one quotation from the now celebrated and much-discussed case of Kansas *v.* Colorado (206 U. S.), where Mr. Justice Brewer says:

> But it is needless to pursue the inquiry further in this direction. It is enough for the purposes of this case that each State has full jurisdiction over the lands within its borders, including the beds of streams and other waters.

Under all these decisions by what authority can it be claimed that the United States has power, commercially and for purposes of its own profit, to invade a State under pretense of safeguarding or improving navigation and proceed to sell power produced by the water unnecessary to navigation? And where, I ask, in the Constitution does any executive department of the Government find any warrant or excuse for invading a State

for the purpose of reserving power sites on nonnavigable State streams for commercial purposes unconnected with any governmental needs over and above the cry of its General Treasury for more supplies? We are willing to pay our part of such demands as this; we protest against paying more.

In Escanaba Co. *v.* Chicago (107 U. S., 678, 687) the court said:

> The doctrine declared in these several decisions is in accordance with the more general doctrine now firmly established, that the *commercial power of Congress is exclusive* of State authority *only* when the *subjects* upon which it is exercised are national in their character and admit and require uniformity of regulation affecting alike *all the States*. Upon such subjects only that authority can act which can speak for the whole country. Its nonaction is therefore a declaration that they shall remain free from all regulation. (Welton *v.* State of Missouri, 91 U. S., 275; Henderson *v.* Mayor of New York, 92 id., 259; County of Mobile *v.* Kimball, 102 id., 691.)

"In the matter of our right to carry water through canals over the public land, notwithstanding the alleged right of the Government to reserve power sites on our streams, the most that can be claimed is that the Federal Government might now, however inequitable it might be so to do, adopt rules and regulations under which, as a private proprietor, it could exact and receive such compensation as another private proprietor might exact within a State for a right of way connected with a public use. In so doing it could not, under the law, claim to be acting *pursuant to any public duty*, or for the *public benefit*, but merely as a selfish, private proprietor exacting, in connection with the development of local industry, such damages as resulted to its lands in connection with the easement or use.

"That its rights as a proprietor could in no event be so asserted as to impede or prevent the development of the State's resources or impose upon its citizens any unusual charges, or any terms or rights of way connected with continuing public uses, or reserve any official control or police power or regulation of business, or monopolies in Federal authority, or in any manner invade or seek to exercise such powers in conjunction with or in substitution for the State, are matters so well settled as to be beyond the pale of argument, or it would so appear if the Supreme Court of the United States is still assumed to have power to construe and interpret the law."

If the State of New Jersey, for instance, can protect its citizens in the free and uninterrupted use of its waters, subject to no charges, restrictions, or terms, except only such as the State itself imposes, what, I ask, becomes of all the decisions sustaining the equality clause of the Constitution, and what becomes of that constitutional guaranty to all the States if in public-land States this right was made subordinate to the following Federal powers, namely:

1. To impose a charge in connection with the right of way measured by the water or its products.

2. To withhold access to rights of way and use, except upon payment of what such "opportunity" is worth to divert, appropriate, and use it.

3. Reserving in Federal officials power of inspection, supervision, and determination of disputed questions and fixing of charges, and also power to determine questions of monopoly proceedings in restraint of trade and police powers fully invested in the State.

4. To permit uses of rights of way for beneficial uses—subject to be continued and compelled by mandamus under State authority—for limited periods only, at the end of which term the powers of the State and the rights of the owner would depend upon further governmental favor or departmental action, and beyond such term to be subject to further regulation, taxation, and limitations.

5. To compel a transfer of the water right to the United States, presumably to invest it with control and authority and taxing and charging power, as a condition of "permitting" the State and its agencies to install and enjoy a public use in the State.

But the fact is that such Federal powers are assumed in the public-land States, while its exercise in the original States was never dreamed of.

Let me hastily cite at random a few cases that may illustrate our contention.

In the United States *v.* Railroad (27 Fed. Cases) Judge McLean says:

> Within the limits of a State Congress can, in regard to the disposition of the public lands and their protection, make all needful rules and regulations. But beyond this it can exercise no other acts of sovereignty which it may not exercise in common over the lands of individuals. A mode is provided for the cession of jurisdiction when the Federal Government purchases a site for a military post, a customhouse, and other public buildings; and if this mode be not pursued, the jurisdiction of the State over the ground purchased remains the same as before the purchase. This, I admit, is not a decided point, but I think the conclusion is maintainable by the deductions of constitutional law.
>
> * * * * * * *
>
> But the important inquiry is whether the public lands are subject to the sovereignty of the State in which they are situated.
>
> It is a fair implication that if the State were not restrained by compact it could tax such lands. In many instances the States have taxed the lands on which our customhouses and other public buildings have been constructed, and such taxes have been paid by the Federal Government. This applies only to the lands owned by the Government as a proprietor, the jurisdiction never having been ceded by the State. The proprietorship of land in a State by the General Government can not, it would seem, enlarge its sovereignty or restrict the sovereignty of the State. This sovereignty extends to the State limits over the territory of the State, subject only to the proprietary right of the lands owned by the Federal Government, and the right to dispose of such lands and protect them under such regulations as it may deem proper. The State organizes its territory into counties and townships, and regulates its process throughout its limits, and in the discharge of the ordinary functions of sovereignty a State has a right to provide for intercourse between the citizens, commercial and otherwise, in every part of the State, by the establishment of easements, whether they may be common roads, turnpike, plank, or railroads. The kind of easement must depend upon the discretion of the legislature. And this power extends as well over the lands owned by the United States as to those owned by individuals. This power, it is believed, has been exercised by all the States in which the public lands have been situated. It is a power which belongs to the State and the exercise of which is essential to the prosperity and advancement of the country. State and county roads have been established and constructed over the public lands in a State, under the laws of the State, without any doubt of its power and with the acquiescence of the Federal Government. In this respect the lands of the public have been treated and appropriated by the State as the lands of individuals. These easements have so manifestly conduced to the public interest that no objection from any quarter has hitherto been made. And it is believed that this power belongs to the States.
>
> It is difficult to perceive on what principle the mere ownership of land by the General Government within a State should prohibit the exercise of the sovereign power of the State in so important a matter as the easements named. In no point of view are these improvements prejudicial to the general interest; on the contrary they greatly promote it. They encourage population and increase the value of land. In no respect is the exercise of this power by the State inconsistent with a fair construction of the constitutional power of Congress over the public lands. It does not interfere with the disposition of the lands, and instead of lessening enhances their value.
>
> Where lands are reserved or held by the General Government for specified and national purposes it may be admitted that a State can not construct an easement which shall in any degree affect such purposes injuriously. No one can question the right of the Federal Government to select the sites for its forts, arsenals, and other public buildings. The right claimed for the State has no reference to lands specially appropriated, but to those held as general proprietor by the Government, whether surveyed or not. The right of eminent domain appertains to a State sovereignty, and it is exercised free from the restraints of the Federal Constitution. The property of individuals is subject to this right, and no reason is perceived why the aggregate property in a State, of the individuals of the Union, should not also be subject to it. The principle is the same and the beneficial result to the proprietors is the same in proportion to their interests. These easements have their source in State power and do not belong to Federal action. They are necessary for the public at large and essential to the interests of the people of the State. The power of a State to construct a road necessarily implies the right not only to appropriate the line of the road, but the materials necessary for its construction and use. Whether we look to principle or the structure of Federal and State Governments or the uniform practice of the new States there would seem to be no doubt that a State has the power to construct a public road through the public lands.

Judge Sawyer said in People *v.* Shearer (30 Cal.) that since the admission of that State the public lands were held by the United States simply as proprietor and not as a municipal sovereign.

See also Woodruff *v.* North Bloomfield, etc., Co. (18 Fed. Cases, p. 772):

> Upon the cession of California by Mexico the sovereignty and the proprietorship of all the lands within its borders in which no private interest had vested, passed to the United States. Upon the admission of California into the Union, upon an equal footing with the original States, the sovereignty for all internal municipal purposes and for all purposes except such purposes and with such powers as are expressly conferred upon the National Government by the Constitution of the United States, passed to the State of California. Thenceforth the only interest of the United States in the public lands was that of a proprietor, like that of any other proprietor, except that the State, under the express terms upon which it was admitted, could pass no laws to interfere with their primary disposal, and they were not subject to taxation. In all other respects the United States stood upon the same footing as private owners of land. They could authorize no invasion of private property, either to enable their grantees to mine the lands purchased by them of the Government or otherwise. (Biddle Boggs *v.* Merced Min. Co., 14 Cal., 375, 376; People *v.* Shearer, 30 Cal., 658; Pollard's Lessee *v.* Hagan, 3 How., 223.)

We quote again from the case of Illinois R. R. Co. *v.* Illinois (146 U. S., 434):

> "The State of Illinois was admitted into the Union in 1818 on an equal footing with the original States in all respects. Such was one of the conditions of the cession from Virginia of the territory northwest of the Ohio River, out of which the State was formed. But the equality prescribed would have existed if it had not been thus stipulated. There can be no distinction between the several States of the Union in the character of the jurisdiction, sovereignty, and dominion which they may possess and exercise over persons and subjects within their respective limits."

How does this language lie parallel with the claim of some of our fellow citizens that the United States Government in States having public lands can impose terms on perpetual beneficial uses, unusual charges and restrictions, control over monopolies, and police powers in such States which the Federal Government does not claim to possess or exercise in other States?

The case is so often cited in this debate and by Senators in opinions given out from the Judiciary Committee by members of it on the resolution of inquiry submitted to that committee touching Federal power on navigable streams, that I will content myself with the following citation from the great case of Kansas *v.* Colorado (185 U. S.):

> We do not mean that its legislation can override State laws in respect to the general subject of reclamation. While arid lands are to be found mainly if not only in the western and newer States, yet the powers of the National Government within the limits of those States are the same (no greater and no less) than those within the limits of the original 13, and it would be strange if, in the absence of a definite grant of power, the National Government could enter the territory of the States along the Atlantic and legislate in respect to improving by irrigation or otherwise the lands within their borders.
>
> * * * * * * *
>
> But it is useless to pursue the inquiry further in this direction. It is enough for the purposes of this case that each State has full jurisdiction over the lands within its borders, including the beds of streams and other waters. Martin *v.* Waddell (16 Pet., 367), Pollard *v.* Hagan (3 How., 212), Goodtitle *v.* Kibbe (9 How., 471), Barney *v.* Keokuk (94 U. S., 324), St. Louis *v.* Myers (113 U. S., 566), Packer *v.* Bird (137 U. S., 661), Hardin *v.* Jordan (140 U. S., 371), Kaukauna Water Power Co. *v.* Green Bay & Mississippi Canal Co. (142 U. S., 254), Shively *v.* Bowlby (152 U. S., 1), Water Power Co. *v.* Water Commissioners (168 U. S., 349), Kean *v.* Calumet Canal Co. (190 U. S., 452). In Barney *v.* Keokuk, supra.

It seems clear then, Mr. President, to my mind at least, that the department, whether acting under presumed congressional authority or otherwise, has no power to enter a sovereign State and in direct derogation of the State constitution and laws withhold from the necessities of the people of the State the use of water within the State, for any beneficial purpose whatever.

That ownership of the public lands, especially where riparian rights do not exist, gives the Government no title to the streams or power over the same.

That the United States in order to acquire right or title to such water must do as the private citizen has to do, which is to divert it and submit it to beneficial use. The Government, however, must submit it to a governmental use in order to hold it against one wanting it.

Mr. President, may I be pardoned for a digression here?

I said in the outset that I was as much in favor of a sensible conservation of State and national resources as anyone can well be. I abhor monopoly in all its phases, whether practiced by individuals, or States, or the United States, except where the Constitution makes monopolies, such as in the administration of the Post Office Department, the issue of money, and such like necessary cases, where, instead of injury to the people, it subserves the common good of all. With this avowal of principle I want also to say that I have never claimed or owned or applied for a foot of public land through all the years of my residence in Arizona, except in mining claims, and for that I have only "a harvest of barren regrets" for the pains and penalties endured. I have no personal interest in any water course; and no act of Congress in respect of the same can injure me personally. I own no stock or shares in any corporation of any kind whatever and am under no obligation—personal or otherwise—to any of them anywhere. I make this declaration for no purpose other than that I may say what I have to say, and that you may hear, knowing my only purpose is to serve as best I can the public interest unprejudiced and uninfluenced by any purely personal interest of any kind whatever.

Mr. President, whatever the power of Congress may be, and giving whatever interpretation of the decisions cited that the Senate pleases, I am ready to maintain, and do maintain, that the public-land States are unjustly if not outrageously treated by Congress and the executive departments, whether they have or have not the Constitutional warrant for the exercise of powers of which we make complaint. If law is deficient in our aid, I file our bill in equity, and ask in the forum of conscience whether you will further oppress the struggling people in the new States and permanently retard that development which nature, together with their courage and fortitude, so amply promised and stands so willing to fulfill?

Prating about monopoly and crying from housetops against its aggression, the agents of the Government, and Congress itself, has established and is maintaining among us the most ruinous monopoly of modern times. I allude to the public-land policy of the United States as now administered, and the withholding from all useful purposes of the State one-half its area and all the lands growing a stick of timber of any lumber value. Not only this, but the alleged forest reserves have been in many cases extended far out on the plains, where nothing grows but grass, with the purpose of renting the lands for grazing privileges and turning the money away from the State into the National Treasury to pay or help to pay a horde of imported forest rangers, many of them good men, no doubt, but all impressed—if not obsessed—with the idea that the security of their tenure in office depends on the activity shown in making charges—as many as possible—against the settlers and others, who of necessity have business in or near such reserve.

Mr. President, while it may not be germane to the question now before us, I trust the Senate will bear with me yet a little longer, in view of the very great importance of the matters—to the public-land States—which I desire to call to legislative attention. And that is the enormous, ruinous reservations that have been made of the public lands in the Western States. Under a mistaken idea that the States are dangerous, and under the equal delusion that the Federal Government is safe, Congress has by statute turned over to Executive experiment almost every resource that the public-land States relied on for growth, progress, and prosperity. These States had a right to rely on their internal natural resources for future growth, even as the older States relied on and enjoyed them. The men that went forth from the older States, knowing something of the history of their homes, and braved and bore the perils and hardships of the West in the hope that they might give their children a better chance than they had had in life, never dreamed that when their courage and endurance had, in a measure, overcome the awful difficulties daily confronting them and laid the foundations of great States that the Federal Government would reverse its policy of a hundred years and seize from them without remorse and hold without shame everything on which existence as a State could depend; taking from them the most fruitful source of revenue, by depriving them from taxation of valuable lands, and holding the same at a great loss not only to the State, but to the General Government as well, dedicating the unused forest to fires, and the deserts to everlasting desolation, the streams so full of power doomed to useless unheard songs of idleness; to turn hope to despair, industry to unwilling repose; to raise at the gates of a greater Eden the sword forbidding entrance, and call all this *conservation of our natural resources;* and you may bask and smile in the effulgent glory of the new false light, but God have mercy on the victims of this new departure. What do these doctrinaire and ethical propagandists, headed by visionary cranks riding their hobby-horses recklessly over every hurdle that our rights, our property, and our lives can rear, expect to accomplish for either our good, their happiness, or the common interest? I freely grant they have no vicious purpose. On the contrary, I accord to them honesty of purpose. Fired by a romantic zeal, born of ignorance of existing conditions, through a cross on Sanca Panza, they go forth fully panoplied to a mighty assault on windmills of their own creation. And they call this *conservation.* "God forgive them, for they know not what they do."

Let us see what they have done and are doing. Speaking for Arizona, they have taken up half our State in reservations of different kinds, and in that half four-fifths of the available lands of the State are included. In other words, they have left to the State of Arizona less than one-fifth—yes, in fact, less than one-tenth—of its valuable lands for any purpose of use or revenue. These reservations are conducted or managed—or mismanaged—at a tremendous loss to the National Treasury and with ruinous effect on the State. And yet the eastern public has learned to call it conservation. If this sort of conservation continues long enough, it will depopulate the State and bankrupt the Federal Treasury. If conservation means spending money on national resources without any return, the time must come when you will find plenty of resources, but no money in your exchequer, and nobody ready to cash such assets. What is conservation, anyway? What does it mean? The high priest of the new departure has defined it to be "use without waste of our natural resources for the benefit of all the people." That sounds good. The statement of broad, general ethical principles always does. The popular conception of conservation, with which I fully agree, is that it permits the wise use and prevents the willful waste of the natural resources still found on the public domain. Conservation has been, however, intrusted to a bureau of the Agricultural Department which, having had no proper reproof, has grown arrogant and wasteful. This has gone on until conservation now threatens with destruction the very resources we are trying to hold for wise use and against profligate waste. The West sees this. The East does not. The East knows theoretical conservation as taught by mere theorists. The West knows it from actual experience as it is being practiced in the West. The East has been taught to believe that every western man is a land thief. The West knows that the greatest aid to land thieves, whether conscious of it or not, is the General Land Office administered through Federal authority, as in the cases where land scrip has been given railroads and their grantees for worthless lands, for forest-reserve purposes, and the scrip placed on the finest timber

lands in all the West. No greater robbery was ever perpetrated.

The trouble is that, whether good or bad, the West is bearing the burden of all this conservation for the whole Nation; for, aside from a few thousand acres in Michigan and Florida, the West bears the burden of largely over 190,000,000 acres reserved from local necessary use. Coal lands and oil lands have been locked up as national forests and local settlers denied any access to them or use of them; and they *call* this *conservation*.

Mr. President, I have gone further than I intended on this question, but I can not refrain from presenting a few expressions from Pearson's Magazine of January, 1913, written by Ed. H. Thomas, who seems familiar with the question and fair in his statements:

Western resources have been locked up by blanketing the public domain with reserves; coal lands, oil lands, etc., have been reserved as national forests.

The withdrawals are made without the least knowledge of the land; Bellingham, a city of 30,000 people, was included in a Washington coal-land withdrawal.

Total timber sales on the reserves for 7 years have averaged less than 9 per cent of the annual new growth, while a $3,000,000 annual deficit piles up.

Northwestern cities have to get their power from British Columbia, because water-power sites have been withdrawn without provision for their future use.

In Washington State alone decay annually kills 1,000,000,000 feet of timber on reserved land; total sales are 7,000,000 feet; waste like that keeps lumber prices up.

The Forestry Bureau thinks it wise to perpetuate forests which produce 33⅓ cents per year per acre on land which, if cultivated, would produce from $50 to $500.

Land along the international line is alike; just north of the line last year mines produced $11,000,000; just south, $800,000; the south mineral land is forest reserve.

Alaska is buying domestic fuel from British Columbia for from $17 to $30 per ton, while its own land is full of coal which it is not allowed to use.

Mr. President, I will not detain the Senate longer. At some future and more convenient time I hope to take up the question of conservation as now practiced; to suggest the miserable mistakes being made and to call attention to what should be done in respect of the natural resources located in the several States, and suggest the proper means to secure to the States their rightful interest in these resources, without loss to the great cause of conservation and without injury to the National Government, but at the same time conferring immeasurable benefits on the respective interested States. I appreciate the magnitude of the undertaking, but am ready to assume the burden when proper opportunity appears.

One thing, however, is as certain to-day as it was in the beginning. No one or one dozen States can afford to support the National Government. No one State should have more than its due weight of national burdens placed on it than every other State equally bears. Every State has, and always has had, about all it can do to support properly a State government's manifold demands on the resources of the State. Its internal obligations many times over exceed all just demands of the more general welfare of the whole country. Virginia and Massachusetts, in more wasteful days, and especially Michigan and Wisconsin, having permitted destruction of their resources, have no just claim to make on Colorado and Oregon. Times have changed. No State in the Union nor all of them combined are wider awake or more watchful of waste than is the State of Arizona, and Colorado, New Mexico, and Washington. The Government may have, and in fact has, permitted unpardonable waste of Arizona's natural wealth, but Arizona is not and has not been guilty. Under the beneficent power of the people, exercised through the referendum of all questionable legislative acts to the electorate, there is no need of your fear that we can not protect ourselves against aggressions of individual or corporate greed. Better far to trust the people of Arizona to protect themselves against cormorants that would consume or waste their substance than to leave their guardianship in the hands of an ill-advised and too often careless Congress.

Mr. JONES. Mr. President, the only provision in this bill over which there is any substantial controversy reads as follows:

And provided further, That the Secretary of War, as a part of the conditions and stipulations referred to in said act, may, in his discretion, impose a reasonable annual charge or return, to be paid by the said corporation or its assigns to the United States, the proceeds thereof to be used for the development of navigation on the Connecticut River and the waters connected therewith.

This provision is urged in the name of conservation and for the alleged purpose of creating a fund to be used in the improvement of the Connecticut River generally and the waters connected with it.

In the last analysis the real and only issue on this bill is whether by legislative authority some people shall have their property taken away for the benefit of some other people without compensation. I do not refer to the Connecticut River Co.; I am not concerned about its welfare; it can take care of itself. The consumers of its power are the people in whom I am interested, and why they should be required to contribute of their means to create a fund to improve navigation for the benefit of localities above or below them I am unable to comprehend.

While it would be well to have the legal authority of the Federal Government to impose charges for the use of power created, as it will be created under the terms of this bill, fully and clearly determined, and while our discussion has largely revolved around this proposition, we do not need to decide it in order to reach a correct conclusion as to what we should do. Conceding, merely for the sake of the argument, and for that purpose only, that the Federal Government has the legal right to impose this charge, should it do it?

The people think that conservation is at stake. This is not true. This will be a better conservation bill without this provision than with it. Those favoring this charge are the real obstructionists, the real anticonservationists. This proposition, however, would have no strength and no support at all except that the people have been led to believe that it is in the interest of conservation. Not all that is labeled "conservation" is conservation. We are in favor of conservation. We want our natural resources developed and used. We will agree to the most liberal construction of the Constitution in order to insure the proper use of the resources of the country. We are in favor of that conservation that will bring the greatest good to the people out of all our natural resources with the least expense to them and without monopoly. We want navigation promoted, waste power utilized, monopoly prevented, and fair, just, and reasonable rates for the consumers of power and other natural resources.

What is this bill? It is a bill to give the assent of Congress to the construction of a dam in a navigable river at a point where it is not now navigable to a corporation that desires to build that dam for the generation of water power. The sole purpose of the company is to develop power. In order to secure permanency for its investment and surety against its disturbance in the interest of navigation it asks the consent of Congress to put in this dam. Navigation interests should be protected, and we are in favor of protecting those interests fully. In the bill there is every provision necessary to furnish every facility required for present and prospective navigation where the dam is to be located at the expense of the company and without any cost to the general public. All such provisions are agreed to. There is no opposition to them. Unnatural monopoly is guarded against by the provision relating to assignments to which there is no opposition, and in order to guard further against possible monopoly I shall offer an amendment that will clearly and fully prevent it so far as this can be done by or through legislative enactment. It is agreed by all that fair, just, and reasonable charges by the company to the consumers of its power are assured by competition and effective public-utilities commissions in Connecticut and Massachusetts. In the alleged majority report submitted by the Senator from Ohio it is said:

The public interests seem to be fully safeguarded in this instance against exorbitant charges, because the generation and sale of electricity in the territory covered by this development are under the jurisdiction, both in Connecticut and Massachusetts, of well-organized utility commissions under State authority.

If this is not sufficient the amendment offered by the Senator from Idaho, giving the Interstate Commerce Commission authority over interstate rates, will supply any deficiency. What more is to be desired? Navigation is amply provided for, monopoly is guarded against, and just and reasonable prices are assured to the consumer. In what way is conservation neglected or prevented?

Notwithstanding all this it is insisted in the name and under the guise of conservation that the corporation must pay such annual charges to the National Government as the Secretary of War may from time to time impose. This is the issue. This is the real obstruction to real conservation. This is what continues the waste of this power against which our friends on the other side so loudly complain. What does it mean? It means an additional tax or burden on the people who consume the power. It will be a legitimate expense charge, just as much so as any other improvement cost. The Senator from Connecticut [Mr. BRANDEGEE] frankly admits that the consumer must pay whatever tax is thus imposed. The Senator from Ohio, recognizing the force of such admission and apparently more desirous of securing this legislative declaration than of protecting the people from exorbitant charges, tries to argue that the consumers will not have to pay this tax. In this he does an injustice to his usually good judgment and logical reasoning. He shows to what straits he is driven to maintain his position. He could just as fairly argue that the cost of putting in the dam

would not add to the cost to the consumer. The one would be just as logical as the other. No; if this charge is imposed the public-utility commission or the Interstate Commerce Commission, in determining the rates that are reasonable to be charged the consumers of this power, must take into consideration and allow for this tax, and the people will have to pay it.

What benefit comes from it; what good does it do? It does not improve the navigation of the river at this point, because that is assured by other provisions of the bill. It is of no benefit to the people who buy the power, because they must pay the tax.

Some say it will prevent monopoly, and this was the original ground upon which it was urged. I may be dull, stupid, and obtuse, but I must confess that I can not see why or how the levying of a tax by the National Government on the company producing the power will prevent monopoly or benefit the people. On the contrary, instead of preventing monopoly it will promote it. It will impose a burden on the production of this power that is not imposed on other power production, and thereby either prevent the development of such power propositions or reduce the competitive capacity of this company and other companies upon which such charges are not imposed. Instead of tending to secure lower prices to the consumers, it will have a tendency to raise the price at which other companies sell their power.

The Senator from Ohio seems to think that if this company charges more for its power than other companies that a part of this extra charge should come to the Government. What we insist is that this company shall not charge for its power any more than just, fair, and reasonable rates, and that is what the people desire and all they desire. If by the imposition of this charge it is recognized that this company may charge more than what is fair, just, and reasonable, the inevitable result will be that other companies will raise their charges nearly if not quite to the level of the charges of this company, and thus the imposition of a charge by the National Government upon this company will permit extortionate charges by all the power companies of the States involved.

A peculiar, strange, and mysterious suggestion as to the effect of this tax is put forth in the alleged majority report submitted by the Senator from Ohio. He says:

> It is believed that the authority of the Secretary of War to require a return to the Government in case the corporation earns more than a reasonable return upon its bona fide investment will be in effect a regulation of the charges of the company as well as a source of revenue to the Government, because it will be one of the most important factors to be taken into consideration by the commissions mentioned in fixing the rates of service which the company may charge.

Doubtless the impression conveyed by this statement is that such "a regulation of the charges of the company" would tend to lower prices, because the Senator from Ohio would not dare to suggest that a regulation tending to raise prices would be desirable. How the levying of a tax on the production of water power can lower the price to purchasers is beyond my comprehension, and when the Senator from Ohio wrote that sentence he must have been contemplating the real practical effects or results of modern paper conservation. The practice and administration of conservation policies thus far has resulted uniformly in higher prices to the people. Our forests have been conserved and lumber has increased in price. Coal deposits have been conserved and the price of coal to consumers has steadily advanced, and, if the policy of this bill is carried out, the conservation of water power, as it contemplates, will result in increased prices to consumers.

But, it is said, "this power has been going to waste since the river began to run. We want to stop it." Well, stop it. It rests with those who favor this provision whether it shall continue or not. Cut it out and the bill will pass the Senate without a moment's delay. The dam will be built, navigation will be provided for, power will be developed, and waste will stop. All that is necessary is to omit this unwise and indefensible provision.

"But," it is said again, "the navigation of the river above and below should be improved. Navigation is a public right and a public benefit, and it is for the public interest to collect a charge to go into a fund to improve the navigation of the Connecticut River not only at the point where the dam is to be constructed but at other places above and below and in adjacent waters."

That sounds good. Many have been "buncoed" by similar suggestions. Propositions without merit are often bolstered up with the plea of the "public benefit." The people sometimes have been deceived by it. What does it mean in this case? The people who will consume this power will pay for the improvement of navigation in the river at the point where the dam is located and a reasonable profit on the investment. That is certain. They pay for an improvement that is a great benefit to them, it is true, but it is really a greater benefit to others who do not pay a cent of the cost. Shipping interests and localities far away upon whom none of the burdens fall get the greatest benefits from the navigation provided. We go far enough when we impose upon the people of this locality the burden of improving the navigation at this point, the principal benefit of which goes to the people below, people at a distance, and to the people of Holyoke and other points above. This would seem to be enough to the most exacting, but it is not. The Senator from Ohio and others insist that these people must pay an additional sum to provide a fund for the improvement of the river at other points and for the benefit of those who pay nothing. This can not be justified on any legal or moral ground. The cold, bare, naked proposition is to take from some people's pockets money and put it in some other people's pockets without any compensation on the plea that "it benefits the public." The Secretary of War, in his report on this bill, referring to the provision imposing this charge to be devoted to the interest of navigation, says: "With such a provision I am of the opinion that the bill is in the interest of the public." If the public benefits, is it not fair that the public should pay? Is this another proposition which, in the name of progress, reacts to the feudal days when might and power made right? It is contrary to the fundamental principle of every American State. No constitution of any State in the Union says that private property may be taken for the public use without compensation, and I doubt if there is a constitution that does not expressly say that private property shall not be taken for the public use without compensation. There is no justice, there is no merit in the plea that the people of one locality shall be made to contribute of their means for the benefit of the general public, while other localities not only do not contribute but enjoy the fruits of such a contribution. When we are held up at the point of a gun and our money taken from us we call it highway robbery. When we hold up a community by legislative enactment and take their money for the profit or advantage of others, we call it "a public benefit" or "conservation." Whatever you call it, however, the act is just as indefensible in the one case as in the other.

"But," says the Senator from Ohio and others, "this company is willing to pay these charges in order to get this legislation." Of course, it is. It knows that when it pays these charges to the Government it will collect them from its customers. It loses nothing by accepting this measure. This tax is no burden on it.

"But," they say, "the imposition of this charge is in the interest of conservation." How, when, where, why, and to whom? They do not say and can not. It conserves nothing. It promotes nothing. It lightens no burden. It prevents no waste and, if persisted in as a policy, it will encourage monopoly, continue waste, and enhance prices. It will promote monopoly by diminishing the number of power plants. It will continue waste by retarding development. It will enhance prices by increasing the cost of production and restricting competition.

This charge is to be fixed after ascertaining the profits of the company and making due allowance for all expenditures, and so forth. How are these profits to be ascertained? There is no provision in the bill in this respect. Under what authority and through what officers will the Secretary of War ascertain what the profits, expenditures, and so forth, of this company are? After the passage of this bill, is it expected that Congress will be asked to create a bureau and provide inspectors to investigate and ascertain these matters? If assent is given to the construction of dams in other parts of the country with this provision attached, the creation of such a bureau and the appointment of such inspectors will be the inevitable result. That is the real purpose behind this bill. That is the real motive behind those who are sedulously cultivating a public sentiment in favor of this class of legislation under the guise of "the public benefit." The expense of such a bureau would be great, and once established would simply add one more tentacle to the pernicious bureaucratic system that is taking possession or practically controlling governmental activities. Some seem to think that this bill gives the Government supervision and control over the affairs of the company, the issuance of stock, and so forth. Not so. There is nothing in the bill giving this power, even if it could be granted to any Federal official.

We are in favor of every provision within the authority of Congress in bills of this kind to protect and promote the interest of the people, and especially of the localities directly affected. We want our water powers conserved, developed, and used. We do not want them to be monopolized any more than is absolutely necessary by reason of the conditions under which they must be developed, and we want the power when developed to be sold to consumers at the very lowest possible rates. We want navigation interests fully protected, promoted, and conserved, and no strict construction of our constitutional power will be indulged in to prevent this. We will not stand in the

way of legislation which will fully protect the interests of navigation at the point to be improved. We will agree to all legislative provisions necessary to prevent monopoly and extortion. President Roosevelt, in his message vetoing the bill permitting the construction of a dam in Rainy River, laid down certain provisions which he thought legislation of this kind should contain. His message showed that his greatest fear was of a monopoly. That there is a monopoly in our water power now more or less far-reaching and more or less increasing in power and extent beyond the limits of a natural monopoly we have no reason to doubt, and I am willing, as I have said, to support all provisions which, in my judgment, will tend to curb and destroy monopoly.

I desire to say that President Roosevelt is entitled to a great deal of credit for his efforts in favor of imposing proper conditions upon grants of this kind. There are certain conditions that should be imposed. It was well, in order to bring this matter to the attention of the people, to bring it home to them, that he stopped the passage of bills not containing reasonable restrictions, so that the attention of the people should be riveted upon this question and a correct and wise solution worked out.

That is what we want to do on this bill, and that is what we can do and what we are willing to do. In his message on the Rainy River bill he concluded in this wise:

In place of the present haphazard policy of permanently alienating valuable public property we should substitute a definite policy along the following lines:

First. There should be a limited or carefully guarded grant in the nature of an option or opportunity afforded within reasonable time for development of plans and for execution of the project.

That is all provided for in the pending bill. That condition is complied with.

Second. Such a grant of concession should be accompanied in the act making the grant by a provision expressly making it the duty of the designated official to annul the grant if the work is not begun or plans are not carried out in accordance with the authority granted.

That provision is also complied with in the pending bill.

Third. It should also be the duty of some designated official to see to it that in approving the plans the maximum development of the navigation and power is assured or at least that in making the plans these may not be so developed as ultimately to interfere with the better utilization of the water or complete development of the power.

That condition is also complied with in the present bill and by the general law that is referred to and made a part of it.

Fifth. Provision should be made for the termination of the grant or privilege at a definite time, leaving to future generations the power or authority to renew or extend the concession in accordance with the conditions which may prevail at that time.

That condition is also complied with in this bill, although not exactly in the terms recommended by President Roosevelt. I myself would prefer an unconditional termination of the assent at a definite time, but the alleged majority seem to think that their provision in this regard is preferable, and I am willing to accept it. The committee reporting the bill deemed, after careful consideration, that it was wisest to provide for the renewal of the franchise, if it may be called such, without absolute termination as recommended by him.

Again he says:

Further reflection suggests a sixth condition, viz:

The license should be forfeited upon proof that the licensee has joined in any conspiracy or unlawful combination in restraint of trade, as is provided for grants of coal lands in Alaska by the act of May 28, 1908.

That provision is attempted to be complied with in this bill by making the right of assignment conditioned upon the approval of the Secretary of War. In order to make it more certain that monopoly will be prevented, I have offered an amendment which I propose to ask the Senate to vote upon, which is to be inserted after the word "otherwise," in line 18, on page 2, and reads as follows:

Provided further, That if at any time said Connecticut River Co., or its assigns, shall be owned or controlled by any device, permanently, temporarily, directly, indirectly, tacitly, or in any manner whatsoever, so that it shall form a part of, or in any way effect any combination, or be in anywise controlled by any combination in the form of an unlawful trust, or enter into any contract or conspiracy in restraint of trade in the production, development, generation, transmission, or sale of any power or electrical energy, then the permit herein granted may be forfeited and canceled by the Secretary of War through appropriate proceedings instituted for that purpose in the courts of the United States.

It seems to me that, with the adoption of that amendment, the recommendations of President Roosevelt would be fully complied with in this respect.

Mr. BURTON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Ohio?

Mr. JONES. I do.

Mr. BURTON. Has Congress ever inserted a similar provision to that in any bill granting a privilege?

Mr. JONES. I do not see why that makes any difference. If we have not done so, it is time to do it now.

Mr. BURTON. We have had frequently before us propositions to incorporate in tariff bills provisions to the effect that if in any industry there should be a combination or trust the duty on the article involved should be withdrawn. And has not Congress invariably refused to insert such a provision?

Mr. JONES. There is no argument against the adoption of the proposition in this case.

Mr. BURTON. Is it not a fair and just way to leave the execution of the antitrust law to the courts under general regulation, without seeking in this way to bring about their execution, making one rule in one case and another rule for all the rest of the country in every other form of enterprise?

Mr. JONES. That same question might be asked with reference to some of the other provisions of this bill. There are new provisions in the proposed bill. You ask for a policy not applied to other interests. Why not leave them out? Why not follow the same course as heretofore in regard to these matters?

We are willing and anxious to prevent the evils complained of and feared, but we propose to do it in an effective way, and not by an ineffective provision that can result in nothing but a burden on the people.

Mr. THOMAS. Mr. President.

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Colorado?

Mr. JONES. Certainly.

Mr. THOMAS. I notice that the proposed amendment provides that, under the conditions which are recited, the franchise may be forfeited. Why not insert the word "shall" as a substitute for the word "may"?

Mr. JONES. I would be perfectly satisfied to do that.

Mr. THOMAS. So as to make it mandatory upon the Secretary of War to proceed under those circumstances.

Mr. JONES. That will be agreeable to me, and I shall modify my amendment to that effect. That will more certainly effect the purpose I desire. Then I desire to suggest to the Senator from Ohio [Mr. BURTON] that if that provision were adopted in this bill, it should be adopted, of course, in every bill of a similar character, so as to apply throughout the country everywhere.

I am going to suggest in my remarks a little further on, but I mention it right here, that I think we ought to frame a general legislative act embodying all the provisions of this bill except the proposition to make an annual charge, and put in it a proposition like this to prevent monopolies. Then we would have a good law under which people could come and ask for these permits and develop power all over the country. I will also suggest to the Senator from Ohio that that very provision, almost word for word, was inserted in the coal-land laws of Alaska, so that it is not entirely without precedent.

Mr. President, I have not read the fourth recommendation of President Roosevelt. We have complied in this bill with every proposition that he recommends in order to prevent monopoly, in order to bring about conservation, in order to have good legislation for the control of these water powers, except the fourth. The fourth proposition reads like this:

Fourth. There should be a license fee or charge which, though small or normal at the outset, can in the future be adjusted so as to secure control in the interest of the public.

I have already shown the principal reasons why I do not think that proposition should be put in the bill, and why I do not think that it would be really in the interest of the public, or, if it should be in the interest of the public, that it is right to impose a burden of that kind upon a particular locality, which must be for the benefit of localities and people not paying the charges. Anything that is in the interest of the general public should be paid for and discharged by the general public. I am satisfied that if President Roosevelt would consider this proposition from every angle he would not insist upon a proposition of this character. While he may be positive in his opinions, he never hesitates to change his views when he finds he is wrong.

Mr. President, we who oppose the provision for an annual charge are not in favor of giving the consent of Congress to the building of this dam unconditionally, as some allege. We are in favor of requiring the work to be commenced within a certain time. We are in favor of having it completed by a definite time. We are in favor of requiring the dam and locks to be built in accordance with plans to be approved by the War Department and that such dam and locks shall be sufficient not only for the present but for all prospective navigation needs. We are in favor of requiring the lock or locks to be turned over to the Federal Government free of cost. We are in favor of requiring the gates of the locks and such electrical power as may be necessary to light and operate the same to be furnished free. We are in favor of no assignment of the rights of the company, except under the approval of the Secre-

tary of War or under the decree of a court of competent jurisdiction. We are in favor of a strong legislative provision against this company or its property becoming a part of any conspiracy or combination, or its being controlled in any way so as to operate or be used in restraint of trade. We are in favor of such permits being granted only when and where there are effective local agencies to regulate the prices to be charged, so that consumers of power may have to pay only just and reasonable rates, and that the Interstate Commerce Commission shall have authority over the rates charged for interstate power. These conditions are all clearly within the power and right of the Federal Government to impose. They are all in the interests of the public and place no unnecessary burdens on consumers. Adopt such a policy, pass such a law as a model for such future legislation, and you secure real conservation that will benefit the public and not enrich the "special interests." With such a measure waste will cease, navigation will be promoted, monopoly will be prevented, the public will secure power at just and reasonable rates, and all the objects and purposes of real conservation will be accomplished, and that too without any unnecessary attacks upon consumption.

Mr. President, I am not going to discuss the legal questions concerned with this matter at any length. This has already been fully done. The real question of the right of the Federal Government to exact a charge for the power developed by the construction of a dam after navigation has been fully protected by a company at its own expense and on its own lands has never been presented to the courts. Those cases relied upon as substantiating this right are not at all in point. In neither of them was the commerce clause of the Constitution involved or mentioned, but each was decided upon the particular facts of the case.

In Kaukauna Water Power Co. *v.* Green Bay & Mississippi Canal Co. (142 U. S., 254) a grant of land had been made to the State of Wisconsin by the Federal Government for the improvement of navigation in the Fox River. The State had accepted the grant and passed an act for the improvement of the river. It acquired, by appropriate proceedings, the necessary lands, waters, or materials for the use of the public in the construction of the necessary improvements and paid for the same. In the act passed by the Legislature of the State of Wisconsin it was provided that—

> Whenever a water power shall be created by reason of any dam erected or other improvement made on any of said rivers, such water power shall belong to the State, subject to the future action of the legislature.

The sole question in this case, as stated by Mr. Justice Brown, was "whether the act of the Legislature of Wisconsin of August 8, 1848, reserving to the State the water power created by the erection of the dam over the Fox River, as construed by the supreme court of the State, and the proceedings thereunder, operate to deprive the plaintiffs in error of their property without due process of law." The powers of the Federal Government were not involved in any way.

Green Bay & Mississippi Canal Co. *v.* Patten Paper Co. (172 U. S., 58), the other case relied upon, grew out of the same facts and did not involve the consideration of the construction of the commerce clause of the Constitution. The case rested and was decided upon the grants and contracts connected with it. The syllabus states the basis for the decision very clearly, as follows:

> Under the legislation and contracts set forth in the opinion of the court in this case the water power incidentally created by the erection and maintenance of the dam and canal for the purpose of navigation in Fox River is subject to control and appropriation by the United States, and the plaintiff in error is possessed of whatever rights to the use of this incidental water power that could be granted by the United States.

In this case the United States made certain grants to the State of Wisconsin for the improvement of navigation in Fox River. The State accepted the grant and undertook the improvement, and in its legislative act provided that—

> Whenever a water power shall be created by reason of any dam erected or other improvement made on any of said rivers, such water power shall belong to the State, subject to the future action of the legislature.

The right of the State to make this reservation was not questioned. In 1853 the State, by appropriate legislation, granted and transferred to a certain company the uncompleted works of improvement and "all and singular the rights of way, dams, locks, canals, water power, and other appurtenances." Evidently this water power, not by force of the commerce clause of the Constitution but by direct grant, became the property of the United States and, of course, was subject to disposition by it, as by any other owner. The court, by Justice Shiras, said:

> Whether the water power incidentally created by the erection and maintenance of the dam and canal for the purpose of navigation in Fox River is subject to control and appropriation by the United States, owning and operating those public works, or by the State of Wisconsin, within whose limits Fox River lies, is the decisive question in this case.

Does the court proceed to consider this question and decide it on the powers given to the United States by the commerce clause of the Constitution? Not at all. But the court says:

> Upon the undisputed facts contained in the record we think it clear that the canal company is possessed of whatever rights to the use of this incidental water power that could be validly granted by the United States.

What the United States could grant depended not upon the commerce clause of the Constitution but "upon the undisputed facts contained in the record." What were the facts in the record? By what right would the United States control these water-power privileges? This is clearly stated by the court as follows:

> And, subsequently, by act of March 23, 1871, the State authorized the Green Bay & Mississippi Canal Co., which had become the owner of the entire improvement works, lands, and water powers by purchase at the foreclosure sale, to sell and dispose of the same to the United States.

And, in the opinion of the court, this, in effect, was done. The court said:

> The legal effect and import of the sale and conveyance by the canal company were to vest absolute ownership in the improvement and appurtenances in the United States, which proprietary rights thereby became added to the jurisdiction and control that the United States possessed over the Fox River as a navigable water.

Could anything be clearer? The court recognized the right to these waters and water powers as a proprietary right. As a proprietor and owner by actual grant and purchase, of course the United States could deal with them as it saw best, and it was by virtue of this proprietary right and not because of its powers under the commerce clause that the United States did deal with them.

That the only right which the Federal Government has in the Connecticut River is the right to control, protect, and promote navigation is settled by direct decision of the Supreme Court, and that all other rights or property in said stream are subject only to the State laws and State control is equally well settled by a long line of decisions.

In Pollard's Lessee *v* Hagan et al., (3 How., 212) the court says:

> Although this is the first time we have been called upon to draw the line that separates the sovereignty and jurisdiction of the Government of the Union and the State governments over the subject in controversy, many of the principles which enter into and form the elements of the question have been settled by previous well-considered decisions of this court, to which we shall have occasion to refer in the course of this investigation.

After discussing conditions and the powers of the Federal Government while Alabama was a Territory, the court says:

> And this brings us to the examination of the question whether Alabama is entitled to the shores of the navigable waters and the soils under them within her limits.

After discussing the source of title of the United States to the lands embraced in the proposed State of Alabama and the right by the United States acquired thereunder, the court says:

> Alabama is therefore entitled to the sovereignty and jurisdiction over all the territory within her limits, subject to the common law, to the same extent that Georgia possessed it before she ceded it to the United States. To maintain any other doctrine is to deny that Alabama has been admitted into the Union on an equal footing with the original States, the Constitution, laws, and compact to the contrary notwithstanding. But her rights of sovereignty and jurisdiction are not governed by the common law of England as it prevailed in the colonies before the Revolution, but as modified by our own institutions. In the case of Martin and others *v.* Waddell (16 Pet., 410), the present Chief Justice, in delivering the opinion of the court, said: "When the Revolution took place, the people of each State became themselves sovereign, and in that character hold the absolute right to all their navigable water and the soils under them for their own common use, subject only to the rights since surrendered by the Constitution." Then, to Alabama belong the navigable waters and soils under them in controversy in this case, subject to the rights surrendered by the Constitution to the United States; and no compact that might be made between her and the United States could diminish or enlarge these rights.

The court closes its opinion as follows:

> By the preceding course of reasoning we have arrived at these general conclusions: First, the shores of navigable waters and the soils under them were not granted by the Constitution to the United States, but were reserved to the States, respectively.

Shively *v.* Bowlby (152 U. S., 1) discusses at great length the rights of the State and of the Federal Government in navigable waters, and distinguishes various decisions rendered by the court. The court, at page 48, says:

> We can not doubt, therefore, that Congress has the power to make grants of lands below high-water mark of navigable waters in any territory of the United States whenever it becomes necessary to do so in order to perform international obligations or to effect the improvement of such lands for the promotion and convenience of commerce with foreign nations and among the several States or to carry out other public purposes appropriate to the objects for which the United States hold the Territory.

After thus asserting the power of the Federal Government over the property in a territory the court says:

IX. But Congress has never undertaken by general laws to dispose of such lands. And the reasons are not far to seek.

The Congress of the United States in disposing of the public lands has constantly acted upon the theory that those lands, whether in the interior or on the coast above high-water mark, may be taken up by actual occupants in order to encourage the settlement of the country; but that the navigable waters and the soils under them, whether within or above the ebb and flow of the tide, shall be and remain public highways; and, being chiefly valuable for the public purposes of commerce, navigation and fishery, and for the improvements necessary to secure and promote those purposes, shall not be granted away during the period of territorial government, but unless in case of some international duty or public exigency shall be held by the United States in trust for the future States, and shall vest in the several States, when organized and admitted into the Union, with all the powers and prerogatives appertaining to the older States in regard to such waters and soils within their respective jurisdictions; in short, shall not be disposed of piecemeal to individuals as private property, but shall be held as a whole for the purpose of being ultimately administered and dealt with for the public benefit by the State after it shall have become a completely organized community.

On page 58 the court continues as follows:

The United States, while they hold the country as a Territory, having all the powers both of national and of municipal government, may grant, for appropriate purposes, titles or rights in the soil below high-water mark of tidewaters. But they have never done so by general laws, and, unless in some case of international duty or public exigency, have acted upon the policy, as most in accordance with the interest of the people and with the object for which the Territories were acquired, of leaving the administration and disposition of the sovereign rights in navigable waters and in the soil under them to the control of the States, respectively, when organized and admitted into the Union.

Mr. President, the policy that we may adopt and provide for in this bill ought to be such that it can be applied to all sections of the country. We are required to determine what shall be the policy of Congress with reference to grants of this kind. We ought to do it. We ought to adopt such a policy as will permit the development of water power all over the country for the people's benefit. There are water powers all over the United States that are waiting for development, that ought to be developed, that ought to be made to benefit and serve the interests of the people of the country. No other section of the country is more interested in a wise, fair, and equitable decision of this question than the section of the country that I in part represent.

It is estimated that upon the Columbia River and its tributaries there can be developed twenty-five or thirty million horsepower five times as much horsepower as is now developed and in use in the entire United States. So the policy that we are to adopt with reference to this development is an important one to us. This is one reason why I am opposed to the imposition of this charge, because I think that it is unwise, that it is unfair, that it is unjust, that it is inequitable, and that it can not be justified upon any basis whatever when the interests of the consumers are considered; and they, really, are the only ones in whom I am especially interested.

I believe the people of my State are better able than anybody else to determine what shall be just, fair, and reasonable rates to be charged for power developed in my State. They know the situation. They know the local conditions. They know the surroundings. We believe we can say what is a fair, just, and reasonable charge better than the people of any other section of the Union. To take any other position is to assume that our people are not so capable of looking after their own affairs as some one else who knows nothing of local conditions. I deny this most emphatically. We have provided ample means for the protection of our people from exorbitant charges. We have provided for a public-utilities commission. I desire to put in the RECORD, and I desire to read to the Senate, the provisions of our law enumerating the powers that we have given to the public-utilities commission over matters of this kind, and the law speaks for itself and needs no statement from me as to its efficiency.

Article 6 of chapter 117 of the session laws of 1911, providing for a public service commission, defines the powers of the commission in relation to public service companies:

SEC. 54. Charges and service of gas companies, electrical and water companies to be fixed by commission.

Whenever the commission shall find, after a hearing had upon its own motion, or upon complaint as herein provided, that the rates or charges demanded, exacted, charged, or collected by any gas company, electrical company, or water company for gas, electricity, or water, or in connection therewith, or that the rules, regulations, practices, or contracts affecting such rates or charges are unjust, unreasonable, unjustly discriminatory or unduly preferential, or in any wise in violation of the provisions of the law, or that such rates or charges are insufficient to yield a reasonable compensation for the service rendered, the commission shall determine the just, reasonable, or sufficient rates, charges, regulations, practices, or contracts to be thereafter observed and enforced, and shall fix the same by order, as hereinafter provided.

Whenever the commission shall find, after such hearing, that the illuminating or heating power, purity or pressure of gas, the efficiency of electric lamp supply, the voltage of the current supplied for light, heat, or power, or the purity, volume, and pressure of water supplied by any gas company, electrical company, or water company, as the case may be, is insufficient, impure, inadequate, or inefficient, it shall order such improvement in the manufacture, distribution, or supply of gas, in the manufacture, transmission, or supply of electricity, or in the storage, distribution, or supply of water, or in the methods employed by such gas company, electrical company, or water company as will in its judgment be efficient, adequate, just, and reasonable.

Whenever the commission shall find, after hearing, that any rules, regulations, measurements, or the standard thereof, practices, acts, or services of any such gas company, electrical company, or water company are unjust, unreasonable, improper, insufficient, inefficient, or inadequate, or that any service which may be reasonably demanded is not furnished, the commission shall fix the reasonable rules, regulations, measurements, or the standard thereof, practices, acts, or services to be thereafter furnished, imposed, observed, and followed, and shall fix the same by order or rule, as hereinafter provided.

Mr. President, we do not desire to have a policy adopted in the passage of this bill which will be applied to our section of the country and will interfere with the rights and powers and jurisdiction of our public-service commission. We believe this commission can fully protect the consumers, the people who buy water power, from extortionate, unfair, unjust, and unreasonable charges. We are ready and willing to join hands with our friends from Connecticut and put into this bill the necessary language to make reasonable and full provision for navigation, if you please, at the locality to be benefited. We are ready and willing to join with them in putting into the bill every provision that is necessary to prevent monopoly. Then we think we can trust the local body, the local organization, to see that the people—and they are the ones in whom we are really interested; their welfare is really the welfare that is to be conserved by the passage of this legislation—shall get their water power and their electrical power at fair, just, and reasonable rates. I am willing to go this far with reference to this bill. I am willing to make it within the power of the Secretary of War to refuse a permit until it is clearly shown that the local authorities have ample legislative power and have provided the necessary State agencies to protect the people of the State, the people of the locality, against extortion. What more can anyone ask? What good purpose can be served by any other provision? Mr. President, I am heartily in favor of real conservation, but I am unalterably opposed to unnecessary and unjust taxation.

Mr. O'GORMAN. Mr. President, much of the discussion in relation to the pending bill has been devoted to a consideration of public policy rather than to a careful appreciation of the limitations and restraints imposed upon the National Government by the Constitution. I am opposed to the bill, because it recognizes a principle that can not be supported by any provision of the Constitution.

Prior to the Revolution the Crown of England owned the waters of the Connecticut River and the soil thereof. At the time of the Revolution, when Connecticut became an independent State, it succeeded to the rights theretofore possessed by the King of England. The State of Connecticut became the owner of the Connecticut River and the soil and bed of the stream. It had absolute power and dominion over the river and the soil of the stream. This was so held by Chief Justice Taney in Martin *v.* Waddell (16 Peters, 367). When the Constitution of 1787 was adopted, Connecticut, in common with the other States, conferred upon the Federal Government certain enumerated powers and authorities. The only power conferred upon the Federal Government at the time of the adoption of the Constitution, so far as it affected the ownership and dominion of the rivers in the various independent States, as they then were, was the so-called "commerce clause" of the Constitution, which provided that the Congress should have power to regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

It is now claimed by the advocates of this obnoxious measure that when the thirteen independent States, sovereign in their ownership of the various rivers, conferred upon the Federal Union the right to regulate commerce with foreign nations and among the several States the States practically surrendered the sovereign powers that they were then exercising over their own rivers; because if the views of those who defend this legislation are followed to a logical conclusion, the States exercise no rights in the rivers of the country which the Federal Government is bound to respect.

Under this language of the Constitution, empowering the Federal Government to regulate interstate commerce, the courts from time to time declared that the Federal Government had the right to do whatever it considered necessary for the purpose of promoting the navigability of the streams and the rivers, but that is the only authority that may be invoked by the Federal Government respecting this subject. The Federal Government has had conferred upon it the naked power to go into any river and do what it deems essential for the purpose of promoting the navigability of the river.

Mark you, that is simply a power to do a specific thing. It is a mere easement and has been so declared by the Supreme Court. The advocates of this measure insist that the naked power to do a specific thing carries with it practically an appropriation of property rights—a conclusion that can not be indulged in without doing violence to simple, plain, and unambiguous language.

The claim, in brief, is made that if, as an incident of the improvement the Federal Government may make in promoting the navigation of a river, a surplus water power is created, that water power so created belongs to the Federal Government and may be leased or sold or made a source of revenue to the Government. That is an absolutely erroneous theory, which first found support in the careless reading of two decisions of the Supreme Court of the United States—Kaukauna *v.* Green Bay (142 U. S., 254) and Green Bay *v.* Patten (172 U. S., 58). Certain Senators persist in their error, notwithstanding the fact that their attention has been called to the circumstance that when the Supreme Court held in the Wisconsin cases that the Federal Government had a right to the excess water power created as an incident of the improvement, the ruling was based upon an express grant from the State of Wisconsin to the Federal Government, and not because of any rights believed to be secured under the commerce clause.

In the case of Illinois *v.* People (146 U. S. Sup. Ct. Repts.) the court said:

> It is the settled rule of this country that the ownership of and dominion and sovereignty over lands covered by tidewaters within the limits of the several States belong to the respective States within which they are found, and with the consequent right to use or dispose of any portion thereof, when that can be done without substantial impairment of the interest of the public in the waters, and subject always to the paramount right of Congress to control their navigation, so far as may be necessary for the regulation of commerce with foreign nations and among the States. This doctrine has often been announced by this court, and is not questioned by counsel of any of the parties.

The contention has been urged upon us during this discussion that notwithstanding the constitutional restraints the time has arrived when the Federal Government should have control of the disposition of these valuable water powers of the country. But with respect to that I should like to call attention to the views of the Supreme Court in the case of Kansas *v.* Colorado (206 U. S., p. 46), where it is said:

> The Government of the United States is one of enumerated powers; that it has no inherent powers of sovereignty; that the enumeration of the powers granted is to be found in the Constitution of the United States, and in that alone; that the manifest purpose of the tenth amendment to the Constitution is to put beyond dispute the proposition that all powers not granted are reserved to the people; and that if in the changes of the years further powers ought to be possessed by Congress they must be obtained by a new grant from the people. While Congress has general legislative jurisdiction over the Territories, and may control the flow of waters in their streams, it has no power to control a like flow within the limits of a State, except to preserve or improve the navigability of a stream; that the full control over those waters is, subject to the exception named, vested in the State.

In United States *v.* Rio Grande (174 U. S., 709), Mr. Justice Brewer, alluding to the limited and restricted function of the National Government in relation to navigation, said:

> The Hudson River runs within the limits of the State of New York. It is a navigable stream and a part of the navigable waters of the United States, so far at least as from Albany southward. One of the streams which flows into it and contributes to the volume of its waters is the Croton River, a nonnavigable stream. Its waters are taken by the State of New York for domestic uses in the city of New York. Unquestionably the State of New York has a right to appropriate its waters, and the United States may not question such appropriation, unless thereby the navigability of the Hudson be disturbed.

These authorities establish the proposition that the ownership of the waters and soil of navigable streams is in the State, and that the Federal Government has no right or power to interfere with the State's property except for the purpose of preserving or improving the navigability of a river. The surplus water or power produced as an incident to the public improvement made by the Government in aid of navigation belongs to the State. Under the commerce clause the Government acquires no title or property interest whatever in the river or bed thereof. The Constitution confers a naked power to regulate commerce; nothing more. The title of the State remains unimpaired, both as to the water and as to the soil. There is no power expressed or implied in the Constitution justifying the claim that the Federal Government may appropriate such surplus water or power. The assertion of such a right would constitute an interference with and confiscation of the property of the State by the Federal Government. The State is the owner of its natural resources, and, within its properly reserved power, has an absolute right to make use of its property, including the water power of its rivers, subject only to the limitation that it can not impede commerce and navigation.

The right of the Government to sell or lease its own property does not justify this attempted appropriation of the property of a State. Section 3, Article IV, of the Constitution is a grant of power to the United States of control over its own property, but what belongs to the State can not be the property of the Federal Government.

The United States is not authorized by any of the enumerated powers to engage in the business of manufacturing, transmitting, or selling electrical power, whether at cost or for a profit; and the commerce clause was never designed to permit the Federal Government to secure revenue or profit as an incident to the promotion of the facilities of navigation.

Federal expenditures must be reimbursed exclusively through taxation. The function of taxation is to secure sufficient money to perform the delegated governmental functions. This power was limited by section 8, Article I, as follows:

> The Congress shall have the power to lay and collect taxes, duties, imposts, and excises to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

The Constitution merely permits regulation in the interest of navigation and commerce by the Federal Government. Regulation does not mean appropriation or confiscation of the rights of a State in its natural resources.

The contention in favor of the right of the Federal Government to lease the excess water power is without authority or reason to sustain it. Kaukauna Co. *v.* Green Bay (142 U. S., 254) and Green Bay Co. *v.* Patten (172 U. S., 58) are not in point and do not support the proposition. The commerce clause was not involved in either case. In the former case the controversy arose between a State and a riparian owner, and in the latter case the right of the Federal Government grew out of a grant and was not based upon the commerce clause.

The claim is made that the Government's improvement creates the excess power, but the fact is that the water that produces the power concededly belongs to the State, and the only effect of the improvement by the Government is to enlarge the potentiality of the State's water at the point of improvement.

The Government has no more right to claim ownership of the increase of the water than the State or a riparian owner would have to require the Government to make compensation for impairment of the stream at other points resulting from the improvement. Where depreciation is necessarily caused by the improvement for navigation the State must bear the loss; where appreciation results from the improvement the State is entitled to the gain. In either case the property affected belongs to the State. As we have seen, the title of the State includes the water as well as the bed of the rivers. The right of the State, under its title, to appropriate the water, subject only to the power of the Government under the commerce clause, is recognized by the cases cited, and the State's title necessarily excludes dominion over its waters by the Government except for the single purpose above indicated. The Government may improve navigation; it can not confiscate the property of the State.

It is claimed that as the power of the Government can be granted or withheld, the Government has the right to impose conditions upon the grant. I can not approve of that extraordinary proposition. Every function delegated to the Government presumably is to be exercised in good faith. The States granted this power to the Federal Government, assuming that it would be used for the legitimate promotion of commerce, and, as an incident to that, for the promotion of the navigability of the several streams and rivers.

It has been said here within the last day or two that this right, now possessed by the Federal Government, is so complete that there is no power elsewhere; there is no power in the courts to coerce the Federal Government to assent to the building of a dam in a river, and that, inasmuch as that power remains in the Government, it may impose any condition, however onerous, however foreign to the expectations of the fathers of the Republic, who drafted the Constitution; and in that connection it is claimed that it has a perfect right to utilize these surplus waters for the purpose of creating a revenue with which to meet the expensé that the Government incurs in making the particular improvement. But that contention is made in disregard of the express provision in the Constitution that the revenue to meet public expenditures is to be raised in a way specifically pointed out in that instrument.

We hear very much in these days of the usurpation of power by the Federal Government. When the general dam acts were passed by Congress in 1906 and 1910 they contained provisions which involved a clear usurpation of power, and they should be repealed at once. The Government undertook by that legislation to withhold its consent to reasonable and salutary measures looking to the promotion of commerce, unless it were permitted to secure a revenue in a method never contemplated by the Constitution nor by those who drafted that instrument.

I am not much concerned about the pending bill, further than that it gives recognition to what I conceive to be a vicious principle. If there is any general sentiment throughout the country that the functions of the Federal Government should be enlarged with respect to the water powers of the land, let the right be conferred upon the Federal Government in a legitimate way. Let the Constitution be amended, and, if the States are willing to surrender more of their reserved powers, let the States do so. But until this change is brought about in a constitutional method, I believe it is the duty of every Senator to resist these encroachments, insidiously made, upon the reserved rights of the States. If the Federal Government is permitted, in disregard of constitutional restraints, to take property from the States, where will its operations stop? If it may appropriate and engage in the sale of electrical power belonging to a State, as was said the other day by the Senator from Colorado [Mr. THOMAS], why may it not go further and operate a trolley system or a manufacturing plant or do other things in disregard of the limitations of the Constitution?

The greatest security against encroachments upon the rights of the people is to be found in confining the Federal Government to the powers specifically granted in the Constitution. This bill can not be adopted, as it is proposed, without doing violence to the organic law of the land, and without doing a lasting injury to the State of Connecticut as well as to every other State in the Union.

Mr. McLEAN obtained the floor.

Mr. BRANDEGEE. We are approaching so near the hour at which we agreed to take the vote that I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Connecticut suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Cummins	Lodge	Simmons
Bacon	Dillingham	McCumber	Smith, Ariz.
Bankhead	du Pont	McLean	Smith, Ga.
Borah	Fall	Martin, Va.	Smith, Md.
Bourne	Fletcher	Martine, N. J.	Smith, S. C.
Brady	Foster	Nelson	Smoot
Brandegee	Gallinger	O'Gorman	Stephenson
Bristow	Gardner	Oliver	Stone
Burnham	Gore	Overman	Swanson
Burton	Gronna	Page	Thomas
Catron	Guggenheim	Paynter	Thornton
Chamberlain	Jackson	Percy	Tillman
Clapp	Johnson, Me.	Perkins	Townsend
Clark, Wyo.	Johnston, Ala.	Poindexter	Warren
Clarke, Ark.	Jones	Pomerene	Webb
Crane	Kenyon	Richardson	Works
Crawford	Kern	Root	
Culberson	Lea	Sheppard	
Cullom	Lippitt	Shively	

The PRESIDENT pro tempore. On the call of the roll of the Senate 73 Senators have answered to their names. A quorum of the Senate is present. The Senator from Connecticut will proceed.

Mr. McLEAN. The amendment which I offered this morning could not be printed in time for Senators to read it. I ask that it be read again.

The PRESIDENT pro tempore. The amendment will be again read.

The SECRETARY. Add at the end of section 1 the following additional proviso:

And provided further, That if said company shall neglect or refuse to pay any charge or return demanded of said corporation by the Secretary of War, either by order or under any contract, and such neglect or refusal is based on the ground that said charge or return is invalid or unconstitutional and not within the power of Congress to require, such neglect or refusal on the part of the company shall not affect the rights of said company to hold and exercise all the powers, rights, and privileges granted in this act and in any suit brought against said corporation for the collection of said charge or return the said corporation shall have the right to enter its proper plea to test the constitutionality or validity of said charge or return, and the courts shall take cognizance of the same, and nothing in this section shall be understood as committing the Government to a policy of imposing or not imposing such charges or returns as are herein described from any other company or corporation seeking the assent of Congress under like or similar circumstances.

Mr. McLEAN. Mr. President, before this measure is lowered or raised to its last resting place I should like to make a few remarks as the nearest friend of the victim in a geographical sense. In a material way I have no further interest in this question than that of my fellow citizens in general, but in view of the fact that my home is close to the spot where this dam will be built, or would be built but for the fact that the surplus water would wash away State sovereignty and incidentally undermine the foundation of the Constitution itself, I am persuaded that it is my duty to call the attention of the Senate to the real character of the about-to-be deceased.

I believe that if the Senators who have opposed this measure lived where I do they would realize that it is sometimes wise and sometimes profitable to meet conditions and their demands rather than take counsel of speculation and improbability.

First, I wish to call the attention of the Senate to the fact that the precise question presented by this measure is susceptible of two answers. We can pass the bill authorizing the development of this water power subject to the condition imposed by the executive department, which we will say is a confiscation of an infinitesimal part of the net income, or we can defeat this measure and in that way, to use a western term, we can confiscate the whole proposition.

I think I can safely assume that no Senator wants to subscribe to the policy of preventing the creation of wealth in this country. We would have no respect for a government that prevented the development of its natural resources through fear that when developed they could not be controlled.

I do not believe it is necessary, Mr. President, for this Government to wrap its latent wealth in the napkin of congressional impotency, through fear that the State or the Nation will reap where it has not sown.

The first section of the bill presents a solemn legal question. It is a question that has been discussed on the floor of the Senate for nearly a week. The Senator from Washington [Mr. JONES], who preceded the junior Senator from New York [Mr. O'GORMAN], a few minutes ago declared that he would not discuss the legal question involved, because no case presenting a similar condition of facts had ever been presented to the Supreme Court. The Senator from New York who preceded me began his remarks this afternoon with the statement that the bill had been discussed for many days upon the theory that the policy involved was objectionable, but that he wished to call the attention of the Senate at this late hour to the fact that the bill is offensive to the Constitution, and the Senator from New York is absolutely certain that the question presented by this bill has been determined by the Supreme Court.

So, Mr. President, it has been debated for nearly a week, with almost as many opinions as there have been debates. A few days ago two Senators of great learning in constitutional law cited precisely the same case in defense of diametrically opposed conclusions.

It seems to me it must be evident that the question, and the real question, which we must have decided before we can legislate intelligently upon this question at all must be answered by the Supreme Court of the United States, and until that question is answered by the Supreme Court the situation will present to Congress a condition full of doubt, full of trouble, and full of loss, not only to the people of Connecticut, but to the people of every other State in the Union.

I think it is clear that unless we find a way out for this measure Congress will have put an end to the development of water powers in this country. This question has been agitated for years; commissions have been appointed, composed of able lawyers; reports have been received full of valuable data, maps, and so forth, and nothing has been done.

The Senator from Ohio [Mr. BURTON] and the Senator from Nevada [Mr. NEWLANDS] have presented unanswerable arguments why Congress should lose no time in dealing with this question in an intelligent and effective way in conjunction with the several States.

It is my belief, Mr President, that where the State authorities are satisfied and have granted full authority to the capital interested, where the representatives of that State in Congress are satisfied with the proposed plan, when the individuals who are to furnish the capital are satisfied, the least that Congress can do is to find some way whereby the question will be decided which must be decided before we can agree upon a general law that will lead to a final disposition of this important question. I repeat, it is evident that the question involved is one that the Supreme Court alone can answer, and it is for this reason that the amendment I have offered should be adopted. Many valuable suggestions have been made in relation to this measure by the opposition. It is not necessary for me to disagree with anyone in appealing for a reprieve of this measure, and it is not necessary for any Senator here to disagree with me so far as the real, vital question is concerned.

The Senator from Minnesota [Mr. NELSON] presented objections to this measure because he disapproved the extension of the powers of administrative officers. He will remember that in this case we are dealing not with a Secretary of War but with the President of the United States, who we all know has a very intimate connection with legislation. We know that it is his duty to examine every bill that comes before Congress and return it with his disapproval if it seems to be his duty. It appears to me that we must solve this question upon some other basis than the one which requires a two-thirds vote of both Houses of Congress in order to be successful.

The Senator from California [Mr. WORKS] and the Senator from Idaho [Mr. BORAH] object to the bill because, as they claim, it is possible that the charge imposed may be put upon the ultimate consumer. Mr. President, the situation is that the people who live within the circuit of this proposed development of power want cheap power; they want cheap heat and cheap light; and it can not be contended that the development of 30,000 additional horsepower within 20 miles of 250,000 people, close to Hartford, can increase the present price of heat or power. If it has any effect at all, it must render it cheaper.

The people of Connecticut do not care whether they buy power of the United States Government or of the State of Connecticut or of an individual. What they want is cheaper heat and light and power; and it must be clear that they have everything to gain and nothing to lose if the bill passes, no matter whether the tax goes to the State of Connecticut in the first instance and is expended upon the highways or goes into the Treasury of the United States and is expended in improving navigation in the Connecticut River. In no event can it result in anything but an improvement in present conditions there.

And so we come right back to the real trouble. No matter from what angle we view this important subject, we shall never be in a position where we can draw a bill that will get more than 10 votes in this body until we know whether the tax proposed offends the Constitution or not. Congress can answer this question to-day, and it may find to-morrow that it has answered it incorrectly.

I am a firm believer in State rights; but, Mr. President, I believe in a government by brains and not boundary lines. I do not believe that any citizen of the United States should suffer an irreparable financial loss on account of the fact that he is also a citizen of a State, and I do not believe that a citizen of a State should suffer irreparable loss on account of the fact that he is also a citizen of the United States.

I think it will be utterly impossible for us to get an intelligent and effective solution of this problem until a case is presented to the Supreme Court which involves the critical issue which has been discussed here for more than a week. I believe that every Member of this body would vote for this bill but for the unfortunate precedent that they feel would be established. I do not think that the other objections to the bill which have been raised would be considered important factors enough to prevent the passage of the bill, but for the fear that it will operate as a precedent which Congress will be under obligation to follow in some other State.

Mr. President, if we attach a protest to this bill, such as is embodied in my amendment, a declaration that our purpose in approving the bill is not to establish a precedent that is to be followed in other States, but precisely the contrary, a declaration that we will pass this bill because we want to know what can be done by Congress without offending the Constitution, I can not conceive of any avenue that will lead to a final settlement of this question except the one that is pointed out to us by the only authority which can tell us what the Constitution means, namely, the Supreme Court.

There is another Senator who wishes to discuss this question, and while I might add many reasons to those already stated——

Mr. CLAPP. I would desire a moment before 4 o'clock, if the Senator could accommodate himself to my desire.

Mr. McLEAN. I only desire to make my point clear. I think in the future precisely the same political conditions will arise that are here to-day. We shall have the same shades of opinion, if we consign this bill to the grave, coming up next year and the year after—one Senator in favor of a general proposition because it goes a certain distance in one direction; his colleague opposed to it for that very reason; another Senator opposed to certain provisions because they go too far in another direction—and so between these extremes of opinion you will have as many shades as there are men debating the question, just as you have them to-day and have had them here for a week.

The precedents we can establish to-day are two. We can pass the bill, relying upon the fact that 100,000,000 sovereign people will be able later on to remove the obligations in this bill if they think it is unjust; and we can start the machinery to-day, and the only machinery that can be started, which will put us in a position where we can solve this problem later on; and it is a very important question. We can not tell without experience how it will or can be solved intelligently and economically, and we can not tell without the opinion of the Supreme Court what lines we can take or can not take under the Constitution.

We know that we have hardly ascended the foothills of the ranges that lie above and beyond us in the improvement of hydroelectric power. It is something that means millions upon millions of dollars to the people of this country. It seems to me that it would be wise to begin, if possible, and begin now, to put Congress in a position where, without any further delay, we can act in a way that will not prevent longer the development of the natural resources of this country as exemplified by the developed water power.

I wish to give notice that I shall offer the amendment which I have proposed in the nature of a substitute to the amendment offered by the Senator from Alabama [Mr. BANKHEAD]. If it is adopted, the Connecticut River Co. will test the right of the Federal Government to exact the proposed charge and the way will be cleared for future action.

Mr. CLAPP. Mr. President, I have no difficulty whatever in reconciling my views to the proposition that Congress has the power which is asserted in this bill, but, as I propose to vote against the bill, I would not want that vote hereafter to be used as an argument against my voting to sustain the power asserted in the bill.

I desire to say that in my judgment section 5, without being so intended by the author of the bill, puts it in the power of the men who hold the charter under the bill, if it becomes a law, either to force the United States Government to take this property or violate the pledge contained in the bill; and not only that, but in that event establishes a rule for determining the value of the property, which, of course, I could not assent to.

Therefore, unless section 5 be amended so as to relieve the Government of the possible burden the holders of the charter might some day impose upon it, I shall vote against the bill, although I believe in the fundamental principles of the measure.

Mr. NELSON. Mr. President, the amendment pending is the motion of the Senator from Alabama [Mr. BANKHEAD] to strike out all after line 18 in section 1 of the bill. The amendment offered by the Senator from Connecticut [Mr. McLEAN] is no substitute for that, because if that is stricken out the amendment of the Senator from Connecticut is of no value. It seems to me we ought to vote upon that question first.

Mr. McLEAN. On which question, may I ask the Senator?

Mr. NELSON. On the motion of the Senator from Alabama to strike out.

Mr. McLEAN. That, of course, entirely negatives the value of my amendment. If it is in order, Mr. President, I offer my amendment as an amendment to the amendment offered by the Senator from Alabama [Mr. BANKHEAD].

Mr. BANKHEAD. Mr. President, I beg to suggest to the Senator from Connecticut that while I am not very sure that we have a written rule on the subject the practice has been uniform, as far as I remember, that a committee may perfect its bill by amendments before other amendments are properly in order. Am I correct about that?

The PRESIDENT pro tempore. That is the usual custom, the Chair will suggest, if amendments are to be offered looking to perfecting the original bill.

Mr. BRANDEGEE. But can not a Senator offer an amendment to perfect a committee amendment?

The PRESIDENT pro tempore. Beyond a doubt.

Mr. BRANDEGEE. As a substitute?

The PRESIDENT pro tempore. Beyond a doubt.

Mr. BANKHEAD. Then does the Chair hold that the amendment offered by the Senator from Connecticut is to be voted upon before the amendment which the committee offered to strike out the proviso?

The PRESIDENT pro tempore. The Chair would hold that, if the Senator from Connecticut offers his amendment, as he states he does, as a substitute for the amendment submitted by the Senator from Alabama, it is in order. The question will be then upon the amendment submitted by the Senator from Connecticut to the amendment submitted by the Senator from Alabama.

Mr. McLEAN. On that question I ask for the yeas and nays.

Mr. OLIVER. Let it be read.

Mr. BORAH. I ask that the amendment be again read.

The PRESIDENT pro tempore. It will be again read.

The SECRETARY. Add at the end of section 1 the following additional proviso:

And provided further, That if said company shall neglect or refuse to pay any charge or return demanded of said corporation by the Secretary of War either by order or under any contract, and such neglect or refusal is based on the ground that said charge or return is invalid or unconstitutional and not within the power of Congress to require, such neglect or refusal on the part of the company shall not affect the rights of said company to hold and exercise all the powers, rights, and privileges granted in this act and in any suit brought against said corporation for the collection of said charge or return, the said corporation shall have the right to enter its proper plea to test the constitutionality or validity of said charge or return and the courts shall take cognizance of the same; and nothing in this section shall be understood

as committing the Government to a policy of imposing or not imposing such charges or returns as are herein described from any other company or corporation seeking the assent of Congress under like or similar circumstances.

The PRESIDENT pro tempore. The Chair will suggest that manifestly this is not an amendment to the amendment offered by the Senator from Alabama. It deals with an entirely different section.

Mr. BRANDEGEE. With the same section, of course.

Mr. McLEAN. It is precisely the same section. I propose to add the additional proviso at the end of section 1.

Mr. SHIVELY. It comes at the end of the amendment.

The PRESIDENT pro tempore. The Chair is clearly of the opinion that it is not an amendment to the amendment offered by the Senator from Alabama [Mr. BANKHEAD]; and the question will be first upon the amendment of the Senator from Alabama.

Mr. BURTON. Mr. President, is not that a proper amendment to add at the end of section 1? It explains and modifies a portion of the bill at the end of that section. Is it not in order to present that in the first instance?

Mr. BRANDEGEE. I want to make one suggestion in that connection. I think, if that amendment is added at the end of section 1, it being in the nature of a substitute for the amendment of the Senator from Alabama, it is equivalent to voting down the amendment of the Senator from Alabama, leaving section 1 as it would be with this amendment adopted. In that view of it, I thought it was in order as an amendment.

The PRESIDENT pro tempore. The Chair is clearly of the opinion that it is not an amendment to the pending amendment. The question is upon the amendment of the Senator from Alabama.

Mr. BRANDEGEE. I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. BRANDEGEE. I want to ask the Senator from Alabama if it is not necessary to make a change in that part of his proposed amendment which reads "amend by striking out of section 1, beginning after the word 'act,' in line 15, page 2"?

The PRESIDENT pro tempore. That modification of the amendment has already been made.

Mr. BRANDEGEE. Then, should it not propose to amend by changing the language so as to make it read "amend by striking out of section 1, beginning after the word 'otherwise,' in line 18, on page 2"?

The PRESIDENT pro tempore. That is precisely the form in which the amendment is, the Chair would suggest. The question is on the amendment submitted by the Senator from Alabama.

Mr. NEWLANDS. Mr. President, I should like to have the amendment stated.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. It is proposed to amend by striking out of section 1, beginning after the word "otherwise," in line 18, on page 2, the following:

And provided further, That the Secretary of War, as a part of the conditions and stipulations referred to in said act, may, in his discretion, impose a reasonable annual charge or return, to be paid by the said corporation or its assigns to the United States, the proceeds thereof to be used for the development of navigation on the Connecticut River and the waters connected therewith. In fixing such charge, if any, the Secretary of War shall take into consideration the existing rights and property of said corporation and the amounts spent and required to be spent by it in improving the navigation of said river, and no charge shall be imposed which shall be such as to deprive the said corporation of a reasonable return on the fair value of such dam and appurtenant works and property, allowing for the cost of construction, maintenance and renewal, and for depreciation charges.

The PRESIDENT pro tempore. The question is on the amendment.

Mr. BANKHEAD. I ask for the yeas and nays, Mr. President.

Mr. McLEAN. A parliamentary inquiry, Mr. President.

The PRESIDENT pro tempore. The Senator from Connecticut will state it.

Mr. McLEAN. I understand that if the amendment offered by the Senator from Alabama is adopted, the amendment which I offered will never be in a position to take the place of the amendment offered by the Senator from Alabama. In other words, if that amendment is adopted, the Senate will not have the opportunity to vote for my amendment as a substitute.

The PRESIDENT pro tempore. The Senator from Connecticut can afterwards offer his amendment in any form that he may see fit to submit it. The question is on the amendment proposed by the Senator from Alabama [Mr. BANKHEAD], on which he has demanded the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. Not knowing how he would vote if present, I withhold my vote.

Mr. DILLINGHAM (when his name was called). In the absence of the senior Senator from South Carolina [Mr. TILLMAN], with whom I have a general pair, I withhold my vote.

The roll call was concluded.

Mr. MARTINE of New Jersey. I am authorized to announce the pair of the senior Senator from New Jersey [Mr. BRIGGS] with the Senator from West Virginia [Mr. WATSON].

Mr. SMITH of Michigan (after having voted in the negative). I observe that the junior Senator from Missouri [Mr. REED] has not voted. In view of the pair I have with him, and not knowing how he would vote if present, I withdraw my vote.

The result was announced—yeas 53, nays 29, as follows:

YEAS—53.

Ashurst	Curtis	Martin, Va.	Stephenson
Bacon	Fall	Myers	Stone
Bankhead	Fletcher	Nelson	Sutherland
Borah	Foster	O'Gorman	Swanson
Bourne	Gamble	Oliver	Thomas
Bradley	Gardner	Overman	Thornton
Brady	Gronna	Paynter	Warren
Bryan	Guggenheim	Percy	Webb
Catron	Johnson, Me.	Sheppard	Wetmore
Chamberlain	Johnston, Ala.	Shively	Williams
Clark, Wyo.	Jones	Simmons	Works
Clarke, Ark.	Kern	Smith, Ariz.	
Culberson	Lea	Smith, Md.	
Cummins	McCumber	Smith, S. C.	

NAYS—29.

Brandegee	Dixon	Lodge	Poindexter
Bristow	du Pont	McLean	Pomerene
Brown	Gallinger	Martine, N. J.	Richardson
Burnham	Gore	Newlands	Root
Burton	Jackson	Owen	Townsend
Clapp	Kenyon	Page	
Crane	La Follette	Penrose	
Crawford	Lippitt	Perkins	

NOT VOTING—13.

Briggs	Hitchcock	Smith, Ga.	Watson
Chilton	Kavanaugh	Smith, Mich.	
Cullom	Massey	Smoot	
Dillingham	Reed	Tillman	

So Mr. BANKHEAD's amendment was agreed to.

Mr. BORAH. I offer the amendment which I proposed a few days ago as a new section to the bill.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Idaho will be stated.

The SECRETARY. It is proposed to add at the end of the bill, as section 6, the following:

That the provisions of the act entitled "An act to regulate commerce," passed and approved on the 4th day of February, 1887, together with the amendments thereto, shall apply to any corporation or any person or persons engaged in transmitting hydroelectric power or electricity from one State, Territory, or District of the United States to any State, Territory, or District of the United States, or from one place in a Territory to another place in the same Territory or to any foreign country, and that the term "common carrier" as used in said act and the amendments thereto shall include companies engaged in transmitting hydroelectric power or electricity as aforesaid: *Provided*, That said act shall not apply to the transmission of hydroelectric power or electricity wholly within one State and not transmitted to or from a foreign country, from or to any State or Territory as aforesaid; that the rules prescribed in said act as to just and reasonable charges or rates and the procedure relative to other common carriers, in so far as applicable, shall apply to such company, person, or persons transmitting hydroelectric power or electricity as aforesaid, and to the fixing and establishing of just and reasonable charges or rates fully and completely.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Idaho.

Mr. BORAH. I call for the yeas and nays, Mr. President.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON], and therefore withhold my vote.

Mr. DILLINGHAM (when his name was called). I have already announced my pair with the senior Senator from South Carolina [Mr. TILLMAN], who is absent. For that reason I withhold my vote. I desire that this announcement shall stand on all the votes on the bill, unless the Senator from South Carolina returns.

The roll call was concluded.

Mr. CULLOM. As there is apparently a unanimous vote in favor of this amendment, I will take the liberty of voting, notwithstanding my pair with the Senator from West Virginia [Mr. CHILTON]. I vote "yea."

The result was announced—yeas 82, nays 1, as follows:

YEAS—82.

Ashurst	Brady	Burton	Crane
Bacon	Brandegee	Catron	Crawford
Bankhead	Bristow	Chamberlain	Culberson
Borah	Brown	Clapp	Cullom
Bourne	Bryan	Clark, Wyo.	Cummins
Bradley	Burnham	Clarke, Ala.	Curtis

Dixon	Kenyon	Overman	Smith, S. C.
du Pont	Kern	Page	Smoot
Fall	La Follette	Penrose	Stephenson
Fletcher	Lea	Perkins	Sutherland
Foster	Lippitt	Poindexter	Swanson
Gallinger	Lodge	Pomerene	Thomas
Gamble	McCumber	Richardson	Thornton
Gardner	McLean	Root	Townsend
Gore	Martin, Va.	Sheppard	Warren
Gronna	Martine, N. J.	Shively	Webb
Guggenheim	Myers	Simmons	Wetmore
Jackson	Nelson	Smith, Ariz.	Williams
Johnson, Me.	Newlands	Smith, Ga.	Works
Johnston, Ala.	O'Gorman	Smith, Md.	
Jones	Oliver	Smith, Mich.	

NAYS—1.

Paynter

NOT VOTING—12

Briggs	Hitchcock	Owen	Stone
Chilton	Kavanaugh	Percy	Tillman
Dillingham	Massey	Reed	Watson

So Mr. BORAH's amendment was agreed to.

Mr. PAYNTER subsequently said: Mr. President, I desire to make a statement in view of the fact that I have voted for the bill and it contains the amendment adopted on motion of the Senator from Idaho [Mr. BORAH]. I voted against that amendment, not fully understanding its purport. After having read the amendment and understanding it, I want to say I most heartily concur in the principle expressed by it, and had I understood the amendment as it really is I should have voted for it and not against it. I thought it was subject to the same objection as was the provision stricken out by the amendment offered by the Senator from Alabama [Mr. BANKHEAD], but after reading the amendment I realized that it was not an effort to invade by the Federal Government what I believe to be the province of the States. If I were permitted to do so, I would change my vote upon that amendment, and if it can be done by unanimous consent I would be glad to be recorded as having voted for the amendment.

Mr. JONES. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. After the word "otherwise," in line 18, page 2, it is proposed to insert the following proviso:

Provided further, That if at any time said Connecticut River Co., or its assigns, or its property shall be owned or controlled by any device, permanently, temporarily, directly, indirectly, tacitly, or in any manner whatsoever, so that it shall form a part of, or in any way effect any combination, or be in anywise controlled by any combination in the form of an unlawful trust, or enter into any contract or conspiracy in restraint of trade in the production, development, generation, transmission, or sale of any power or electrical energy, then the permit herein granted shall be forfeited and canceled by the Secretary of War through appropriate proceedings instituted for that purpose in the courts of the United States.

Mr. JONES. I ask for the yeas and nays on that amendment.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Washington, on which he demands the yeas and nays. Is there a second? [After a pause.] In the opinion of the Chair, not a sufficient number have seconded the demand.

Mr. JONES. I should like to have the other side of that. I think there were several Senators whom the Chair did not see who seconded the demand.

The PRESIDENT pro tempore. There were not a sufficient number. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. POINDEXTER. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The junior Senator from Washington offers an amendment, which will be stated.

The SECRETARY. At the end of the amendment just agreed to it is proposed to add the following:

Said Connecticut River Co., its successors and assigns in the ownership of the water-power plant to be developed by and in connection with the dam referred to herein, shall pay to the Secretary of War 1 per cent of the net profits derived from the operation of said plant. The Secretary of War shall have authority to collect said charge and shall pay one-half of all sums so collected into the Treasury of the United States, and one-half thereof into the treasury of the State of Connecticut; and the Secretary of War shall have authority to examine the books of said company, its successors and assigns, for the purpose of ascertaining the profits thereof.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the junior Senator from Washington.

The amendment was rejected.

Mr. CUMMINS. Mr. President, I move to amend the bill by striking out section 5.

The PRESIDENT pro tempore. The Senator from Iowa moves to amend the bill by striking out section 5, which will be read.

The Secretary read as follows:

SEC. 5. That upon the termination for any cause whatever of the authority, rights, and privileges granted hereby, or any renewal thereof, the United States may renew the same or the grant may be made or transferred to other parties. Unless the grant is renewed to the original grantee or its assigns, as herein provided, the United States shall pay or require its new grantee to pay to said original grantees or its assigns, as full compensation, the reasonable value of the improvements and appurtenant works constructed under the authority of this act and of the property belonging to said corporation necessary for the development hereby authorized, exclusive of the value of the authority hereby granted. Said improvements and appurtenant works and property shall include the lands and riparian rights acquired for the purposes of such development, the dam and other structures, and also the equipment useful and convenient for the generation of hydroelectric power or hydromechanical power, and the transmission system from generation plant to initial points of distribution, but shall not include any other property whatsoever. Such reasonable value shall be determined by mutual agreement between the Secretary of War and the owners, and, in case they can not agree, then by proceedings instituted in the United States district court for the condemnation of such properties. The basis for determining the value shall be the cost of replacing the structures necessary for the development and transmission of hydroelectric power by other structures capable of developing and transmitting the same amount of marketable power with equal efficiency, allowance being made for deterioration, if any, of the existing structures in estimating such efficiency, together with the fair value of other properties herein defined, to which not more than 10 per cent may be added to compensate for the expenditure of initial cost and experimentation charges and other proper expenditures in the cost of the plant which may not be represented in the replacement valuation herein provided.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Iowa. [Putting the question.] By the sound the noes appear to have it.

Mr. CUMMINS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON], and therefore withhold my vote.

Mr. SMITH of Michigan. I again announce my pair with the Senator from Missouri [Mr. REED]. If he were present, I should vote "nay."

Mr. STONE (when his name was called). I vote "yea." I desire to announce that my colleague [Mr. REED] is detained at home by the serious illness of his wife and by important business.

The roll call was concluded, and the result was announced—yeas 55, nays 27, as follows:

YEAS—55.

Ashurst	Crawford	Kern	Shively
Bacon	Culberson	La Follette	Simmons
Bankhead	Cummins	Lea	Smith, Ariz.
Borah	Curtis	McCumber	Smith, Md.
Bourne	Dixon	Martin, Va.	Smith, S. C.
Bradley	Fall	Myers	Stone
Brady	Fletcher	O'Gorman	Sutherland
Bristow	Gamble	Overman	Swanson
Brown	Gardner	Paynter	Thomas
Bryan	Gronna	Percy	Thornton
Catron	Johnson, Me.	Perkins	Tillman
Chamberlain	Johnston, Ala.	Poindexter	Williams
Clapp	Jones	Pomerene	Works
Clarke, Ark.	Kenyon	Sheppard	

NAYS—27.

Brandegee	Gallinger	Nelson	Smoot
Burnham	Guggenheim	Oliver	Stephenson
Burton	Jackson	Owen	Townsend
Clark, Wyo.	Lippitt	Page	Warren
Crane	Lodge	Penrose	Webb
Dillingham	McLean	Richardson	Wetmore
du Pont	Martine, N. J.	Root	

NOT VOTING—13.

Briggs	Gore	Newlands	Watson
Chilton	Hitchcock	Reed	
Cullom	Kavanaugh	Smith, Ga.	
Foster	Massey	Smith, Mich.	

So the amendment of Mr. CUMMINS was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDENT pro tempore. The bill having been read three times, the question is, Shall it pass?

Mr. ROOT. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I again announce my pair with the junior Senator from West Virginia [Mr. CHILTON]. If he were present, I should vote "yea."

The roll call having been concluded, the result was announced—yeas 74, nays 12, as follows:

YEAS—74.

Ashurst	Bradley	Burnham	Crane
Bacon	Brady	Catron	Cummins
Bankhead	Brandegee	Chamberlain	Curtis
Borah	Brown	Clark, Wyo.	Dillingham
Bourne	Bryan	Clarke, Ark.	Dixon

Fall	Kern	Page	Smith, S. C.
Fletcher	Lea	Paynter	Smoot
Foster	Lippitt	Penrose	Stephenson
Gallinger	Lodge	Percy	Stone
Gamble	McCumber	Perkins	Sutherland
Gardner	McLean	Pomerene	Swanson
Gore	Martin, Va.	Richardson	Thornton
Gronna	Martine, N. J.	Sheppard	Tillman
Guggenheim	Myers	Shively	Warren
Jackson	Nelson	Simmons	Wetmore
Johnson, Me.	O'Gorman	Smith, Ariz.	Williams
Johnston, Ala.	Oliver	Smith, Ga.	Works
Jones	Overman	Smith, Md.	
Kenyon	Owen	Smith, Mich.	

NAYS—12.

Bristow	Crawford	Newlands	Thomas
Burton	du Pont	Poindexter	Townsend
Clapp	La Follette	Root	Webb

NOT VOTING—9.

Briggs	Cullom	Kavanaugh	Reed
Chilton	Hitchcock	Massey	Watson
Culberson			

So the bill was passed.

MEMORIAL ADDRESSES ON LATE REPRESENTATIVES FROM PENNSYLVANIA.

Mr. OLIVER. Mr. President, on the 7th of this month I gave notice that on March 1 I should ask the Senate to consider resolutions commemorative of the life, character, and public services of Hon. HENRY H. BINGHAM, Hon. GEORGE W. KIPP, and Hon. JOHN G. MCHENRY, late Members of the House of Representatives from the State of Pennsylvania. I wish to withdraw that notice and to give notice that I shall ask the Senate to consider such resolutions on Thursday, February 27, at such hour as may be convenient for the calling up of the same.

IMMIGRATION OF ALIENS—VETO MESSAGE.

Mr. LODGE. Mr. President, I move that the Senate proceed to reconsider the bill (S. 3175) to regulate the immigration of aliens to and the residence of aliens in the United States, which was returned by the President with his objections; and on that motion I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. STONE. Mr. President, I wish to inquire just what the effect of the motion would be. If the motion were agreed to, would its effect be to reconsider the action of the Senate, or would it be a vote upon whether the Senate agrees or disagrees to the proposition of passing the bill notwithstanding the objections of the President?

The PRESIDENT pro tempore. As the Chair understands the motion, it is simply to proceed to the consideration of the bill.

Mr. LODGE. The motion that I made is in the language of the Constitution, that the House in which the bill originated shall proceed to reconsider the bill which the President returns without his approval. The motion the Senator from Missouri suggests will apply when the vote is taken on the question of passing the bill over the veto or sustaining the veto.

Mr. STONE. In other words, if the motion to reconsider should be agreed to, what then would be the status of the matter?

Mr. LODGE. That would bring before the Senate the question as to whether we should support the veto or overrule it.

Mr. STONE. Suppose the motion to reconsider should be disagreed to?

Mr. LODGE. That would end it, naturally.

Mr. STONE. In that event would the bill be passed, notwithstanding the objections of the President?

Mr. LODGE. No; this simply brings the matter before the Senate. If my motion is disagreed to, that shows that the Senate declines to reconsider it, and is equivalent to sustaining the veto.

The PRESIDENT pro tempore. The Chair will suggest that, in the opinion of the Chair, the motion should be to take the bill and message from the table for consideration, and that then the constitutional question should be propounded.

Mr. LODGE. Certainly.

Mr. BACON. Mr. President, I may be in error, but I think the language of the Constitution, when it says that the House in which the bill originated shall proceed to reconsider it, means that it shall proceed to consider it again, and not that there shall be a reconsideration for the purpose of reversal.

Mr. LODGE. Undoubtedly.

Mr. BACON. And the proper question is whether or not the bill shall pass, the veto notwithstanding.

Mr. LODGE. The bill and the veto message are not before the Senate. The motion is to proceed to the consideration of the bill.

The PRESIDENT pro tempore. The yeas and nays have been ordered on the motion of the Senator from Massachusetts to take the bill and message from the table. The Secretary will call the roll.

The question having been taken by yeas and nays, resulted—yeas 75, nays 9, as follows:

YEAS—75.

Ashhurst	Cummins	La Follette	Root
Bacon	Curtis	Lea	Sheppard
Bankhead	Dillingham	Lippitt	Simmons
Borah	Dixon	Lodge	Smith, Ariz.
Bourne	du Pont	McCumber	Smith, Ga.
Bradley	Fall	McLean	Smith, S. C.
Brady	Fletcher	Martin, Va.	Smoot
Brandegee	Foster	Myers	Sutherland
Bristow	Gallinger	Nelson	Swanson
Brown	Gamble	Oliver	Thomas
Burnham	Gardner	Overman	Thornton
Burton	Gore	Owen	Tillman
Catron	Guggenheim	Page	Townsend
Chamberlain	Jackson	Penrose	Warren
Clark, Wyo.	Johnson, Me.	Percy	Webb
Clarke, Ark.	Johnston, Ala.	Perkins	Wetmore
Crane	Jones	Poindexter	Williams
Crawford	Kenyon	Pomerene	Works
Culberson	Kern	Richardson	

NAYS—9.

Clapp	O'Gorman	Shively	Stephenson
Gronna	Paynter	Smith, Mich.	Stone
Martine, N. J.			

NOT VOTING—11.

Briggs	Cullom	Massey	Smith, Md.
Bryan	Hitchcock	Newlands	Watson
Chilton	Kavanaugh	Reed	

So Mr. LODGE's motion was agreed to.

The PRESIDENT pro tempore. The bill is before the Senate. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. LODGE. Mr. President, I do not desire to delay for a moment the vote on this bill. The bill was fully discussed in every stage, and came back twice from conference. The President has rested his objections on the single point of the literacy test, and has referred us to the accompanying letter of the Secretary of Commerce and Labor for his reasons. There are no reasons offered in that letter which have not been considered constantly during the last 20 years the question has been before Congress, and it seems to me there is no reason why we should not immediately dispose of the question stated by the Chair. I do not myself wish to discuss the matter at all. I hope the Senate is ready to vote.

Mr. MARTINE of New Jersey. Mr. President, apropos of the remarks of the Senator from Massachusetts [Mr. LODGE], I desire to send to the desk a telegram which I have received with reference to this subject, and I ask that it be read.

The PRESIDENT pro tempore. Without objection, the telegram will be read.

The Secretary read as follows:

NEW YORK, *February 16, 1913.*

Hon. JAMES E. MARTINE,
United States Senate, Washington, D. C.:

The Hebrew Sheltering and Immigrant Aid Society, composed of American citizens in all parts of the country, respectfully pray that you exercise your functions as a representative of the people in Congress and refuse to pass the immigration bill, S. 3175, over the veto of His Excellency William Taft, President of the United States. This bill contains uncalled-for drastic provisions which are bound to exclude from our shores decent law-abiding men and women for no good reason. No matter what the motives of the authors, this bill is based upon false notions. We are convinced as an organization that has worked among immigrants for a quarter century and is coming in daily contact with every strata of immigration that our immigrants in this country have made good. In their loyalty to the United States they rank next to none. In their patriotism and devotion to the principles of liberty they occupy the same place as any patriotic native American. They appreciate our glorious institutions more than a great many Americans who can trace their ancestry back for several generations. They have not given cause for the Congress of the United States to legislate for the exclusion from our shores of their kind. We are satisfied that the calm judgment of the American people is not in favor of the further restriction of immigration. Our laws provide sufficiently against the incoming of the mentally and physically unsound, and these laws are rigidly enforced by the United States Government. Our country is large enough, and there are enormous stretches of land lying bare and awaiting the human hand and brain to develop them. We pray that you do not permit the spirit of "narrow nativism" to override the just veto of the Chief Executive of this Nation.

Respectfully,

LEON SANDERS, *President.*
JACOB MASSEL, *Secretary.*

Mr. MARTINE of New Jersey. Mr. President, when this measure was before this body last year I expressed myself in most positive terms and with all the earnestness of my nature as being unequivocally opposed to it, and I am now gratified to see that the President of the United States has seen fit to send his veto to this body. As a self-respecting citizen and as an American I could not vote at this crisis to override the President's veto of this measure. As a principle I am opposed to it.

I insist that the literacy test has accomplished nothing of good and that it can accomplish nothing of good in the matter

of immigration to this country. It will be subversive of the whole policy and system of immigration in this land.

The best that has been accomplished in this great land for its development has come from men from the other side who were not asked the question: "Can you read or can you write?" And when the Nation's life was in crisis and struggle, and you asked him to shoulder his musket and fix his bayonet for a charge you never questioned as to whether he could read or write, but you garnered him in and bade him go on and defend your Constitution and your flag.

I say, Mr. President, that during the whole history of this country of the men who have carved out their fortunes and have made our country great, a great many, and those of their progeny who came after them, were utterly unable to write. I know within my own knowledge of men who can neither read nor write who have accumulated wealth in this land, and have made most respected and honored citizens.

I believe the passage of this measure can result in no good. It has accomplished nothing where it has been tried, and it can accomplish nothing to-day.

The argument, I know, will be advanced, "Oh, we have a different class to-day from what we had 40 or 50 years ago." Yes; different somewhat, but in the main it is the same. Earnest, honest men, endowed with God's good health, have come here to seek a refuge and to carve out for themselves a fortune and to aid us in developing this great country.

It is said that the Italians are dangerous people in this land. I insist there are good Italians, and as a race they are an industrious race. I defy the gentlemen advocating this measure to find an Italian beggar in the streets of your city or any other city. An Italian beggar is unknown. They are industrious and frugal to a degree that is unparalleled.

If literacy must be the gauge, I insist, Mr. President, that the most dangerous alien who can come to the shores of this fair land is the intellectual and intelligent villain, the intellectual and conniving scoundrel. I have no fear of the man who may not be able to read or write or translate in comparison with the man who is able in letters and at translation, if you choose, and in reading or writing. In comparison, I think, they have been plotting villains and have brought disaster not only to our own country but almost every other land to which they may have had access.

Mr. President, I recall very well having drunk in a good deal of inspiration from the words of a distinguished Senator in this body when, on April 7, 1908, he declared in these words:

Within the last 20 years, however, there has been a great change—

In referring to immigration—

Within the last 20 years, however, there has been a great change in the proportion of the various nationalities emigrating from Europe to the United States. The immigrants from Great Britain and Ireland and from Germany and Scandinavia have come down in numbers as compared with immigrants from countries which, until very recent years, sent no immigrants to America. We have never received, and do not now receive, any immigration from Spain or any considerable immigration from France and Belgium. The great growth in recent years in our immigration has been from Italy, from Poland, Hungary, and Russia, from eastern Europe, from subjects of the Sultan, and is now extending to the inhabitants of Asia Minor. With the exception of the Italians—

And it is these who are discriminated against largely—

With the exception of the Italians, these people have never been amalgamated with or brought in contact with the English-speaking people or with those of France, Germany, Holland, and Scandinavia, who have built up the United States. I except the Italians not merely because their noble literature and splendid art are a part of our common inheritance but because they are conspicuously one of the countries which belong to what is known as western civilization. They, like ourselves, are the heirs of the civilization of ancient Rome, and until one has traveled in eastern Europe and studied the people one does not realize how much this signifies.

These words and more are the words of the distinguished Senator from Massachusetts [Mr. LODGE] when he saw fit and proper to laud the immigration of Italians to this fair land of ours.

I insist, Mr. President, in my own Commonwealth, in the southern part of the State of New Jersey, and in many other States, where there are millions of idle acres demanding the work of toilers, of industrious, honest men, there is a rich opportunity, and we can invite them here. I ask as the only restriction healthy bodies, clean minds, and moral purposes, and then, with these broad acres and a splendid Constitution, we can assimilate and digest the whole world better to our advantage, better to the world's Christianization and to the civilization of humanity.

I shall vote with all the earnestness of my nature to sustain the President's veto of this bill.

Mr. SMITH of Michigan. Mr. President, I desire to send to the desk a telegram received from many representative Polish citizens, or citizens of Polish origin, protesting against overriding the President's veto. I should like to have the telegram read and the names appended thereto, representing many thousands of the most respected citizens of Grand Rapids, Mich., printed in the RECORD without reading.

The PRESIDENT pro tempore. Without objection, the telegram will be read.

The telegram was read, and the names appended thereto were ordered to be printed in the RECORD, as follows:

GRAND RAPIDS, MICH., *February 16, 1913.*

HON. WM. ALDEN SMITH,
Senate, Washington, D. C.:

Justice demands that you vote to uphold President Taft's veto of the Dillingham-Burnett immigration bill. The bill is so unjust that we are forced to request you to stand by our President, who considers that good clean men and women may come into our great country without having to stand a literacy test. We all know that in some countries the people are so unfortunate as to not have the opportunity to get an education; we have had a great many come here that could not read nor write and they have made some of our best citizens and their children very learned good men and women. We the undersigned most earnestly request your assistance, and have signed on behalf of our respective societies and as individuals.

Committee in charge from Polish National Benevolent Society; Polish American Industrial Society; Polish Progressive Benevolent Society and Knights of John Sobieske and Society, Michael Buzalski, president, Y. Stanley Jacowski, secretary; Rev. L. P. Krakowski, pastor of the Polish Sacred Heart congregation; Rev. Joseph Pietrasik, pastor of St. Isidore's congregation; Rev. C. Skory, pastor of St. Adalberts Church; Polish National Benevolent Society (a corporation), Michael Buzalski, president; Polish American Industrial Society (a corporation), F. Centilli, president; Grand Rapids central committee, representing six local branches of the Polish National Alliance of the United States, Julian Malsizewski, president; Polish Progressive Benevolent Society, Valentine J. Banaszak, president; Red Hussars' Benevolent Society, Adam Walchewski, president; Sacred Heart Society of Sacred Heart Parish, Jan Radlicki, president; Pulaski Guard Benevolent Protective Association, Jan Jochim, president; Sacred Heart Society of St. Isadore Sacred Parish, Frank Michalski, president; St. Isadore's Benevolent Society, Anthony Sakowiski, president; St. Hedwig Benevolent Society, B. Z. Czubinski, president; Knights of St. Casimir, A. Panfil, president; St. Casimir Benevolent Society, Frank Andrysiak, president; St. Adalberts Sons Aid Society, Jan Kosowiski, president; St. Hyacinth Aid Society, Aug Michalski, president; St. Stanislaus Aid Society, Casimir Talalay, president.

Mr. O'GORMAN. Mr. President, I ask that the Secretary read the message of the President, together with the communication from the Department of Commerce and Labor, in relation to the pending bill.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

Mr. STONE. Mr. President, I would most respectfully invite the attention of Senators to the letter of Secretary Nagel. I am sure they have not read it.

The PRESIDENT pro tempore. The message and the letter from the Secretary of the Department of Commerce and Labor will be read as requested.

The Secretary read as follows:

To the Senate:

I return herewith, without my approval, S. 3175.

I do this with great reluctance. The bill contains many valuable amendments to the present immigration law which will insure greater certainty in excluding undesirable immigrants.

The bill received strong support in both Houses and was recommended by an able commission after an extended investigation and carefully drawn conclusions.

But I can not make up my mind to sign a bill which in its chief provision violates a principle that ought, in my opinion, to be upheld in dealing with our immigration. I refer to the literacy test. For the reasons stated in Secretary Nagel's letter to me, I can not approve that test. The Secretary's letter accompanies this.

WM. H. TAFT.

THE WHITE HOUSE, *February 14, 1913.*

DEPARTMENT OF COMMERCE AND LABOR,
Washington, February 12, 1913.

MY DEAR MR. PRESIDENT: On the 4th instant Mr. Hilles, by your direction, sent me Senate bill 3175, "An act to regulate the immigration of aliens to and the residence of aliens in the United States," with the request that I inform you at my earliest convenience if I know of any objection to its approval. I now return the bill with my comments.

In view of the number of hearings and the general discussion that have been had no more than a brief reference to many of the points will be necessary. The following are some of the objections that have been raised:

First. No exception has been made in behalf of Hawaii. You have been assured that it is proposed to meet this objection by joint resolution. Even if this plan should not be carried out, I do not regard the objection as sufficiently serious to affect the merits of the bill.

Second. The provision that persons shall be excluded who can not become eligible under existing law to become citizens of the United States by naturalization is obscure, because it leaves unsettled the question as to who are to be regarded as white persons. But this is merely a perpetuation of the uncertainty which is now to be found in the naturalization law.

Third. The provision that the Secretary may determine in advance, upon application, whether it is necessary to import skilled labor in any particular instance, that this decision shall be held in abeyance for 30 days, and that in the meantime anyone objecting may appeal to the dis-

trict court to try de novo such question of necessity is unsatisfactory. The provision for the appeal to the courts is probably unconstitutional, but even if the entire provision proves ineffective the law will be left substantially where it is, and so this does not constitute a grave objection to the bill.

Fourth. The provision that the Secretary may detail immigrant inspectors and matrons for duty on vessels carrying immigrants or immigrant passengers is objected to by foreign countries, but inasmuch as this is left to the discretion of the Secretary, and it is understood, for illustration, that Italy insists upon such practice with respect to all steamship companies taking immigrants from her shores, it does not seem to me that this is a controlling objection.

Fifth. The provision in section 7, with respect to the soliciting of immigration by steamship companies, vests the Secretary with somewhat drastic authority by way of imposing fines and denying the right of a steamship company to land alien immigrant passengers. Again, this is not mandatory, and therefore does not go to the heart of the bill.

It appears to me that all these and similar objections might well have been considered in committee and may become the subject of future consideration by Congress, but, fairly considered, they are of incidental importance only and furnish no sufficient reason for disapproving this bill.

With respect to the literacy test, I feel compelled to state a different conclusion. In my opinion, this is a provision of controlling importance, not only because of the immediate effect which it may have upon immigration and the embarrassment and cost it may impose upon the service, but because it involves a principle of far-reaching consequence with respect to which your attitude will be regarded with profound interest.

The provision as it now appears will require careful reading. In some measure the group system is adopted—that is, one qualified immigrant may bring in certain members of his family—but the effect seems to be that a qualified alien may bring in members of his family who may themselves be disqualified, whereas a disqualified member would exclude all dependent members of his family, no matter how well qualified they might otherwise be. In other words, a father who can read a dialect might bring in an entire family of absolutely illiterate people, barring his sons over 16 years of age, whereas a father who can not read a dialect would bring about the exclusion of his entire family, although every one of them can read and write.

Furthermore, the distinction in favor of the female members of the family as against the male members does not seem to me to rest upon sound reason. Sentimentally, of course it appeals, but industrially considered it does not appear to me that the distinction is sound. Furthermore, there is no provision for the admission of aliens who have been domiciled here, and who have simply gone abroad for a visit. The test would absolutely exclude them upon return.

In the administration of this law very considerable embarrassment will be experienced. This at least is the judgment of members of the immigration force, upon whose recommendations I rely. Delay will necessarily ensue at all ports, but on the borders of Canada and Mexico that delay will almost necessarily result in great friction and constant complaint. Furthermore, the force will have to be very considerably increased, and the appropriation will probably be in excess of present sums expended by as much as a million dollars. The force of interpreters will have to be largely increased and, practically speaking, the bureau will have to be in a position to have an interpreter for any kind of language or dialect of the world at any port at any time. Finally, the interpreters will necessarily be foreigners, and with respect to only a very few of the languages or dialects will it be possible for the officials in charge to exercise anything like supervision.

Apart from these considerations, I am of the opinion that this provision can not be defended upon its merits. It was originally urged as a selective test. For some time recommendations in its support upon that ground have been brought to our attention. The matter has been considered from that point of view, and I became completely satisfied that upon that ground the test could not be sustained. The older argument is now abandoned, and in the later conferences, at least, the ground is taken that the provision is to be defended as a practical measure to exclude a large proportion of undesirable immigrants from certain countries. The measure proposes to reach its result by indirection, and is defended purely upon the ground of practical policy, the final purpose being to reduce the quantity of cheap labor in this country. I can not accept this argument. No doubt the law would exclude a considerable percentage of immigration from southern Italy, among the Poles, the Mexicans, and the Greeks. This exclusion would embrace probably in large part undesirable but also a great many desirable people, and the embarrassment, expense, and distress to those who seek to enter would be out of all proportion to any good that can possibly be promised for this measure.

My observation leads me to the conclusion that, so far as the merits of the individual immigrant are concerned, the test is altogether overestimated. The people who come from the countries named are frequently illiterate because opportunities have been denied them. The oppression with which these people have to contend in modern times is not religious, but it consists of a denial of the opportunity to acquire reading and writing. Frequently the attempt to learn to read and write the language of the particular people is discouraged by the Government, and these immigrants in coming to our shores are really striving to free themselves from the conditions under which they have been compelled to live.

So far as the industrial conditions are concerned, I think the question has been superficially considered. We need labor in this country, and the natives are unwilling to do the work which the aliens come over to do. It is perfectly true that in a few cities and localities there are congested conditions. It is equally true that in very much larger areas we are practically without help. In my judgment, no sufficiently earnest and intelligent effort has been made to bring our wants and our supply together, and so far the same forces that give the chief support to this provision of the new bill have stubbornly resisted any effort looking to an intelligent distribution of new immigration to meet the needs of our vast country. In my judgment no such drastic measure, based upon a ground which is untrue and urged for a reason which we are unwilling to assert, should be adopted until we have at least exhausted the possibilities of a rational distribution of these new forces.

Furthermore, there is a misapprehension as to the character of the people who come over here to remain. It is true that in certain localities newly arrived aliens live under deplorable conditions. Just as much may be said of certain localities that have been inhabited for a hundred years by natives of this country. These are not the general conditions, but they are the exceptions. It is true that a very considerable portion of immigrants do not come to remain, but return after they have acquired some means, or because they find themselves unable to cope with the conditions of a new and aggressive country. Those who return for the latter reason relieve us of their own volition of a burden. Those who return after they have acquired some means certainly must be admitted to have left with us a consideration for the advantage which they have enjoyed. A careful examination of the character of the people who come to stay and of the employment in which a large part of the new immigration is engaged will, in my judgment, dispel the apprehension which many of our people entertain. The census will disclose that with rapid strides the foreign-born citizen is acquiring the farm lands of this country. Even if the foreign-born alone is considered, the percentage of his ownership is assuming a proportion that ought to attract the attention of the native citizens. If the second generation is included it is safe to say that in the Middle West and West a majority of the farms are to-day owned by foreign-born people or they are descendants of the first generation. This does not embrace only the Germans and the Scandinavians, but is true in large measure, for illustration, of the Bohemians and the Poles. It is true in surprising measure of the Italians; not only of the northern Italians, but of the southern.

Again, an examination of the aliens who come to stay is of great significance. During the last fiscal year 838,172 aliens came to our shores, although the net immigration of the year was only a trifle above 400,000. But, while we received of skilled labor 127,916, and only 35,898 returned; we received servants 116,529, and only 13,449 returned; we received farm laborers 184,154, and only 3,978 returned, it appears that laborers came in the number of 135,726, while 209,279 returned. These figures ought to demonstrate that we get substantially what we most need, and what we can not ourselves supply, and that we get rid of what we least need and what seems to furnish, in the minds of many, the chief justification for the bill now under discussion.

The census returns show conclusively that the importance of illiteracy among aliens is overestimated, and that these people are prompt after their arrival to avail of the opportunities which this country affords. While, according to the reports of the Bureau of Immigration, about 25 per cent of the incoming aliens are illiterate, the census shows that among the foreign-born people of such States as New York and Massachusetts, where most of the congestion complained of has taken place, the proportion of illiteracy represents only about 13 per cent.

I am persuaded that this provision of the bill is in principle of very great consequence, and that it is based upon a fallacy in undertaking to apply a test which is not calculated to reach the truth and to find relief from a danger which really does not exist. This provision of the bill is new, and it is radical. It goes to the heart of the measure. It does not permit of compromise, and, much as I regret it, because the other provisions of the measure are in most respects excellent and in no respect really objectionable, I am forced to advise that you do not approve this bill.

Very sincerely, yours, CHARLES NAGEL, *Secretary.*

The PRESIDENT.

During the reading of Secretary's Nagel's letter.

Mr. O'GORMAN. I should like to have the reading of the letter suspended now, and move that the Senate adjourn until 12 o'clock to-morrow.

The motion was not agreed to.

After the reading of Secretary Nagel's letter.

Mr. DU PONT. Mr. President, I do not like to detain the Senate at this late hour, and I shall do so only for a moment. I desire to say that I disapprove of the illiteracy clause in the pending bill, and shall therefore vote to sustain the President's veto.

Some years ago I had occasion to examine the muster rolls of the continental line of the Revolutionary Army, and I discovered that in many companies as high as 75 or 80 per cent of the soldiers were illiterates and foreigners. If those men—those illiterates, those foreigners—were then good enough to risk their lives in assisting to obtain our independence, it seems to me that the same class of men are now good enough to assist in the development of this great country by their labor on the farms, in the mines, and in every other department where labor is so much needed.

The PRESIDENT pro tempore. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. STONE. Mr. President——

Mr. LODGE. The yeas and nays, of course, are necessary under the Constitution.

The PRESIDENT pro tempore. The Constitution requires that the vote in such a case shall be taken by yeas and nays.

Mr. STONE. I will ask the Senator from Massachusetts [Mr. LODGE] to adjourn the further consideration of this bill until to-morrow at some hour when we may agree to vote. There are some Senators who would like to make observations in opposition to the bill. I do not know whether there are any who wish to speak in favor of it. For myself, I desire to say a few words in support of the President's veto, but I would rather the matter should go over until some hour to-morrow.

Mr. LODGE. Mr. President, if we can agree to vote to-morrow I shall be very glad to comply with the suggestion of the Senator from Missouri. The bill and the message of the President are now the unfinished business of the Senate, and, therefore, would come up to-morrow at 2 o'clock. Therefore I ask unanimous consent that, not later than 5 o'clock to-morrow, a vote be taken on the question of sustaining the veto.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Massachusetts?

Mr. CLAPP. Mr. President, I shall object to any unanimous-consent agreement. Let us proceed with this matter and dispose of it.

The PRESIDENT pro tempore. Objection is made.

Mr. LODGE. I have nothing further to do, then, of course, but to keep the matter before the Senate, though I do not like to interfere with other business. I wish to say to the Senator from Minnesota that the suggestion did not come from me, but it came from the opponents of the bill.

Mr. CLAPP. I did not mean that in any such sense.

The PRESIDENT pro tempore. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. CLARKE of Arkansas. I believe there is one motion which can be made by which we can attend to the matter to-morrow, and I move that the Senate adjourn.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Arkansas. [Putting the question.] The noes appear to have it.

Mr. MARTINE of New Jersey. I call for the yeas and nays, Mr. President.

The yeas and nays were ordered; and, being taken, resulted—yeas 25, nays 58, as follows:

YEAS—25.

Brady	du Pont	Martine, N. J.	Stephenson
Brown	Fletcher	Myers	Stone
Catron	Gronna	O'Gorman	Townsend
Chamberlain	Kenyon	Paynter	Williams
Clarke, Ark.	Kern	Pomerene	
Culberson	Lippitt	Shively	
Cullom	Martin, Va.	Smith, Md.	

NAYS—58.

Ashurst	Curtis	McCumber	Smith, Ariz.
Bacon	Dillingham	McLean	Smith, Ga.
Bankhead	Dixon	Nelson	Smith, Mich.
Borah	Fall	Oliver	Smith, S. C.
Bourne	Gallinger	Overman	Smoot
Bradley	Gardner	Owen	Sutherland
Brandegee	Gore	Page	Swanson
Bristow	Guggenheim	Penrose	Thomas
Burnham	Jackson	Percy	Thornton
Burton	Johnson, Me.	Perkins	Tillman
Clapp	Johnston, Ala.	Poindexter	Webb
Clark, Wyo.	Jones	Richardson	Wetmore
Crane	La Follette	Root	Works
Crawford	Lea	Sheppard	
Cummins	Lodge	Simmons	

NOT VOTING—12.

Briggs	Foster	Kavanaugh	Reed
Bryan	Gamble	Massey	Warren
Chilton	Hitchcock	Newlands	Watson

So the Senate refused to adjourn.

Mr. STONE. Mr. President, I should like to have the bill read by the Secretary for the information of the Senate. I am a little apprehensive that some, if not most, of the Senators have not read the bill.

The PRESIDENT pro tempore. The Senator from Missouri requests that the bill shall be read. That order will be made, in the absence of objection.

Mr. LODGE. Mr. President, I do not know of any rule that compels the reading of the bill. It is perfectly familiar to Senators, I think, and I do not wish to have the time consumed uselessly. If Senators wish to speak, that is one thing, but I do not think we should have documents read, and I object.

The PRESIDENT pro tempore. Objection to the reading is made.

Mr. STONE. I can read the bill.

Mr. LODGE. I know the Senator can read it, but I do not want to put him to that trouble. I should like very much if we could make the agreement which I have proposed, which was, in fact, suggested by the Senator from Missouri. I do not think it is possible to take a vote at this late hour, if there are Senators who desire to speak, and so I will renew the request, if it be agreeable to the Senator from Missouri.

Mr. STONE. If the Senator will pardon me, there are two or three Senators who desire to address the Senate on the pending question, and after conference with the Senator from Massachusetts, in charge of the measure, it was agreed between them and him that we would adjourn until 12 o'clock to-morrow, and that the vote should be taken not later than 5 o'clock. I believe it can be taken much earlier than 5 o'clock. There is certainly no disposition, so far as I am advised—and I think I can speak with confidence—on the part of anyone merely to delay the consideration and final disposition of this question; but there is reason in all things; and I join with the Senator from Massachusetts in again asking the Senate to allow this matter to go over until to-morrow with an assurance that there is no disposition to obstruct the early disposition of it.

Mr. LODGE. Mr. President, I renew the request, and I hope the Senator from Minnesota will allow us to adopt that course. It is the quickest way of disposing of the matter. We shall gain nothing by sitting here this evening, in my opinion. I renew the request, which is, in brief, that we shall vote on the bill to-morrow, not later than 5 o'clock.

Mr. CLAPP. Will the Senator make it 3 o'clock?

Mr. LODGE. I am perfectly willing to make it 3 o'clock, if that is agreeable.

Mr. STONE. If we can begin a little earlier than 2——

Mr. LODGE. The bill can be taken up immediately after the routine morning business and voted on not later than 3 o'clock.

Mr. STONE. If we can begin at 1——

Mr. KERN. Make it 4.

Mr. NELSON. Mr. President, will the Senator from Massachusetts yield to me?

Mr. STONE. What is the need of a controversy here about half an hour?

Mr. LODGE. Exactly.

Mr. STONE. Several Senators desire to be heard, not extensively, but within reasonable limits. My friend from Minnesota is so generous and fair in all things that I am sure I need only to present the matter to him.

Mr. NELSON. Will the Senator from Missouri yield to me?

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Minnesota?

Mr. STONE. I do.

Mr. NELSON. It is very important that we should dispose of the appropriation bills. Therefore I would suggest that unanimous consent be asked that we take up this bill to-morrow, immediately after the reading of the Journal, and dispose of it by a final vote before 3 o'clock, or not later than 3 o'clock.

Mr. LODGE. That is all right.

Mr. STONE. That is satisfactory to me.

Mr. OLIVER. Mr. President, there are quite a number of committee reports that have been delayed, and on that account there ought to be a short time allowed for routine morning business.

Mr. LODGE. That will come immediately after the vote. It will not cut off the routine morning business.

Mr. SMOOT. That will be all right.

Mr. LODGE. It will not cut it off if the vote is taken at 3 o'clock.

The PRESIDENT pro tempore. Will the Senator from Massachusetts restate his request?

Mr. LODGE. I ask that to-morrow, immediately after the reading of the Journal, the immigration bill, with the President's objections, be taken up, and that the vote upon it be taken not later than 3 o'clock.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Massachusetts?

Mr. CLAPP. I objected to the other suggestion not for purposes of delay, but because I thought we ought to go to work and dispose of this matter. I do not want to stand against the will of the Senate. We have an immense amount of work yet before us at the present session. If it is the sense of the Senate that we should pass upon this matter at 3 o'clock to-morrow, while I deprecate that policy, I shall not any further interpose an objection.

Mr. CLARK of Wyoming. Mr. President, I rise to a parliamentary inquiry. Will the taking up of this bill by unanimous consent cut off morning business to-morrow?

Mr. LODGE. No.

Mr. CLARK of Wyoming. I am asking the Chair.

The PRESIDENT pro tempore. It would preclude the presentation of morning business, except by unanimous consent, after the disposition of this measure.

Mr. CLARK of Wyoming. I supposed that was true; and in that event, unless the request for unanimous consent is so amended that we can take up the morning business, I shall have to object.

Mr. LODGE. I thought it would be open to morning business. I will add to the request, then, that after the disposition of this question the morning business shall be disposed of.

The PRESIDENT pro tempore. Is there objection to the modified request of the Senator from Massachusetts? The Chair hears none, and it is so ordered.

INCOME TAX.

The PRESIDENT pro tempore presented a joint resolution passed by the Legislature of Wyoming, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
Office of the Secretary of State.

UNITED STATES OF AMERICA, *State of Wyoming:*

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following copy of senate joint resolution No. 2,

adopted by the Legislature of the State of Wyoming, has been carefully compared with the original, filed in this office on the 6th day of February, A. D. 1913, and is a full, true, and correct copy thereof:

Senate joint resolution ratifying an amendment to the Constitution of the United States of America granting power to Congress to levy a tax on incomes.

Whereas both Houses of the Sixty-first Congress of the United States of America at its first session by a constitutional majority of two-thirds thereof, made the following proposition to amend the Constitution of the United States of America in the following words, to wit:

A joint resolution proposing an amendment to the Constitution of the United States.

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed by an amendment to the Constitution of the United States, which when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution, namely:

"ART. XVI. The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States and without regard to any census or enumeration."

Therefore be it

Resolved by the Senate of the State of Wyoming (the House of Representatives concurring), That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the Legislature of the State of Wyoming.

That certified copies of this preamble and joint resolution be forwarded by the secretary of state of this State to the President of the United States, Secretary of State of the United States, to the Presiding Officer of the United States Senate, to the Speaker of the House of Representatives of the United States, and to each Senator and Representative of the United States, and to each Senator and Representative in Congress from the State of Wyoming.

By the president:

BIRNEY H. SAGE.

By the speaker:

MARTIN L. PRATT.

10.52 a. m., February 3, 1913.

JOSEPH M. CAREY, *Governor.*

In witness whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 10th day of February, A. D. 1913.

[SEAL.] FRANK L. HOUX,
Secretary of State.

By F. H. WESCOTT,
Deputy.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented a memorial adopted by the Legislature of Idaho, which was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

[Certificate of certified copy.]

STATE OF IDAHO,
DEPARTMENT OF STATE.

I, Wilfred L. Gifford, Secretary of State of the State of Idaho, do hereby certify that the annexed is a full, true, and complete transcript of House joint memorial No. 1; by Mason; passed the house January 23, 1913; passed the Senate January 31, 1913; which was filed in this office on the 5th day of February, A. D. 1913, and admitted to record.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State. Done at Boise City, the capital of Idaho, this 7th day of February, A. D. 1913, and of the independence of the United States of America the one hundred and thirty-seventh.

[SEAL.] WILFRED L. GIFFORD,
Secretary of State.

House joint memorial 1.

To the honorable the Senators and Representatives of the United States in Congress assembled:

Your memorialists, the Legislature of the State of Idaho, respectfully represent that—

Whereas a bill, known as the "three-year homestead bill," was passed by the Senate of the National Congress on February 5, 1912, said bill being without any requirements as to the cultivation of homesteads; and

Whereas the said bill was afterwards amended in the National House of Representatives so as to require cultivation, and was finally approved on June 6, 1912; and

Whereas said cultivation clause works a hardship upon settlers who have taken up or who will take up homesteads in the timbered sections of the State of Idaho and in other Western States in that those settlers who are dependent upon their own resources and labor to maintain their families and to improve their homesteads can not comply with the provisions of said law;

We therefore pray and earnestly urge that relief be granted to these homesteaders by appropriate amendment, so as to make the provisions of the said law applicable to the timbered sections of this and other Western States.

The Secretary of State of the State of Idaho is hereby instructed to forward copies of this memorial to the Senate and House of Representatives of the United States, and copies of the same to our Senators and Representatives in Congress.

This memorial passed the house of representatives on the 23d day of January, 1913.

C. S. FRENCH,
Speaker of the House of Representatives.

This memorial passed the Senate on the 31st day of January, 1913.

HERMAN H. TAYLOR,
President of the Senate.

I hereby certify that the within house joint memorial originated in the house of representative during the twelfth session of the Legislature of the State of Idaho.

[SEAL.] DAVID BURRELL,
Chief Clerk of the House of Representatives.

The PRESIDENT pro tempore presented a joint memorial of the Legislature of Idaho, which was ordered to lie on the table and to be printed in the RECORD, as follows:

[Certificate of certified copy.]

STATE OF IDAHO,
Department of State.

I, Wilfred L. Gifford, secretary of state of the State of Idaho, do hereby certify that the annexed is a full, true, and complete transcript of house joint memorial No. 2, by committee on privileges and elections, recommending the passage of the Kenyon-Sheppard bill—passed the house January 27, 1913; passed the senate February 3, 1913—which was filed in this office on the 5th day of February, A. D. 1913, and admitted to record.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State. Done at Boise City, the capital of Idaho, this 7th day of February, in the year of our Lord one thousand nine hundred and thirteen and of the independence of the United States of America the one hundred and thirty-seventh.

[SEAL.] WILFRED L. GIFFORD,
Secretary of State.

House joint memorial 2.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

Your memorialists, the Legislature of the State of Idaho, respectfully represent that—

Whereas a bill is now pending in Congress having for its purpose the guaranteeing to the respective States the fullest jurisdiction over all intoxicating liquors consigned to them from the time they enter the State, said bill being known as the Kenyon-Sheppard bill;

Whereas we believe that under the present laws the State is seriously handicapped in carrying out its policies relative to the liquor traffic, and that the passage of such act would be of great benefit to the several States: Now therefore

Your memorialists urgently recommend said bill be enacted into a law at the earliest possible time.

The secretary of state of the State of Idaho is hereby instructed to forward this memorial to the Senate and House of Representatives of the United States and copies of the same to our Senators and Representatives in Congress immediately upon the passage of the same.

This house joint memorial passed the house of representatives on the 27th day of January, 1913.

C. S. FRENCH,
Speaker of the House of Representatives.

This house joint memorial passed the senate on the 3d day of February, 1913.

HERMAN H. TAYLOR,
President of the Senate.

I hereby certify that the within house joint memorial originated in the house of representatives during the twelfth session of the Legislature of the State of Idaho.

[SEAL.] DAVID BURRELL,
Chief Clerk of the House of Representatives.

The PRESIDENT pro tempore presented a joint resolution passed by the Legislature of Ohio, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

House joint resolution 11.

Joint resolution relative to funds in the Federal Treasury and to provide for the distribution and use of the income therefrom.

Whereas there was on deposit in the Federal Treasury at the close of business January 21, 1913, to the credit of the general revenue fund the sum of $136,120,738; and

Whereas the sum of $136,120,738 represents the normal credit balance of such fund; and

Whereas the amount of such credit balance is not at this time nor prior hereto has ever been in active circulation; and

Whereas the amount of such fund should be loaned to the banking institutions of the various States on the basis of competitive bidding; and

Whereas the general business, manufacturing, commercial, and agricultural interests of Ohio, as well as of every other State, would be greatly benefited through the investment, use, and privilege of such Federal credit balance; and

Whereas the amount of revenue that should be obtained from the use of such Federal Treasury balance should be credited to the respective States in which such funds are employed; and

Whereas the total amount of interest paid by the banks of the respective States to the Federal Government should be credited to the respective States employing such fund; and

Whereas the amount so credited to such respective States should be used in constructing and maintaining highways: Therefore be it

Resolved by the General Assembly of the State of Ohio, That the Congress of the United States be, and is hereby petitioned to enact statutes providing for the deposit of funds in the Federal Treasury in any of the banks of the United States upon competitive bidding as to interest, and upon approved security. And that the income from such deposits be credited to the treasurer of the State in the respective States in which such funds were on deposit; and be it

Resolved, That the income from such deposits as are credited to the treasurer of such States having employed such funds be credited to the highway construction and improvement funds to be used as are other funds for such construction and improvement purposes; and be it further

Resolved, That the secretary of state be, and is hereby, directed to forward duly authenticated copies of this resolution to the President of the United States Senate and to the Speaker of the House of Representatives of the United States, with the request that the same be laid before the Senate and House for prompt consideration.

C. L. SWAIN,
Speaker of the House of Representatives.

HUGH L. NICHOLS,
President of the Senate.

Adopted January 20, 1913.

UNITED STATES OF AMERICA,
STATE OF OHIO,
Office of the Secretary of State.

I, Chas. H. Graves, secretary of state of the State of Ohio, do hereby certify that the foregoing is an exemplified copy, carefully compared by

me with the original rolls now on file in this office and in my official custody as secretary of state and found to be true and correct, of a joint resolution adopted by the General Assembly of the State of Ohio on the 29th day of January, A. D. 1913, entitled "Joint resolution relative to funds in the Federal Treasury, and to provide for the distribution and use of the income therefrom."

In testimony whereof I have hereunto subscribed my name and caused the great seal of the State of Ohio to be affixed at Columbus, Ohio, this 13th day of February, A. D. 1913.

[SEAL.]

CHAS. H. GRAVES,
Secretary of State.

The PRESIDENT pro tempore presented a telegram, in the nature of a petition, from Local Union No 242, United Mine Workers' Association of Iowa, praying that an investigation be made by Congress of the conditions in the strike zone of the West Virginia coal fields, which was referred to the Committee on Education and Labor.

He also presented the petition of John Buzzuffi, of New York, N. Y., and telegrams in the nature of petitions from the Polish National Alliance and the Polish Alma Mater of America, praying Congress to sustain the President's veto of the immigration bill, which were ordered to lie on the table.

Mr. TILLMAN. I present a concurrent resolution adopted by the Legislature of South Carolina, which I ask may be printed in the RECORD and be referred to the Committee on Military Affairs.

There being no objection, the concurrent resolution was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

A concurrent resolution.

Be it resolved by the house of representatives (the senate concurring), That the United States Senators and Representatives in Congress for South Carolina be, and they are hereby, requested to approve and use their influence in securing the passage of the Pepper militia pay bill, now pending in Congress, if consistent with their views as to the desirability of the legislation.

That the clerk of the house is instructed to forward a copy of this resolution to the Senators and Representatives in Congress from this State.

The house agrees to the resolution and orders that it be sent to the senate for concurrence.

By order of the house:

JAMES A. HOYT,
Clerk of the House.

The Senate agrees to the resolution and orders that it be returned to the house with concurrence.

By order of the senate:

W. M. MANN,
Clerk of the Senate.

Mr. GRONNA. I present several telegrams, in the nature of petitions, praying that the Congress sustain the veto of the President of the immigration bill. I ask that the telegrams lie on the table and be printed in the RECORD.

There being no objection, the telegrams were ordered to lie on the table and to be printed in the RECORD, as follows:

NEW YORK, *February 16, 1913.*

Hon. ASLE J. GRONNA,
United States Senate, Washington, D. C.:

The Hebrew Sheltering and Immigrant Aid Society, composed of American citizens in all parts of the country, respectfully prays that you exercise your functions as a representative of the people in Congress and refuse to pass the immigration bill (S. 3175) over the veto of His Excellency William H. Taft, President of the United States. This bill contains uncalled-for drastic provisions, which are bound to exclude from our shores decent law-abiding men and women for no good reason. No matter what the motives of the authors, this bill is based upon false notions. We are convinced as an organization, that has worked among immigrants for a quarter century and is coming in daily contact with every strata of immigration, that our immigrants in this country have made good. In their loyalty to the United States they rank next to none. In their patriotism and devotion to the principles of liberty they occupy the same place as any patriotic native American. They appreciate our glorious institutions more than a great many Americans who can trace their ancestry back for several generations. They have not given cause for the Congress of the United States to legislate for the exclusion from our shores of their kind. We are satisfied that the calm judgment of the American people is not in favor of the further restriction of immigration. Our laws provide sufficiently against the incoming of the mentally and physically unsound, and these laws are rigidly enforced by the United States Government. Our country is large enough and there are enormous stretches of land lying bare that are awaiting the human hand and brain to develop them. We pray that you do not permit the spirit of "narrow nativism" to override the just veto of the Chief Executive of this Nation.

Respectfully,

LEON SANDERS, *President.*
JACOB MASSEL, *Secretary.*

CHICAGO, ILL., *February 17, 1913.*

Hon. A. J. GRONNA,
Washington, D. C.:

Hope the veto of the immigration bill will be sustained.

A. V. EILERT,
Secretary and Treasurer Skandinaven.

NEW YORK, *February 14, 1913.*

Senator ASLE J. GRONNA,
United States Senate, Washington, D. C.:

I trust that you will do all that lies in your power to sustain the President's veto of the immigration bill.

LOUIS MARSHALL,
President American Jewish Committee.

Mr. GRONNA presented a memorial of the General Federation of Women's Clubs of North Dakota, remonstrating against the transfer of the control of the national forests of the United States to the several States, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a memorial of the congregation of the Seventh-day Adventist Church of Kulm, N. Dak., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

He also presented a memorial of the congregation of the Seventh-day Adventist Church of Kenmare, N. Dak., and a memorial of the congregation of the Seventh-day Adventist Church of Max, N. Dak., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

He also presented a petition of G. A. Fraser, Fargo, N. Dak., praying for the passage of the so-called Owen health bill, which was ordered to lie on the table.

Mr. FLETCHER presented a memorial of the Board of Trade of Tampa, Fla., and a memorial of sundry citizens of Miami, Fla., remonstrating against the enactment of legislation providing for the Federal regulation of pilots and pilotage, which were referred to the Committee on Commerce.

Mr. CULLOM presented a memorial of members of the Woman's Club of Chicago, Ill., remonstrating against the enactment of legislation transferring the control of the national forests to the several States, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of sundry citizens of Illinois, praying for the enactment of legislation to increase the compensation paid to railroads for carrying the mails, which was referred to the Committee on Post Offices and Post Roads.

He also presented resolutions adopted by the Trades and Labor Council of Danville, Ill., favoring the strict enforcement of legislation providing for the inspection of locomotive boilers and safety appliances for railway equipment, etc., which were referred to the Committee on Interstate Commerce.

Mr. SMITH of South Carolina presented a concurrent resolution passed by the general assembly of the State of South Carolina, favoring the passage of the so-called Pepper militia pay bill, which was referred to the Committee on Military Affairs.

Mr. ASHURST presented resolutions adopted by the Phoenix and Maricopa County Board of Trade, of Phoenix, Ariz., recommending that the present area of Indian reservations in the Salt River Valley and in the vicinity of the Salt River Valley be not extended, and favoring the adoption of a plan for the reduction rather than the extension of the Indian reservations, which were referred to the Committee on Public Lands.

Mr. ROOT presented a memorial of the congregation of the Seventh-day Adventist Church of the Bronx, New York, and memorials of sundry citizens of Rome and Oneida, N. Y., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. DU PONT, from the Committee on Pensions, to which was referred the bill (S. 8438) granting an increase of pension to Annie G. Hawkins, reported it without amendment and submitted a report (No. 1211) thereon.

Mr. BOURNE. From the Committee on Post Offices and Post Roads I report back favorably with amendments the bill (H. R. 27148) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1914, and for other purposes, and I submit a report (No. 1212) thereon.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

Mr. GAMBLE. From the Committee on Indian Affairs I submit a report (No. 1213) to accompany the bill (H. R. 26874) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914, which I ask may be printed.

The PRESIDENT pro tempore. The report will be received and printed.

Mr. CRAWFORD, from the Committee on Claims, to which was referred the bill (S. 8404) for the relief of Jeanie G. Lyles, reported it without amendment and submitted a report (No. 1214) thereon.

Mr. OLIVER, from the Committee on Manufactures, to which was referred the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or

transportation of adulterated, or misbranded, or poisonous, or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, reported it with amendments and submitted a report (No. 1216) thereon.

Mr. DILLINGHAM, from the Committee on the District of Columbia, to which was referred the bill (S. 4681) to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., to authorize a change in the permanent system of highway plans, to provide for the condemnation of certain streets, and for other purposes, reported it with amendments and submitted a report (No. 1215) thereon.

PAY OF OFFICERS OF THE NAVY.

Mr. SMITH of Maryland. From the Committee on Naval Affairs I report back favorably without amendment the bill (S. 7278) providing that the pay of officers of the Navy commence from the date they take rank as stated in their commissions, and I submit a report (No. 1217) thereon. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that all officers of the Navy who, since the 3d day of March 1899, have been advanced or may hereafter be advanced in grade or rank pursuant to law shall be allowed the pay and allowances of the higher grade or rank from the dates stated in their commissions.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOHN K. WREN.

Mr. BRISTOW. From the Committee on Military Affairs I report favorably without amendment the bill (H. R. 22939) for the relief of John K. Wren, and I submit a report (No. 1220) thereon. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes that in the administration of the pension laws John K. Wren, who served in Company D, Sixty-sixth Regiment Ohio Volunteer Infantry, shall be held and considered to have been honorably discharged from said company and regiment on the 16th day of December, 1863. But no rights or benefits under any law shall accrue to John K. Wren prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM KAISER.

Mr. BRISTOW. From the Committee on Claims I report favorably without amendment the bill (H. R. 16127) for the relief of William Kaiser, and I submit a report (No. 1218) thereon. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes the Secretary of the Treasury to pay to William Kaiser $565.04, the amount lost by him while postmaster at Faribault, Minn., throught the failure of the First National Bank of that city.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHRISTIAN HEDGES.

Mr. KENYON. On behalf of the senior Senator from Montana [Mr. DIXON] I report back favorably from the Committee on Military Affairs the bill (H. R. 19191) for the relief of Christian Hedges, and I submit a report (No. 1219) thereon. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committe of the Whole, proceded to its consideration. It provides that in the administration of the pension laws Christian Hedges, late captain Company G, Seventh Regiment Iowa Volunteer Infantry, shall hereafter be held and considered to have been honorably discharged from military service of the United States as a member of said regiment on the 6th day of July, 1864. But no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DEPARTMENT OF LABOR.

Mr. BORAH. Mr. President, I give notice that to-morrow, immediately following the disposition of the unanimous-consent agreement as to the veto message on the immigration bill, I shall move to take up and consider Calendar No. 856, being the bill (H. R. 22913) to create a department of labor.

Mr. SMOOT. I ask the Senator from Idaho if he intends his notice to interfere with the consideration of the District appropriation bill.

Mr. BORAH. I do not care to modify my notice. We can dispose of that question when the time comes.

Mr. SMOOT. I merely desire to call attention to it, Mr. President.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. PAYNTER:

A bill (S. 8477) to authorize and direct the Commissioners of the District of Columbia to cause to be removed all obstructions from West Virginia Avenue, in the city of Washington, in the District of Columbia; to the Committee on the District of Columbia.

By Mr. CLAPP:

(By request:) A bill (S. 8478) to provide for the sale and conveyance of the inherited Indian lands; to the Committee on Indian Affairs.

A bill (S. 8479) granting a pension to William A. Gray; to the Committee on Pensions.

By Mr. STONE:

A bill (S. 8480) to construe the name of E. T. Bourger, as the same appears in the report of Hawkins-Taylor Commission in relation to Company F, Osage County Battalion, Missouri Home Guards, to refer to Joseph Bourgeret, of Osage County, Mo.; to the Committee on Military Affairs.

A bill (S. 8481) granting a pension to Louisa Squires; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 8482) for the relief of James P. Ruggles, and others; to the Committee on Claims.

By Mr. TOWNSEND:

A bill (S. 8483) granting an increase of pension to Thomas W. Michael (with accompanying paper); to the Committee on Pensions.

By Mr. SMITH of Maryland:

A bill (S. 8484) to amend the charter of the East Washington Heights Traction Railroad Co.; to the Committee on the District of Columbia.

By Mr. BORAH:

A bill (S. 8485) granting an increase of pension to Marsena De Witt McKane (with accompanying papers); and

A bill (S. 8486) granting a pension to Sarah R. Vancourt (with accompanying papers); to the Committee on Pensions.

By Mr. WEBB:

A bill (S. 8487) to prevent the desecration of the flag of the United States and to provide punishment therefor; to the Committee on the Judiciary.

By Mr. CHILTON:

A bill (S. 8488) for the relief of Anthony Lawson; to the Committee on Claims.

A bill (S. 8489) granting a pension to George W. Cook;

A bill (S. 8490) granting a pension to A. T. Landress (with accompanying paper); and

A bill (S. 8491) granting an increase of pension to Samuel W. Ake (with accompanying paper); to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 8492) granting an increase of pension to David S. Fairchild; to the Committee on Pensions.

By Mr. McCUMBER:

A bill (S. 8493) granting an increase of pension to Emsey O. Young; to the Committee on Pensions.

A bill (S. 8494) for the relief of Charles Ashwell and others (with accompanying paper); to the Committee on Claims.

By Mr. LA FOLLETTE:

A bill (S. 8495) granting an increase of pension to Elisha L. Ashley; to the Committee on Pensions.

By Mr. BRYAN:

A bill (S. 8496) to amend section 8 of an act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes"; and

A bill (S. 8497) to repeal section 3 of an act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1900"; to the Committee on Post Offices and Post Roads.

By Mr. SMITH of Maryland:

A bill (S. 8498) for the relief of John E. Semmes, receiver of the Columbian Iron Works & Dry Dock Co., of Baltimore, Md.; to the Committee on Claims.

By Mr. BRISTOW:

A bill (S. 8499) granting an increase of pension to George W. Miller (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 8500) establishing compensation of certain customs officials; to the Committee on Finance.

A bill (S. 8501) granting an honorable discharge to George W. Biggs; to the Committee on Military Affairs.

A bill (S. 8502) granting an increase of pension to Harrison D. Boyer (with accompanying papers);

A bill (S. 8503) granting an increase of pension to Peter Banks (with accompanying papers);

A bill (S. 8504) granting an increase of pension to Margaret A. Pepper (with accompanying papers); and

A bill (S. 8505) granting an increase of pension to William H. Jackson (with accompanying papers); to the Committee on Pensions.

By Mr. NEWLANDS:

A joint resolution (S. J. Res. 161) granting permission to the Woman's Titanic Memorial Association to erect a memorial structure in Potomac Park, in the city of Washington; to the Committee on the Library.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. SMITH of Maryland submitted an amendment proposing to appropriate $80,000 for the construction of a post-office building at Cambridge, Md., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. BRISTOW submitted an amendment proposing to appropriate $1,575.55 for a pavement in front of the post office and courthouse at Salina, Kans., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. ROOT submitted an amendment proposing to appropriate $350,000 to acquire, by purchase, condemnation, or otherwise, part of the block on which the post office in the Borough of Brooklyn, city of New York, N. Y., is located, etc., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $75,000 for the purchase of a site and the erection thereon of a suitable building for the use and accommodation of the city of Waverly, N. Y., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment relative to a reissuance of Treasury drafts, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. PENROSE submitted an amendment proposing to appropriate $15,000 to increase the limit of cost for the public building at York, Pa., intended to be proposed by him to the omnibus public-buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also (by request) submitted an amendment relative to the retirement of officers of the Navy now on the retired list who prior to June 30, 1911, became incapacitated for active service by reason of physical disability incurred in line of duty, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

Mr. GUGGENHEIM submitted an amendment proposing to appropriate $225 to pay James F. Belford for services rendered as secretary to the Commission to Investigate the Pneumatic-Tube Postal System, intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

WITHDRAWAL OF PAPERS—HARRY M. OSBORNE.

On motion of Mr. GUGGENHEIM, it was

Ordered, That the papers accompanying the bill S. 737, Sixty-second Congress, first session, granting a pension to Harry M. Osborne, be withdrawn from the files of the Senate, no adverse report having been made thereon.

THE INITIATIVE AND REFERENDUM.

Mr. OWEN. I offer a substitute for Senate resolution No. 413, and ask that it be read, lie on the table, and be printed.

The resolution (S. Res. 413) was read, ordered to lie on the table, and to be printed, as follows:

Resolved, That the system of direct legislation, such as the optional initiative and referendum adopted by Oklahoma, Oregon, California, Washington, Arizona, Utah, Colorado, Montana, North Dakota, South Dakota, Missouri, Arkansas, Nebraska, Wisconsin, Ohio, and Maine, is in harmony with and makes more effective the representative system and the principle of the sovereignty of the people upon which this Republic was founded and is not in conflict with the republican form of government guaranteed by the Constitution.

Mr. OWEN. I desire to give notice that on Monday next, after the disposition of the regular routine morning business, I shall address the Senate upon the resolution.

EULOGIES ON THE LATE VICE PRESIDENT.

Mr. SMOOT submitted the following concurrent resolution (S. Con. Res. 41), which was read, considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed and bound, under the direction of the Joint Committee on Printing, 14,100 copies of the proceedings and the eulogies delivered in Congress on James Schoolcraft Sherman, late Vice President of the United States, with illustration, of which 4,000 copies shall be for the use of the Senate, 8,000 copies for the use of the House of Representatives, 2,000 copies for the use of the Senators and Representatives of the State of New York, and 100 copies, bound in full morocco, for the use of Mrs. James Schoolcraft Sherman: *Provided*, That there shall be included in such publication the proclamation of the President and the proceedings in the Supreme Court of the United States upon the death of Vice President Sherman, and an account of the funeral services at Utica, N. Y.

CONDITIONS IN THE CITY OF MEXICO.

Mr. ASHURST. I submit a resolution and ask that it lie on the table and be printed.

The resolution (S. Res. 464) was read and ordered to lie on the table and to be printed, as follows:

Whereas according to the best information obtainable by the American people and by the Senate of the United States, American citizens now residents of the City of Mexico, capital of the Republic of Mexico, have been compelled to take refuge within the American Embassy, to escape the dangers of a warfare now being conducted in the Republic of Mexico;

Whereas Americans and other noncombatants have been wounded and killed while within the shelter of their own homes and while seeking safety in the residences of the official representatives of their respective Governments; and

Whereas the American Embassy has been under fire and the life of the American ambassador and his family and other American citizens gathered there for safety have been and are jeopardized, and assaults have been made upon official representatives of the Government of the United States; and

Whereas official communications between the American Government and its diplomatic representatives in the city of Mexico are either censored or garbled by and under authority of the Government of Mexico, and foreign Governments appear to look to the Government of the United States to protect life and property and maintain a state of law and order; and

Whereas the President of the United States is quoted as having stated that Congress must share with him whatever action may be taken with regard to the present deplorable state of affairs in Mexico: Therefore be it

Resolved, That the President of the United States be, and he is hereby, requested, if not incompatible with the public interests, to transmit to the Senate full and complete copies of all correspondence, cables, telegrams, and other communications received by him or by the Department of State or by the Department of the Navy relative to conditions in the City of Mexico, and copies of all instructions sent to the American diplomatic representatives and officers of the Army and Navy in command of vessels or military forces that have been placed under orders and directed to hold themselves in readiness to protect American interests, copies of such communications and orders being necessary to the end that Congress may properly assume whatever responsibility the President at any time may believe Congress should share with him.

CONDITIONS IN PAINT CREEK, W. VA., COAL FIELDS.

Mr. BORAH submitted the following resolution (S. Res. 463), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That a committee of three Members of the Senate be appointed by the President of the Senate to make a thorough and complete investigation of the conditions existing in the Paint Creek coal fields of West Virginia, for the purpose of ascertaining—

1. Whether or not a system of peonage is maintained in said coal fields.

2. Whether or not access to post offices is prevented; and if so, by whom.

3. Whether or not our treaty obligations with other countries are being violated; and if so, by whom.

4. If any or all of those conditions exist, the causes leading up to such conditions.

5. Whether or not the Commissioner of Labor or any other official or officials of the Government can be of service in adjusting such strike.

6. Whether or not parties are being convicted and punished in violation of the laws of the United States.

Said committee, or any subcommittee thereof, is hereby empowered to sit and act during the session or recess of Congress, or of either House thereof, at such time and place as it may deem necessary; to require, by subpœna or otherwise, the attendance of witnesses and the production of papers, books, and documents; to employ stenographers to take and make a record of all evidence taken and received by the committee, and keep a record of its proceedings; to have such evidence,

record, and other matter required by the committee printed and suitably bound; and to employ such assistance as may be deemed necessary. The chairman of the committee, or any member thereof, may administer oaths to witnesses. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee or subcommittee thereof. The claim that any testimony or evidence given may tend to incriminate the person giving such evidence shall not excuse such witness from testifying, but such evidence or testimony shall not be used against such person on the trial of any criminal proceedings, except in prosecuting for perjury committed in giving such testimony. Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default, or who, having appeared, refuses to answer any questions pertinent to the investigation herein authorized, shall be deemed guilty of a misdemeanor, and upon conviction thereof be punished by a fine of not more than $1,000 nor less than $100 and imprisoned in a common jail for not more than one year nor less than one month, as provided in section 102 of the Revised Statutes of the United States.

The expenses thereof shall be paid from the contingent fund of the Senate on vouchers ordered by said committee, signed by the chairman thereof, and approved by the Committee on Contingent Expenses.

EIGHT-HOUR LAW.

Mr. BORAH. I ask the Chair to lay before the Senate the action of the House on the disagreeing votes on House bill 18787.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives agreeing to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 18787) relating to the limitation of the hours of daily service of laborers and mechanics employed upon public works of the United States and of the District of Columbia, and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia.

Mr. BORAH. I ask that the Senate concur——

Mr. BURTON. I ask that the matter may go over.

The PRESIDENT pro tempore. It will go over.

Mr. SMOOT. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 58 minutes p. m., Monday, February 17) the Senate adjourned until to-morrow, Tuesday, February 18, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *February 17, 1913.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Infinite Spirit, our heavenly Father, that we may touch hearts with Thee and feel the influx of Thy spirit mingling with our spirit and thus consciously renew our relationship with Thee, be strengthened, purified, ennobled, and led forward to new victories, new achievements in the work Thou hast given us to do. For Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

INCOME TAX.

The SPEAKER. The Chair will announce to the House, to save the trouble of reading a long document, that he has received a communication from the secretary of state of Wyoming announcing that the legislature of that State has ratified the income-tax amendment.

The communication is as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA, *State of Wyoming:*

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following copy of senate joint resolution No. 2, adopted by the Legislature of the State of Wyoming, has been carefully compared with the original, filed in this office on the 6th day of February, A. D. 1913, and is a full, true, and correct copy thereof:

Senate joint resolution ratifying an amendment to the Constitution of the United States of America granting power to Congress to levy a tax on incomes.

Whereas both Houses of the Sixty-first Congress of the United States of America, at its first session, by a constitutional majority of two-thirds thereof, made the following propositon to amend the Constitution of the United States of America in the following words, to wit:

A joint resolution proposing an amendment to the Constitution of the United States.

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed by an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution, namely:

"ART. XVI. The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionments among the several States and without regard to any census or enumeration";

Therefore be it

Resolved by the senate of the State of Wyoming (the house of representatives concurring), That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the Legislature of the State of Wyoming.

That certified copies of this preamble and joint resolution be forwarded by the secretary of state of this State to the President of the United States, Secretary of State of the United States, to the Presiding Officer of the United States Senate, to the Speaker of the House of Representatives of the United States, and to each Senator and Representative in Congress from the State of Wyoming.

By the president:

BIRNEY H. SAGE,
Secretary of the Senate.

By the speaker:

MARTIN L. PRATT,
Chief Clerk.

10.52 a. m., February 3, 1913.

JOSEPH M. CAREY, *Governor.*

In witness whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 10th day of February, A. D. 1913.

[SEAL.]

FRANK L. HOUX,
Secretary of State.

EXTENSION OF REMARKS.

Mr. SHARP. Mr. Speaker, I ask unanimous consent that there may be printed in the RECORD an article by Mr. Alfred W. Lawson, of New York, the editor and proprietor of the monthly magazine Aircraft. This article upon the subject of aviation is very interesting and illuminating and contains in it much that is of valuable information. I deem this request not inappropriate at this time, inasmuch as the subject of aerial navigation as it concerns a means of national defense and attack, will be, I believe, one of the features of the forthcoming naval appropriation bill. Other bills involving different phases of this subject are also in course of preparation and will claim our attention during the next Congress. While the zeal of the author has led him to make some recommendations with which we may not all fully agree, yet I believe his suggestions are timely and of much value, not only to Congress but to the country at large. Indeed, I believe Congress is fast coming to appreciate the importance of this new field of enterprise in its varied possibilities.

The SPEAKER. The gentleman from Ohio asks unanimous consent to print in the CONGRESSIONAL RECORD an article by Mr. Alfred W. Lawson on the subject of flying machines.

Mr. MANN. Mr. Speaker, reserving the right to object, how long is this article?

Mr. SHARP. I should think it would take probably three columns of the CONGRESSIONAL RECORD. I have made no estimate.

Mr. MANN. If the gentleman will make his request that he have leave to extend his remarks in the RECORD by printing this article, I shall have no objection.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD as indicated. Is there objection? [After a pause.] The Chair hears none.

The article is as follows:

A RECOMMENDATION TO CONGRESS.

(By Alfred W. Lawson.)

To the Members of the House of Representatives and the United States Senate:

As a private citizen I beg leave to address you, both individually and collectively, upon a subject which I consider of vital importance to this glorious Nation, upon a subject which, although new and little understood at present, must within a very short period take its place at the very head of human interest and progress. I allude to air craft and air navigation.

I want to point out to you a few facts in connection with what has already been accomplished in this new method of transportation and what reasonable development may be expected in the immediate future, and I want to show you with facts and figures and argument just why it becomes necessary at this time for Congress to give this subject most careful consideration and bring to bear upon it that rare good judgment and foresight which anticipates and avoids difficulties with preparedness, and thereby demonstrates the wisdom that distinguishes the preeminent minority from the eminent majority. In offering this address, gentlemen, I fully recognize the great number and variety of present-day problems you have to occupy your time, and, of course, it would be unreasonable to expect that you had given any especial attention to the development or the possibilities of air transportation during its embryo state; nor could you have been expected to do so when taking into consideration that the majority of our American publicists have seen fit to only spread broadcast the gruesome and sensational side of the subject, and thereby harass American progress, in contradistinction to the attitude of the publicists of European countries, who endeavor to educate their people in the scientific and industrial value of the movement.

So I address you, gentlemen, as one who has given much time and thought to this great subject—a specialist in this line, you might say—and give you the benefit of five years' constant investigation of the matter, summed up in the fewest possible words and relating only to that which concerns the people of the United States the most. I address you as one who knows.

I speak not as the elastic dreamer, who overleaps at a bound all the obstacles which naturally block up the passageway of progress and which require years to remove, nor as the habitual doubter who, with eyes in the back of his head, can see nothing to the fore, and naturally scouts and denies the possibilities of progress of any nature whatsoever.

I speak as one who has studied closely the lines of air-craft development, its possibilities and probabilities, and calculated conservatively regarding the time necessary to overcome certain mechanical and human obstacles while attaining its natural and healthy growth. By knowing the facts and carefully weighing the theories I have obtained a perspective from which my views on the subject should be as clear

on what has already taken place and that which should follow—as effects follow causes—as it is possible for a frail mentality to acquire.

I may say here that owing to my having acted in the capacity of editor in chief of two aeronautical periodicals during the past five years my opportunities have been unusually extended for obtaining authoritative information as well as the views of the best-informed men throughout the entire world upon the different phases of the movement, which practically enables me to arrive at very substantial conclusions.

So, to begin with, I will state that the time has now arrived for this Nation to start the construction of a great aerial fleet, both for offensive and defensive purposes. In fact, in view of the great progress already made by other nations along this line, further delay on our part must be considered little short of criminal negligence. Delay is jeopardizing the best interests of our people in general and the efficiency of our Army and Navy in particular. For every year we delay now two or more years will be required later to overtake other nations, who now lead us and who are increasing that lead with every setting of the sun.

As I write the United States of America stands thirteenth on the list of Governments who have made expenditures for the purpose of aerial development. China still ranks below us, but so pitifully insignificant have been the American appropriations for this work that China could overtake and go beyond us in a day.

It can be seen from the table which accompanies this address that Germany leads the countries of the world in governmental expenditures, having to date spent approximately $12,000,000 for their aeronautical equipment, and if you will pause momentarily to compare Germany's $12,000,000 with America's $300,000 expenditure you can see at a glance the awful inferiority of our position. For this amount Germany has acquired 320 aeroplanes, 22 dirigibles, and 9 great military sheds, as against 19 aeroplanes, 1 puny dirigible, and 1 military shed of the United States Government.

If you compare the United States position with that of France, it is almost as bad, as France has expended approximately $9,000,000, for which they can show 300 aeroplanes, 19 dirigibles, and 7 sheds.

Russia, Italy, England, Japan, Brazil, Belgium, Greece, Bulgaria, and Spain also outrank us in governmental work. Not only do these countries lead us, but they are running away from us as a greyhound can run away from a snail. Furthermore, almost every little second, third, fourth, and fifth rate country in the world is showing more governmental activity in aeronautics than this Government. For instance, as I speak new reports have just reached me that little Belgium has decided to purchase 27 more aeroplanes, while such countries as Denmark, Greece, etc., are making preparations to acquire large numbers of machines in the near future.

The haste made to equip aerially by these different countries, and the feverish haste made by Germany and France in particular, with Japan just getting a flying start, has more significance than the average mind comprehends. There are great scientists and famous war strategists in harness to-day who will tell you that within a few years "that country's air fleet which controls the air above will control the ground or water below"; and whether or not their predictions will be fulfilled the fact remains that there are at least a half dozen countries who are now preparing for just such a state of affairs.

The purpose of this address, however, is not to delve so much into the future as it is to show you just what exists at present and what could happen now in case war broke out between the aerially armed foreigner and the aerially unarmed United States. Germany, for instance, could play havoc with this country if war broke out to-day. Yes, within 30 days they could have within our shores and right up over our heads at least 10 great armor-clad air cruisers of the Zeppelin and Schuette-Lanz types and 200 or more of the latest pattern war aeroplanes. How, you ask? The easiest way possible. These 10 great air cruisers could be accompanied across the ocean by a flotilla of steamships with supplies, just as a fleet of naval vessels are accompanied by colliers and supply ships on their long voyages.

They could be reprovisioned, regasolined, and recharged with hydrogen gas as often as necessary en route by these supply ships, and again innumerable times while standing off our very shores, say, a hundred miles away and out of sight of our forts and fleets. (The word airship should only be used when referring to a rigid dirigible—that is to say, it should depend upon a solid structure, a hull braced from the inside, for its rigidity, instead of depending on the pressure of the gas itself. It should have separate and independent gas chambers, which should perform the same functions as the air-tight compartments of an ocean steamship, and be able to carry a large number of passengers. It is about as foolish to call one of those little two or three passenger-carrying dirigible balloons as an airship as it would to refer to a two or three passenger-carrying motor boat as a steamship. To call an aeroplane an airship shows absolutely no aeronautical breeding whatsoever.) These airships, which have a radius of action of about 1,200 miles, and are capable of staying in the air for 48 hours without the necessity of having to be restocked with gasoline or hydrogen, could float over our forts and fleets as though they never existed and find their way right to the very hearts of our great cities. New York, Boston, Philadelphia, Baltimore, or Washington could be put in a terrible state of panic by the very knowledge of these monsters being above them loaded with explosives and rapid-firing guns such as all the latest German air cruisers are now fitted with.

It would require but two or three of these great ships of the air to float over Washington and lay its magnificent public buildings in waste. They could pour down shot and shell, in fact, tons of ignitible explosives right over the Halls of Congress themselves, and the strangest part of the whole affair would be our absolute helplessness to prevent it. They could come and go by day or by night without opposition by merely rising high enough. All they would have to do would be to discharge their cargo of explosives and return over our great fortresses, without fear or harm, to their ocean convoy, reload, and repeat the operation as often as time would allow.

Furthermore, while Germany also has a great naval fleet that could back them up, even this would be hardly necessary, for the reason that a few air scouts could find and remain in constant touch with our own warships, and by wireless telegraphy post their convoy steamships as to their location and movements, thereby enabling the cheaper, unarmed supply ships to keep out of the way of the high-priced war vessels.

Besides the 10 big, powerful armor-clads of the air (Zeppelin and Schuette-Lanz types), each of the Germany supply ships would be accompanied by many hydroaeroplanes, to be utilized for scout work as well.

Such feats could be performed to-day; what I am saying is not relating to the future. Germany has these airships now; they are armed, tried, proved, officered, manned, and being experimented with constantly, and with each and every day's development Germany is getting nearer and nearer to the vital points of America, from a war viewpoint, while the great strides they have already made and are still making over there are so far in advance of us that even if we begin immediately to push forward it will require years before we can overtake them.

I do not want to overload you with statistics, but can not resist the temptation to call your attention to some figures recently compiled by the Zeppelin Co. concerning the performances of their airships from January 1, 1912, to December 1, 1912, which will give some idea of the magnitude of air traffic as now practiced in Germany.

Out of 334 days Zeppelin airships were operated during 308 days, with the total number of hours in the air 1,167, during which time a distance of 41,145 miles were covered and 10,291 people carried (4,682 passengers and 5,609 crew).

One single airship—the *Viktoria Luise*—made 225 trips, with a total duration of 497 hours, covering 17,737 miles in an air line and carrying 4,336 people (2,409 crew and 1,927 passengers).

It might also be stated here that during all of these trips, or any others made by the Zeppelin ships previously, there has never occurred one fatal accident—read again, very slowly and thoughtfully, during the many years of experimentation, and in many cases accidents to the ships, of the hundreds of trips made and tens of thousands of miles covered and tens of thousands of passengers carried, not one life was lost from a Zeppelin airship. Strange, isn't it, especially after your favorite editor has been repeatedly telling you how man's efforts to navigate the air was draining the population of the world.

Aerial fleets and expenditures of the different Governments (approximate).

Country.	Government aeroplanes.	Government dirigibles.	Government expenditures.
1. Germany	320	22	$12,000,000
2. France	300	19	9,000,000
3. Russia	150	10	6,000,000
4. Italy	125	8	4,000,000
5. Austria	100	7	3,000,000
6. England	60	6	2,500,000
7. Japan	50	4	1,000,000
8. Belgium	40	2	800,000
9. Brazil	18	3	500,000
10. Bulgaria	35	.....	350,000
11. Greece	30	.....	325,000
12. Spain	20	2	310,000
13. United States[1]	19	1	300,000
14. Roumania	14	.....	200,000
15. Denmark	10	1	150,000
16. Holland	8	.....	100,000
17. Turkey	6	.....	80,000
18. Mexico	6	.....	70,000
19. Norway	5	.....	60,000
20. Servia	3	.....	50,000
21. Argentina	3	.....	40,000
22. China	2	.....	30,000
23. Montenegro	1	.....	15,000

[1] The estimate on the United States includes the appropriation of March 3, 1911, for $125,000 and that of August 24, 1912, for $100,000 as well as allowing $75,000 expenditure of the Navy to date.

It must be understood that with air craft was born an entirely new science of engineering and navigating and that airship engineers and navigators of the air must be educated and developed with the same care and attention that is bestowed upon marine engineers and navigators—in fact more so, because it requires a higher developed mentality to succeed in the new order of things.

Great air cruisers can not be built in a day, neither can men be trained to man them in a day. It requires years of actual experimentation through a course of development from the seed upward.

An idea prevailed in the British Navy a short time ago that an airship could be built by British engineers to equal or surpass the qualities of a German Zeppelin. Yes, the product of the English constructors, who had never built airships before, was to be as good or better than the product of the Germans who had spent years in the accumulation of practical experience in airship construction and operation. So an order was given to one of the largest engineering concerns in England for a great Zeppelin type, rigid airship. Well, the ship was built according to the specifications of some men who had spent much valuable time in figuring and theorizing, but who, unfortunately, had had no actual training or experience, with the result that while it looked like a Zeppelin it acted quite differently when let loose into the great highway above. To be short, it lacked the main essentials of a Zeppelin—knowledge and experience gained from years of trials and failures—and upon one of its first test trials it came to an untimely end by breaking into two separate and distinct parts.

Just what happened in England is just what would no doubt happen in America if one of our great engineers in some other line undertook to build a "Zeppelin" or a "Schuette-Lanz" without first passing through a long course of airship study, experimentation, and some failures. Our greatest engineer in any other line would be a mere novice in airship construction. In fact, he would probably be worse than a novice because he would try to inject his old methods and principles into an entirely new dimension.

So with Germany several years in the lead in airship construction and air navigation, enjoying the benefit of a great fighting fleet of air cruisers manned by crews trained right up to the minute and America without an air fleet, without airship constructors, and without men educated and trained in air navigation, this country, in case of war with Germany would present about as pitiable a sight during the conflict as that presented by the savage Filipino tribesmen who undertook to fight with their bows and arrows and antiquated firearms our trained American soldiers with their up-to-date quick-firing guns.

Now, if Germany with a great aerial fleet could blind us with a rain of fire and explosives from above to-day, Japan could do the same thing to-morrow, for that country is even now stealthily collecting a fleet of both aeroplanes and dirigibles, and what is more, they are experimenting with them and training their best men to handle them. The Japanese fleet could lay off of any of our western coast cities from Seattle to

Panama and by utilizing the very latest up-to-date aeroplanes and airships could fly over our forts and fleets as though they never existed. Luckily for us Japan has not made the great strides in aerial methods that Germany has yet. She started later; in fact, she started later than the United States, but within one short year she has outdistanced us in governmental appropriations for aeronautical work at a ratio of about 8 to 1.

If Japan keeps up this ratio of aerial progress within the next five years, and the United States persists in remaining inactive as it has done almost entirely during the past four years, Japan will have gained an advantage, from a war standpoint, which it will require at least from 5 to 10 years of our best efforts to overcome, while, if war broke out between the two countries in the meantime, we surely would have to pay a terrible penalty for our procrastination.

Not only does the expenditure of huge sums of money by the different Governments for aerial purposes develop war strength for those countries, but it also aids in the development of their industrial side as well. For instance, because the Government of France spent several millions of dollars for the purchase of aeroplanes, the manufacturers of aeroplanes in France secured a tremendous advantage over the aeroplane manufacturers of the United States for the simple reason that it gave the Frenchmen a home market to dispose of their machines and consequently that much more money to carry on the work with. This naturally induced some of the greatest engineers in France to enter the industry, and when it was found that the Government spent its money for flying machines capital in quantity then became available for building and experimental purposes, with the result that the American manufacturer with little or no capital at his disposal and no governmental market for his product found great difficulty in trying to compete in the world's market with his French rival, who was nursed, so to speak, upon governmental supplies during his infancy period. So it can readily be seen that the knife is cutting both ways against America—it cuts both in war and industry.

Therefore for the reasons mentioned and many other good reasons I could offer, if I could but have your time and attention, I herewith recommend that Congress immediately appropriate the sum of $10,000,000 for the purpose of creating an adequate American aerial fleet of both aeroplanes and airships, together with their necessary equipment as well as the cost of their operation.

And, furthermore, I recommend that Congress immediately pass a bill giving both the Army and Navy the power to enlist a sufficient number of officers and men to be educated in the theory and trained in the practice of aerial maneuvers.

I also recommend that the duty be taken off foreign airships (rigid dirigibles) for a period of two years from date in order to stimulate the importation of a few of these leviathans which would eventually lead to their construction in this country.

And, again, I recommend that suitable provision be made to subsidize airships, either manufactured or operated by properly organized companies in the United States of America, that their ships of the air can be utilized by this Government in case of war or during maneuvers in times of peace. These airships, of course, at other times would be used for passenger-carrying service between important points.

While I recommend the temporary suspension of the tariff from airships (rigid dirigibles) for the reason that we have no concerns in this country who have demonstrated their ability to construct them, still I would like to have it distinctly understood that I am in favor of a heavy tariff being placed on aeroplanes, for the reason that there are a number of well-organized, well-equipped American concerns capable of building aeroplanes equally as good, if not better, than the foreigners, and as home industries should be encouraged in the United States as they are encouraged in other countries, I furthermore recommend that every heavier-than-air machine, whether it be of the overland or over-water variety, purchased by the United States Government, must be made in whole or in part entirely upon United States soil. For our air fleet in war will eventually develop only that efficiency that we are capable of putting into it ourselves, and it is a thousand times better for this Government to purchase now even a slightly inferior flying machine from a home manufacturer, and thus enable him to enlarge and improve his efficiency with the use of the purchase money, than to buy a better machine from a foreign concern, thus enabling it to still further increase its power over the American manufacturer with the use of our capital. This rule should be made effective at least until such time as the infant industry in America has developed to a point where it can maintain its standard without favor.

The policy of this country should be to have as efficient an air force as any other country in the world, and in order to do so we must figure on overtaking the countries who are now leading us. To overtake Germany, for instance, would require at least five years' time, so that if this should be our aim, in order to do so by the year of 1919, we must arrange a progressive policy in aeroplane and airship addition which will permit us to catch up instead of falling further behind. At a very conservative estimate I place the German air fleet in the year of 1919 at more than 100 dirigibles and more than 1,500 aeroplanes, so that if we intended to catch her or take a leading position with the great aerial powers of the world it will be necessary for us to outline our policy and begin work along this line at once with these figures as the goal.

No less than 150 aeroplanes and 2 rigid dirigibles should be added to our forces this year, with at least three military airship sheds. One of these sheds should be erected in the Panama Canal Zone, while one should be located somewhere along the North Atlantic coast, and the other somewhere on the Pacific seaboard.

Above all things it should not be forgotten that suitable provision must be made immediately for the enlistment of a large enough force of officers and men to be thoroughly trained in up-to-date airmanship. At the present time Germany has over 300 trained aeroplane pilots, in addition to several hundred trained men for the navigation of airships—an air force that altogether exceeds 600—whereas we have in our United States service less than a dozen trained airmen, and, worse still, no provision has yet been made for that purpose. The few members that can be spared for that sort of work by the Signal Corps in the Army or those taken from the ranks of Navy officers make up our entire air force.

It is to be hoped, therefore, gentleman that the foregoing recommendations will receive your most earnest consideration and support, and that the position, honor, and power of this country may not be further jeopardized through lack of progressive action.

No man can serve his country in a more worthy manner than by adding his mite toward the development of nature's latest and greatest gift to mankind—the power to navigate the air.

Respectfully submitted.

ALFRED W. LAWSON,

HOMESTEAD ALLOTMENTS, CHOCTAW AND CHICKASAW NATIONS.

The SPEAKER. The Clerk will report the first bill on the Unanimous Consent Calendar.

The Clerk read as follows:

A bill (H. R. 25507) to authorize certain changes in homestead allotments to the Choctaw and Chickasaw Nations in Oklahoma.

Mr. BROUSSARD. Mr. Speaker, when the House adjourned the other day the bill H. R. 25762 was under consideration, and on my motion it was passed without prejudice for consideration this day.

The SPEAKER. What was the statement of the gentleman?

Mr. BROUSSARD. I stated, Mr. Speaker, that on the last unanimous-consent day the House had under consideration the bill H. R. 25762. It was not completed, and it was passed on my motion for consideration this day without prejudice, so that that bill is the unfinished business of the last unanimous-consent day.

Mr. MANN. Mr. Speaker, there was no unfinished business on unanimous-consent day.

The SPEAKER. It seems to the Chair the gentleman from Louisiana is mistaken about what happened. That bill was called up and the gentleman asked to pass it over without prejudice. That is all that was done to it.

Mr. BROUSSARD. Well, does not it come up as the first thing this morning?

The SPEAKER. It would come up in its natural place on the calendar, wherever that is.

Mr. BROUSSARD. All right, Mr. Speaker.

The SPEAKER. There is no such thing as unfinished business on Unanimous Consent Calendar. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 25507) to authorize certain changes in homestead allotments of the Choctaw and Chickasaw Indians in Oklahoma.

Be it enacted, etc., That the Secretary of the Interior is hereby authorized and directed to set aside from the homestead allotment of the Choctaw and Chickasaw Indians in Oklahoma, duly and legally enrolled as of one-half or more Indian blood, a homestead of 80 acres, which shall be subject to all the restrictions now prescribed by law for homesteads of Choctaw and Chickasaw allottees of one-half or more Indian blood.

SEC. 2. That all restrictions upon lands belonging to allottees of less than three-quarters Indian blood, as shown by the tribal rolls, which are by this act changed from homestead to surplus allotments, shall immediately after such change as made be removed.

SEC. 3. That by and with the consent of the allottee the Secretary of the Interior is hereby authorized and directed to cause to be sold, at a fair price, all or any portion of the surplus allotments of the Choctaw and Chickasaw allottees of three-quarters or more Indian blood and pay over to such allottee or his guardian not less than one-fourth of the proceeds of such sale, and to invest and reinvest the remainder of such proceeds in permanent improvements upon the remaining unsold homestead, or as the best interest of such allottee may require, with authority to pay over all or any part thereof to such allottee in the discretion of the Secretary of the Interior.

SEC. 4. That the Secretary of the Interior be, and he is hereby, authorized to prescribe such rules, regulations, terms, and conditions, not inconsistent with this act, as he may deem necessary to carry out its provisions: *Provided*, That final payment by the purchasers of land hereunder shall not be deferred longer than five years after the sale is made, and interest on such deferred payments shall not be charged to exceed 5 per cent per annum: *Provided further*, That nothing contained herein shall be construed to prohibit the Secretary from removing restrictions upon such allottees as may, in his opinion, be fully competent, nor to impose restrictions removed from land by or under existing law.

Mr. BURKE of South Dakota. Mr. Speaker, the bill which has been called is a bill of the gentleman from Oklahoma [Mr. CARTER], who is absent in Oklahoma at present by consent of the House. The chairman of the committee that reported this bill does not happen to be present, and I ask unanimous consent that the bill be passed over.

Mr. GARRETT. Mr. Speaker, reserving the right to object, will the gentleman state what effect that will have, as this is the last unanimous-consent day——

Mr. MANN. Mr. Speaker, I reserve the right to object.

Mr. GARRETT. Mr. Speaker, I reserved the right to object.

Mr. MANN. I was going to call the attention to what effect it would have and then object. The rule provides that the Unanimous Consent Calendar is called on suspension day. The last six days of the session are suspension days, and the Unanimous Consent Calendar, therefore, is on call on the last six days of the session.

The SPEAKER. Is the gentleman certain of that?

Mr. MANN. I am absolutely certain of it.

The SPEAKER. That unanimous-consent business is in order on the last six days?

Mr. MANN. I am, Mr. Speaker, and the practice in the last Congress was, not that unanimous-consent bills were taken up every day immediately after the reading of the Journal when nobody demanded the regular order, but that the Unanimous Consent Calendar, during the six days, was called when it was convenient for the House or when anybody demanded the regu-

lar order. And as no one can tell when the Unanimous Consent Calendar will be called during the last six days, I shall object to passing over any bill on the Unanimous Consent Calendar to-day.

Mr. BURKE of South Dakota. The question I will submit is in the form of a parliamentary inquiry. The gentleman from Illinois [Mr. MANN] says that the Unanimous Consent Calendar will be in order on the last six days, and therefore he proposes to object to all bills on the Unanimous Consent Calendar to-day where there is a request to pass them over without prejudice. My parliamentary inquiry is, Can not a bill which has been on the calendar only once be placed upon the calendar again if it goes off by objection to-day?

The SPEAKER. Of course it can.

Mr. GARRETT. Mr. Speaker, if the gentleman will permit, I understood the gentleman from Illinois [Mr. MANN] to state that during the last six days it would not be possible to know at what hour or what time the Unanimous Consent Calendar might be called.

Mr. MANN. I take it that under the rule it could be required to be called at the time fixed by the rule. As a matter of convenience in the House during the last six days of the last Congress the only time we had practically was where during the last six days the Unanimous Consent Calendar was called at the convenience of the House.

Mr. GARRETT. The rule, of course, provides that on the days when it is in order to move to suspend the rules that the Unanimous Consent Calendar shall be called immediately after the approval of the Journal?

Mr. MANN. Yes; I understand. I object.

The SPEAKER. We might as well have this matter settled. If this rule is construed literally, then the last six days you will not do anything except to call this Unanimous Consent Calendar and have suspension of the rules?

Mr. MANN. If the Chair will permit, if this rule should be construed literally, and anyone should insist on the regular order during the last six days for the calling of the Unanimous Consent Calendar, it would not take more than about two minutes to dispose of all the bills on it, because all the bills would be objected to as soon as the number and the title were read.

The SPEAKER. Everybody understands the last six days will be largely taken up with appropriation bills and conference reports.

Mr. MANN. Undoubtedly. There was no trouble in the working of the rule before, and I apprehend there will be no trouble again.

Mr. NORRIS. And I would like to suggest, Mr. Speaker, that these motions must be on the calendar at least seven days.

Mr. GARRETT. Three days.

Mr. NORRIS. Three days. So that by mere lapse of time if the calendar is once cleared, you will not be able to put any of them on again.

Mr. HARDWICK. If the gentleman from Illinois will permit, I want to suggest that while motions to suspend the rules are in order during the last six days as well as unanimous consents, according to the calendar, yet neither one of them would interfere in the slightest with the consideration of conference reports on appropriation bills. It is a matter for consideration of the Chair. They are not of higher privilege than the consideration of conference reports or appropriation bills. The latter two would come first, I think.

The SPEAKER. Has the gentleman read the rule?

Mr. HARDWICK. Yes, sir.

Mr. MANN. I suggest to the Speaker no one can hold up the House by the Unanimous Consent Calendar or by demand for the regular order, because if anyone demands to do that it is a very short shift to dispose of the Unanimous Consent Calendar by objection.

The SPEAKER. Does the gentleman from Illinois [Mr. MANN] object to that bill?

Mr. MANN. I did, and to its being passed over.

The SPEAKER. Did he object to its being passed over without prejudice?

Mr. MANN. I objected to its being passed over without prejudice and I objected to its consideration.

Mr. CLAYTON. Mr. Speaker, may I ask the gentleman from Illinois a question? There was some confusion in the House and some of us over here did not perhaps catch the gentleman's statement. We desire to know whether the gentleman stated that he would object to every bill which would be called up to-day under unanimous consent?

Mr. MANN. Oh, not at all. I said that I should object to bills being passed over without prejudice.

Mr. CLAYTON. Now I understand the gentleman. There was so much confusion that I could not hear the gentleman's statement.

The SPEAKER. That bill will be stricken from the calendar, and the Clerk will report the next one.

STANDARD BARREL FOR DRY COMMODITIES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 23113) to fix the standard barrel for fruits and vegetables.

The title of the bill was read.

Mr. TUTTLE. Mr. Speaker, I ask unanimous consent that the Clerk read the committee substitute in lieu of the original bill.

The SPEAKER. The gentleman from New Jersey [Mr. TUTTLE] asks unanimous consent that the substitute be read in lieu of the original bill. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the substitute.

The Clerk read as follows:

That the standard barrel for fruits, vegetables, and other dry commodities shall be of the following dimensions when measured without distention of its parts: Diameter of head inside of staves, 17¼ inches; distance between heads, inside measurement, 26 inches; the outside bilge or circumference shall not be less than 64 inches; and the thickness of staves not greater than four-tenths of an inch: *Provided*, That any barrel of a different form having the same distance between heads and a capacity of 7,056 cubic inches shall be a standard barrel.

SEC. 2. That it shall be unlawful to sell, offer, or expose for sale in any State, Territory, or the District of Columbia, or to ship from any State, Territory, or the District of Columbia to any other State, Territory, or the District of Columbia, or to a foreign country, a barrel containing fruits or vegetables or any dry commodity of less capacity than the standard barrel defined in the first section of this act or subdivision thereof known as the half barrel; and any person guilty of a violation of any of the provisions of this act shall be liable to a penalty of $1 and costs for each barrel so unlawfully sold or offered for sale or shipped, as the case may be, to be recovered at the suit of the United States in any court of the United States having jurisdiction: *Provided, however*, That no barrel shall be deemed below standard within the meaning of this act when shipped to any foreign country and constructed according to the specifications or directions of the foreign purchaser, if not constructed in conflict with the laws of the foreign country to which the same is intended to be shipped.

SEC. 3. That reasonable variations shall be permitted, and tolerances shall be established by rules and regulations made by the Director of the Bureau of Standards and approved by the Secretary of Commerce and Labor. Prosecutions for offenses under this act may be begun upon complaint of local sealers of weights and measures, or other officers of the several States and Territories appointed to enforce the laws of the said States or Territories, respectively, relating to weights and measures: *Provided, however*, That nothing in this act shall apply to barrels used in packing or shipping cranberries or commodities sold exclusively by weight.

SEC. 4. That this act shall be in force and effect from and after the 1st day of July, 1913.

Mr. HAY. Mr. Speaker, I reserve the right to object.

Mr. AUSTIN. Mr. Speaker, I am going to insist on an objection to all reservations of points of order on all of these bills.

The SPEAKER. Is there objection?

Mr. FIELD. I object, Mr. Speaker.

The SPEAKER. The bill will be stricken from the calendar. The Clerk will report the next one.

EFFICIENCY OF PERSONNEL OF NAVY AND MARINE CORPS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 24225) to amend an act entitled "An act to reorganize and increase the efficiency of the personnel of the Navy and Marine Corps of the United States," approved March 3, 1899.

The Clerk began the reading of the bill.

Mr. MANN. Mr. Speaker, I reserve the right to object.

Mr. AUSTIN. Mr. Speaker, there will be no reservations of any points of order on any of these bills. I give notice now.

Mr. GARNER. The bill has not been read yet.

Mr. MANN. I was reserving the right to object for the purpose of asking one question, whether the author of the bill would be willing to substitute a repealing clause for the "plucking board" section instead of the proposition to amend it, because I shall object unless the section can be repealed.

The SPEAKER. The Chair does not know who is the author of the bill.

Mr. AUSTIN. I demand the regular order, Mr. Speaker.

Mr. GARNER. Let the bill be read.

The SPEAKER. The regular order is the reading of this bill.

Mr. MANN. I object.

The SPEAKER. Objection is made, and the Clerk will report the next one.

BRIDGE ACROSS MISSISSIPPI RIVER, BATON ROUGE, LA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 25762) for the construction of a bridge across the Mississippi River at or near Baton Rouge, La.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Baton Rouge Bridge & Terminal Co., a corporation organized under the laws of the State of Louisiana, its successors and assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge, and all approaches thereto, across the Mississippi River at or near the city of Baton Rouge, La., at a point suitable to the interests of navigation, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That said bridge shall be so constructed, maintained, and operated that, in addition to its use for railroad trains and trolley cars, it shall provide for a separate roadway and approaches and continuous use by the public as a highway bridge, to be used for all kinds of highway traffic and travel, for the transit of which reasonable rates of toll may be charged and received, but no rate for passage of a single passenger on a railroad train shall exceed 25 cents.

SEC. 2. That the Interstate Commerce Commission shall have authority to make rules and regulations for the use of this bridge by any other common carrier engaged in interstate commerce at any time any other such common carrier may desire to use it jointly, and the Interstate Commerce Commission is authorized to fix charges for any such joint use, and such charges shall be based upon the relation that the proportionate use of each carrier bears to the interest of the net income from the sale of bonds to the amount of the actual cost of construction.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, I desire to ask the gentleman from Louisiana [Mr. BROUSSARD]——

Mr. AUSTIN. I demand the regular order.

The SPEAKER. The regular order is demanded. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Speaker, I do not desire to use all the time to which I would be entitled. I rise merely for the purpose of asking a question which was not thoroughly answered when this bill was up for consideration before. If the gentleman from Louisiana [Mr. BROUSSARD] will kindly consent to answer, I think the matter can be settled very quickly. This bridge is to be constructed across the Mississippi River about 2,500 miles from its source. It is to be at substantially the lower terminus of this great inland waterway. Much money has been appropriated by the Government for the improvement of the Mississippi River for navigation purposes, and the expenditure of much more money is contemplated. I want the gentleman to state, if he will, whether the construction of this bridge at this point will impede navigation or interfere with the work that is being done for the prevention of floods or will in any way impair the results of the enormous expenditure upon the Mississippi River or the expenditure which is contemplated.

Mr. BROUSSARD. The construction of this bridge will not do any of the things which the gentleman inquires about, and the report of the engineer, which is embodied in the report of the committee upon the construction of the bridge, states that the bridge to be constructed upon plans to be approved by the Chief of Engineers will not interfere with navigation or with the use of the money expended for the improvement of the river.

Mr. MOORE of Pennsylvania. Then I understand the gentleman brings the bill into the House with the assurance of the War Department that the navigation of the Mississippi will not in any way be impeded?

Mr. BROUSSARD. Yes. Here is the report of the engineer:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, August 15, 1912.

Respectfully returned to the Secretary of War.

The accompanying bill (H. R. 25762, 62d Cong., 2d sess.) authorizing the construction of a bridge across the Mississippi River at or near Baton Rouge, La., is in the usual form and makes ample provision for the protection of navigation interests.

So far as those interests are concerned, I know of no objection to its favorable consideration by Congress.

W. H. BIXBY,
Chief of Engineers, United States Army.

Mr. MOORE of Pennsylvania. One further question. Has the gentleman fully considered, or have his constituents fully considered, the possible danger that a bridge constructed at this point might be in the event of floods?

Mr. BROUSSARD. Yes; and that is all provided for.

Mr. MOORE of Pennsylvania. There will be no backing up or overflowing of the land by reason of the construction of the abutments of the bridge?

Mr. BROUSSARD. No; it is proposed to build that bridge at least 125 feet above the water level, and I learned from the engineer's office that the span must be at least 1,000 feet, which is 220 feet wider than the span of the bridge at St. Louis, so that there will be no obstruction to navigation.

Mr. MOORE of Pennsylvania. Mr. Speaker, I have no objection.

The SPEAKER. It is too late to object anyway. The Clerk will report the first amendment.

The Clerk read as follows:

Amend, page 1, lines 6 and 7, by striking out after the word "bridge" in line 6, the comma and the words "and all approaches thereto."

The amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 2, strike out all of section 2.

The amendment was agreed to.

The Clerk read the next amendment, as follows:

Page 2, line 20, strike out the figure 3 and insert the figure 2.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time, and passed.

On motion of Mr. BROUSSARD, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 27941. An act making appropriations for the support of the Army for the fiscal year ending June 30, 1914.

ENROLLED BILLS SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 14053. An act to increase the pension of surviving soldiers of Indian wars in certain cases.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 3873. An act for the relief of Lewis F. Walsh;

S. 4030. An act for the relief of Sylvester W. Barnes;

S. 186. An act for the relief of Francis Grinstead, alias Francis M. Grinstead;

S. 5262. An act for the relief of Sylvester G. Parker;

S. 2733. An act for the relief of the estate of Almon P. Frederick; and

S. 104. An act for the relief of Carl Krueger.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 14053. An act to increase the pensions of surviving soldiers of Indian wars in certain cases.

ARMY APPROPRIATION BILL.

Mr. HAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Army appropriation bill, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The Clerk will report the bill by title and read the amendments.

The Clerk read the title of the bill (H. R. 27941) making appropriations for the support of the Army for the fiscal year ending June 30, 1914.

Mr. HAY. Mr. Speaker, I did not want to have the amendments read. I wanted to save time.

The SPEAKER. The gentleman from Virginia asks unanimous consent to take the bill from the Speaker's table, disagree to the Senate amendments, and ask for a conference. Is there objection?

Mr. RODDENBERY. Mr. Speaker, I object, in order that the bill may go to the committee.

The SPEAKER. The gentleman from Georgia objects.

Mr. HAY. Mr. Speaker, I ask unanimous consent that the bill may be printed with the Senate amendments numbered.

Mr. MANN. If it is referred to the committee, it does not require unanimous consent.

Mr. HAY. I ask that it be referred to the Committee on Military Affairs.

The SPEAKER. It is referred to the Committee on Military Affairs.

The Clerk will report the next bill.

EXCHANGE OF CONVEYANCES.

The next business on the Calendar for Unanimous Consent was the bill (S. 1589) to authorize the exchange of conveyances between the Florida East Coast Railway Co. and the United States.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and empowered to exchange conveyances with the Florida East Coast Railway Co. for the adjustment of a boundary line between the military reservation of Key West Barracks, on the island of Key West, Fla., and the land in front of said reservation filled in by said railway company under permission of the Secretary of War, as authorized by law, in accordance with the memorandum of agreement between

said railway company and Maj. George G. Bailey, quartermaster, United States Army, dated December 5, 1910, which agreement is hereby ratified.

The SPEAKER. Is there objection?

Mr. HAMLIN. Reserving the right to object, Mr. Speaker, I think we ought to have some little explanation of this bill. I hold the report in my hand, and it gives no sort of information, except that the committee has considered it and reports it favorably.

Mr. SPARKMAN. It is true, Mr. Speaker, that the House committee report is very meager and gives no information as to the purpose of the measure; but it is a Senate bill, and the Senate committee's report is quite full and instructive.

Mr. HAMLIN. Then the Senate report ought to have been incorporated in the House report.

Mr. SPARKMAN. I agree with the gentleman. The purpose of the bill is, as the Senate report shows, to carry into effect an agreement entered into between the East Coast Railway Co., on the one hand, and the War Department, representing the Government, on the other. It seems that under a provision that was incorporated in the Army appropriation bill of 1907 the East Coast Railway Co. went upon land in front of what is known as the barracks in Key West.

Mr. HAMLIN. Is it a military reservation?

Mr. SPARKMAN. It was hardly a military reservation; it was submerged land in front of the military reservation. The Government had obtained this submerged land partly from the Government and partly, as I understand, from the State of Florida, which is the owner of all the submerged land within the 3-mile limit from shore. This was a little cove running up in front of the island of Key West. Other islands lie to the northward of that, some short distance away, and this submerged land lies between the main island and the smaller islands.

The State of Florida in two or three acts divested itself of the ownership of this property and vested it in the United States Government. When the East Coast Railway Co. was preparing to go into Key West, finding it difficult to obtain land there for its purposes, the island being very small and land being scarce, it sought to go upon this submerged land and obtained permission to use a part of this submerged land for terminal purposes, the Government having no special use for it. In addition to this, so I am told—I do not know it of my own knowledge—the Florida Legislature passed some law vesting in the railway company the title to other lands lying contiguous to that owned by the Government.

Mr. HAMLIN. Then it is the purpose of this bill to give the East Coast Co. title to land there?

Mr. SPARKMAN. The chief purpose is to establish a boundary line between the military reservation which has been partly filled in by the railroad company and the land owned by it in front of the military reservation.

Mr. MANN. If the gentleman from Florida will allow me, is not the purpose of the bill to establish the boundary line between the military reservation and the land of the Florida East Coast Railway Co., which is a very irregular boundary line, running in and out? The company is now filling in land on both sides of that irregular boundary line at their expense by agreement with the Government, and is not the only purpose of this act to make a comparatively straight boundary line without the Government losing any amount of property?

Mr. SPARKMAN. That is the purpose of the measure, and, as I understand it, the filling is already made, the Government getting the benefit of a part of the fill.

Mr. HAMLIN. Mr. Speaker, I have no objection.

Mr. MANN. Mr. Speaker, reserving the right to object, I think that unanimous consent should be asked to consider the bill in the House as in Committee of the Whole.

The SPEAKER. The Chair will put that after consent has been given to consider the bill.

Mr. MANN. But I will have to object, unless the gentleman makes the request.

Mr. SPARKMAN. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Florida asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SPARKMAN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

CERTAIN TRACTS OF LAND IN CALIFORNIA AS PROPOSED FOREST RESERVATIONS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 26737) to amend an act approved October 1, 1890, entitled "An act to set apart certain tracts of land in the State of California as forest reservations."

The Clerk read the title to the bill.

Mr. MANN. Mr. Speaker, as there is a similar Senate bill further down on the calendar, I shall object to this.

The SPEAKER. The gentleman from Illinois objects, and the bill will be stricken from the calendar.

COMPENSATION OF UNITED STATES GOVERNMENT CIVILIAN EMPLOYEES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 20995) granting to the civilian employees of the United States the right to receive from it compensation for injuries sustained in the course of their employment.

The SPEAKER. Is there objection?

Mr. EDWARDS. Mr. Speaker, reserving the right to object, I would like to get some information about this bill.

Mr. MANN. Mr. Speaker, reserving the right to object, it is very evident that this bill would require consideration and that we would not be able to pass it under a day.

Mr. CLAYTON. Mr. Speaker, I think the gentleman from Illinois is correct about that, but the gentleman from Ohio [Mr. HOWLAND] reported this bill from the Committee on the Judiciary, and I would like to have him make a statement in regard to it.

Mr. MANN. I would vote for the passage of the bill, but it is evident that it would take a day for its consideration. Therefore I feel constrained, owing to the condition of the calendar, to object.

The SPEAKER. The gentleman from Illinois objects, and the bill will be stricken from the calendar.

UNITED STATES COURT AT OPELIKA, ALA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 27827) to amend section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended to read as follows:

"SEC. 70. The State of Alabama is divided into three judicial districts, to be known as the northern, middle, and southern districts of Alabama. The northern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Cullman, Jackson, Lawrence, Limestone, Madison, and Morgan, which shall constitute the northeastern division of said district; also the territory embraced on the date last mentioned in the counties of Colbert, Franklin, and Lauderdale, which shall constitute the northwestern division of said district; also the territory embraced on the date last mentioned in the counties of Cherokee, Dekalb, Etowah, Marshall, and St. Clair, which shall constitute the middle division of said district; also the territory embraced on the date last mentioned in the counties of Blount, Jefferson, and Shelby, which shall constitute the southern division of said district; also the territory embraced on the date last mentioned in the counties of Walker, Winston, Marion, Fayette, and Lamar, which shall constitute the Jasper division of said district; also the territory embraced on the date last mentioned in the counties of Calhoun, Clay, Cleburne, and Talladega, which shall constitute the eastern division of said district; also the territory embraced on the date last mentioned in the counties of Bibb, Greene, Pickens, Sumter, and Tuscaloosa, which shall constitute the western division of said district. Terms of the district court for the northeastern division shall be held at Huntsville on the first Tuesday in April and the second Tuesday in October; for the northwestern division, at Florence on the second Tuesday in February and the third Tuesday in October: *Provided*, That suitable rooms and accommodations for holding court at Florence shall be furnished free of expense to the Government; for the middle division, at Gadsden on the first Tuesdays in February and August: *Provided*, That suitable rooms and accommodations for holding court at Gadsden shall be furnished free of expense to the Government; for the southern division, at Birmingham on the first Mondays in March and September, which courts shall remain in session for the transaction of business at least six months in each calendar year; for the Jasper division, at Jasper on the second Tuesdays in January and June: *Provided*, That suitable rooms and accommodations for holding court at Jasper shall be furnished free of expense to the Government; for the eastern division, at Anniston on the first Mondays in May and November; and for the western division, at Tuscaloosa on the first Tuesdays in January and June. The clerk of the court for the northern district shall maintain an office, in charge of himself or a deputy, at Anniston, at Florence, at Jasper, and at Gadsden, which shall be kept open at all times for the transaction of the business of said court. The district judge for the northern district shall reside at Birmingham. The middle district shall include the territory embraced on the 1st day of July, 1910, in the counties of Autauga, Barbour, Bullock, Butler, Chilton, Coosa, Covington, Crenshaw, Elmore, Lowndes, Montgomery, and Pike, which shall constitute the northern division of said district; also the territory embraced on the date last mentioned in the counties of Coffee, Dale, Geneva, Henry, and Houston, which shall constitute the southern division of said district; also the territory embraced on the date last mentioned in the counties of Chambers, Lee, Macon, Randolph, Russell, and Tallapoosa, which shall constitute the eastern division of said middle judicial district. Terms of the district court for the northern division shall be held at Montgomery on the first Tuesdays in May and December; for the southern division, at Dothan on the first Mondays in June and December; and for the eastern division, at Opelika on the first

Mondays in April and November: *Provided*, That suitable rooms and accommodations for holding court at Opelika shall be furnished free of expense to the Government. The clerk of the court for the middle district shall maintain an office in charge of himself or a deputy at Dothan, and shall maintain an office in charge of himself or a deputy at Opelika, which said offices at Dothan and Opelika shall be kept open at all times for the transaction of the business of said divisions. The southern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Baldwin, Choctaw, Clarke, Conecuh, Escambia, Mobile, Monroe, and Washington, which shall constitute the southern division of said district; also the territory embraced on the date last mentioned in the counties of Dallas, Hale, Marengo, Perry, and Wilcox, which shall constitute the northern division of said district. Terms of the district court for the southern division shall be held at Mobile on the fourth Mondays in May and November; and for the northern division at Selma on the first Mondays in May and November."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CLAYTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

WILLIAM C. GORGAS AND OTHERS.

The next business on the Calendar for Unanimous Consent was H. J. Res. 365, to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador.

The Clerk read the resolution, as follows:

Resolved, etc., That the Secretary of War is authorized to grant Col. William C. Gorgas and not exceeding two other officers of the Medical Corps and not exceeding three officers of the Engineer Corps of the Army leave of absence, without pay, and that they be permitted to assist the Republic of Ecuador in an advisory or other capacity in connection with the improvement of sanitary conditions in said Republic and to accept compensation therefor. The permission hereby granted shall be held to terminate at such date or dates as the Secretary of War may determine: *Provided*, That the United States shall not be liable for any expenditure hereunder, nor shall any money heretofore appropriated in connection with or for the construction of the Panama Canal be expended for purposes of sanitation outside of the Canal Zone.

With the following committee amendments:

Strike out all after the resolving clause and insert:

"That the Secretary of War, upon any future request of the Government of Ecuador, is authorized to grant Col. William C. Gorgas and not exceeding two other officers of the Medical Corps and not exceeding three officers of the Engineer Corps of the Army leave of absence, without pay, and that they be permitted to assist the Government of Ecuador in an advisory capacity in connection with the improvement of sanitary conditions in said Republic and to accept compensation therefor: *Provided*, That said compensation to said officers shall not exceed the amount paid to them on the Isthmus of Panama in connection with the construction of the Panama Canal: *And provided further*, That the United States shall not be liable for any expenditure hereunder, nor shall any money heretofore or hereafter appropriated in connection with or for the construction of the Panama Canal be expended for purposes of sanitation outside of the Canal Zone, except within the cities of Panama and Colon and other regions subject, under the terms of the treaty with Panama concluded November 18, 1903, to the authority of the United States for the construction, maintenance, operation, sanitation, and protection of the Panama Canal and other works necessary therefor, and hereafter the Secretary of War is directed to report to Congress all moneys spent for sanitation purposes in the cities of Panama and Colon and in the other regions subject under the treaty aforesaid to the authority of the United States.

"SEC. 2. That the permission hereby granted shall be held to terminate at such date or dates as the Secretary of War may determine."

The SPEAKER. Is there objection?

Mr. CARY. Mr. Speaker, reserving the right to object, I would like to hear from somebody having the resolution in charge.

Mr. SHERLEY. Mr. Speaker, the purpose of the resolution is expressed in the language of the resolution. Ecuador has asked permission of the Federal Government to lend her certain officers who have had experience in sanitation work for the cleaning up of one of her cities which is badly in need of such work being done, and which is a menace to-day to the health of all neighboring cities and countries and particularly to the health of the Panama Canal Zone. The purpose of the resolution is to authorize these officers to accept this employment under Ecuador at the expense of that country and without expense to this country in the performance of this work of sanitation.

Mr. NORRIS. I will state to the gentleman from Wisconsin that they could not do that under the Constitution without an act of Congress.

Mr. MANN. Mr. Speaker, will the gentleman from Kentucky yield?

Mr. SHERLEY. Yes.

Mr. MANN. What object is there in restricting the work these gentlemen may do to working in an advisory capacity?

Mr. SHERLEY. I understand that is the character of the work they want of these officers. Just why it is necessary to put in the word "advisory" I am not myself advised. The bill was introduced by the chairman of my committee, who is not able to be on the floor at the present time.

Mr. MANN. The gentleman will notice on page 2 of the resolution, in lines 17 and 18, the following language:

Provided, That said compensation to said officers shall not exceed the amount paid to them on the Isthmus of Panama.

There might be some question in reference to that, especially as these officers might not have been employed on the Isthmus of Panama. Would it not be better to change that and make it read:

Provided, That the rate of compensation paid to such officers shall not exceed the rate paid to them or similar officers on the Isthmus of Panama.

Mr. SHERLEY. I see no objection to that amendment.

Mr. MANN. That would be clear and the other would not.

Mr. SHERLEY. I think it is contemplated to detail men now on the Isthmus, and the matter might be cured by simply putting in the word "now," so that it would read:

Shall not exceed the rate now paid to them.

The gentleman's amendment is satisfactory, however.

Mr. NORRIS. What is the object of limiting their compensation to this amount?

Mr. SHERLEY. That amendment came from the Committee on Military Affairs, and I assume that it was to avoid temptation to any officers to extend their leave beyond that required in the doing of the particular work to be done that there should not be an inducement of extra pay.

Mr. NORRIS. On the other hand, unless they could get some extra pay, there would, of course, be no probability that the officers would want to go.

Mr. SHERLEY. There is no question about the willingness of the officers to undertake the work. While the committee was at Panama this matter came up, but there was no authority by which Col. Gorgas could be sent there. But knowing the importance of doing the work, he was sent down after an informal conference between the Secretary of War and the Members of Congress then on the zone, and I have now an amendment which I desire to offer to the second section which I will ask to have read and then explain the purpose of it.

Mr. MANN. Mr. Speaker, reserving the right to object, let us hear that amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend by striking out section 2 on page 2 and inserting the following:

"SEC. 2. The permission hereby granted shall be held to terminate at such date or dates as the Secretary of War may determine, and to authorize and sanction the payments already made by the Government of Ecuador to Col. William C. Gorgas and Maj. Robert E. Nobel, Medical Corps, United States Army, one civil engineer and one clerk, in connection with their recent visit of investigation to Ecuador."

Mr. MANN. That is all right.

Mr. SHERLEY. I will say in explanation of the amendment that there was no authority whereby these gentlemen could go there and accept compensation, but the matter was urgent. The situation there is one fraught with danger to Panama and to other countries near Ecuador. For that reason we felt that the circumstances were such as to warrant Col. Gorgas and his men being sent there. This is work so important that we would insist on its being done if necessary, and when we found the country not only willing to do it but asking the loan of these men, we felt it proper to enable them to undertake that work.

Mr. MANN. Regular order!

The SPEAKER. Is there objection?

Mr. PRINCE. Mr. Speaker, reserving the right to object, I want to be heard.

The SPEAKER. The other gentleman from Illinois [Mr. MANN] demands the regular order.

Mr. MANN. I will waive that for the moment.

Mr. PRINCE. Mr. Speaker, as a member of the committee I think I ought to be heard on this.

The SPEAKER. The gentleman will proceed; the Chair is simply construing the rules of the House.

Mr. PRINCE. Mr. Speaker, I think the House ought to know something about this matter intelligently when they vote on it.

Mr. BUTLER. The House will not vote on it; the gentleman from Illinois [Mr. MANN] has demanded the regular order.

Mr. PRINCE. Did the gentleman from Illinois demand the regular order?

Mr. MANN. I thought the gentleman wanted the bill considered.

Mr. PRINCE. No; I do not.

Mr. MANN. Is the gentleman going to object to it?

Mr. PRINCE. I think the House ought to know something about it before it is voted on.

Mr. MANN. The House will know that after it is considered. Does my colleague intend to object at the end?

Mr. SHERLEY. Mr. Speaker, I have no desire to prevent some debate of the matter if permission is given to consider it, and I suggest to the gentleman that it is a matter that the House ought to have an opportunity to consider.

Mr. PRINCE. Mr. Speaker, I do not want to object to the consideration of the bill, but I want to let the House know what they are doing when they vote on this bill.

Mr. SHERLEY. I am perfectly willing to give the gentleman such time as is within reason.

Mr. PRINCE. Mr. Speaker, if I am recognized as a member of the Committee on Military Affairs, I claim my own time.

The SPEAKER. The gentleman understands the rule.

Mr. PRINCE. I do.

The SPEAKER. If we get consideration of this bill, why, then the man who is in charge has an hour, and if he does not move the previous question, then, when he gets through with his hour——

Mr. MANN. May I ask my colleague how much time he desires to consume?

Mr. PRINCE. I do not think I will consume over five minutes——

Mr. SHERLEY. I will say to the gentleman——

Mr. PRINCE (continuing). Not to exceed 10 minutes.

Mr. SHERLEY. I will say to the gentleman I can assure him at least 10 minutes.

Mr. PRINCE. I do not want more than that.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. SHERLEY. Now, Mr. Speaker, I yield five minutes to the gentleman from Illinois.

Mr. PRINCE. Mr. Speaker, Guyaquil, Ecuador, is two and a half days' sail from the Canal Zone. True it is that it is a spot or place much infected by mosquitoes. Our quarantine laws protect us amply from Guyaquil or from any pestiferous places—that is, in South American countries. We have a hundred million people or thereabouts.

Ecuador has 4,000,000 people. The South American Republics now feel very unkindly toward our desire to get into some of their territory. When this bill appeared before the Committee on Military Affairs, there came representatives from the South American countries finding considerable fault with this proposition. It was alleged, and as to the truth of it I am not prepared to say, that there was a sanitary commission organized with a view to going down there and getting unreasonable concessions and at the same time drawing large, exorbitant, and inconceivable pay for services rendered.

The Committee on Military Affairs, after looking it over, substituted the amendment which we thought would probably cure the trouble that might arise, if any should arise. The old Government of Ecuador did permit some of our officers to go there, and they were anxious to have them come there for sanitation purposes. The new Government of Ecuador does not feel kindly disposed toward this proposition, but on account of their being small and helpless they dare not raise a hand against our going there in this way. In order to put the burden upon them and not to make it harder for commerce and for our people to do business with the South American Republics, we put in this provision that the Secretary of War, upon any future request of the Government of Ecuador, was authorized to grant it. It was intimated to us, if we made no limitation as to the expense, that there was an opportunity for officers to go and receive an enormous pay for services performed by them there. We then limited that so that it would be the same pay as was received on the Panama Canal. We made the wisest provisions we could, and finally agreed to the amendment that we have offered to the House.

Now comes another amendment to section 2, to approve and authorize friendly acts of some of our officers, and to pay them for services rendered to a defunct Government—one that has been defeated by the people. A new Government has been put in control in Ecuador.

Mr. SHERLEY. If the gentleman will permit, he misunderstood the entire purport of the amendment read.

Mr. PRINCE. I want to be correct.

Mr. SHERLEY. The gentleman is aware that Col. Gorgas and certain officers who have gone there went as the result of the invitation of the then Government of Ecuador?

Mr. PRINCE. The defeated Government.

Mr. SHERLEY. The now defeated Government. But at the time they went at the authorization and at the request of the Government of Ecuador. We are not putting an obligation upon Ecuador, and neither are we putting an obligation upon the Treasury of the United States; but they went, as the gentleman is aware, without authority of this Government. They had no right to go except by the authority of Congress. But those of us who knew the situation, and the administration itself, took the responsibility of telling these officers to go, and they obeyed the orders that were given them. The whole purpose of section 2 is to ratify their having gone, but it in no way affects the internal policy of Ecuador. And I entirely agree with the gentleman that this country ought not to force its services upon Ecuador, although I am also of the opinion that if Ecuador or any other country fails to maintain sanitary conditions, so as to remove a menace to the commerce and the health of this or any other nation, such other nation, being imperiled by their failure, ought to take very stringent action in the way of quarantine to bring about a change of affairs.

Mr. PRINCE. Have we not ample authority under the quarantine law to do so?

Mr. SHERLEY. Unquestionably, and would do it if it became necessary. But there is nothing in this instance or in this amendment that seeks in any way to interfere with Ecuador's internal policy or to force her into the doing of something she does not want to do.

The SPEAKER. The time of the gentleman from Illinois [Mr. PRINCE] has expired.

Mr. SHERLEY. Mr. Speaker, I yield five minutes more to the gentleman.

Mr. PRINCE. If these gentlemen went there without the authority of the President or of Congress, but at the mere ipse dixit of some other people, and they now come in and approve of the thing they did, we will find that it will be like another case where we have invited the nations of the world to participate, and the argument is made that we must therefore make appropriations. We have ratified their going, and therefore we must pay them for the service they have rendered. That is the next step, as we move along in a legislative sense.

Now, all I desire to say, Mr. Speaker, is this: Our country is, in my judgment, going out into the world as a big policeman. Our place is at home, notwithstanding the rumbles down there in Mexico. [Applause.] Our place is here, minding our own business. We had our election here in this country, and it was by ballots, and we announced the result on the floor of this House last week, and the country acquiesced in it. Their method seems to be by bullets, and if our bystanders are in the way when they are electing their men down there in those foreign countries, let them get out of the way and not ask to have American blood and American bone and American manhood sent there for the benefit of American exploiters, to destroy their lives, as seems to be in the air. [Applause.]

Mr. HAMILTON of Michigan. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield?

Mr. PRINCE. Yes.

Mr. HAMILTON of Michigan. I wanted to ask the gentleman how he squares this expression of his views with our obligation under the Monroe doctrine? We, by the Monroe doctrine, do not recognize with equanimity the interference of foreign nations on this hemisphere, so that it is considered that a certain obligation devolves upon us to try to maintain conditions here in this hemisphere. Is the gentleman in favor of abrogating the Monroe doctrine?

Mr. PRINCE. If the proposition is ever brought into this House that we shall intervene or take control or send our troops down there, to stay from 5 to 10 years, at a cost of hundreds of millions of dollars and thousands of lives, when that question comes up I will meet it. But now I am talking on another question. You may go on and do this. I am not going to object. But I think the place of American officers, educated by our Government, is to attend to American business and to do the business of our country. We educate them at our expense. Now, here is proposed to be formed a sanitary commission of our officers. There is a demand for officers all the time. There is a demand on the Committee on Military Affairs for more officers, and as soon as we give more officers they want to go outside and do work that properly belongs to the civilians of this country. The work of sanitation belongs to civilians, and the work of engineering belongs to the civilians of this country, and it seems to me that, while I am not going to object to this bill, I will hesitate whether I shall support it or not when it comes up for passage. [Applause.]

Mr. SHERLEY rose.

Mr. MANN. Mr. Speaker, will the gentleman from Kentucky [Mr. SHERLEY] yield to me to offer an amendment?

Mr. SHERLEY. Yes.

Mr. MANN. I move, Mr. Speaker, to amend the committee amendment by striking out, on page 2, lines 17 and 18, the words "that said compensation to said officers shall not exceed the amount paid to them," and insert the language that I send to the Clerk's desk.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. MANN].

The Clerk read as follows:

Amend, page 2, by striking out, after the word "therefor," the remainder of line 17 and all of line 18, and inserting the following: "The rate of compensation paid said officers shall not exceed the rate paid to them or similar officers."

The SPEAKER. The gentleman from Kentucky [Mr. SHERLEY] is recognized.

Mr. SHERLEY. Mr. Speaker, I ask for a vote on that amendment.

The SPEAKER. The question is on agreeing to the amendment to the committee amendment.

Mr. PRINCE. Mr. Speaker, I should like to be heard on that for a moment.

Mr. SHERLEY. Just a moment, Mr. Speaker. I yielded to the gentleman time with the idea of getting the bill through. If the gentleman wants to take additional time, I shall move the previous question upon that amendment and the amendment I now offer because, in justice to the House, I must go forward——

Mr. PRINCE. My purpose is not delay. I have never tried that during my service in the House and never intend to. I want to ask the gentleman from Illinois what is the present compensation of each one of these officers.

Mr. SHERLEY. I do not suppose the gentleman from Illinois can answer that offhand. The salary of Col. Gorgas, one of the commissioners, is the salary of a commissioner, which is $14,000 a year. The gentleman is aware that these gentlemen receive under the canal government certain pay, which is in some instances in excess of the pay they would receive as Army officers. The purpose of the bill as reported, and of the amendment of the gentleman from Illinois, was simply to make certain that they should not get anything in excess of the sum they are now receiving.

Mr. PRINCE. That is, in excess of at least $14,000, with other privileges, which bring it up close to $20,000 a year.

Mr. SHERLEY. No; nothing like that. Col. Gorgas is the only man who is getting $14,000 a year, and he is not getting privileges amounting to $20,000 a year, and this would not authorize any privileges.

Mr. PRINCE. As a colonel in the Army, what is his pay?

Mr. SHERLEY. The gentleman knows that as well as I do. He is a member of the Committee on Military Affairs.

Mr. PRINCE. That is all I care to say.

Mr. SHERLEY. I ask for a vote.

The SPEAKER. The question is on the amendment to the committee amendment.

The amendment to the amendment was agreed to.

Mr. SHERLEY. I offer the amendment which I have sent to the Clerk's desk, an amendment to the committee amendment, to strike out paragraph 2 and insert.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Strike out section 2 of the amendment and insert the following:

"SEC. 2. The permission hereby granted shall be held to terminate at such date or dates as the Secretary of War may determine, and to authorize and sanction the payments already made by the Government of Ecuador to Col. William C. Gorgas and Maj. Robert E. Noble, Medical Corps, United States Army, one civil engineer, and one clerk, in connection with their recent visit of inspection to Ecuador."

Mr. SLAYDEN. Mr. Speaker, I supported this measure in the committee, and I think it ought to pass; but I never have had brought to my attention before the fact that payments had already been made to officers of the Army without the consent of Congress, except in an instance in Cuba, which Congress acted upon, and which we received assurances at the time would not happen again.

Mr. SHERLEY. The gentleman from Texas may not have been present when I made my statement. This is what occurred: Here was a situation where it was exceedingly important that sanitary work should be done——

Mr. SLAYDEN. I recognize the importance of sanitary work. That is admitted.

Mr. SHERLEY. Congress was not in session. The Government of Ecuador had placed at the disposal of this Government a large sum of money to undertake this work. The gentleman is aware that there was no authority for our detailing this officer. The Secretary of War happened to be on the Isthmus at the time. There were a number of Members of Congress there. We talked the thing over informally. We recognized that there was no direct authority, but we believed that the situation was unique enough and important enought to warrant his letting these men go for the purpose of making a preliminary survey.

Mr. SLAYDEN. He must have recognized the fact that there is a direct prohibition of law against it.

Mr. SHERLEY. It entailed no payment upon the Government, and it was work that was very important in connection with the Panama Canal itself. We said to the Secretary informally, and that was the consensus of opinion of all the Members there, that under the circumstances we felt that he would be warranted in letting Col. Gorgas go there. He having gone under the instruction of his commander in chief, the administration having sent him and having consulted us, we did not feel that, in a matter which was done so openly, Congress would refuse.

Not long ago we had a situation in connection with the floods in the Mississippi. The Government turned in and sent down provisions and men without any authority of law. It is not a good practice. It is a practice that ought not to be enlarged, but it is a practice that, I submit, under certain circumstances has been and is warranted; and that was so in this case, in the judgment of those who were called upon to act under all these circumstances.

Mr. SLAYDEN. Mr. Speaker, I recognize the desirability of having the ports of Ecuador and all other Central American countries clean and free from menace to the Canal Zone——

Mr. MANN. This is not a Central American country.

Mr. SLAYDEN. But it is a serious fact when a high executive officer, for the second time, authorizes a deliberate violation of the law, and I think it ought to be a matter of record.

Mr. MANN. Will the gentleman yield?

Mr. SLAYDEN. Yes.

Mr. MANN. Did not an executive officer violate the law when Galveston was flooded and when the Mississippi River was flooded, and when something occurred up in Alaska?

Mr. SLAYDEN. How did he violate the law when Galveston was flooded?

Mr. MANN. They gave sustenance to the people and sent tents there without authority of law, and afterwards got it ratified by Congress, just as they did with relation to the floods of the Mississippi River last spring, and in Alaska, and as we did in San Francisco.

Mr. SLAYDEN. Now, if the gentleman will let me have a minute of my own time——

Mr. MANN. I did not know that the gentleman had any time. I thought the gentleman from Kentucky had the floor.

Mr. SLAYDEN. I arose to address the House on the amendment, which I had a right to do, I suppose.

Mr. MANN. Not without being recognized by the Chair.

Mr. SLAYDEN. I simply wanted to direct attention to the fact that Members of Congress have authorized a deliberate violation of law.

Mr. SHERLEY. Mr. Speaker, for my part I am here now ready to assume what responsibility there may be. I am a respecter of law; but not such a respecter of law as to disregard the common sense of such a situation, but to exercise common sense with other Members who had the responsibility put upon us. We assumed it, and I ask this Congress to ratify what I believe was a sensible action, whatever force or action was placed upon us. We did not seek the situation, but it was put up to us to decide. It was in the interest of humanity; it was in the interest of health; it was in the interest of common sense. I ask for a vote.

The SPEAKER. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

The SPEAKER. The question now is on the amendment as amended.

The amendment as amended was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SHERLEY, a motion to reconsider the vote whereby the joint resolution was passed was laid on the table.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message in writing from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries.

MANILA HEMP (H. DOC. NO. 1401).

The SPEAKER laid before the House the following message from the President of the United States, which was ordered printed and referred to the Committee on Ways and Means:

To the House of Representatives:

The following resolution was adopted by the House of Representatives February 10, 1913:

Resolved, That the President of the United States be, and he is hereby, requested to advise the House, if in his judgment not incompatible with the public interest, as to the facts regarding the exemption of American importers of Manila hemp from payment of the export tax thereon, stating, as nearly as may be practicable, what amounts of money have

been refunded to such importers by virtue of said exemption since the act of Congress of March 8, 1902, known as the Philippine tariff act, up to the present time, and to whom said amounts have been refunded.

An export tax was imposed on hemp, among other products of the Philippine Islands, prior to American occupation and has been continued by each of the several revisions of the tariff of the Philippine Islands since. It was fixed by act No. 230 of the Philippine Commission, revising and amending the tariff laws of the Philippine Archipelago, which was enacted September 17, 1901, at 75 cents per 100 kilos, or $7.50 per metric ton, and this rate has been continued in subsequent Philippine tariffs.

Prior to the passage of the act of March 8, 1902, this export tax was imposed on all manila hemp shipped from the Philippine Islands, whatever might be the destination. This was but one of the several articles on which duty was imposed, and it was, in general, regarded as being the article which was most able to bear the export duty, manila hemp being a natural monopoly of the Philippine Islands and it being impossible to replace it by any other fiber in many of the uses to which it is put.

By the act of March 8, 1902, "Temporarily to provide revenues for the Philippine Islands, and for other purposes," the act of the Philippine Commission, heretofore referred to, was confirmed, including the provisions imposing an export tax, but it was provided that the rate of duty paid upon products of the Philippine Archipelago coming into the United States should be less any duty or taxes levied, collected, and paid thereon upon shipment thereof from the Philippine Archipelago, and that this practical exemption of the export tax on shipments to the United States might be extended to articles coming in free under the United States tariff there was added this final provision to section 2 of the act of March 8, 1902:

But all articles, the growth and product of the Philippine Islands, admitted into the ports of the United States free of duty under the provisions of this act and coming directly from said islands to the United States for use and consumption therein shall be hereafter exempt from any export duties imposed in the Philippine Islands.

This section has its principal application in the importation into the United States of manila hemp. The only statement with reference to the specific object of the legislation is that of the chairman of the Committee on the Philippines of the Senate in reporting this bill on January 21, 1902.

Briefly, the objects as stated were to distribute the export tax remitted by increasing the price to the producer of hemp in the islands and decreasing the price of raw material to the manufacturer and of his product to the user of cordage in the States.

The loss to the Philippine treasury was to be more than made up by the provision of section 4 of the act that—

all duties and taxes collected in the United States upon articles coming from the Philippine Archipelago and upon foreign vessels coming therefrom shall not be covered into the general fund of the Treasury of the United States, but shall be held as a separate fund and paid into the treasury of the Philippine Islands, to be used and expended for the government and benefit of said islands.

Under the act of March 8, 1902, regulations were put in effect requiring that on exportation from the Philippine Islands, whatever its destination, the export duty on hemp should be paid, and that on submission of proper evidence within a period of two years thereafter that the hemp so exported had proceeded directly to the United States and had been consumed by manufacture therein, the amount of the export duty collected was refunded. The United States Navy, which is a regular purchaser of hemp, was exempted from this payment. Herewith is a copy of the regulations governing under the act of March 8, 1902. This will explain why the remission of this tax became known as a refund.

Those observing the practical application of the law in the islands believed that the remission of the export duty on hemp shipped directly to the United States for consumption therein did not increase the price to the producer, in so much as the purchase of hemp for export to the United States was made in competition with purchase for export to foreign countries, which paid the export duty provided in the Philippine tariff.

On the other hand, the amount of the export tariff remitted was a direct loss of that amount to the Philippine treasury, and the authorities in the Philippine Islands, to whom the treasury of the Philippine Islands was the first consideration, believing that this remission of the export duty was of no benefit to the hemp producer in the Philippine Islands and that it was a direct loss to the Philippine treasury, recommended, in reports covering several years, the abolition of this remission of export in favor of American consumers of hemp. Annexed hereto, marked "A," are collected these recommendations.

In 1904, when the War Department and the Philippine Government took up the study of a revision of the Philippine tariff, it was decided to recommend, among other changes, the abolition of this refund of the export tax on hemp, and the draft of a proposed tariff which was submitted by the War Department omitted this provision for a refund. It, however, was not approved by Congress, and the bill as passed, which was the act of Congress of March 3, 1905, embodied in section 13 the provision of the act of March 3, 1902, with reference to the exemption from export duties imposed by the Philippine Islands on all articles the growth and product of such islands admitted into the ports of the United States free of duty.

At the same session of Congress (58th Cong., 3d sess.) the Ways and Means Committee reported a bill (H. R. 17752) to amend the act of March 8, 1902 (H. Rept. 4867, 58th Cong., 3d sess.), which bill, however, as reported—though it did not pass—continued the exemption of export duties in the Philippine Islands in favor of exporters of the United States. The minority reported as a substitute House bill 18678, section 2 of which contained this provision:

All articles the growth and product of the Philippine Islands admitted into the ports of the United States free of duty under the provisions of this act, and coming directly from said islands to the United States for use and consumption therein, shall be hereafter exempt from any export duties imposed in the Philippine Islands—

which is identical with the exemption provision in the act of March 8, 1902, and in the act of March 3, 1905.

Notwithstanding the position taken by Congress, the Philippine Commission continued in its annual report to recommend the abolition of this exemption.

In 1909, when the revision of the Philippine tariff was again taken up, the Philippine Government submitted a proposed draft of a tariff act which eliminated this exemption. The discussion which followed in the hearings on this subject developed the fact that Congress would not waive the exemption of the export tax, and that the only way in which the Philippine Government could avoid this would be by abandoning the export duty altogether. That government was unwilling to do this, fearing that the loss of revenue which would result therefrom, added to the loss which would result from the admission into the Philippine Islands free of duty of American goods, would reduce the revenues of the government below the minimum necessary for its support. The 1909 tariff act contained, in section 13 thereof, the provision exempting from the export tax articles the growth and product of the Philippine Islands coming directly from said islands to the United States.

The foregoing is a recitation of the facts. It is believed that this exemption works no injury to the producer of hemp in the Philippine Islands but is a direct loss to the Philippine treasury of the amount of the exemption; that the exemption does not increase the price of hemp received by the producer nor does it decrease that price. In fact, the producer of hemp in selling it does not know, in the general case, whether it is later to be exported to the United States with an exemption of the export duty or to Great Britain with a payment of the export duty.

It may well be that the export tax itself falls directly on the producer of hemp, but the amount of the burden thus imposed on him can not be increased by the partial exemption in favor of American-consumed hemp.

After the passage of the tariff act of 1909, and when it had been rather fairly put to the Philippine Government that it could exempt the producer of hemp, if it saw fit, from the export tax, but that it could not, even though the tax were continued, impose that tax on hemp shipped direct to the United States for consumption therein, that Government ceased to repeat the recommendation which it had made for a number of years for the abolition of the exemption in favor of the American manufacturers.

After the enactment of the tariff act of August 5, 1909, the regulations governing the remission of export duty were modified, so that instead of requiring the payment of the export duty on hemp shipped direct to the United States a bond to secure the payment in case the hemp was not used in manufacture in the United States within two years was required, the bond being released on the submission of the requisite evidence that the hemp had been shipped direct to the United States and had been used for manufacture therein. Herewith is a copy of these regulations.

From these regulations it will be apparent that to answer as was doubtless intended the question as to what amount of moneys had been refunded it is necessary to consider the amount refunded under the act of 1902 until the regulations of 1909 went into effect and thereafter to consider the amount which was not collected due to the exemption of the law. Attached hereto is a table showing by years from 1902 the amount of export duty refunded, and a table showing since 1909 the amount of the duty which was not collected due to the exemption under consideration.

There is attached, marked "R," a list of the shippers of hemp from the Philippine Islands to whom refunds have been made, with an attached list of the factories in the United States in which the hemp was consumed. These statements begin with the year 1905, the first year that such reports were furnished the Bureau of Insular Affairs of the War Department. The statistics are given in bales. The bale is approximately 127 kilograms in weight.

It is believed that the recapitulation attached to each of the annual or quarterly tables will give the information desired, but the entire report in each case is inclosed, giving all the details on which the refund was based.

There is inclosed herewith a statement showing the collections in the United States held as a separate fund and paid into the treasury of the Philippine Islands under the provisions of section 4 of the act of March 8, 1902. These amounts are the collections which it was contemplated would more than supply the loss to the Philippine treasury of the hemp refunds. It will be observed that prior to the passage of the tariff act of 1909 the loss to the Philippine treasury was so met.

In fairness, also, it should be stated that those who have favored this refund have justified it on the grounds—

First. That it was unfair to admit an article into the United States free of duty, and at the same time, for the benefit of another Government, to place an export tax on this article at its point of origin.

Second. That by this preferential treatment of hemp exported to the United States the manufacturer of hemp in the United States was relieved of the condition which had hitherto existed of having the price of hemp controlled in London and of very generally having this hemp transshipped from London.

Third. That it increased the amount of freight which came direct from the Philippine Islands to the United States, and to this extent was a benefit to shipping engaged in the American-Philippine trade.

Fourth. That it decreased the price of cordage to the users thereof in the United States.

WM. H. TAFT.

THE WHITE HOUSE, *February 17, 1913.*

CLERKS OF UNITED STATES DISTRICT COURTS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 21226) providing for compensation for clerks of United States district courts.

The Clerk read the title of the bill.

Mr. MANN. Mr. Speaker, reserving the right to object, while I am in favor of the principles involved in this bill it is perfectly apparent that it would take all the balance of the day for its consideration without finishing it. I think at this time it has no place on the Unanimous Consent Calendar, and purely in the interest of orderly procedure of business in the House, I shall be compelled to object.

Mr. CLAYTON. Mr. Speaker, just a moment. I think the gentleman from Illinois is correct in his statement as to the length of time it would require to consider this bill. I think the bill ought to be considered carefully. I realize that it is not entirely perfect, and I know that there ought to be some amendments adopted.

I agree with the statement that the gentleman from Illinois has made. I ask unanimous consent that I may print in the RECORD as a part of my remarks a portion of the report that I made on this bill. I think it is in the interest of good legislation that the bill do pass. The United States marshals and district attorneys are now on salaries, and I think the tendency of all modern legislation in all of the States is to take officers off from the fee system and put them on a salary basis.

Mr. MANN. I entirely agree with the gentleman from Alabama and congratulate his committee on bringing this bill before the House. I hope at the next Congress it will receive early consideration.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD by printing a portion of the report. Is there objection?

There was no objection.

The following is the report by Mr. CLAYTON:

The Committee on the Judiciary, having had under consideration House bill 21226, providing for compensation of clerks of United States district courts, report it back with the following amendments, with the recommendation that the several amendments be agreed to and that the bill as amended do pass.

* * * * * * *

OFFICE OF CLERK OF CIRCUIT COURT ABOLISHED.

The judicial code which went into effect January 1, 1912, abolished the office of clerk of circuit court. Prior to that time in many cases the clerk of the circuit court also held the office of clerk of the district court, and received the compensation of both officers, to wit, an amount not over $7,000 per annum. The clerk of the district court must now in every case discharge all the duties heretofore incumbent upon both the clerk of the circuit court and the clerk of the district court. Section 839 of the Revised Statutes provides that out of the fees earned by him in his office the clerk of the district court may retain as compensation for his services a sum not to exceed $3,500, the amount (subject to this limitation) being fixed by the Attorney General as provided in said section. Under the old order which provided for a clerk of the circuit court and a clerk of the district court, there were in some districts more than one clerk of each the circuit court and the district court. Arizona had five district clerks as a Territory. Now, under the joint operation of this bill and the judicial code, the number is reduced to one. New Mexico had seven district clerkships as a Territory and now has one. Among districts having more than one may be mentioned the following: The eastern district of Kentucky, where there were six circuit court clerks and six district clerks; western district of Kentucky, where there were four circuit court clerks and four district clerks; and the western district of Virginia, where there were four circuit court clerks and four district clerks. Under the provisions of the judicial code there can be but one clerk in each district, or a total of 79 clerks.

BILLS INTRODUCED TO CHANGE COMPENSATION OF DISTRICT CLERKS.

Bills have been introduced in the Senate and the House of Representatives at this session of Congress to increase the maximum compensation to $5,000 per annum to be retained by the clerk out of his fees earned. It seems to be generally believed that $3,500 is in some cases too small a compensation for the clerk who now must discharge all the duties heretofore incumbent upon the two clerks, circuit and district, and in other cases that sum would be excessive compensation.

PURPOSE OF THIS BILL.

This bill has as its prime object the abolition of the existing system of compensating clerks of the district courts out of fees earned by them, and seeks to pay the clerks fixed salaries, similar to the plan now provided for the compensation of district attorneys and district marshals. These latter officers, attorneys and marshals, were put on salaries by the act approved May 28, 1896. (29 Stat. L., p. 179.) It is submitted that this measure is in harmony with that legislation and with like legislation which has been had in recent years in many of the States of the Union.

There has been no change in the method of compensating clerks of district courts since 1853. After careful consideration of all the measures pertaining to the compensation of the clerks of the district courts your committee has reached the conclusion that the salary system is, for many reasons, better than the fee system. By it there would be an improvement in the public service and the Government would be benefited by a saving annually of many thousands of dollars.

By the provisions of this bill all the fees of every character received by the clerks of the district courts will be paid into the Treasury of the United States, and the clerks will receive fixed salaries, which are stated in the bill. The information and the reasons which guided the committee in fixing these salaries are stated in the hearings and accompanying documents hereto appended.

By reference to the hearings, which are appended to this report, it will be found that after the payment of the salaries of clerks, deputies, and clerical assistants the United States will receive the services of the clerks without expense, and that fees collected from firms, individuals, and corporations will pay all the expenses of the clerks' offices, including the salaries of deputy clerks, and still leave a substantial balance to be turned into the Treasury. The reform proposed by this bill is, it is believed, worthy of legislative sanction.

The SPEAKER. The gentleman from Illinois objects and the bill will be stricken from the calendar.

MEMORIALS TO THOMAS JEFFERSON AND ALEXANDER HAMILTON.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28468) providing for the erection of memorials to Thomas Jefferson and Alexander Hamilton in the District of Columbia.

The Clerk read the bill.

The SPEAKER. Is there objection?

Mr. COX. Mr. Speaker, I object.

Mr. BURNETT. Mr. Speaker, I object.

The SPEAKER. The gentleman from Indiana and the gentleman from Alabama object. The bill will be stricken from the calendar.

STEAM YACHT "DIANA."

The next business on the Calendar for Unanimous Consent was the bill (S. 1653) to provide American register for the steam yacht *Diana*.

The Clerk read the bill.

The SPEAKER. Is there objection?

Mr. GREENE of Massachusetts. Mr. Speaker, I object.

Mr. EDWARDS. I object.

The SPEAKER. The gentleman from Massachusetts and the gentleman from Georgia object. The bill will be stricken from the calendar.

WALLKILL VALLEY CEMETERY ASSOCIATION.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28469) granting two condemned cannon to the Wallkill Valley Cemetery Association, of Orange County, N. Y.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized to donate to the Wallkill Valley Cemetery Association, of Orange County, N. Y., two condemned bronze or brass cannon for use in connection with a monument in memory of the men of Company H, One hundred and twenty-fourth New York Volunteer Infantry, who died in the service of the United States during the Civil War. Such donation shall be made subject to the rules and regulations of the War Department, and the Government shall be put to no expense in connection therewith.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill for amendment.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

PATENT OFFICE FEES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28268) to amend sections 4931 and 4934 of the Revised Statutes of the United States.

The Clerk read the bill, with the committee amendments.

The SPEAKER. Is there objection?

Mr. PICKETT. Mr. Speaker, I object.

The SPEAKER. The gentleman from Iowa objects, and the bill will be stricken from the Calendar for Unanimous Consent.

UNITED STATES COURT AT JONESBORO, ARK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28335) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 71 of chapter 5 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended to read as follows:

"SEC. 71. The State of Arkansas is divided into two districts, to be known as the eastern and western districts of Arkansas. The western district shall include the territory embraced on the 1st day of July, 1910, in the counties of Sevier, Howard, Little River, Pike, Hempstead, Miller, Lafayette, Columbia, Nevada, Ouachita, Union, and Calhoun, which shall constitute the Texarkana division of said district; also the territory embraced on the date last mentioned in the counties of Polk, Scott, Yell, Logan, Sebastian, Franklin, Crawford, Washington, Benton, and Johnson, which shall constitute the Fort Smith division of said district; also the territory embraced on the date last mentioned in the counties of Baxter, Boone, Carroll, Madison, Marion, Newton, and Searcy, which shall constitute the Harrison division of said district. Terms of the district court for the Texarkana division shall be held at Texarkana on the second Mondays in May and November; for the Fort Smith division, at Fort Smith, on the second Mondays in January and June; and for the Harrison division, at Harrison, on the second Mondays in April and October. The eastern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Lee, Phillips, St. Francis, Cross, Monroe, and Woodruff, which shall constitute the eastern division of said district; also the territory embraced on the date last mentioned in the counties of Independence, Cleburne, Stone, Izard, Sharp, and Jackson, which shall constitute the northern division of said district; also the territory embraced on the date last mentioned in the counties of Crittenden, Clay, Craighead, Greene, Mississippi, Poinsett, Fulton, Randolph, and Lawrence, which shall constitute the Jonesboro division of said district; and also the territory embraced on the date last mentioned in the counties of Arkansas, Ashley, Bradley, Chicot, Clark, Cleveland, Conway, Dallas, Desha, Drew, Faulkner, Garland, Grant, Hot Spring, Jefferson, Lincoln, Lonoke, Montgomery, Perry, Pope, Prairie, Pulaski, Saline, Van Buren, and White, which shall constitute the western division of said district. Terms of the district court for the eastern division shall be held at Helena on the second Monday in March and the first Monday in October; for the northern division, at Batesville, on the fourth Monday in May and the second Monday in December; for the Jonesboro division, at Jonesboro, on the second Monday in May and the fourth Monday in November; and for the western division, at Little Rock, on the first Monday in April and the third Monday in October. The clerk of the court for the eastern district shall maintain an office in charge of himself or a deputy at Little Rock, at Helena, at Jonesboro, and at Batesville, which shall be kept open at all times for the transaction of the business of the court. And the clerk of the court for the western district shall maintain an office in charge of himself or a deputy at Fort Smith, at Harrison, and at Texarkana, which shall be kept open at all times for the transaction of the business of the court."

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MACON, a motion to reconsider the vote by which the bill was passed was laid on the table.

RESTORING CERTAIN LANDS TO PUBLIC DOMAIN.

The next business on the Calendar for Unanimous Consent was the bill (S. 7448) restoring to the public domain certain lands heretofore reserved for reservoir purposes at the headwaters of the Mississippi River and tributaries.

The Clerk read the bill.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. MILLER. Mr. Speaker, I will ask the gentleman to reserve his objection.

Mr. MANN. Mr. Speaker, I reserve the objection for a moment.

Mr. EDWARDS. Mr. Speaker, I object.

The SPEAKER. The gentleman from Georgia objects, and the bill will be stricken from the calendar.

IOWA TRIBE OF INDIANS, OKLAHOMA.

The next business on the Calendar for Unanimous Consent was House resolution 773, referring the bill (H. R. 27995) for the relief of the Iowa Tribe of Indians in Oklahoma to the Court of Claims.

The SPEAKER. Is there objection?

Mr. ELLERBE. Mr. Speaker, I object.

The SPEAKER. The bill will be stricken from the calendar.

TAX ON ADULTERATED BUTTER.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 27279) to amend the second clause of section 4 of chapter 784 of the United States Statutes at Large, volume 32, page 195.

The SPEAKER. Is there objection?

Mr. THOMAS. Mr. Speaker, I object.

Mr. KINKAID of Nebraska. Mr. Speaker, if it is not too late, will the gentleman withhold his objection to permit an explanation?

The SPEAKER. Does the gentleman withhold his objection or make it?

Mr. THOMAS. No, sir; I do not. I have read the bill.

The SPEAKER. The gentleman from Kentucky objects, and the bill will be stricken from the calendar.

ESTABLISHING IN THE BUREAU OF STATISTICS A DIVISION OF MARKETS.

The next business on the Calendar for Unanimous Consent was the bill (S. 5294) to establish in the Bureau of Statistics, in the Department of Agriculture, a division of markets.

The bill was read.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I think it was the general understanding in the House when the agricultural bill passed, carrying the item of $50,000 for this purpose, that this bill would not be considered for passage at this session, and as that item went into the agricultural appropriation bill I object.

The SPEAKER. The gentleman from Illinois objects, and the bill will be stricken from the calendar.

PUBLICITY IN TAKING EVIDENCE.

The next business on the Calendar for Unanimous Consent was the bill (S. 8000) providing for publicity in taking evidence under the act of July 2, 1890.

The bill was read.

The SPEAKER. Is there objection?

Mr. GREENE of Massachusetts. Mr. Speaker, I object to this bill.

Mr. NORRIS. Will the gentleman withhold his objection?

The SPEAKER. The gentleman objects, and the bill will be stricken from the calendar.

DESERT-LAND ENTRIES, CHUCKAWALLA VALLEY, CAL.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 26943) to exempt from cancellation certain desert-land entries in the Chuckawalla Valley and Palo Verde Mesa, Riverside County, Cal.

The bill was read.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The bill will be stricken from the calendar.

EXCHANGE OF SCHOOL LANDS.

The next business on the Calendar for Unanimous Consent was the bill (S. 5068) to authorize the Secretary of the Interior to exchange lands for school sections within an Indian, military, national forest, or other reservation, and for other purposes.

The bill was read.

The SPEAKER. Is there objection?

Mr. MARTIN of South Dakota. Mr. Speaker, I reserve the right to object——

Mr. AKIN of New York. I object, Mr. Speaker.

The SPEAKER. The gentleman from New York objects, and the bill is stricken from the calendar.

STATUE TO THOMAS JEFFERSON.

The next business on the Calendar for Unanimous Consent was the bill (S. 745) providing for the erection of a statue to Thomas Jefferson, at Washington, D. C.

The bill was read.

The SPEAKER. Is there objection?

Mr. COX. Mr. Speaker, I object.

The SPEAKER pro tempore (Mr. GARRETT). The gentleman from Indiana objects and the bill will be stricken from the calendar.

MINING EXPERIMENT STATION, HELENA, MONT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 25990) to establish a mining experiment station at Helena, Lewis and Clark County, Mont., to aid in the development of the mineral resources of the United States, and for other purposes.

The bill was read.

Mr. GREEN of Iowa. Mr. Speaker, I object.

Mr. COX. Mr. Speaker, I object.

Mr. PRAY. Will the gentleman withhold his objection?

Mr. GREEN of Iowa. Certainly.

The SPEAKER pro tempore. The gentleman from Iowa reserved the right to object?

Mr. GREEN of Iowa. I do, but the gentleman from Indiana also objected.

Mr. PRAY. Will the gentleman from Indiana withhold his objection?

Mr. COX. I think we ought to proceed with this matter, but——

Mr. PRAY. Mr. Speaker, I know there were two or three similar bills which were objected to at the last session. They were all meritorious measures like the one now before the House for Montana. I want to say a word or two about this bill. The Secretary of the Interior very strongly recommends the establishment of such stations to aid in the development of the mineral resources of the Western States. Heretofore most of the work of the Bureau of Mines has been in connection with coal-mining investigations and experiments.

The purpose of this bill is to provide for making inquiries and scientific investigations relative to the mining, preparation, treatment, and utilization of ores and other mineral substances, with a view to improving health conditions, increasing safety, efficiency, economic development, and the prevention of waste in the mining, quarrying, metallurgical, and other mineral industries. It is the desire also to facilitate the proper and efficient development of the resources of the public domain. The principal features of this bill are approved by the Secretary of the Interior and the Director of the Bureau of Mines, under whom the station would be operated. The passage of the measure will unquestionably very materially aid in the further development of the mining industry in the great State of Montana, where the extent and variety of mineral wealth and resources are almost without limit.

A question has been raised at the department as to the specific location of the station in the bill, the suggestion being made that if the selection of site were left to the proper officials of the Government the purposes sought to be accomplished might be carried out with greater efficiency and economy It was also intimated that a movable station might result in advantage, but no plans have been considered. Whatever course may be adopted later on in this regard the members of the Committee on Mines and Mining were convinced that Helena, the capital city of the State, situated in the heart of a great mining region, would be the logical point for the establishment of an experiment station in Montana. Railroad facilities are such that all mining sections of the State can be easily reached from this locality.

Agriculture and mining are regarded as the two great foundation industries of the country. No complaint is ever heard about the activities of the Agricultural Department in promoting the interests of the farmer. Lasting benefits have been bestowed upon him and great credit is due the Government. The miner should be accorded similar treatment; but until the establishment of the Bureau of Mines, in May, 1910, no special recognition has even been given him by the Government. It was not until the great mine disasters took place during the first session of the Sixtieth Congress that the people of the country were brought to a full realization of the enormous loss of life and waste of resources constantly going on in the mining and metallurgical industries.

Upon the establishment of the bureau the attention of Director Holmes and his assistants was first directed to coal mines, where over 700 lives had been lost within a month in mine fires and explosions. Mine-rescue and first-aid work was begun, and within a short time was extended throughout the United States. One of the mine-rescue cars was stationed at Billings, Mont., in close proximity to the coal fields of Montana and Wyoming. The work carried on is exceedingly important and the results attained during the past two years have fully justified the effort and expense to the Government. During the year 1911 over 50,000 miners attended the lectures and demonstrations given from the mine-rescue cars. With the increasing complexity of mining conditions throughout the country the need of further extending and developing this service will become more apparent. Experiments conducted at a mining station, such as is proposed by this bill, will in the course of time become indispensable to the mining industry.

There are over 1,500,000 men connected with mining operations in the various States, and thousands of them work under conditions of great hazard and discomfort. Although there are more than 80,000 mines in the country with which these men are associated, it is a significant fact that less than 20 per cent employ more than 10 men to each mine and the great majority employ less than 5 men. The hundreds of applications that are constantly being made to the bureau for information and assistance come very largely from men who are conducting their operations on limited capital.

Complaint was made at first that extension of this work would have a tendency to retard State and private effort. On that subject the Secretary of the Interior, after a careful investigation, made the following statement:

There is no foundation for the fear sometimes expressed that if such investigations as are here recommended be undertaken by the Government private corporations will unload their local problems on the Government laboratories. The result of recent experience has been just the reverse. When, in 1904, the Federal Government began the testing and analyzing of coals and later took up similar investigations of explosives, mine accidents, and mine-rescue work, similar objections were raised in each case; but in every case private corporations and private laboratories have been stimulated to greater activities in the investigation of new problems at their own expense. Nor is there any foundation for the similar objection to the investigation by the Federal Government that this would discourage the States from taking up their own local problems. When the aid of the Federal Government was sought in the establishment of agricultural experiment stations in each of the several States it was claimed that this would discourage similar activity on the part of the States. On the contrary, it has stimulated the States to even greater activity, and after several years of experience and development the aggregate amount now annually expended by the States for buildings and equipment and the maintenance of agricultural experiment stations is far in excess of that now expended by the Federal Government.

Since the establishment of the United States Geological Survey the number as well as the activities of the State geological surveys has largely increased. The testing of coals by the Federal Government has stimulated to similar activity at their own expense not only many private mining companies, but many States, municipalities, private institutions, and private manufacturing corporations.

And so it will be with the investigations of the Bureau of Mines in behalf of the mining industry; they will stimulate local inquiries and investigations by both the State and private corporations; they will neither compete with nor interfere with, but will rather increase, the work of the private laboratories.

I regret that gentlemen have decided to object to consideration of this bill. This is probably the last opportunity that will be given for its consideration at this session, which will expire in a few days.

There are two other bills on this calendar of importance to my State which will be reached later in the afternoon, and I hope they may be given consideration. One is to accept cession by the State of Montana of exclusive jurisdiction over the territory embraced within the Glacier National Park. This bill is strongly recommended by the Secretary of the Interior and is based upon the acts of Congress for the administration of the Yellowstone National Park and Hot Springs Reservation. Without the authority conferred by this bill the Secretary is unable to take care of the park property and protect the fish and game within the park boundaries. I read a communication recently from Supt. Galen, of the Glacier Park, urging favorable action on this bill and stating that it was absolutely necessary for the proper discharge of the duties imposed upon him.

A similar House bill which I reported from the Public Lands Committee was placed on this calendar at the last session, but was objected to on the ground that it would consume too much time in consideration under unanimous consent. Inasmuch as the bill was read at length to the House at the last session very little time ought to be required to act upon it this afternoon. The other bill referred to provides for the opening of the abandoned Fort Assinniboine Reservation to homestead settlement, and is supported by a favorable report from the Secretary of the Interior and a unanimous report from the Committee on the Public Lands. This reservation was abandoned by the War Department and turned over to the Interior Department a year ago last November. It consists of about 175,000 acres of arid land, and is situated 50 miles south of the Canadian line, about 7 miles from the city of Havre. In addition to the usual land-office fees a charge of $2.50 per acre is made upon applications filed within six months subsequent to the date of opening. A tract of land consisting of 640 acres, embracing the Government buildings at Assinniboine, is reserved from the operation of this act for the purpose of enabling the State of Montana to establish an agricultural, manual training, or other educational or public institution. The Secretary's favorable recommendation is in harmony with his report proposing a similar grant of lands within the former Lemhi Reservation to the State of Idaho. Both bills are meritorious and ought to have favorable action at this session.

The SPEAKER pro tempore. The gentleman from Iowa objects and the gentleman from Indiana [Mr. Cox] also objects, and the bill will be stricken from the calendar.

RELEASING CLAIM OF UNITED STATES TO LOT 306, PENSACOLA, FLA.

The next business on the Calendar for Unanimous Consent was the bill (S. 5377) releasing the claim of the United States Government to lot No. 306 in the old city of Pensacola.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MICHAEL E. DRISCOLL. Mr. Speaker, I object.

The SPEAKER pro tempore. The gentleman from New York objects, and the bill will be stricken from the calendar.

RELEASE OF LANDS IN THE OLD CITY OF PENSACOLA.

The next business on the Calendar for Unanimous Consent was the bill S. 5378, an act releasing the claim of the United States Government to that portion of land, being a fractional block, bounded on the north and east by Bayou Cadet, on the west by Cevallos Street, and on the south by Intendencia Street, in the old city of Pensacola.

The bill was read, as follows:

Be it enacted, etc., That the United States hereby remises, releases, and quitclaims unto George W. Wright, Mattie La Rua, the heirs of W. D. Chipley, and the heirs of William Fisher, and their assigns, all that portion of the fractional block bounded on the north and east by Bayou Cadet, on the west by Cevallos Street, and on the south by Intendencia Street, in the old city of Pensacola, Escambia County, Fla.

Also the following committee amendments were read:

Strike out all after the enacting clause down to and including line 9 and insert:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to issue a patent remising, releasing, and quitclaiming forever all right, title, claim, and interest of the United States of America in and to that portion of land, being a fractional block, bounded on the north and east by Bayou Cadet, on the west by Cevallos Street, and on the south by Intendencia Street, in the old city of Pensacola, in the county of Escambia and the State of Florida, to such person or persons, firms or corporations, as shall make proof that he himself, or he and his grantor or grantors, has had continuous possession thereof under claim of ownership during the last 20 years next before the passage of this act. Such patent, however, shall be subject to any public easement or other adverse right suffered or granted by the patentee or his grantors.

The SPEAKER pro tempore. Is there objection?

Mr. MICHAEL E. DRISCOLL. I object.

Mr. MANN. Will the gentleman reserve the right to object?

Mr. MICHAEL E. DRISCOLL. I thought you wanted to save time.

Mr. MANN. I do not wish to save time at the expense of a bill that ought to be passed. I have no interest in this bill, but it ought to be passed.

The SPEAKER pro tempore. Does the gentleman from New York [Mr. MICHAEL E. DRISCOLL] object?

Mr. MICHAEL E. DRISCOLL. I reserve the objection.

Mr. MANN. Has the gentleman any special objection to the bill?

Mr. MICHAEL E. DRISCOLL. It looks to me like squatting on the land.

Mr. DENT. May I interrupt the gentleman from Illinois [Mr. MANN]? I reported this bill, but I did not introduce it. The author of it is the gentleman from Florida [Mr. MAYS].

Mr. MANN. This is a Senate bill.

Mr. DENT. I mean that he introduced a similar bill in the House. He is absent now on a Panama trip with a committee. This bill simply undertakes to quiet the title growing out of the occupation of this territory by Spain, and those claiming title have been in the undisputed possession of this property ever since some time during the forties. In fact, the property was divided under decree of partition by the court, as I recall the facts, some time in the early part of the forties. The House bill changes the Senate bill to this extent only. The Senate quitclaims the title in favor of the particular parties now in possession of the property.

Mr. MICHAEL E. DRISCOLL. To save time, I will withdraw the objection.

The SPEAKER pro tempore. Does the gentleman from New York [Mr. MICHAEL E. DRISCOLL] withdraw his objection?

Mr. MICHAEL E. DRISCOLL. I withdraw the objection.

Mr. MILLER. I withhold the right to object.

Mr. AUSTIN. Mr. Speaker, I demand the regular order on this bill.

The SPEAKER pro tempore. The regular order is the objection.

Mr. MILLER. I object.

LAUNCH FOR THE CUSTOMS SERVICE, LOS ANGELES, CAL.

The next business on the Calendar for Unanimous Consent was the bill (S. 3625) for the purchase or construction of a launch for the customs service at and in the vicinity of Los Angeles, Cal.

The bill and the committee amendment were read.

The SPEAKER pro tempore. Is there objection?

Mr. COX. I object.

Mr. BATHRICK. I object, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Indiana [Mr. Cox] and the gentleman from Ohio [Mr. BATHRICK] object. The Clerk will report the next bill.

SITE FOR IMMIGRATION STATION, BALTIMORE, MD.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28280) to authorize the use as a site for the United States immigration station and grounds at the port of Baltimore of a piece of land acquired by the United States about the year 1836 as part of an addition to Fort McHenry, in the State of Maryland, and which is now under the control of the War Department, and authorizing the Secretary of the Treasury to acquire an outlet therefrom to the city streets and to contract and arrange for necessary railroad facilities.

The bill was read.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. AKIN of New York. I object.

The SPEAKER pro tempore. The gentleman from New York [Mr. AKIN] objects, and the bill will be stricken from the calendar.

FOREST RESERVATIONS, STATE OF CALIFORNIA.

The next business on the Calendar for Unanimous Consent was the bill (S. 8279) to amend an act approved October 1, 1890, entitled "An act to set apart tracts of land in the State of California as forest reservations."

The bill was read.

The SPEAKER. Is there objection?

Mr. DAVIDSON. Mr. Speaker, I object.

Mr. RAKER. Will not the gentleman kindly reserve his objection for a moment? I would like to say to the gentleman that this is——

Mr. AUSTIN. Mr. Speaker, I demand the regular order.

The SPEAKER. If the gentleman from Wisconsin [Mr. DAVIDSON] insists on his objection, that is the end of it.

Mr. DAVIDSON. I insist on the objection.

Mr. RAKER. Mr. Speaker, I will ask the gentleman if he will not consent to give me two minutes' time in regard to this bill that has just been passed over? I am satisfied if he does there will be no man in the House who will object to it.

Mr. GREEN of Iowa. Regular order!

Mr. MANN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. RAKER] may have two minutes.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from California [Mr. RAKER] shall have two minutes in which to explain the bill. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I want to say to the House that the main purpose of this bill is to extend the time of leases of land in the Yosemite Valley from 10 years, as it is now, to 20 years, to the end that the Secretary of the Interior may grant a lease to those who are willing to expend from $250,000 to $700,000 in putting up a proper hotel and other necessary buildings in that park, with the right to lease under such proper conditions as may be prescribed by the Secretary, and always under his control and reservation, giving the lessee full opportunity to mortgage, subject to the control of the Secretary of the Interior, and when the time expires the private individual who takes the second lease shall pay a reasonable price to the first lessee.

The Secretary of the Interior has been willing and the people of California and the West have been asking for 10 years to get men to take a lease and build such a hotel. Practically all arrangements have been made to the end that there shall be a hotel built there, costing private individuals at least $500,000, and without a sufficient length of time of 20 years no man will go into that park and put the money in. He can not afford to do it.

The entire State of California and the West are asking and pleading this House to give this legislation in order that the proper improvement may be made, and I earnestly ask the gentleman who made the objection if he can not see his way clear to let this bill pass the House. It has already passed the Senate without amendment, is fully recommended by the Secretary of the Interior and all the officers concerned, and is recommended by all the organizations in the State of California and throughout the West. It is to the interest of the public service and not to the interest of any private individual. The hotel that is there now is a disgrace to this country.

The SPEAKER. The time of the gentleman from California has expired.

Mr. RAKER. Would not the gentleman withhold his objection?

Mr. DAVIDSON. No; I insist on my objection.

The SPEAKER. The gentleman from Wisconsin [Mr. DAVIDSON] insists on his objection, and the bill is stricken from the calendar.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD, chairman of the Committee on Appropriations, by direction of that committee, reported the bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union and, with the accompanying report (No. 1526), ordered to be printed.

Mr. MANN. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Illinois [Mr. MANN] reserves all points of order on the bill.

NORTHEASTERN DIVISION, NORTHERN JUDICIAL DISTRICT OF GEORGIA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 25781) to amend section 77 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 77 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended to read as follows:

"SEC. 77. The State of Georgia is divided into two districts, to be known as the northern and southern districts of Georgia. The northern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Campbell, Carroll, Clayton, Cobb, Coweta, Cherokee, Dekalb, Douglas, Fannin, Fayette, Fulton, Gilmer, Gwinnett, Henry, Milton, Newton, Pickens, Rockdale, and Spalding, which shall constitute the northern division of said district; also the territory embraced on the date last mentioned in the counties of Clarke, Elbert, Franklin, Greene, Hart, Jackson, Morgan, Madison, Oglethorpe, Oconee, and Walton, which shall constitute the eastern division of said district; also the territory embraced on the date last mentioned in the counties of Chattahoochee, Clay, Early, Harris, Heard, Meriwether, Marion, Muscogee, Quitman, Randolph, Schley, Stewart, Talbot, Taylor, Terrell, Troup, and Webster, which shall constitute the western division of said district; also the territory embraced on the date last mentioned in the counties of Bartow, Chattooga, Catoosa, Dade, Floyd, Gordon, Haralson, Murray, Paulding, Polk, Walker, and Whitfield, which shall constitute the northwestern division of said district; also the territory embraced on the date last mentioned in the counties of Hall, White, Lumpkin, Dawson, Forsyth, Banks, Habersham, Stephens, Rabun, Towns, and Union, which shall constitute the northeastern division of said district. Terms of the district court for northern division of said district shall be held at Atlanta on the second Monday in March and the first Monday in October; for the eastern division, at Athens on the second Monday in April and the first Monday in November; for the western division, at Columbus on the first Mondays in May and December; for the northwestern division, at Rome on the third Mondays in May and November; and for the northeastern division, at Gainesville on the fourth Mondays in April and November. The clerk of the court for northern district shall maintain an office in charge of himself or a deputy at Athens, at Columbus, at Rome, and at Gainesville, which shall be kept open at all times for the transaction of the business of the court. The southern district shall include the territory embraced on the said 1st day of July, 1910, in the counties of Appling, Bulloch, Bryan, Camden, Chatham, Emanuel, Effingham, Glynn, Jeff Davis, Liberty, Montgomery, McIntosh, Screven, Tattnall, Toombs, and Wayne, which shall constitute the eastern division of said district; also the territory embraced on the date last mentioned in the counties of Baldwin, Bibb, Butts, Crawford, Dodge, Dooly, Hancock, Houston, Jasper, Jones, Laurens, Macon, Monroe, Pike, Pulaski, Putnam, Sumter, Telfair, Twiggs, Upson, Wilcox, and Wilkinson, which shall constitute the western division; also the territory embraced on the date last mentioned in the counties of Burke, Columbia, Glascock, Jefferson, Jenkins, Johnson, Lincoln, McDuffie, Richmond, Taliaferro, Washington, Wilkes, and Warren, which shall constitute the northeastern division; also the territory embraced on the date last mentioned in the counties of Berrien, Brooks, Charlton, Clinch, Coffee, Decatur, Echols, Grady, Irwin, Lowndes, Pierce, Thomas, and Ware, which shall constitute the southwestern division; and also the territory embraced on the date last mentioned in the counties of Baker, Ben Hill, Calhoun, Crisp, Colquitt, Dougherty, Lee, Miller, Mitchell, Tift, Turner, and Worth, which shall constitute the Albany division. Terms of the district court for the western division shall be held at Macon on the first Mondays in May and October; for the eastern division at Savannah on the second Tuesdays in February, May, August, and November; for the northeastern division, at Augusta on the first Monday in April and the third Monday in November; for the southwestern division, at Valdosta on the second Mondays in June and December; and for the Albany division at Albany on the third Mondays in June and December."

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Amend, page 3, by inserting after the word "November," in line 7, the following: "*Provided*, That suitable rooms and accommodations for holding court at Gainesville shall be furnished free of expense to the Government."

The SPEAKER. Is there objection?

Mr. WHITACRE. Mr. Speaker, I object.

The SPEAKER. The gentleman from Ohio [Mr. WHITACRE] objects, and the bill is stricken from the calendar. The Clerk will report the next bill.

Mr. MANN. Mr. Speaker, this is one of those bills of which we have passed so many. Is the gentleman from Ohio [Mr. WHITACRE] really objecting to the bill, or objecting to the taking of it up for consideration? Well, if gentlemen are going to object to bills like this that are purely local in a State, dividing up judicial districts——

The SPEAKER. It is not debatable.

Mr. MANN. Well, I know it is not debatable, but I make the point of order that there is no quorum present if gentlemen do not want to be fair.

Mr. WHITACRE. Mr. Speaker, I withdraw my objection.

Mr. MANN. Then I will withdraw my point of order.

The SPEAKER. The gentleman from Ohio [Mr. WHITACRE] withdraws his objection, and the gentleman from Illinois [Mr. MANN] withdraws his point of order. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the committee amendment.

The Clerk read as follows:

Amend, page 3, by inserting after the word "November," in line 7, the following: "*Provided*, That suitable rooms and accommodations for holding court at Gainesville shall be furnished free of expense to the Government."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BELL of Georgia, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS MONONGAHELA RIVER, W. VA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 27837) to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River in the State of West Virginia.

The bill was read, as follows:

Be it enacted, etc., That the Buckhannon & Northern Railroad Co., a corporation organized under the laws of the State of West Virginia, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Monongahela River, near Catawba, from a point suitable to the interests of navigation, on the left shore of said river above the mouth of Pricketts Creek, a southern tributary to said river in Paw Paw district, to a point on the right shore of said river above the mouth of said Pricketts Creek in Winfield district, all in the county of Marion, in the State of West Virginia, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906. Said bridge shall be constructed for the passage of railway trains propelled by steam, electric, or other power, and at the option of the corporation for which it is built may be used for the passage of wagons and vehicles of all kinds, for the transit of animals, and for foot passengers, for a reasonable rate of toll, to be fixed by said company and approved by the Secretary of War. Said bridge shall be commenced within one year from the time this act goes into effect and completed within three years thereafter.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 1, line 10, after the word "point," insert the words "suitable to the interests of navigation."

Page 2, strike out lines 7 to 16, inclusive.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. If there be no objection, the committee amendments will be considered as agreed to.

Mr. MANN. Mr. Speaker, the first committee amendment ought to be disagreed to.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 10, after the word "point," strike out the words "suitable to the interests of navigation."

Mr. MANN. Mr. Speaker, that language is already in the bill in lines 7 and 8, and ought not to be duplicated.

Mr. CULLOP. I should like to call the attention of the gentleman from Illinois to the fact that if I remember correctly, when the bill was considered in the committee, we found that it was necessary to insert this language at that point because of the manner in which it is inserted below. If the gentleman will examine it, he will see that the bill only makes it from a point suitable to the interests of navigation on the left shore.

Mr. MANN. This is the form we have always used:

From a point suitable to the interests of navigation on the left side to a point on the right side.

Mr. CULLOP. The committee thought otherwise at the time the bill was considered.

Mr. MANN. This is the only time, however, when the committee has ever reported such an amendment.

Mr. CULLOP. And this is the only time, perhaps, in this Congress that a bill in that peculiar language has been presented here.

Mr. MANN. Every bill is in practically the same form.

Mr. CULLOP. Not as this one.

Mr. MANN. As a rule it is from a point on one side of the river to a point on the other side of the river.

The SPEAKER. The question is on the first committee amendment.

The amendment was rejected.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

Amend, page 2, by striking out all of lines 7 to 16, inclusive.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

PERSONNEL OF THE REVENUE-CUTTER SERVICE.

The next business on the Calendar for Unanimous Consent was the bill (S. 7461) construing the provisions of section 8 of the act entitled "An act to improve the efficiency of the personnel of the Revenue-Cutter Service," approved April 16, 1908.

The bill was read, as follows:

Be it enacted, etc., That in computing the length of service which shall entitle a warrant or petty officer to longevity pay under the eighth section of the act approved April 16, 1908, entitled "An act to improve the efficiency of the personnel of the Revenue-Cutter Service," all service rendered under the official designation of "pilot" in the Revenue-Cutter Service shall be included.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. COX. Mr. Speaker, reserving the right to object, I would like an explanation of this bill. I find that the Senate report is about four or five lines long and the House report is eight lines long.

Mr. MANN. I will say to my friend from Indiana that the bill will not bear explanation.

Mr. CALDER. Mr. Speaker, if this bill is enacted into law, it will give to seven men formerly employed as pilots the longevity pay to which they would be entitled if their titles had been properly construed when the law was originally enacted.

Mr. MANN. And it would, as I understand it, allow an increase of longevity pay to these men from 1908 down to date, amounting to in the neighborhood, altogether, of $15,000 to date, not to mention the amount that might be paid in the future. In my judgment, it is on a parallel with the construction of longevity pay dated from the entrance to Annapolis and West Point, and I think it has gone quite far enough.

Mr. COX. Then, Mr. Speaker, I object.

The SPEAKER. The gentleman from Indiana objects. The bill will be stricken from the calendar.

BRIDGE OVER GREAT KANAWHA RIVER.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28187) to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes.

The bill was read, as follows:

Be it enacted, etc., That the county court of Kanawha County, W. Va., is hereby authorized to construct, maintain, and operate a wagon and foot bridge and approaches thereto, for the use of the public, across and over the Great Kanawha River, at a point suitable to the interests of navigation, at or near the city of Charleston, Kanawha County, W. Va.

SEC. 2. That the construction, maintenance, and operation of said bridge herein authorized shall be in all respects in accordance with and subject to the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

With the following committee amendments:

Page 1, line 5, strike out the words "wagon and foot."
Page 1, lines 5 and 6, strike out the words "for the use of the public."
Page 1, strike out lines 9 and 10.
Page 2, line 1, strike out "and subject to."
Page 2, add after line 4:
"SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved."

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS YELLOWSTONE RIVER, N. DAK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28021) authorizing the Minneapolis, St. Paul & Sault Ste. Marie Railway Co. to build a bridge across the Yellowstone River in sections 15 and 16, township 151 north, range 104 west of the fifth principal meridian, in the State of North Dakota.

The Clerk read the title to the bill.

Mr. STEVENS of Minnesota. Mr. Speaker, I ask unanimous consent to substitute the bill S. 8089, of a similar tenor, on the Speaker's table. This bill is in a long form, while the Senate bill is in the proper form.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to substitute the Senate bill of a like tenor for the House bill, and that the House bill lie on the table. Is there objection?

There was no objection.

The Clerk read the bill (S. 8089) permitting the building of a railroad bridge across the Yellowstone River from a point on the east bank in section 15 to a point on the west bank in section 16, township 151 north of range 104 west of the fifth principal meridian, in McKenzie County, N. Dak., as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Minneapolis, St. Paul & Sault Ste. Marie Railway Co., a railway corporation organized under the laws of the States of Michigan, Wisconsin, Minnesota, and North Dakota, its successors or assigns, to build a railway bridge across the Yellowstone River from a point on the east bank in section 15 to a point on the west bank in section 16, township 151 north of range 104 west of the fifth principal meridian, in McKenzie County, N. Dak., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That this act shall be null and void unless the bridge herein authorized be commenced within one year and completed within two years from the date of approval of this act.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. MANN. Mr. Speaker, I move to strike out section 2 of the bill. It is already covered by the general bridge law.

The question was taken, and the amendment was agreed to.

Mr. HELGESEN. Mr. Speaker, I move to amend by inserting on page 1, line 8, after the word "point" the following words: "at a point suitable to the interests of navigation."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 1, line 8, after the word "point" by inserting the words "at a point suitable to the interests of navigation."

The amendment was agreed to.

The Senate bill as amended was ordered to be read a third time, was read the third time, and passed.

ISSUE OF PATENTS AND SURVEYS OF PRIVATE LAND CLAIMS.

The next business on the Calendar for Unanimous Consent was the bill (S. 6781) in reference to the issuance of patents and copies of surveys of private land claims.

The Clerk read the bill at length, with committee amendments.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, does this bill practically accomplish anything except to release to owners of private land claims in New Mexico about $2,500 which they would otherwise have to pay in order to obtain patents and copies of plats of surveys?

Mr. FERGUSSON. About that amount.

Mr. MANN. Why should we release to these owners of large tracts of land, which they obtained without any consideration in the first place, the payment of that sum of money?

Mr. FERGUSSON. The object is to make uniformity as to the delivery of patents in private land claims. When the private land claim court was created in 1891 that had charge of settling the Spanish claims for New Mexico, it was provided that the United States should pay half and the claimant the other half of the surveys. That was on the theory, as I understand it, that in ascertaining the part of a land claim rejected it was necessary for the Government to ascertain the facts by surveying a large quantity of land owned by the Government, and in order to make it uniform this bill provides that the same method shall be pursued with reference to private land claims—to make it applicable to all other land claims. That seems to be fair and reasonable, because in ascertaining the land that belongs to the individual the Government ascertains the boundaries of its own land. It is of joint benefit to both to have this survey.

Mr. MANN. What is the area of private land claims in New Mexico?

Mr. FERGUSSON. I do not know personally, but the report is full on the subject. It contains two letters from the department.

Mr. MANN. There are millions of acres.

Mr. FERGUSSON. I think this bill will apply——

Mr. AUSTIN. Mr. Speaker, I demand the regular order.

The SPEAKER. The gentleman from Tennessee demands the regular order, which is to ascertain if there is objection to the present consideration of this bill.

Mr. MANN. I object. I think, Mr. Speaker, we had better keep a quorum in the House as the gentleman from Tennessee seems anxious to get at the public buildings bill.

The SPEAKER. Does the gentleman from Illinois raise the point of no quorum?

Mr. MANN. I do; and I think we will have to keep a quorum here the rest of the afternoon.

Mr. AUSTIN. I think we can keep them here.

Mr. MANN. I would not be surprised.

The SPEAKER (after counting). One hundred and thirty Members present—not a quorum.

Mr. GARRETT. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Ames	Fairchild	Jones	Peters
Andrus	Farr	Kitchin	Porter
Ansberry	Ferris	Knowland	Pou
Ayres	Flood, Va.	Korbly	Pujo
Barchfeld	Focht	Lafean	Rainey
Broussard	Gardner, N. J.	Lafferty	Randell
Brown	George	Levy	Rauch
Buchanan	Gill	Lewis	Redfield
Burke, Pa.	Gillett	Lindsay	Reyburn
Burleson	Gray	Littleton	Richardson
Carter	Greene, Vt.	McCall	Riordan
Cline	Guernsey	McGuire, Okla.	Scully
Conry	Hamill	Maher	Sims
Copley	Hamilton, W. Va.	Matthews	Smith, J. M. C.
Covington	Hammond	Mays	Speer
Crumpacker	Harris	Moon, Pa.	Stack
Curley	Harrison, N. Y.	Morgan, La.	Stephens, Tex.
Curry	Hart	Morgan, Okla.	Taggart
Danforth	Hawley	Morse	Talbott, Md.
Davenport	Hayes	Murray	Taylor, Ohio
Davis, Minn.	Holland	Nelson	Thayer
Dixon, Ind.	Howell	Olmsted	Tilson
Donohoe	Hughes, Ga.	Palmer	Underwood
Driscoll, D. A.	Hull	Parran	Vare
Ellerbe	Johnson, Ky.	Patten, N. Y.	Wilson, Ill.
Evans	Johnson, S. C.	Pepper	Wilson, N. Y.

The SPEAKER. On this call 277 Members have answered to their names, a quorum.

Mr. GARRETT. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

DESERT-LAND ENTRIES IN THE CHUCKAWALLA VALLEY.

The next business on the Calendar for Unanimous Consent was the bill (S. 7875) to exempt from cancellation certain desert-land entries in the Chuckawalla Valley and Palo Verde Mesa, Riverside County, Cal.

The Clerk read the bill.

The SPEAKER. Is there objection?

Mr. AUSTIN. I object.

The SPEAKER. The gentleman from Tennessee objects, and the bill will be stricken from the calendar.

KIOWA, COMANCHE, AND APACHE CEDED LANDS, OKLAHOMA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28191) authorizing the extension of payments on certain town lots in the Kiowa, Comanche, and Apache ceded lands in Oklahoma.

The Clerk read the bill with committee amendments.

The SPEAKER. Is there objection?

Mr. AUSTIN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Tennessee objects to the consideration of the bill, and the bill will be stricken from the calendar.

STEAMBOAT INSPECTORS, LOS ANGELES, CAL.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28524) to create a board of local inspectors, Steamboat Inspection Service, for the port of Los Angeles, Cal.

The Clerk read the bill.

Mr. AUSTIN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Tennessee objects, and the bill will be stricken from the calendar.

CONTRACTS FOR TRANSFERRING FOREIGN MAIL.

The next business on the Calendar for Unanimous Consent was House resolution 778, directing the Committee on the Post Office and Post Roads to institute and carry forward an investigation into the letting of contracts, and so forth.

The Clerk read the resolution.

The SPEAKER. Is there objection?

Mr. AUSTIN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Tennessee objects, and the resolution will be stricken from the calendar.

HOTEL ON FORT HUACHUCA MILITARY RESERVATION, ARIZ.

The next business on the Calendar for Unanimous Consent was the bill (S. 6898) authorizing the Secretary of War to grant permission for the erection of a hotel on the Fort Huachuca Military Reservation, in Arizona.

The bill was read.

The SPEAKER. Is there objection?

Mr. BURNETT. Mr. Speaker, I object.

Mr. HAYDEN. Mr. Speaker, I hope the gentleman will withhold his objection.

The SPEAKER. The gentleman from Alabama objects, and the bill will be stricken from the calendar.

LOAN OF TENTS TO HELLA TEMPLE, DALLAS, TEX.

The next business on the Calendar for Unanimous Consent was Senate joint resolution 143, authorizing the Secretary of War to loan certain tents for use at the meeting of the Imperial Council of the Ancient Arabic Order of the Nobles of the Mystic Shrine, to be held at Dallas, Tex., in May, 1913.

The Clerk read as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to loan, at his discretion, to the executive committee of Hella Temple of the Ancient Arabic Order of the Nobles of the Mystic Shrine, at Dallas, Tex., having in charge the arrangements for the meeting of the imperial council of said order, to be held in Dallas, Tex., in May, 1913, such tents, with necessary flies, poles, ridges, and pins for each, as may be required at said meeting: *Provided*, That no expense shall be caused the United States Government by the delivery and return of such property, the same to be delivered to said executive committee of Hella Temple at such time prior to the date of such meeting as may be agreed upon by the Secretary of War and Mike H. Thomas, chairman of said executive committee: *Provided further*, That the Secretary of War shall, before delivering such property, take from said Mike H. Thomas a good and sufficient bond for the safe return of said property in good order and condition, the whole transaction to be without expense to the Government of the United States: *Provided further*, That hereafter no loan of tents shall be made except to the Grand Army of the Republic and the Confederate Veterans Association.

Mr. MANN. Mr. Speaker, reserving the right to object, and reserving a point of order on the bill, I take it that this bill belongs on the Union Calendar, although it is on the House Calendar. Apparently this Senate joint resolution says this is a very wicked thing to do; we will do it now, but we will never do it again. The resolution provides for the loaning of certain tents to an order, and then puts in this provision: "That hereafter no loan of tents shall be made except to the Grand Army of the Republic and the Confederate Veterans Association." If we ought not to make a loan of tents hereafter, then we ought not to make any now.

Mr. BEALL of Texas. Will the gentleman yield for a question?

Mr. MANN. Certainly.

Mr. BEALL of Texas. I think that is a very needless and useless provision, and if unanimous consent is given I shall move to strike out the last proviso.

Mr. MANN. Well, I see that the Masonic order is even stronger in the House than the pork barrel, and I shall not object.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. BEALL of Texas. Mr. Speaker, I desire to offer an amendment. I move to amend by striking out all after the word "States," in line 11, page 2, down to the end of the bill.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

On page 2, strike out the proviso beginning on line 11.

Mr. MANN. Mr. Speaker, I ask to have it read.

The Clerk read as follows:

Provided further, That hereafter no loan of tents shall be made except to the Grand Army of the Republic and the Confederate Veterans Association.

The SPEAKER. Without objection, the amendment will be agreed to.

Mr. FOSTER. Mr. Speaker, I object to that.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Senate joint resolution as amended was ordered to be read a third time, was read the third time, and passed.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows

To Mr. HART, for five days, on account of illness.

To Mr. LITTLEPAGE, for three days, on acount of important business.

FORT ASSINNIBOINE MILITARY RESERVATION.

The next business on the Calendar for Unanimous Consent was the bill (S. 5138) authorizing the Secretary of the Interior

to survey the lands of the abandoned Fort Assiniboine Military Reservation and open the same to settlement.

The bill was read.

The SPEAKER pro tempore (Mr. BARNHART). Is there objection?

Mr. EDWARDS. Mr. Speaker, I object.

The SPEAKER pro tempore. The bill will be stricken from the calendar.

Mr. RAKER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. RAKER. I wonder whether or not there is any particular reason that these bills are objected to, or whether the fact that H. R. 28766 might come up to-day has anything to do with the taking of all these bills off the calendar? [Cries of "Regular order!"]

The SPEAKER pro tempore. The Chair can not undertake to say what is in the minds of Members. The regular order is demanded, and the Clerk will report the next bill.

GLACIER NATIONAL PARK.

The next business on the Calendar for Unanimous Consent was the bill (S. 7318) to accept the cession by the State of Montana of exclusive jurisdiction over the lands embraced within the Glacier National Park, and for other purposes.

The Clerk began the reading of the bill.

Mr. MANN. Reserving the right to object——

Mr. AUSTIN. Mr. Speaker, I demand the regular order.

Mr. HAMLIN. I think it is not worth while to take up the bill. I shall object to it——

Mr. MANN. It is a wonder the gentleman did not think of that before the reading was interrupted. The bill has only been read about half through. I was going to give a good reason for objecting to it.

Mr. HAMLIN. I do not doubt the gentleman has a good reason——

Mr. CLAYTON. Mr. Speaker——

The SPEAKER. It is not debatable.

Mr. CLAYTON. I know that; but I would like to have one minute to make a statement.

The SPEAKER. The gentleman from Alabama asks unanimous consent to speak for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. CLAYTON. Mr. Speaker, this bill seems to empower the commissioner of the park to try, convict, fine, and imprison for violation of law and park rules without court proceeding and without the intervention of a trial by jury. And therefore, if it had not been objected to, I would have objected to it on that ground.

The SPEAKER. The gentleman from Missouri [Mr. HAMLIN] and the gentleman from Tennessee [Mr. AUSTIN] both object.

Mr. AUSTIN. Mr. Speaker, I did not object to the consideration of the bill. I objected to the reservation of the objection.

DONATION OF CONDEMNED CANNON AND CANNON BALLS.

The next business on the Calendar for Unanimous Consent was the bill (S. 8273) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls.

Mr. MONDELL. Mr. Speaker, I object to the consideration of this bill.

The SPEAKER. The gentleman from Wyoming [Mr. MONDELL] objects, and the bill will be stricken from the calendar.

COAL LANDS FOR MUNICIPAL PURPOSES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 26200) granting cities and incorporated towns coal lands for municipal purposes.

Mr. AUSTIN. Mr. Speaker, I object to the consideration of this bill.

The SPEAKER. The gentleman from Tennessee [Mr. AUSTIN] objects to the consideration of this bill, and it will be stricken from the calendar.

BRIDGE ACROSS MISSOURI RIVER.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28022) authorizing the Minneapolis, St. Paul & Sault Ste. Marie Railway Co. to build a bridge across the Missouri River in sections 14 and 15, township 152 north, range 93 west of the fifth principal meridian, in the State of North Dakota.

Mr. HELGESEN. Mr. Speaker, I ask unanimous consent that the bill S. 8090 be substituted for this one and that the latter lie on the Speaker's table.

The SPEAKER. The gentleman from North Dakota [Mr. HELGESEN] asks unanimous consent that the Senate bill 8090 be substituted for the bill H. R. 28022, they being of similar tenor, and that the House bill lie on the table. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the Senate bill.

The Clerk read as follows:

An act (S. 8090) permitting the building of a railroad bridge across the Missouri River from a point on the east bank in section 14, Mountrail County, N. Dak., to a point on the west bank of said river in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west of the fifth principal meridian.

Be it enacted, etc., That the consent of Congress is hereby granted to the Minneapolis, St. Paul & Sault Ste. Marie Railway Co., a railway corporation organized under the laws of the States of Michigan, Wisconsin, Minnesota, and North Dakota, its successors and assigns, to build a railway bridge across the Missouri River from a point on the east bank in section 14, Mountrail County, N. Dak., to a point on the west bank of said river in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west of the fifth principal meridian, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That this act shall be null and void unless the bridge herein authorized be commenced within one year and completed within two years from the date of approval of this act.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. HELGESEN. Mr. Speaker, I move to amend by inserting after the word "point," page 1, line 8, "suitable to the interests of navigation."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 8, after the word "point," insert the words "suitable to the interests of navigation."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. HELGESEN. Mr. Speaker, I move to strike out section 2, and have section 3 numbered "section 2."

The SPEAKER. The gentleman from North Dakota [Mr. HELGESEN] moves to strike out section 2, and number section 3 as "section 2."

The amendment was agreed to.

The bill as amended was ordered to a third reading, was read a third time, and passed.

DONATION OF CONDEMNED CANNON AND CANNON BALLS.

Mr. MONDELL. Mr. Speaker, I objected a moment ago to the consideration of the bill S. 8273, an act authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls. I withdraw my objection.

The SPEAKER. The bill was ordered stricken from the calendar.

Mr. MANN. It is off the calendar.

Mr. KENDALL. Regular order, Mr. Speaker.

INTERSTATE TELEGRAPH AND TELEPHONE MESSAGES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 3010) to fix the requirements governing the receipt, transmission, and delivery, and the preservation of messages of interstate telegraph and telephone companies.

The SPEAKER. Is there objection to consideration of the bill?

Mr. ADAIR. Mr. Speaker, I object.

The SPEAKER. The gentleman from Indiana [Mr. ADAIR] objects and the bill is stricken from the calendar.

JUDICIAL DISTRICTS IN IOWA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 28635) to amend section 81 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary."

Mr. KENDALL. Mr. Speaker, this is a lengthy bill, although it accomplishes only one purpose, namely, the transfer of one county in Iowa from the southern judicial district to the northern judicial district. I make this suggestion, because, if time is to be consumed, it ought to be consumed in the reading of the bill. The judges of both courts in Iowa, and the bar in each division, join in a petition that this bill be passed, and the Department of Justice recommends it.

The SPEAKER. The Clerk will report the bill.

Mr. KENDALL. If it is going to be objected to, the time of the House should not be taken up with it.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 81 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended so as to read as follows:

"SEC. 81. The State of Iowa is divided into two judicial districts, to be known as the northern and southern districts of Iowa. The northern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Allamakee, Dubuque, Buchanan, Clayton, Delaware, Fayette, Winneshiek, Howard, Chickasaw, Bremer, Blackhawk, Floyd, Mitchell, and Jackson, which shall constitute the eastern division of said district; also the territory embraced on the date last mentioned in the counties of Jones, Cedar, Linn, Johnson, Iowa, Benton, Tama, Grundy, and Hardin, which shall constitute the Cedar Rapids division;

also the territory embraced on the date last mentioned in the counties of Emmet, Palo Alto, Pocahontas, Calhoun, Carroll, Kossuth, Humboldt, Webster, Winnebago, Hancock, Wright, Hamilton, Worth, Cerro Gordo, Franklin, and Butler, which shall constitute the central division; also the territory embraced on the date last mentioned in the counties of Dickinson, Clay, Buena Vista, Sac, Osceola, O'Brien, Cherokee, Ida, Lyon, Sioux, Plymouth, Woodbury, and Monona, which shall constitute the western division. Terms of the district court for the eastern division shall be held at Dubuque on the fourth Tuesday in April and the first Tuesday in December, and at Waterloo on the second Tuesdays in May and September; for the Cedar Rapids division, at Cedar Rapids on the first Tuesday in April and the fourth Tuesday in September; for the central division at Fort Dodge on the second Tuesdays in June and November; and for the western division, at Sioux City on the fourth Tuesday in May and the third Tuesday in October. The southern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Louisa, Henry, Des Moines, Lee, and Van Buren, which shall constitute the eastern division of said district; also the territory embraced on the date last mentioned in the counties of Marshall, Story, Boone, Greene, Guthrie, Dallas, Polk, Jasper, Poweshiek, Marion, Warren, and Madison, which shall constitute the central division of said district; also the territory embraced on the date last mentioned in the counties of Crawford, Harrison, Shelby, Audubon, Cass, Pottawattamie, Mills, and Montgomery, which shall constitute the western division of said district; also the territory embraced on the date last mentioned in the counties of Adair, Adams, Clarke, Decatur, Fremont, Lucas, Page, Ringgold, Taylor, Union, and Wayne, which shall constitute the southern division of said district; also the territory embraced on the date last mentioned in the counties of Scott, Muscatine, Washington, and Clinton, which shall constitute the Davenport division of said district; also the territory embraced on the date last mentioned in the counties of Davis, Appanoose, Mahaska, Keokuk, Jefferson, Monroe, and Wapello, which shall constitute the Ottumwa division of said district. Terms of the district court for the eastern division shall be held at Keokuk on the second Tuesday in April and the third Tuesday in October; for the central division, at Des Moines on the second Tuesday in May and the third Tuesday in November; for the western division, at Council Bluffs on the second Tuesday in March and the third Tuesday in September; for the southern division, at Creston on the fourth Tuesday in March and the first Tuesday in November; for the Davenport division, at Davenport on the fourth Tuesday in April and the first Tuesday in October; and for the Ottumwa division, at Ottumwa on the first Monday after the fourth Tuesday in March, and the first Monday after the third Tuesday in October. The clerk of the court for said district shall maintain an office in charge of himself or a deputy at Davenport and at Ottumwa, for the transaction of the business of said divisions."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

COAL LANDS FOR GRAND JUNCTION, COLO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 26189) granting certain coal lands to the city of Grand Junction, Colo.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. BURNETT. I object.

THE LATE SENATOR JEFF DAVIS, OF ARKANSAS.

Mr. MACON. Mr. Speaker, I ask unanimous consent to have an order entered.

The SPEAKER. The Clerk will report the order.

The Clerk read as follows:

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. JEFF DAVIS, late a Senator from the State of Arkansas.

The SPEAKER. Is there objection to the present consideration of the order? [After a pause.] The Chair hears none. The question is on agreeing to the order.

The order was agreed to.

COUNCIL OF NATIONAL DEFENSE.

Mr. HOBSON. Mr. Speaker, I move that the House take up as the unfinished business the bill (H. R. 1309) to establish a council of national defense.

Mr. HARDWICK. Mr. Speaker, I raise a point of order.

The SPEAKER. What point of order does the gentleman raise?

Mr. HARDWICK. The committees are entitled to the preference to-day, this being the third Monday in the month.

The SPEAKER. It has been decided in a case exactly like this by both Speaker Carlisle and Speaker Reed that a matter such as that of the gentleman from Alabama [Mr. HOBSON] comes up as unfinished business.

Mr. HAY. Mr. Speaker, I demand a second.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Is not the motion of the gentleman from Alabama [Mr. HOBSON] the unfinished business without being remade so?

The SPEAKER. It is the unfinished business, and the motion has been made.

Mr. FOSTER. I demand a second.

Mr. HARDWICK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HARDWICK. How did it become the unfinished business when it was objected to on the Calendar for Unanimous Consent?

The SPEAKER. Because the House adjourned before a second was obtained.

Mr. HAY. Now, Mr. Speaker, I demand a second.

Mr. HOBSON. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

Mr. HAY. I object.

The SPEAKER. The Clerk will report the bill, and then the Chair will take notice of the fact that a second has been demanded and refused to be considered as made, and the Chair will appoint tellers. But it is right and proper that the House should know what is in this bill. The Clerk will report it.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby established a Council of National Defense, consisting of the Secretary of War, who shall be president of the council, the Secretary of the Navy, the chairman of the Committee on Appropriations of the Senate, the chairman of the Committee on Foreign Relations of the Senate, the chairman of the Committee on Military Affairs of the Senate, the chairman of the Committee on Naval Affairs of the Senate, the chairman of the Committee on Appropriations of the House of Representatives, the chairman of the Committee on Foreign Affairs of the House of Representatives, the chairman of the Committee on Military Affairs of the House of Representatives, the chairman of the Committee on Naval Affairs of the House of Representatives, the Chief of the General Staff of the Army, the aid for operations of the fleet of the Navy, the president of the Army War College, and the president of the Navy War College.

SEC. 2. That said council shall determine a general policy of national defense and shall recommend to the President, for transmission to Congress, such measures relating to the national defense as it shall deem necessary and expedient: *Provided*, That in time of war said council shall meet only upon the request of the President of the United States.

SEC. 3. That said council shall meet at least once in each calendar year on such date or dates as it shall fix: *Provided*, That special meetings may be called by the president of the council, except in time of war: *And provided further*, That any member of the Cabinet, any Senator, any Representative, and any officer of the Army, Navy, Marine Corps, or Militia may be called for consultation at any meeting of the council.

SEC. 4. That for carrying out the purposes of this act there is hereby appropriated, out of any funds in the Treasury not otherwise appropriated, the sum of $20,000, to be available until expended, and to be expended upon vouchers signed by the president of the council: *Provided*, That all necessary expenses of the chairmen of committees of the Senate and of the House of Representatives, when called to attend meetings of said council when Congress is not in session, shall be paid from this appropriation, upon approval by the president of the council.

Mr. MANN. Mr. Speaker, I demand a second.

The SPEAKER. A second has already been demanded.

Mr. MANN. I know it was; but that was before the bill was read. But I do not care.

The SPEAKER. The Chair ordered the bill to be read for the information of the House, and the Chair appoints the gentleman from Alabama [Mr. HOBSON] and the gentleman from Virginia [Mr. HAY] as tellers. Those in favor of seconding the motion to suspend the rules and pass the bill will pass between the tellers and be counted.

The House divided; and the tellers reported—ayes 55, noes 81.

The SPEAKER. The House refuses to second the motion to suspend the rules and pass the bill.

OMNIBUS PUBLIC-BUILDINGS BILL.

Mr. BURNETT. Mr. Speaker, I am directed by the Committee on Public Buildings and Grounds to move to suspend the rules and pass the bill H. R. 28766—the omnibus public-buildings bill.

The SPEAKER. The gentleman from Alabama [Mr. BURNETT], by authority of the Committee on Public Buildings and Grounds, moves to suspend the rules and pass House bill 28766, which the Clerk will report.

The Clerk began the reading of the bill.

Mr. BURNETT. Mr. Speaker, I ask unanimous consent that the further reading of the bill be dispensed with.

Mr. FITZGERALD. I object.

The SPEAKER. The gentleman from New York objects.

The Clerk resumed and concluded the reading of the bill, as follows:

Be it enacted, etc., That to enable the Secretary of the Treasury of the United States to give effect to and execute the provisions of existing legislation authorizing the acquisition of land for sites or the enlargement thereof, and the erection, enlargement, extension, remodeling, or repair of public buildings in the several cities hereinafter enumerated, the limit of cost heretofore fixed by Congress therefor be, and the same is hereby, increased, respectively, as follows; and the Secretary of the Treasury is hereby authorized to enter into contracts for the completion of each of said buildings within its respective limit of cost, including site:

United States post office at Mobile, Ala., $75,000.

United States post office and courthouse at Gadsden, Ala., $8,000.

United States post office and courthouse at Opelika, Ala., $50,000, and the act of Congress approved June 25, 1910, is hereby amended so as to authorize the Secretary of the Treasury to construct said building in such way as to provide suitable accommodations for the United States courts.

United States post office at Greeley, Colo., $35,000.

United States post office at La Junta, Colo., $10,000.

United States post office at Live Oak, Fla., $15,000.
United States post office at St. Petersburg, Fla., $25,000.
United States post office at Carrollton, Ga., $7,500: *Provided*, That $750 of said amount may be used, in the discretion of the Secretary of the Treasury, for the acquisition of additional ground adjoining the present site.
United States post office at Elberton, Ga., $6,250.
United States post office and courthouse at Atlanta, Ga., $22,500.
United States post office at Cartersville, Ga., $6,250.
United States post office at Mount Vernon, Ill., $15,000.
United States post office at La Salle, Ill., $35,000.
United States post office at Hopkinsville, Ky., $20,000.
United States post office at Middlesboro, Ky., $25,000.
United States post office at Georgetown, Ky., $30,000.
United States post office at Milford, Mass., $15,000.
United States post office at Cadillac, Mich., $25,000.
United States post office and courthouse at Detroit, Mich., $70,000.
United States post office at Holland, Mich., $20,000.
United States post office at Minneapolis, Minn., $175,000.
United States post office and courthouse at Chillicothe, Mo., $65,000, and the act of Congress approved June 25, 1910, is hereby amended so as to authorize the Secretary of the Treasury to construct said building in such way as to provide suitable accommodations for the United States courts.
United States post office at Tupelo, Miss., $10,000.
United States post office at Laurel, Miss., $20,000.
United States post office and courthouse at Clarksdale, Miss., $55,750, and the act of Congress approved June 25, 1910, is hereby amended so as to authorize the Secretary of the Treasury to construct said building in such way as to provide suitable accommodations for the United States courts.
United States post office at Corinth, Miss., $3,500.
United States post office and courthouse at McCook, Nebr., $25,000.
United States post office at Morristown, N. J., $50,000.
For the acquisition of additional land for enlargement of site for a post office in the Borough of the Bronx, New York City, in the State of New York, $60,000.
That the provisions of the acts of Congress approved June 30, 1906, May 30, 1908, and June 25, 1910, for the acquisition of a site and the erection thereon of a public building at Yonkers, N. Y., at a total limit of cost of $250,000, be, and the same are hereby, amended so as to provide for the acquisition of a site only for said building at a limit of cost of $250,000, and the appropriations heretofore and to be made under said limit of cost for said site and building are hereby made available for the acquisition of such site only: *Provided*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be erected upon the site, when acquired, a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, for the use of the United States post office and other governmental offices, the cost of said building not to exceed $250,000.
United States post office at Gastonia, N. C., $20,000.
United States post office at Kinston, N. C., $20,000.
United States post office at Tarboro, N. C., $15,000.
For a site for a post-office building at Lumberton, N. C., $5,000 in addition to the amount heretofore authorized.
United States post office at Rocky Mount, N. C., $16,000.
United States post office at Piqua, Ohio, $45,000.
United States post office at Alliance, Ohio, $30,000.
United States post office and courthouse at Dayton, Ohio, $50,000.
United States post office and courthouse at Tulsa, Okla., $114,750.
United States post office at Reading, Pa., $70,000.
United States post office at Hanover, Pa., $10,000.
United States post office at Shelbyville, Tenn., $5,000.
For additional land for site for a United States post office at Winchester, Tenn., $2,300.
United States post office and courthouse at Corpus Christi, Tex., $70,000, and the act of Congress approved June 25, 1910, is hereby amended so as to authorize the Secretary of the Treasury to construct said building in such way as to provide suitable accommodations for the United States courts.
That the $90,000 authorized by the act of Congress approved June 25, 1910, for the extension, enlargement, remodeling, or improvement of the appraisers' stores at Galveston, Tex., and $40,000 in addition thereto, which sum of $40,000 is hereby authorized, shall be applied to the purposes set forth in the next following three items pertaining to or providing for public buildings at Galveston, Tex., namely:
For remodeling and reconstruction, for a courthouse, the building now used for appraisers' stores, $50,000.
For the purchase of suitable and convenient building and site for an appraiser's store, warehouse, and other purposes, and providing suitable offices therein, $65,000.
For rearranging and constructing offices in the third story of the post-office and customhouse building, $15,000. The act of Congress approved August 24, 1912, authorizing an expenditure of $8,000 for rented quarters and moving expenses, is hereby repealed.
United States post office at Cuero, Tex., $20,000.
United States post office at Brigham City, Utah, $20,000.
United States post office and courthouse at Brattleboro, Vt., $50,000.
United States post office and courthouse at Lynchburg, Va., $25,000.
United States post office at Moundsville, W. Va., $25,000.
United States post office at Sistersville, W. Va., $10,000.
SEC. 2. That the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into contracts for the enlargement, extension, remodeling, rebuilding, or improvement of the following-named buildings within the respective limits of cost hereby fixed:
United States post office and customhouse at Oakland, Cal., $75,000: *Provided*, That this amount, or so much thereof as may be necessary, shall be used for the acquisition of additional land for the enlargement of the present site.
United States post office, courthouse, and other governmental offices at East St. Louis, Ill., $125,000.
United States post office at Evansville, Ind., $150,000.
United States post office at New Albany, Ind., $38,000.
United States post office and courthouse at Alexandria, La., $65,000.
United States post office at Winchester, Ky., $30,000: *Provided*, That this amount, or so much thereof as may be necessary, shall be used in erecting a second story on the present building, and for necessary changes in said building and in the mechanical equipment, lighting, and plumbing systems thereof.
United States post office and customhouse at Muskegon, Mich., $75,000: *Provided*, That not exceeding $10,000 of this amount may be expended for the enlargement of the present site.
United States post office at Kirksville, Mo., $40,000.
United States post office and courthouse at Lincoln, Nebr., $175,000.
United States post office at Poughkeepsie, N. Y., $68,000, and the Secretary of the Treasury is further authorized, in his discretion, to acquire by purchase, condemnation, or otherwise, out of this amount such additional land as may be necessary for the enlargement of the site for said building.
For the remodeling, extending, enlarging, or rebuilding the customhouse building at Toledo, Ohio, now used for courts and other Federal offices, $25,000.
For the enlargement of the site for a post-office building at Ashland, Ohio, $10,000.
United States post office and customhouse at Nashville, Tenn., $400,000.
That the present site in each of the cities heretofore mentioned shall not be enlarged by the acquisition of ground under the provisions of this act unless the Secretary of the Treasury is given specific authority herein to enlarge said sites, and where such authority is given the Secretary is authorized to secure, by purchase, condemnation, or otherwise, such additional ground as he may deem necessary, respectively: *Provided*, That the limits of cost hereinbefore respectively fixed shall include all necessary changes in, alterations and repairs of, the above-named buildings, and of the heating, ventilating, and plumbing systems and elevators therein which may become necessary by reason of or incident to the extension, enlargement, remodeling, improvement, or rebuilding of said buildings, or which it may be found expedient or advisable to make to such heating, ventilating, and plumbing systems and elevators because of the enlargement, extension, remodeling, improving, or rebuilding of said buildings; and the annual appropriations for the general maintenance of public buildings under the control of the Treasury Department shall be construed to be available for all other repairs to and equipment of said buildings, grounds, and approaches, and the heating, hoisting, plumbing, and ventilating apparatus thereof.
SEC. 3. That the Secretary of the Treasury be, and he is hereby, authorized and directed to contract for the erection and completion of a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, complete, for the use and accommodation of the United States post office and other governmental offices upon ground now owned by the United States or authorized to be acquired in each of the following cities, respectively, within its respective limit of cost hereby fixed:
United States post office and courthouse at Jasper, Ala., $100,000.

United States post office at Rogersville, Tenn., $3,000.
United States post office at Memphis, Tenn., $40,000.
For the acquisition, by purchase, condemnation, or otherwise of additional ground adjoining the post office and courthouse at Sherman, Tex., $5,000, or so much thereof as may be necessary.
United States post office at Gilmer, Tex., $5,000.
United States post office at Crockett, Tex., $5,000.
United States post office at Taylor, Tex., $5,000.
United States post office at Orange, Tex., $10,000.
United States post office at Coleman, Tex., $5,000.
For the acquisition, by purchase, condemnation, or otherwise, of additional ground adjoining the post office and courthouse at Dallas, Tex., $300,000, or so much thereof as may be necessary: *Provided*, That the Secretary of the Treasury be, and he is hereby, authorized and empowered, in his discretion, in lieu of the foregoing, to acquire a new site by purchase, condemnation, or otherwise, for a post office at Dallas, Tex., at a limit of cost not to exceed $300,000.
United States post office at Nephi, Utah, $5,000.
United States post office at West Point, Va., $5,000.
United States post office at Colfax, Wash., $7,000.
United States post office at New Martinsville, W. Va., $12,500.
United States post office on west side at Milwaukee, Wis., $100,000.
United States post office at Newcastle, Wyo., $5,000.

SEC. 6. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site, or additional ground adjoining the site already acquired, and to contract for the erection and completion thereon of a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, complete, for the use and accommodation of the United States post office, courts, and other governmental offices at Birmingham, Ala. The cost of said building and addition to site, or new site and building shall not exceed $1,000,000: *Provided*, That if the Secretary of the Treasury should decide to acquire a new site he may sell the site already acquired at an upset price of not less than $200,000, at public or private sale, in the discretion of the Secretary of the Treasury at such time and upon such terms as he may deem to be to the best interests of the United States and deposit the proceeds in the Treasury as a miscellaneous receipt.

SEC. 7. That the limit of cost for the acquisition of a site and the erection thereon of a suitable building for the accommodation of the post office and other governmental offices at New Haven, Conn., as provided by the act of Congress approved June 25, 1910, is hereby increased by the sum of $400,000, or so much thereof as may be realized from the sale of the old post-office and customhouse building and site thereof in the said city of New Haven, as provided in said act of June 25, 1910; and said act of June 25, 1910, is hereby amended so that the Secretary of the Treasury is authorized, in his discretion, to sell said old post-office and customhouse building and site before the completion of the new Federal building, on such terms as the Secretary of the Treasury may deem to be to the best interest of the United States subject to the provision and agreement that possession of same shall not be delivered until said new building is ready for occupancy.

SEC. 8. That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be constructed on square No. 143, in the city of Washington, D. C., a fireproof building of modern office building type of architecture of sufficient area to afford when completed office accommodations for the entire organization at Washington, D. C., of the Geological Survey, Reclamation Service, Indian Office, Bureau of Mines, and such other offices and bureaus of the Interior Department as can be accommodated therein.

That the designs and estimates for said building shall be approved by a board consisting of the Secretary of the Treasury, the Secretary of the Interior, and the Superintendent of the Capitol Building and Grounds.

That for the purpose of beginning the construction of said building the sum of $500,000 is hereby authorized, and the unexpended balance of the appropriation for the acquisition of said square 143 is hereby made available as a part of said authorization for the employment, without regard to civil-service laws, rules, or regulations, of technical and engineering services in the Office of the Supervising Architect, exclusively to aid in the preparation of such plans and specifications and toward the commencement of the construction of said building.

That the foregoing authorization for the employment of technical and engineering services shall be in addition to and independent of the authorizations and appropriations for personal services for the Office of the Supervising Architect otherwise made: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said building at the sum hereby named, but the building hereby authorized shall be constructed or so planned as to cost, complete, including fireproof vaults, heating and ventilating apparatus, elevators, lighting fixtures, and approaches, but exclusive of site, not exceeding $2,500,000.

That the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into contracts for the construction of a suitable building for said purpose within the ultimate limit of cost above mentioned.

SEC. 9. That so much of section 24 of the act of Congress approved May 30, 1908, as provides for the construction of buildings for a customhouse and other governmental offices, except United States courts and post office, and for a building for the United States appraisers' stores at Wilmington, N. C., be, and the same is hereby, amended so as to require that upon the enlarged site of the present customhouse and warehouse in said city the Secretary of the Treasury shall cause to be constructed a suitable and commodious fireproof building for the accommodation of the customs service, the appraisers' stores, the United States courts and court officials, and such other governmental offices, exclusive of the post office, as can be properly and conveniently quartered in said building; and that the limit of cost fixed by said act of May 30, 1908, is hereby extended by the sum of $118,750, and said act is hereby amended so as to fix the limit of cost for said new customhouse, appraisers' stores, and courthouse and enlargement of site thereof at not exceeding $418,750; and that the unexpended balances of the appropriations heretofore made pursuant to said section 24 of the building act of May 30, 1908, are hereby made available for the construction of the said building for customhouse, appraisers' stores, and courthouse hereinbefore prescribed; and the Secretary of the Treasury is authorized and directed to enter into contracts for the construction of such building for customhouse, appraisers' stores, and courthouse at Wilmington, N. C., within the limit of cost hereinbefore fixed.

SEC. 10. Post office at Lancaster, Pa., $80,000, together with the unexpended balance of the amounts heretofore appropriated for additional land and building; all to be available for the acquisition of a new site.

SEC. 11. That the Secretary of the Treasury be, and he is hereby, authorized and directed to purchase a site, or acquire it by condemnation or otherwise, in the city of Akron, Ohio, and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, for the use and accommodation of the post office and other governmental offices, the cost of said site and building, including said vaults, heating and ventilating apparatus, and approaches, not to exceed $400,000. And the Secretary of the Treasury is hereby authorized, when said building is completed and occupied by the United States authorities, to sell the present post-office building and site in said city of Akron at public or private sale, after proper advertisement, on such terms as he may deem to be to the best interests of the United States, to execute a quitclaim deed to the purchaser thereof, and to deposit the proceeds of said sale in the Treasury of the United States as a miscellaneous receipt: *Provided*, That said building and site shall not be sold for any sum less than $160,000.

SEC. 12. That for the purpose of beginning the construction under the direction of a commission consisting of the Secretary of War, the Secretary of the Navy, and Superintendent of the United States Capitol Building and Grounds, and Ivory G. Kimball, representing the Grand Army of the Republic, of a memorial ampitheater, including a chapel, at the national cemetery at Arlington, Va., and in accordance with the plans of Carrere and Hastings, architects, of New York City, adopted by the commission heretofore appointed, there is hereby authorized the sum of $250,000: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said building at the sum herein named, but the building herein provided for shall be constructed so as to cost, complete, including heating and ventilating apparatus and approaches, $750,000.

That said commission is hereby authorized to enter into contracts for the construction of said memorial amphitheater and chapel within the ultimate limit of cost above mentioned: *Provided further*, That the said commission may, in its discretion, expend, of the sum hereby authorized, not more than $75,000 for the purpose of constructing a mortuary chapel, in accordance with the plans of Carrere and Hastings referred to in this act, or to locate the same elsewhere in and upon the Arlington estate, in pursuance of any other plan which may be approved by the commission for that purpose.

SEC. 13. That the Secretary of the Treasury be, and he is hereby, authorized, in his discretion, to convey by quitclaim deed to the city of Oneonta, N. Y., for street purposes and no other, all the right, title, and interest of the United States of America in and to all or so much of a 10-foot strip of land off the South Main Street side of the Federal building site in said city as he may deem advisable for said street purposes.

SEC. 14. That the Secretary of the Treasury be, and he is hereby, directed to purchase a site, or acquire it by condemnation or otherwise, on land at a convenient point between the incorporated city of Las Vegas, N. Mex., and the incorporated town of Las Vegas, N. Mex., and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, for the use and accommodation of the post office, courthouse, and other governmental offices, the cost of said site and building, including said vaults, heating and ventilating apparatus, and approaches, not to exceed the sum of $125,000, and the post office herein provided for shall be used as a post office and courthouse and for other governmental purposes for both the incorporated city of Las Vegas and the incorporated town of Las Vegas, notwithstanding the general law requiring the maintenance of a post office in each county seat, and the authorization of $15,000 made for the purchase of a site in the town of Las Vegas is hereby repealed.

SEC. 15. That a commission, consisting of the Secretary of the Interior, the Commissioner of Patents, and the Supervising Architect of the Treasury Department, be, and is hereby, created, which shall cause plans and estimates to be prepared for a building to accommodate the Patent Office of the United States, and report the estimated cost thereof to the Congress, provided that such plans and estimates be

prepared under the direction of the Secretary of the Treasury. And for the preparation of such plans and estimates a sum not to exceed $5,000 is hereby authorized to be expended for employment of technical and engineering services in the Office of the Supervising Architect. That the foregoing authorization for the employment of technical and engineering services shall be in addition to and independent of the authorization and appropriations for personal services for the Office of the Supervising Architect otherwise made.

SEC. 16. That the Secretary of the Treasury be, and he is hereby, authorized and directed to sell, in whole or in part, the post-office site situated at Liberty Avenue and Sixteenth Street, in Pittsburgh, Pa., at public or private sale, after proper advertisement, at such time and on such terms as he may deem to be to the best interests of the United States, and to execute a quitclaim deed to the purchaser or purchasers thereof, and to deposit the proceeds of said sale in the Treasury of the United States as a miscellaneous receipt: *Provided*, That all the land embraced in said site and shall not be sold for less than an aggregate of $750,000.

SEC. 17. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site for a suitable building and approaches, for the use and accommodation of the United States post office and other governmental offices in the city of Newark, in the State of New Jersey, the cost of said site not to exceed the sum of $800,000: *Provided*, That such site shall not be acquired until the Secretary of the Treasury shall have entered into a contract on behalf of the United States with a responsible purchaser for the sale of the site now occupied in said city by the post office at a minimum price of $1,800,000, such contract to provide for the use by the Government free of rent of said site and buildings thereon for governmental purposes until the completion and occupation by the Government of a building upon the site herein authorized to be acquired: *And provided further*, That the sale of the present site and building thereon shall be made only after proper advertisement and at such time and upon such terms as the Secretary of the Treasury may deem to be for the best interests of the United States, and the Secretary of the Treasury is hereby authorized to execute and deliver to the purchaser a quitclaim deed. The balance of said proceeds in excess of the amount paid for the site is hereby authorized for the construction of a new building complete, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use of the United States post office and other governmental offices, said building to be erected on the site herein authorized to be purchased: *And provided further*, That the Secretary of the Treasury, in his discretion, may disregard the provision requiring 40 feet open space for fire protection.

SEC. 18. That the Secretary of the Treasury be, and he is hereby, authorized and directed to prepare designs and estimates for a fireproof national archives building containing not less than 1,500,000 cubic feet of space, suitable for the orderly storage of records, documents, and other papers which have accumulated in the various executive departments and independent establishments, and in the files of the Senate and House of Representatives and offices of the White House, and are not needed for current use.

That the said designs and estimates shall be prepared with a view to the erection of the said building in the city of Washington, D. C., upon a lot of land large enough to contain ultimately a building embracing 4,000,000 cubic feet of space.

That the said designs and estimates shall make provision for a building capable of subsequent extension without impairing its architectural appearance from a capacity of 1,500,000 cubic feet to a capacity of 4,000,000 cubic feet.

That upon the completion of the said designs and estimates the Secretary of the Treasury shall report to the Senate and House of Representatives the minimum cost of such a building and the minimum cost of a suitable site therefor conveniently located in the District of Columbia.

SEC. 19. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire by purchase, condemnation, or otherwise, the land adjoining the present Federal building site in Ardmore, Okla., extending from said site to A Street by a depth of 145 feet in A Street, at a cost not exceeding $8,000, said sum to be paid out of the balance heretofore authorized for building and site in said city.

SEC. 20. That for the purpose of beginning the construction on the site heretofore procured of a suitable and commodious fireproof building for the accommodation of the United States Subtreasury and other governmental offices at St. Louis, Mo., the sum of $200,000 is hereby authorized: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said building at the sum hereby named, but the building hereby provided for shall be constructed or planned so as to cost, complete, including fireproof vaults, heating and ventilating apparatus, and approaches, but exclusive of site, not exceeding $1,000,000.

That the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into contracts for the construction of a suitable building for said purpose within the ultimate limit of cost above mentioned.

SEC. 21. That the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into a contract or contracts for the erection and completion of fireproof laboratories and other buildings suitable and necessary for the investigations of the Bureau of Mines, on a site hereinafter provided, in the city of Pittsburgh, Pa., within the total limit of cost hereinafter fixed.

That the said laboratories and other buildings shall be constructed under the direction of and in accordance with plans and estimates to be approved by a board consisting of the Director of the Bureau of Mines, the Chief of Engineers of the Army, and the Supervising Architect of the Treasury, and shall be so constructed as to cost, complete, with the necessary railroad sidings, approaches, plumbing, lighting, heating, ventilating and hoisting apparatus, and other necessary appurtenances, not to exceed the sum of $500,000, of which amount the sum of $250,000 is hereby authorized and shall be immediately available for the preparation of plans for said laboratories and other buildings and for carrying forward construction work. And the Secretary of the Treasury is hereby authorized to employ, without regard to civil-service laws, rules, or regulations, and to pay for at customary rates of compensation, out of this authorization, such technical and engineering services as may be recommended by the above board, to serve exclusively in the Office of the Supervising Architect of the Treasury Department to aid in the preparation of plans and specifications for and to supervise the construction of the work herein provided for: *Provided*, That the foregoing authorization for the employment of technical and engineering services shall be in addition to and independent of the authorizations and appropriations for personal services for the Office of the Supervising Architect otherwise made.

That the Secretary of War be, and he is hereby, authorized to transfer to the city of Pittsburgh, Pa., or to the board of public education of the said city of Pittsburgh, for public use, that part of the United States arsenal grounds in the city of Pittsburgh lying between Thirty-ninth and Fortieth Streets and between Butler Street and the tract of land transferred by the Secretary of War to the custody and control of the Treasury Department for a marine-hospital site by an instrument dated June 1, 1904, under authority of the sundry civil act of March 3, 1903, the land to be transferred to the said city of Pittsburgh being more particularly described as follows: Beginning at the northwest corner of the said tract of land transferred to the custody and control of the Treasury Department, and running thence along Fortieth Street in a northwesterly direction to the intersection of said street and Butler Street, 1,117½ feet, more or less; thence along Butler Street in a southwesterly direction to the intersection of said street and Thirty-ninth Street, 523 feet, more or less; thence along Thirty-ninth Street in a southeasterly direction to southwest corner of the said tract of land transferred to the custody and control of the Treasury Department, 1,100½ feet, more or less; and thence along the westerly boundary of said tract of land in a northeasterly direction to the place of beginning, 523 feet, more or less; and containing 13¼ acres, more or less, on the transfer by the board of public education of the city of Pittsburgh, or by the city of Pittsburgh, to the United States, for the use of the Bureau of Mines, under the Department of the Interior, as a site for the erection of the laboratories and other buildings hereinbefore provided for, of the tract of land in the said city of Pittsburgh, known as the Magee High School site, and lying on Forbes Street and the Baltimore & Ohio Railroad, and more particularly described as follows: Beginning in the center of Boundary Street at its junction with Forbes Street and running north 87 degrees 36 minutes 45 seconds east parallel to Forbes Street for a distance of 536.2 feet, more or less, to a stone monument; thence running south 2 degrees 23 minutes 15 seconds east for a distance of 150 feet, more or less, to a stone monument; thence north 87 degrees 36 minutes 45 seconds east for a distance of 115 feet, more or less, to a stone monument; thence north 2 degrees 23 minutes 15 seconds west for a distance of 58.89 feet, more or less, to a stone monument; thence south 52 degrees 26 minutes 15 seconds east for a distance of 20.80 feet, more or less, to a pin; thence south 50 degrees 41 minutes 15 seconds east for a distance of 413.8 feet, more or less, to a pin; thence south 15 degrees 28 minutes 45 seconds west for a distance of 326.70 feet, more or less, to a pin; thence north 76 degrees 45 minutes west for a distance of 1,144.75 feet, more or less, to the center of Boundary Street; and thence along the center of Boundary Street north 28 degrees 15 minutes east for a distance of 444.38 feet, more or less, to the starting point, and containing an area of 11½ acres, more or less: *Provided*, That before the above-described transfer by the Secretary of War to the city of Pittsburgh shall become effective, and as an express further consideration for said transfer, and for the surrender by the United States of a perpetual water supply now obtained from a reservoir located on the lands so to be transferred, the city of Pittsburgh, through its proper officers, shall covenant and agree, at its own expense, and within a reasonable time, to tap, within that part of the Pittsburgh supply depot and reservation between Butler Street and the Allegheny River retained by the United States, the 42-inch water main belonging to the said city which now crosses the said reservation under a revocable license, and thereafter to furnish, free of charge to the United States, all the water needed for all purposes upon the said reservation, and shall also agree to keep its own water main, pipes, hydrants, and other necessary appurtenances now located or hereafter to be located upon the same, in good condition and repair at its own expense.

SEC. 22. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, additional ground adjoining the present site of the post office, customhouse, and courthouse at Utica, N. Y., at a cost not to exceed $35,000, and that for the purpose of beginning the enlargement, extension, remodeling, repairing, or improvement upon the present site and the enlarged site herein provided for of said post office, customhouse, and courthouse and other governmental offices in said building, the sum of $180,000 is hereby authorized: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said enlargement, extension, remodeling, repairing, or improvement at the sum hereby named, but the enlargement hereby provided for shall be constructed or planned so as to cost, complete, including fireproof vaults, heating and ventilating apparatus, not exceeding $365,000.

SEC. 23. That the employment is hereby authorized of an architectural designer at a compensation of $6,000 per annum, a structural engineering expert at $5,000 per annum, and a heating, lighting, and ventilating engineering expert at $5,000 per annum, to serve in the office of the Supervising Architect of the Treasury Department, to assist the Supervising Architect in connection with the designing and standardizing of public buildings authorized to be erected under the control of the Treasury Department and the mechanical equipment thereof, and in connection with architectural and engineering work of said office of unusual magnitude or complication: *Provided*, That such services may be employed without regard to civil-service laws, rules, or regulations, and no person now in the employ of the Supervising Architect's office shall be eligible to such employment: *And provided further*, That the foregoing authorization for the employment of technical experts to assist the Supervising Architect shall be in addition to and independent of the authorizations and appropriations for personal services for the office of the Supervising Architect otherwise made.

SEC. 24. That the limit of cost for the construction of an immigration station at Baltimore, Md., is hereby increased by the sum of $100,000 and such further sum as may be realized from the sale of the site heretofore acquired for said immigration station. That the piece of ground forming a part of the land acquired by the United States about the year 1836 as an addition to the grounds of Fort McHenry, in the State of Maryland, which is described as follows: "Beginning for the same at the intersection formed by the southwesternmost outline and the southeasternmost outline of the property of the Baltimore Dry Dock Co., as conveyed by George W. McCrary, Secretary of War, to Baltimore Dry Dock Co., March 26, 1879, and recorded in Liber F. A. P., 836, folio 557, of the records of Baltimore City, which point of beginning is the southernmost corner of said Baltimore Dry Dock Co.'s land; thence southeasterly binding on the said southwesternmost outline produced southeasterly in a straight line 230 feet to intersect a line drawn southwesterly from the northwest branch of Patapsco River parallel to the above-mentioned southeasternmost outline of Baltimore Dry Dock Co.'s land and 230 feet therefrom measured at right angles thereto; thence northeasterly reversing said line so drawn and binding thereon 585 feet, more or less, to the northwest branch of Patapsco River; thence northwesterly binding on said northwest branch of Patapsco River 238 feet, more or less, to the above-mentioned southeasternmost outline of Baltimore Dry Dock Co.'s land; thence southwesterly binding

on said southeasternmost outline of Baltimore Dry Dock Co.'s land, 642 feet to the beginning, containing 3¼ acres, more or less," be, and the same is hereby, set aside and designated as a site for the immigration station to be constructed at the port of Baltimore; and the Secretary of the Treasury is hereby authorized to acquire, by purchase, condemnation, or otherwise, sufficient land along the southwestern boundary of the lot ceded by the United States to the Baltimore Dry Dock Co. and through the land of the Baltimore & Ohio Railroad Co. for an outlet from said immigration site and grounds to the city streets beyond, the said outlet not to cost more than $20,000, and to be paid for out of the funds authorized for said immigration station; and the Secretary of the Treasury is further authorized to contract and arrange for railroad facilities upon said outlet and immigration site; and the Secretary of the Treasury is further authorized and directed to sell, in such manner and upon such terms as he may deem for the best interests of the United States, the site heretofore acquired for said immigration station in the city of Baltimore, Md.; and to convey the last-mentioned land to such purchaser by the usual quitclaim deed.

SEC. 25. That for the purpose of beginning the enlargement, extension, remodeling, repairing, rebuilding, or improvement, upon the present site, of the United States post office and courthouse at Kansas City, Mo., so as to provide additional and necessary accommodations for the said post office, United States courts, and other governmental offices in said building, the sum of $150,000 is hereby authorized: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said enlargement, extension, remodeling, repairing, or improvement at the sum hereby named, but the enlargement hereby provided for shall be constructed or planned so as to cost, complete, including fireproof vaults, heating and ventilating apparatus, not exceeding $500,000.

That the Secretary of the Treasury be, and he is hereby, authorized to enter into contracts for the enlargement, extension, remodeling, repairing, and improvement of said building within the ultimate limit of cost above stated.

SEC. 26. That the Secretary of the Treasury be, and he is hereby, authorized and directed to accept for the United States, by donation, without expense to the United States, a suitable site for the use and accommodation of the post office and other governmental offices at Malden, Mass.

SEC. 27. That section 30 of the act of Congress approved June 25, 1910 (36 Stat. U. S., 696), authorizing the enlargement of the site for the new post office, courthouse, and customhouse at Honolulu, Territory of Hawaii, be, and the same is hereby, amended in so far as to provide that, in addition to the limit of cost fixed for such enlargement of site by said act, the unexpended balance of the original appropriation for site shall be available for the acquisition of said additional land, together with the further sum of $75,000, which is hereby authorized to be expended from the amount heretofore authorized for the construction of said building, and the limit of cost for such additional land is hereby increased accordingly.

SEC. 28. That the Secretary of the Treasury shall require all owners or agents of sites in each city mentioned in this act, where sites or additions to sites are to be purchased, to submit offers of sale in writing. And in case a site or addition to a site acquired under the provisions of this act contains a building or buildings, the Secretary of the Treasury is hereby authorized, in his discretion, to rent until their removal becomes necessary such of said buildings as may be purchased by the Government, or the land on which the same may be located, where the buildings are reserved by the vendors, at a fair rental value, the proceeds thereof to be deposited in the Treasury of the United States, and a report of the proceedings to be submitted to Congress annually: *Provided*, That each site selected under the provisions of this act shall be bounded upon at least two sides by streets, unless otherwise specifically provided.

SEC. 29. That proposals for the sale of land suitable for all sites, or additions to sites, provided for in this act, respectively, shall be invited by public advertisement in one of the newspapers of largest circulation of said cities, respectively, for at least 20 days prior to the date specified in said advertisement for the opening of said proposals. Proposals made in response to said advertisement shall be mailed and addressed to the Secretary of the Treasury, who shall then cause the said proposed sites, and such others as he may think proper to designate, to be examined in person by an agent of the Treasury Department, who shall make written report to said Secretary of the results of said examination and of his recommendation thereon and the reasons therefor, which shall be accompanied by the original proposals and all maps, plats, and statements which shall have come into his possession relating to the said proposed sites.

SEC. 30. That all buildings authorized to be constructed, enlarged, or extended under the provisions of this act shall, unless otherwise provided herein, be unexposed to danger from fire by an open space of at least 40 feet on each side, including streets and alleys: *Provided*, That in exceptional cases and for good cause shown the Secretary of the Treasury may, in his discretion, reduce the open space to less than 40 feet and to any dimensions which he shall deem sufficient to afford fire protection.

The SPEAKER. Is a second demanded?

Mr. FITZGERALD. I demand a second.

Mr. BURNETT. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

Mr. FITZGERALD. I object.

The SPEAKER. The gentleman from New York objects, and the Chair appoints as tellers the gentleman from Alabama [Mr. BURNETT] and the gentleman from New York [Mr. FITZGERALD]. Those in favor of seconding this motion will pass between the tellers and be counted.

The House divided; and the tellers reported—ayes 154, noes 30.

The SPEAKER. The motion to suspend the rules is seconded. There will be 40 minutes' debate, 20 minutes to be controlled by the gentleman from Alabama [Mr. BURNETT] and 20 minutes by the gentleman from New York [Mr. FITZGERALD].

Mr. BURNETT. Mr. Speaker, there are several gentlemen, members of the committee, who have asked for time, and for that reason I shall take only seven or eight minutes to explain this bill as briefly as possible. It carries about $25,643,000.

It has been three years since a public-building bill has been passed. If we had had a bill a year ago, four or five million dollars less would have been necessary to be authorized in this bill.

This is not, as is often thought, an appropriation bill. It does not take presently any money out of the Treasury. It simply authorizes certain sums to be appropriated by the Appropriations Committee on the recommendation of the Secretary of the Treasury, and those appropriations will only be made and the money will only be taken out of the Treasury as the construction of the buildings, the improvement of buildings, or the purchase of sites demands.

It can not be said that this bill is for several reasons in a class with other appropriation bills. For instance, the river and harbor bill is an annual appropriation. As I have said, it has been three years since there has been any authorization for public buildings.

This bill authorizes the construction of a large building for the Geological Survey, the Bureau of Animal Industry, and many other of the offices of the Government in this city. That makes the amount of the bill much larger than it otherwise would have been.

The bill of three years ago carried an authorization for the making of plans and specifications for this building, but there was no authorization for any proposition to be constructed in this city.

Another large proposition is an amphitheater at Arlington, Va., which the committee thought was justified, and that was authorized.

Mr. Speaker, we have tried to make the bill as fair as possible, considering the various divergent interests of Government service in all parts of the country.

I think this bill is authorized by the caucus action of the Democratic Party. Last summer there was a caucus, and in that caucus it was decided that the omnibus public-building bill should be postponed until this session. With the assurance of the leaders of the party that there would be a bill of this kind at this time, I feel that it would be a breach of faith on the part of our party to disallow it.

Mr. Speaker, the various objects for which authorizations are made in this bill are as follows:

For increase of limit of cost (under sec. 1)	$2,356,550
For enlargement, extension, and improvement (under sec. 2)	1,491,000
For buildings upon sites now owned (under sec. 3)	8,420,000
For new buildings and sites (under sec. 4)	9,072,500
For purchase of sites only (under sec. 5)	1,304,000
Under other sections	2,999,750
Total authorization	25,643,800

I reserve the balance of my time.

The SPEAKER. The gentleman used three minutes and reserves the remainder of his time. The gentleman from New York [Mr. FITZGERALD] is recognized for 20 minutes.

Mr. FITZGERALD. Mr. Speaker, I am opposed to this bill. I am not surprised that the gentleman from Alabama announced that he would describe it as briefly as possible. The less said about it, the better for the bill or those who support it. It can not be defended from any standpoint of public necessity. There are now authorized 289 projects which have not yet been started. Ninety buildings heretofore authorized will be started during the next year, and it will take three years to complete the buildings already authorized.

The sham economists who have been talking economy and advocating public-building bills, which fasten obligations upon the Treasury, should either quit talking economy or should attempt to stop the authorizations which make inevitable the expenditure unnecessarily of large sums of public money.

I denounce as indefensible this method of passing a public-building bill. It ties together everybody with an item in it, and makes impossible that scrutiny and close attention to the various items required in a bill coming from a committee appropriating public money.

In the 20 minutes allowed to the opponents of the bill for debate it will be impossible to review all the items in the bill or to do anything but call attention to them. The bill was reported Saturday and it is called up to-day—Monday—under suspension of the rules under which the bill must be taken in its entirety without opportunity for amendment and with only 40 minutes' discussion. It is impossible in the time elapsing since the bill was reported to obtain the information required in order to analyze the bill carefully and to understand its provisions. The report of the committee does not contain any information as to the population of the various places at which buildings are to be erected, the postal receipts of the various communities, or the expenses to which the Government is now subject.

All such information should be contained not only in the report but placed in the RECORD so that the country might be

informed of the manner in which it is proposed to expend $25,000,000 for public buildings.

If these items could be scrutinized and challenged, many of them could not receive the approval of the House.

In the brief time available I have noted some of the items in this bill to which I wish to call the attention of the House. One for the erection of a building at Jaspar, Ala., with a population of 2,500 people, to cost $100,000. At Arkadelphia, Ark., a population of 2,745, the appropriation is to be $55,000. Why should a town of 2,500 population get $100,000 and a town of 2,700 population get $55,000? The report gives no information. Rockville, Conn., with a population of 7,900, building is limited to cost $55,000. Greenwich, Conn., with a population of 3,800, limit of cost $90,000; Orlando, Fla., with 3,800 population, limit of cost $60,000. Why the difference in the cost of these various buildings? At Las Cruces, N. Mex., the building is to cost $125,000; the population is 3,836.

At Jellico, Tenn., the building is to cost $70,000. The post-office receipts at Jellico last year were $8,424.49, and the cost of rent, fuel, and lights and supplies for the service in rented buildings amounted to $650. Three per cent on $70,000, which is a permanent charge on the revenues, excluding the cost of maintenance and service in the building when completed, is $2,100, or $1,500 more than the present cost of providing adequately for the public service.

At Maryville, Tenn., with a population of 2,381, the limit of cost is $60,000. The post-office receipts last year were $8,183.50. The cost of rent, fuel, and lights in rented quarters the last year was $400. Three per cent on $60,000 is $1,800, the permanent charge, regardless of cost of maintenance, an increase of $1,400 over the amount required for the proper conduct of the public service.

At Buffalo, Wyo., a town of 1,368 people, the limit of cost is $62,500.

For a post office at Willows, Cal., with a population of 1,100, the limit of cost is $75,000 for the building. At Glenwood Springs, Colo., 2,000 population, there is to be appropriated $100,000 for a building.

At Marianna, Fla., with 1,900 population, $70,000 is provided for the building. At Marion, Ky., a town of 1,627 persons, the limit of cost is $70,000. At Leominster, Mass., a town of 17,000 inhabitants, the limit of cost is $90,000. Bad Axe, Mich., 1,500 population, the limit of cost is $55,000.

Bellefourche, S. Dak., a town of 1,300 population, the cost is $75,000.

For a post office at Norton, Va., with a population of 1,800, $75,000. At Burlington, Wis., with a population of 3,200, $70,000.

I come now to the purchase of sites upon which public buildings will be authorized in the future.

Paintsville, Ky., population of 942, $5,000 for a site.

Hodgenville, Ky., with a population of 744, $5,000 for a site.

Mr. JAMES. Oh, the gentleman is mistaken. Hopkinsville has a population of 8,400.

Mr. FITZGERALD. I am talking about Hodgenville.

Mr. Speaker, this bill contains another innovation. It provides for the construction of a post-office substation in the city of Chicago. I have not been able to ascertain that Congress has ever heretofore erected a postal substation in any city. They are rented. Buildings are erected by private parties and leased to the Government. Never before has the Committee on Public Buildings and Grounds yielded to the demand for substations. I understand, however, that this bill has been so scientifically prepared that it can not be defeated. [Applause and laughter.] The Members on this side will note the alacrity with which Republicans, most of whom have been turned out because of their betrayal of the public trust, applaud that statement. [Laughter.]

Provision is made in the bill for a commission to prepare plans for the construction of a new office for the Patent Office, and no limit of cost is suggested. And yet, Mr. Speaker, the sundry civil bill carries an appropriation for an addition to the building now occupied by the Patent Office, which will furnish ample accommodations and save more than a million dollars. There is no need for another building if the present building be properly arranged and enlarged.

The report accompanying this bill states that nothing was done for Washington in the public-building bill three years ago. That is erroneous. Three years ago authority was given to spend $200,000 to prepare plans for three great departmental buildings in this city. The plans have practically all been prepared. These buildings are not placed in this bill at this time. Are they to appear in it later, before the session is over?

Let me call attention to an item in my own State. I do so because this bill should be discussed upon the merit of the items, not the criticism of individuals. In New York, near enough to where I live to attract my attention, is a situation that shows how the public-building bills become indefensible. In 1906 a site and public building were authorized for the city of Yonkers, just north of the line of New York City, to cost together $170,000. The law has been changed from time to time until in this bill the limit of cost of site alone is placed at $250,000, and the limit of cost upon the building is placed at $250,000 additional, so that instead of expending $170,000 in a community of about 80,000 people, with an income of about $13,000 in postal receipts, this Congress now proposes to expend $500,000. Certain information was sent to me from some of the officials of the city—Democratic officials—protesting against this legislation, with which I declined to be burdened, because I knew that under the procedure by which this bill was to be brought before the House it was impossible to discuss any of the various items upon their merits. I believe that the greatest reform the Democratic House can institute, next to defeating such indefensible bills as this one, is to prohibit recognition for the suspension of rules to pass bills of this character. I desire to say to this side of the House that you are placing burdens upon the Treasury for five or six years beyond the present time which will plague you in the future. These items can not be defended. This side of the House will have to meet the record and the charges that will be made after this bill passes. I do not appeal for the defeat of this bill particularly because these items may or may not be defended on their merits, but because nobody can justify authorizing obligations to erect public buildings which can not possibly be commenced inside of three years. This legislation is merely to gratify the unjustifiable desires of communities, or to permit Members to go back to their districts and to assure their constituencies that they have obtained for them improvements which are claimed to be necessary, but which will not be of any value or of any service for four or five years. The bill should be defeated. Its passage can not be justified.

How much time have I used, Mr. Speaker?

The SPEAKER. The gentleman has used 12 minutes.

Mr. FITZGERALD. Mr. Speaker, I reserve the balance of my time.

Mr. ROBERTS of Massachusetts. Mr. Speaker, will the gentleman yield to me to make a request for unanimous consent?

Mr. FITZGERALD. Mr. Speaker, I yield the gentleman one minute.

Mr. ROBERTS of Massachusetts. Mr. Speaker, I ask unanimous consent to strike from the bill an item with regard to my own district, on page 22, lines 11 to 16, inclusive.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to strike from the bill the language which the Clerk will report.

The Clerk read as follows:

Page 22, line 11:

"United States post office at Malden, Mass., on a site to be donated, $90,000: *Provided*, That the construction of such building shall not be begun until the site for the same has been donated, and title thereto accepted by the Secretary of the Treasury as provided in section 26 of this act."

The SPEAKER. Is there objection?

Mr. AUSTIN. Mr. Speaker, reserving the right to object, I wish to ask the same privilege for every other Member of this House who is opposed to this bill, that he be allowed to strike from it the proposition that affects his own district.

Mr. BATHRICK. Mr. Speaker, I will ask the gentleman from Massachusetts if he introduced a bill for this project?

Mr. ROBERTS of Massachusetts. I introduced a bill calling for a respectable building, not for a $90,000 building to be placed on a $40,000 site to be donated.

Mr. BATHRICK. And the gentleman wants more money instead of less?

Mr. ROBERTS of Massachusetts. I want more money instead of less, or I want none.

The SPEAKER. The time of the gentleman from Massachusetts has expired. The gentleman from Tennessee asks unanimous consent to amend the request of the gentleman from Massachusetts, by providing that any Member shall have the privilege of having stricken from the bill every item in his own district. Is there objection?

Mr. MANN. Mr. Speaker, I think that is an impracticable way of legislation; hence I object. Gentlemen can make the request for themselves, if they desire. I object.

Mr. ROBERTS of Massachusetts. Mr. Speaker, I renew my request.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to have stricken from the bill the language which was reported by the Clerk. Is there objection?

Mr. RAKER. Mr. Speaker, I object.

The SPEAKER. The gentleman from California objects. The gentleman from New York reserves the rest of his time, seven minutes.

Mr. BURNETT. Mr. Speaker, I yield five minutes to the gentleman from Florida [Mr. CLARK].

Mr. CLARK of Florida. Mr. Speaker, during the time of my service in this House I do not recollect a bill of this character ever coming into the House for consideration that some gentlemen from some large city, where they have procured all of the public buildings necessary for the transaction of public business, did not rise and object. I am not going to detain this House long, but I propose to show in the few moments that I have the utter fallacy of the argument of the gentleman from New York [Mr. FITZGERALD]. If he does not know any more about some other things than he knows about these particular items or some of them that he has called to the attention of the House, then the gentleman's ignorance upon some questions would be so densely dark that Egyptian midnight would not be in a class with it. [Laughter.]

The gentleman refers to Jasper, Ala., as a town of 2,500 people which has been given $100,000 for a site and a building. The gentleman did not tell you that terms of the Federal court are held at Jasper, Ala., and that this authorization takes care of not only the post office but the Federal court which meets in that town.

Mr. FITZGERALD. No; and the gentleman's report does not show it either.

Mr. CLARK of Florida. It does not make any difference about the report; that is the fact, which the gentleman could ascertain.

Mr. CLAYTON. The bill shows it.

Mr. CLARK of Florida. The bill says "United States post office and courthouse, at Jasper, Ala." You will find it on page 11; and the gentleman could have obtained that information by inquiring at the Department of Justice.

Mr. FITZGERALD. The gentleman knows this bill was reported Saturday and was available to-day.

Mr. CLARK of Florida. Then, I want to call the gentleman's attention to another matter. The gentleman made a comparison between that town and the town of Arkadelphia, Ark., where $55,000 was appropriated for a building. That is simply a post office; there is no court at Arkadelphia, and that makes the distinction between those two towns. The gentleman then referred to Greenwich, Conn., and compared it with a town in my district—Orlando, Fla. He referred to the fact that Orlando had only 3,894 population. That was under the census of 1910. The city of Orlando to-day has fully a population of more than 6,000 and a winter population of at least 20,000 or 25,000, and the postal receipts are twenty-odd thousand dollars. The gentleman referred to Buffalo, Wyo., but he did not tell you that there was a land office at Buffalo, and that was to be taken care of by this authorization.

The gentleman referred to Marianna, Fla., as a small town of 1,900 or 2,000 population, but the gentleman did not tell you that the Federal court is held at Marianna, and that we were building a courthouse as well as a post office at that place. So far as Yonkers, N. Y., is concerned, the gentleman who lives there [Mr. ANDRUS], a member of this committee, is not here; but the fact is, as stated by Mr. ANDRUS, and it supports, Mr. Speaker, the very idea which some of us contend for, that we ought to have annual public building bills, because real estate is advancing at such a rate it is economy for the Government to buy sites in all these towns throughout this country at the earliest opportunity. Mr. Speaker, this bill has been gone into with the utmost care. I admit there are perhaps one or two items in the bill that do not exactly come up to the rules, but in all of these instances there are some peculiar facts which take them out of the rule.

Mr. Speaker, as has been said, it has been three years since an omnibus public building bill has been passed, and during these three years there has been a growth in the country and an enhancement of real estate values, such as has never before been witnessed in a like period in the history of the Republic. As a Democrat, I believe in retrenchment in governmental expenditures, but I believe in sane, common-sense retrenchment, and not in the senseless retrenchment demanded by the yellow journals of the land and the alleged economists in this House. This is the greatest Government on the earth to-day, and this Republic should not occupy the position of tenant anywhere within the confines of its great domain. I want to live to see the day when the Government of the United States will not house a single officer or employee in rented quarters, and I want to see this day come for two reasons:

First. Because from a business standpoint I am convinced that it will be infinitely cheaper for the Government to own all of the property necessary for the transaction of its business than it will be to pay rent; and

Second. Because the occupancy by its officials of buildings owned by the Government inculcates among the people of the various sections of the country a spirit of patriotic pride which is not measureable in dollars and cents. We can save money for the people by occupying our own buildings, and we can knit the affections of the people all over this glorious land in a closer bond of union by rearing in their midst an edifice for the transaction of the public business which, while being useful, will at the same time remind them of the majesty, the glory, and the power of this great Republic.

But, as to this bill, Mr. Speaker, as I have intimated, there may be four or five items in the bill which do not come strictly within the rule, and it would be little short of a marvel if this did not occur in the drafting of a bill of this character. I shall call attention to some more of them, however, which it is claimed should not have been included in this bill and endeavor to demonstrate that the objections made are not well founded.

Rockville, Conn., is referred to as a place of 7,900 population, where $55,000 is authorized; Greenwich, Conn., is referred to as a place of 3,800 population, where $90,000 is authorized; and Orlando, Fla., is referred to as a place of 3,800 population, where $60,000 is authorized; and then the question is asked, "Why the difference in the cost of these various buildings?" The figures are not quoted correctly with reference to these three cities. While Rockville, Conn., has a population of 7,977, the postal receipts for the last fiscal year amounted to only $18,671, whereas Greenwich, Conn., as shown by the last census, instead of having a population of only 3,800, had a population of 16,463, and the postal receipts for the last fiscal year amounted to $40,856. While it is true that the last census gives Orlando, Fla., a population of only 3,894, that place to-day easily has a population of more than 6,000 people, and the postal receipts for the last fiscal year amounted to $28,687. Each of these places already had a site, and when you consider the difference in postal receipts you will at once see that there has been no discrimination.

Las Cruces, N. Mex., while having, according to the last census, 3,836 population, it must be remembered that terms of the Federal court are held there, and that the United States land office is located there.

At Willows, Cal., in addition to the post office, officials in the Forest Service and animal industry had to be housed.

At Glenwood Springs, Colo., in addition to the post office, there is the United States land office and officials in the Forest Service for whom quarters must be provided.

At Leominster, Mass., the postal receipts for the last fiscal year amounted to $37,242, and at Bad Axe, Mich., the postal receipts for the last fiscal year amounted to $1,079.67. The bill carries $90,000 for the purchase of a site and the construction of a building for a post office at Leominster and $55,000 for the purchase of a site and the construction of a post-office building at Bad Axe; and both these items are clearly within the rule, and are therefore justifiable.

While Bellefourche, S. Dak., is a comparatively small town, the United States land office is located there and officials in the Reclamation Service are located there.

At Norton, Va., in addition to the post office, is a mine-rescue station.

At Burlington, Wis., the postal receipts for the last fiscal year amounted to $11,993, and the authorization of $70,000, being for the purchase of a site and the construction of a building, is well within the rule under which the committee has acted for many years.

Objection to the bill is made because it carries an authorization for the purchase of sites at $5,000 each at Nephi, Utah, and Newcastle, Wyo. Both of these are small places, but at the former place, in addition to the post office, is located a branch of the Forest Service; while at the latter place, in addition to the post office, it is a county site and the trading place of a vast territory, and is growing at a remarkable rate. This place, Newcastle, may be taken as typical of the few places which do not come strictly within the rule. While the last census showed a poulation of only 975 persons for Newcastle, the committee had indisputable testimony that the present population was fully 1,900, and the postal receipts for the past two quarters showed such gains as clearly indicated that the minimum of receipts which would entitle the town to a building would be reached long before another public-buildings bill will be presented to Congress. In fact, Mr. Speaker, in every case where a site was authorized at a town which did not come up to the rule in the matter of postal receipts, the committee was convinced by proper testimony that the limit would be reached before, in the usual course, Congress could be called upon to provide for a building. Gentlemen must understand that while the Committee on Public Buildings and Grounds in framing an omnibus public buildings bill considers

the question of population that is not the controlling factor. We give more consideration and weight to the amount of business done at the particular place and the number of the branches of the public service to be cared for.

Gentlemen must also remember that in the West and South, where most of the authorizations complained of are situate, the towns as a rule are small and scattered, but that they are generally the center of a large territory, and that therefore it is unfair to count when measuring their importance only those people who happen to live within the corporate limits of such towns. Gentlemen should also remember that in the West and South our towns are growing by "leaps and bounds," and they should further keep in mind that the changes in our postal service, and particularly the establishment of the parcel post and the postal savings banks, demand more space and better quarters for the transaction of the public business in this great department of the Government. I desire, also, Mr. Speaker, to remind gentlemen that it has been three years since we have had a public buildings bill; that it will probably be three years before any appreciable percentage of the total amount authorized by this bill will have to be appropriated and that therefore all this talk about this bill being instrumental in creating a deficit is simply "moonshine" and nothing more.

In conclusion, Mr. Speaker, I desire to repudiate the imputation that this is a "pork barrel" bill. Yellow journals and alleged Congressional economists indulge in that kind of talk whenever any legislation is sought or governmental function invoked in the interests of those who do not happen to live in the great cities, but the people understand this, and they are perfectly willing to be taxed in order to have their business conducted decently and in order and in quarters commensurate with the dignity of the greatest country on the earth.

The SPEAKER. The time of the gentleman has expired.

Mr. BURNETT. Will the gentleman use some of his time?

Mr. HARDWICK. We have used 13 minutes.

Mr. BURNETT. I yield three minutes to the gentleman from Kentucky [Mr. CANTRILL].

Mr. CANTRILL. Mr. Speaker, I simply want to answer the criticism of the gentleman from New York in reference to two or three items in Kentucky. He called special attention to Hodgenville and the small population of that town. Hodgenville is the birthplace of Abraham Lincoln, where there has been a magnificent memorial erected, and this committee thought it was but right that a slight token on the part of the Nation in the way of a site in this bill should be made at that point. The people of this Nation donated out of their own pockets a memorial to the birthplace of Abraham Lincoln, and that explains that item.

He called attention to Pikeville and Paintsville; the census of those towns was issued in 1910, and those towns have almost doubled in population since that time. They are in the center of the very richest mineral section in the United States, and railroads within the last year have just gone into that section, and it is the part of economy on the part of this House to donate the small sum of $5,000 for the purchase of sites at this time in those towns, because within the next two or three years they will be magnificent towns. And furthermore I want to say that these two or three items to which attention has been called are in eastern Kentucky. Eastern Kentucky is represented by two Representatives upon this floor, and in the two districts represented by them there is but $40,000 carried in this bill. It covers in aren one-half of Kentucky, and as the Democratic member on that committee I thought it was but fair that my colleagues should have this small allotment only for the purchase of sites, not for a building, in the richest mineral section in the United States that within the next few years will bring large postal receipts into the Government. I think the gentleman's criticism is unfair and unwarranted and I think that when gentlemen upon this side of the House understand the situation that they will stand by the committee in support of these few little items in the bill. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. BURNETT. I ask the gentleman from New York [Mr. FITZGERALD] to use some of his time.

Mr. FITZGERALD. I have only one speech.

Mr. BURNETT. Then I will yield five minutes to the gentleman from Tennessee [Mr. AUSTIN].

Mr. AUSTIN. Mr. Speaker, I appreciate the splendid service that the distinguished gentleman from New York [Mr. FITZGERALD] renders to the country and the House of Representatives as the head of the great Committee on Appropriations in this House, but I deny his right as a Member of this House, on every occasion, in season and out of season, to lecture his colleagues and peers about what they stand for, what they advocate, or how they intend to vote. We are all equals. We are all here with the sincere desire to promote and advance the best interests of our common country, and I challenge the gentleman's right to lecture his colleagues on either side of the House, calling them to the attention of the country in a spirit that is not fair, to say the least. We are acting here under the same oath that was administered to the gentleman from New York [Mr. FITZGERALD], and we deny his right as the public guardian of the National Treasury to lecture us on every possible occasion in voting for appropriation bills.

Mr. FITZGERALD. I did not expect it would have any effect on the gentleman from Tennessee. His record is too well known.

Mr. AUSTIN. I will let my colleagues on the floor of the House be the judges as to whether my record here is good or bad, and shall not permit the gentleman from New York to pass upon that question as the sole and only judge. I am coming back here by an increased majority every time, and that is an indication that my service is approved and appreciated by the people at home. [Applause.] And if I had as much for my district as the gentleman has for Greater New York in public buildings, harbor improvements, fortifications, and navy yard, I would not have the nerve to criticize my colleagues.

Now, the gentleman has called attention to two items in this bill in the district which I represent. One of them is Jellico, and he failed to give the House the information that the coal mines of that splendid mineral section are situated in that portion of eastern Tennessee and Kentucky, where the Bureau of Mines must locate and house a mine rescue station. At Maryville, on account of the acquisition of the Appalachian Forest Reserve, we need quarters for the officials of that department. In criticizing Norton, Va., in the district so well and faithfully represented by Mr. SLEMP, the gentleman overlooked the fact that a mine rescue station was to be located at that point. There is sufficient reason and justification for every item in this bill, and I say as a Republican Member of this House that a fairer bill was never drawn nor one that was more absolutely just to the minority side. And as compared with the bill reported by the last Republican Congress, this bill is in the line of retrenchment and reform, in spite of the declaration of the gentleman from New York, the leader of the Democratic side in charge of appropriations. [Applause.]

There is not a more conservative or more economical Member of Congress than the gentleman's colleague from New York [Mr. ANDRUS], who resides in Yonkers. He has been prudent and careful and painstaking in every item contained in this bill, and I defend him from the charge of improper motives or a failure to represent the interests of the people in the item in reference to Yonkers.

Mr. FITZGERALD. I did not charge any improper motives against the gentleman.

Mr. AUSTIN. The gentleman's criticism was unjust and unfair to his colleague [Mr. ANDRUS].

Mr. FITZGERALD. It was not unjust.

Mr. AUSTIN. And it is doubly unfair, because he is not here to defend himself as to the item.

Mr. FITZGERALD. I had no knowledge of his absence.

Mr. AUSTIN. The gentleman has good eyesight.

Mr. FITZGERALD. I say to the gentleman from Tennessee that if he were present I would say what I said concerning the Yonkers item in his absence. And I wish to say that the officials of the city of Yonkers are protesting against this item.

Mr. AUSTIN. This is a fair and just bill. It is an easy matter for the gentleman from New York [Mr. FITZGERALD] and others who are opposing this bill to stand here and ask us to vote millions of dollars for river and harbor improvements, for fortifications, for the Army, for the Navy, for reclamation projects; but on this bill they cry economy. [Applause.]

Mr. BURNETT. How much time have I left?

The SPEAKER. The gentleman from Alabama [Mr. BURNETT] has four minutes, and the gentleman from New York [Mr. FITZGERALD] has seven.

Mr. BURNETT. I yield the balance of the time to the gentleman from Georgia [Mr. HARDWICK].

The SPEAKER. The gentleman from Georgia [Mr. HARDWICK] is recognized for four minutes.

Mr. HARDWICK. Mr. Speaker and gentlemen of the House, it is no easy matter to oppose a bill of this kind, when one's colleagues, who are his warm personal friends, are deeply interested in the measure. But it seems to me that I would fail to measure up to my own standard of duty, on this occasion, if I did not point out to the Members of this House some objections that induce me to oppose this bill.

I believe honestly and candidly that this is the worst bill of its kind that was ever reported to an American House of Representatives. [Applause.] Gentlemen, I say that without intending to give offense, and yet with the utmost frankness. There are things in this bill that no one can defend.

A MEMBER. What are they?

Mr. HARDWICK. Well, I will tell you: The appropriation of thousands of dollars to buy sites and erect buildings in towns of seven or eight or nine hundred population; the appropriation of other thousands in towns that do not come up to any of the rules and requirements that have ever prevailed on this subject in this House in any preceding Congress.

What have you done? For years every one of us has gone home—every one on both sides of this Chamber—and told our constituents that unless a town had at least $10,000 postal receipts the Representative would have but little chance to get a public building here. Hereafter none of us will be able to make such a defense against local demands. If any town of a few hundred population and a few thousand postal receipts, in any district, in the North or in the South, in the East or in the West, makes a demand for a public building, the Representative of the district in which that town is situated can make no such reply.

Mr. AUSTIN. Mr. Speaker, will the gentleman name a town of that size that is carried in the bill?

The SPEAKER. Does the gentleman yield?

Mr. HARDWICK. I can not yield, but I will name them soon enough. I can not yield to the gentleman from Tennessee or to anybody else.

The SPEAKER. The gentleman declines to yield.

Mr. HARDWICK. They have already been named by the gentleman from New York [Mr. FITZGERALD]. Two of them have been located in the State of Kentucky, and there are several not much larger in the State of Tennessee.

Mr. AUSTIN. Mr. Speaker——

Mr. HARDWICK. I can not yield.

The SPEAKER. Does the gentleman yield?

Mr. AUSTIN. The gentleman puts me at a disadvantage when he declines to yield and makes a misstatement.

The SPEAKER. Does the gentleman yield?

Mr. HARDWICK. The gentleman should take his seat. I can not yield.

The SPEAKER. The gentleman from Georgia declines to yield.

Mr. HARDWICK. The gentleman from Georgia will not make a misstatement. On the contrary, Mr. Speaker, I repeat the statement I made, that here it is proposed to appropriate in this bill for $5,000 sites in two towns of less than 1,000 population, and I take it that even the gentleman from Tennessee [Mr. AUSTIN] has got common sense enough to know that the Government of the United States is not going to buy a lot in a town unless it commits itself to the proposition of erecting a building there.

Now, gentlemen, not only that, but there are still other towns where the rental of buildings is a mere bagatelle compared with the interest on the cost of a Government building; where the interest on the cost of a building that you will erect and the cost of the lot largely exceed the rental value of perfectly suitable quarters. You are proposing to spend some of this money in such places.

But I know this bill is destined to pass this House. It is so constructed. It is rock-ribbed, moss-covered, and copper-bound. [Laughter.] There are enough Members on both sides and on all sides and in the middle and in the rear of this Chamber who are well provided for in this bill to carry it. I impute no unworthy motives to them, but they are bound to see that this bill passes.

But, gentlemen, I submit to you that each one of you in your heart of hearts knows that this bill is not right; that instead of being in the interest of the public service and of the people of the United States it is in the interest of the political fortunes of individual Members of Congress on both sides of this big aisle.

What will you be up against? Hereafter when a town of 1,000 or 2,000 people in your district demands that you at least give them a site, even if the total postal receipts are not more than two or three thousand dollars a year, you can no longer tell them that the House of Representatives and the Senate of the United States will not allow it. You have got to promise it, or some aspiring contestant who is rasher and more prodigal as to promises than you are will promise it, and the place that once knew you will know you no longer.

Mr. CLARK of Florida. Will the gentleman let me ask him a question?

Mr. HARDWICK. Not now.

The SPEAKER. The gentleman declines to yield.

Mr. CLARK of Florida. Just one question.

Mr. HARDWICK. All right.

Mr. CLARK of Florida. Did not the gentleman introduce in this House himself a bill to appropriate $60,000 to purchase a site and put up a building in his own town?

Mr. HARDWICK. Undoubtedly; and I am glad the gentleman asked me the question. My colleague upon the committee, the gentleman from Georgia [Mr. RODDENBERY], knows full well what the facts are.

Upon information from an unofficial source that the postal receipts of my home city were $10,000 a year, or in that neighborhood, I introduced such a bill. When it appeared that the receipts were but $7,600 I went to my colleague, the gentleman from Georgia [Mr. RODDENBERY], a member of this committee, and said to him, "I do not think I am entitled to it; I had thought the receipts were about $10,000 a year when I introduced the bill." He then said, "We have gone far below that amount; we have gone away below that, and under any rule that this committee has adopted you are entitled to it."

I was willing to give it up, and I told him if he thought it was right to do it, to go to the chairman and ask him to strike it from the bill. Gentlemen, there are 30 or 40 items, I believe, in this bill that are very much lower than the one you have put in for me.

Mr. ASHBROOK. You are mistaken.

Mr. HARDWICK. A dozen, at least.

Mr. CLARK of Florida. Point them out.

Mr. SABATH. There are more than a dozen.

Mr. HARDWICK. The gentleman from Illinois [Mr. SABATH] says there are more than a dozen. I will now undertake to specify a few of them, at least.

The bill carries an appropriation of $5,000 for a site at each of the following places, the names, population, and postal receipts of which I give from the official information furnished the Committee on Public Buildings and Grounds by the Post Office Department:

Albertville, Ala.; population, 1,544; postal receipts, $4,496.
Attalla, Ala.; population, 2,513; postal receipts, $4,516.
Nogales, Aria.; population, 3,514; postal receipts, $6,516.
Brinkley, Ark.; population, 1,740; postal receipts, $6,284.
Toccoa, Ga.; population, 3,120; postal receipts, $5,638.
Canton, Ga.; population, 2,002; postal receipts, $7,573.
Marengo, Iowa; population, 1,786; postal receipts, $7,086.
Paintsville, Ky.; population, 942; postal receipts, $3,753.
Pikeville, Ky.; population, 1,280; postal receipts, $5,120.
Prestonburg, Ky.; population, 1,120; postal receipts, $2,444.
Murray, Ky.; population, 2,089; postal receipts, $5,531.
Hodgeville, Ky.; population, 744; postal receipts, $3,230.
Rutherfordton, N. C.; population, 1,062; postal receipts, $5,320.
Mount Olive, N. C.; population, 2,789; postal receipts, $7,361.
Dillon, S. C., population, 1,757; postal receipts, $7,436.
Gilmer, Tex.; population, 1,484; postal receipts, $5,964.
Nephi, Utah; population, 2,759; postal receipts, $4,407.
Newcastle, Wyo.; population, 975; postal receipts, $3,973.

Also, the following appropriations for sites:

For Central City, Ky., $7,500; population, 2,545; receipts, $5,635.
For Eminence, Ky., $8,000; population, 1,274; receipts, $3,659.
For Elizabethtown, Ky., $7,500; population, 1,970; receipts, $6,896.
For Centralia, Mo., $7,500; population, 2,016; receipts, $6,561.
For Huntingdon, Tenn., $2,000; population, 1,112; receipts, $4,304.
For Rogersville, Tenn., $3,000; population, 1,242; receipts, $6,757.

So that it seems that there are at least 24 propositions in the bill that are much more indefensible than the one for my own town, Sandersville, Ga., and I have already explained to the House exactly what the facts are in connection with that item and my own conduct with reference to it.

That, however, is not of great importance except to myself. The real important thing is that the demonstration is complete that the bill we are about to pass is about the worst pork bill ever presented to this House. It is not based on the necessities of the public service; it is not based on any sound principle. It embarks us on a policy that will cost this country untold millions, much of it extravagantly and wastefully spent, unless it be checked somewhere.

On the list I have given are 3 villages of less than 1,000 population, 13 others of less than 2,000 population. There are 8 propositions where sites are appropriated for villages whose yearly postal receipts are less than $5,000 and 24 instances where the yearly postal receipts are less than $7,600.

Ah, gentlemen, our chickens are bound to come home to roost some day. You can not make these precedents without inviting, yea, urging, every village in every district in the United States to join in a gigantic raid on the Treasury in the years to come. I favor an efficient administration of the Government in its every department. I would not cripple a single department of our great Government by false or foolish economy; but when we know, as we do, that in the cases of these small villages that these public buildings are not necessary and not to be erected in the interest of the public service—for there is hardly a case in which the interest on the money we will spend for sites would not pay the yearly rental of suitable post-office quarters—then I insist the time has come to call a halt.

I can not vote for the bill. Talk is about the cheapest thing I know. I call on some of these gentlemen who for weeks and months have been posing as economists, denouncing battleships, denouncing river and harbor bills, holding up this appropriation bill or that for reasons of "economy," to join us in an effort to defeat this bill, even if we do lose some "pork" for our districts. I dispute the contention of the committee that the Democratic caucus ever instructed us to pass a public-building bill at all; certainly no caucus has ever favored this bill. I dispute the contention that this sort of "job" has been put up on the country before. If so, when? If so, does that justify us in another raid?

I know this bill will pass, but it will not do so except against my vote and over my protest, and I expect to find lined up and voting for it some of the gentlemen on this side who have been loudest in their shouts for economy.

The SPEAKER. The time of the gentleman from Georgia has expired.

Mr. HARDWICK. I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Alabama [Mr. BURNETT] has four minutes remaining.

Mr. BURNETT. Mr. Speaker, I ask that all who have spoken on this question be allowed to extend their remarks in the RECORD, and that any member of the committee who has not spoken be given the same privilege.

The SPEAKER. The gentleman from Alabama asks unanimous consent that all gentlemen who have spoken and all members of the committee who have not spoken have the privilege of extending their remarks. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, that would not include other Members of the House outside of the committee?

The SPEAKER. It would not. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LANGLEY. I ask the same privilege.

Mr. SABATH. I ask the same privilege.

Mr. ROBERTS of Massachusetts. I ask the same privilege.

Mr. HUGHES of West Virginia. I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to these various requests?

Mr. GOLDFOGLE. I make the same request.

The SPEAKER. The gentleman from New York [Mr. GOLDFOGLE] asks to be included in this request. Is there objection?

Mr. MANN. I ask for the regular order now.

The SPEAKER. The gentleman from Illinois demands the regular order, which is equivalent to an objection.

Mr. MANN. No; I do not object to the requests which have been made.

The SPEAKER. Is there objection to these requests?

There was no objection.

Mr. RODDENBERY. Mr. Speaker, everybody knows, even Members who did not have towns big enough to get in the bill, that the public buildings bill is not an appropriation bill. It does not appropriate a dollar. It does fix the projects for which the Appropriations Committee may in future appropriate and as the funds in the Treasury will warrant. Last year at two meetings the Democratic caucus directed that this bill be brought in at this session instead of at that session. The Public Buildings Committee, in obedience to that caucus instruction, brought in this bill. Over two-thirds of the House will obey the caucus instruction and pass the bill. It is a bill providing for many needed public improvements that touch millions of our citizens. It is not in the interest of the Steel Trust and other big grafting business. It is for the people. There were items of about $5,000,000 total which I thought should be deferred, and moved to do so, but the judgment of the committee did not agree with mine.

Mr. LANGLEY. Mr. Speaker, the gentleman from New York [Mr. FITZGERALD] has seen fit to criticize the provision for a site at Paintsville, which is in the district I represent, and the remarks of the gentleman from Georgia [Mr. HARDWICK] were evidently directed in part to the items in the bill for that district. Of course, I accord to these gentlemen and the other opponents of the bill the utmost good faith in the stand they have taken. They simply do not understand fully the situation, at least so far as my district is concerned. In the first place, there is not a single public building in the district; not even a site for one has heretofore been provided for, nor is there a public work of any kind erected by the Federal Government. It is a mountain district, situated in that wonderful region in eastern Kentucky, which includes the upper valleys of the Big Sandy, Kentucky, and Licking Rivers, so rich in mineral resources, and which has the greatest coal field in the world. As my colleague, Mr. CANTRILL, whose fairness and unselfish aid to that section of the State we all appreciate, has already stated, the Big Sandy Valley, where Pikeville, Paintsville, and Prestonburg are located, is in the heart of that region which is just now being developed. Hundreds of coal operations have recently started up. Thousands of people have come there from other sections during the past two or three years. Railroad building is progressing on an extensive scale. Millions of capital are being invested. The time is not far distant when the mountains of eastern Kentucky will be the richest and most populous section of the State. Gentlemen have referred in their criticisms to the population as shown by the census reports of 1910. That is no criterion for these cases. An analysis of those reports discloses the fact that the increase in Kentucky's population for the preceding decade was almost wholly in that section, and the increase has been still more rapid there since that census was taken. In some of these places the population has nearly doubled in the past three years, and the amount of business has, of course, increased in like proportion. Why, Mr. Speaker, there is in that section one city that I have in mind with a population of over 2,000, the site of which was covered with forest when the census of 1910 was taken, and two years from now it will probably have a population of 10,000. I could give other instances almost as remarkable. Not only that, Mr. Speaker, but we shall shortly have need for public buildings in that mountain section for many purposes other than post-office work. I expect that in the not distant future we shall have a weather bureau station, and a mine rescue station, and a fish hatchery, and a good many other Government establishments at different points in the mountains. Moreover, the Federal court business is larger there than in any other section of the State and is growing rapidly, and we shall soon have, I trust, sessions of the Federal court at Pikeville. Indeed, Mr. Speaker, this is only a very small installment of the public buildings and other things that we deserve and are going to ask and expect from Uncle Sam. I would like to state some facts, for the benefit of the House, regarding the industries, growth, and prospective importance of the cities to which I have referred, but these data have all been submitted to your committee, and it has unanimously decided that they merit this recognition. I am glad that the National Government is at last beginning to recognize this great section of Kentucky as it deserves.

[Mr. BURNETT addressed the House. See Appendix.]

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and on a division (demanded by Mr. FITZGERALD) there were—184 ayes and 46 noes.

Mr. FITZGERALD. I ask for the yeas and nays.

The SPEAKER. The question is on ordering the yeas and nays. All those in favor will rise.

The question was taken, and the Speaker announced that there were 39 in favor, not a sufficient number.

Mr. GOLDFOGLE. Tellers, Mr. Speaker.

Mr. FITZGERALD. Mr. Speaker, the vote on the yeas and nays was so close I ask for tellers.

The question of ordering tellers was taken.

The SPEAKER. Thirty-one gentlemen have arisen, not a sufficient number, and tellers are refused. The ayes have it. Two-thirds having voted in favor thereof, the rules are suspended and the bill is passed.

COLLECTION OF THE MILITARY AND NAVAL RECORDS OF THE REVOLUTIONARY WAR.

Mr. SMALL. Mr. Speaker, I move to suspend the rules and pass the bill (S. 271) to authorize the collection of the military and naval records of the Revolutionary War with a view to their publication.

The Clerk read the title to the bill.

ADJOURNMENT.

Mr. CLAYTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 4 minutes p. m.) the House adjourned until to-morrow, Tuesday, February 18, at 12 o'clock noon.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of Agriculture submitting, pursuant to law, report of the operations of the Bureau of Animal Industry for the fiscal year ended June 30, 1912 (H. Doc. No. 953), was taken from the Speaker's table, referred to the Committee on Agriculture, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. CARY, from the Committee on the District of Columbia, to which was referred the joint resolution (H. J. Res. 398) to direct and empower the Commissioners of the District of Columbia to revoke licenses under certain conditions, reported the same with amendment, accompanied by a report (No. 1527), which said bill and report were referred to the House Calendar.

Mr. SABATH, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 28718) to authorize the St. Louis Belt, Illinois & Eastern Traction Co. to construct a bridge across the Mississippi River near the mouth of the Missouri River, reported the same with amendment, accompanied by a report (No. 1528), which said bill and report were referred to the House Calendar.

Mr. HAMLIN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 28715) to authorize the St. Louis & Western Traction Co. to construct a bridge across the Missouri River near Weldon Springs Landing, in the State of Missouri, reported the same with amendment, accompanied by a report (No. 1529), which said bill and report were referred to the House Calendar.

Mr. STEVENS of Minnesota, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 28571) to authorize the Northern Pacific Railway Co. to construct a bridge across the Mississippi River in Minneapolis, Minn., reported the same without amendment, accompanied by a report (No. 1530), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 28673) to authorize the construction of a bridge across the Mississippi River in Beltrami County, in the State of Minnesota, reported the same with amendment, accompanied by a report (No. 1531), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. STEENERSON: A bill (H. R. 28774) amending section 932 of chapter 89 of title 2 of the Alaskan Civil Code and Code of Civil Procedure; to the Committee on the Territories.

By Mr. FITZGERALD: A bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. MARTIN of South Dakota: A bill (H. R. 28776) excepting certain lands in Pennington County, S. Dak., from the operation of the provisions of section 4 of an act approved June 11, 1906, entitled "An act to provide for the entry of agricultural lands within forest reserves"; to the Committee on the Public Lands.

Also, a bill (H. R. 28777) providing for the issuance of patents to owners of town lots purchased from the United States at auction sales in certain cases; to the Committee on the Public Lands.

Also, a bill (H. R. 28778) to amend an act approved May 30, 1910, entitled "An act to authorize the sale and disposition of a portion of the surplus and unallotted lands in Mellette and Washabaugh Counties in the Rosebud Indian Reservation, in the State of South Dakota, and making appropriation and provision to carry the same into effect"; to the Committee on Indian Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 28786) to provide for the purchase of a site and the erection of a public building thereon at Childress, State of Texas; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 28787) to provide for the purchase of a site and the erection of a public building thereon at Quanah, State of Texas; to the Committee on Public Buildings and Grounds.

By Mr. AYRES: Resolution (H. Res. 844) requesting the President to transmit information relating to City of Mexico; to the Committee on Foreign Affairs.

By Mr. HAY: Resolution (H. Res. 845) to nonconcur in gross in Senate amendments to H. R. 27941; to the Committee on Rules.

By Mr. SHARP: Joint resolution (H. J. Res. 402) extending the operation of the act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes; to the Committee on Foreign Affairs.

By Mr. SLAYDEN: Joint resolution (H. J. Res. 403) to exempt the National Academy of Sciences from the payment of duty on medals imported for presentation by it in recognition of research work; to the Committee on Ways and Means.

By Mr. DUPRÉ: Concurrent resolution (H. Con. Res. 70) for a reprint of the Soil Survey of the New Orleans Area, Louisiana; to the Committee on Printing.

By Mr. ANSBERRY: Memorial of the Legislature of the State of Ohio, requesting the enactment of a Federal law regulating the exportation of food products; to the Committee on Interstate and Foreign Commerce.

Also, a joint resolution of the Senate and House of Representatives of the Legislature of Wyoming, ratifying an amendment to the Constitution of the United States of America granting power to Congress to levy a tax on incomes; to the Committee on Ways and Means.

By Mr. HAYES: Memorial of the Legislature of California, favoring the passage of the Newlands bill for a board of river regulation, etc.; to the Committee on Rivers and Harbors.

By Mr. LAFFERTY: Memorial of the State Legislature of Oregon, favoring an amendment to the Constitution of the United States permitting Congress to pass laws regulating the subject of marriage and divorce throughout the United States; to the Committee on the Judiciary.

Also, memorial of the Legislature of Oregon, favoring the enactment by Congress of a law providing for the closing of certain drawbridges across the Willamette River in the city of Portland, Oreg., between the hours of 7 a. m. and 9 a. m. and 5 p. m. and 7 p. m.; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the Legislature of the State of Oregon, urging Congress to undertake the immediate improvement of Tillamook Bay, Coos Bay, Coquille River, and Port Orford, on the Pacific coast; to the Committee on Rivers and Harbors.

Also, memorial of the Legislature of the State of Oregon, urging Congress at the present session to appropriate $1,400,000, to be immediately available, for the completion of the Celilo Canal; to the Committee on Rivers and Harbors.

By Mr. POST: Memorial of the Legislature of the State of Ohio, urging the enactment of a Federal law regulating the exportation of food products; to the Committee on Interstate and Foreign Commerce.

By Mr. WILLIS: Memorial of the Legislature of the State of Ohio, urging the enactment of a Federal law regulating the exportation of food products; to the Committee on Interstate and Foreign Commerce.

By the SPEAKER (by request): Memorial of the Legislature of the State of Ohio, favoring the enactment of law for depositing the funds of the Federal Treasury in banks upon competitive bidding as to interest and upon approved security; to the Committee on Ways and Means.

Also (by request), memorial of the Legislature of the State of Idaho, recommending the passage of the Kenyon-Sheppard bill; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURLESON (by request): A bill (H. R. 28779) for the relief of Pay Inspector F. T. Arms, United States Navy; to the Committee on Claims.

By Mr. CLARK of Missouri: A bill (H. R. 28780) granting an increase of pension to Laura Fritts; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 28781) for the relief of the legal representatives of H. Mack Whitaker, deceased; to the Committee on War Claims.

By Mr. LANGLEY: A bill (H. R. 28782) granting a pension to Juliet S. White; to the Committee on Pensions.

By Mr. PETERS: A bill (H. R. 28783) granting an increase of pension to Margaret Gallagher; to the Committee on Invalid Pensions.

By Mr. SISSON: A bill (H. R. 28784) to relinquish, release, and quitclaim all right, title, and interest of the United States of America in and to certain lands in the State of Mississippi; to the Committee on the Public Lands.

By Mr. SLOAN: A bill (H. R. 28785) for the relief of Dudley Walton; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Polish Woman's Alliance of America, Chicago, Ill., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also (by request), petition of the Board of Commerce, Commercial Club, Manufacturers and Producers' Association, and the Tariff Bureau, of Knoxville, Tenn., protesting against the passage of legislation reducing the present tariff on aluminum; to the Committee on Ways and Means.

Also (by request), petition of the National Association of United States Customs Inspectors, favoring the passage of legislation to fix the salaries of the customs inspectors by law; to the Committee on Ways and Means.

By Mr. CARY: Petition of the H. C. Schranak Co., Milwaukee, Wis., protesting against the passage of legislation to reduce the tariff on finished goods; to the Committee on Ways and Means.

Also, petition of the Federated Trades Council of Milwaukee and vicinity, Milwaukee, Wis., favoring the passage of legislation for an investigation of the conditions of the locomotive boilers and safety appliances and see that the inspection of same is enforced; to the Committee on Interstate and Foreign Commerce.

Also, petition of the New Smyrna Board of Trade, New Smyrna, Fla., favoring the passage of legislation making appropriation to open up for commerce Mosquito Inlet, Fla.; to the Committee on Rivers and Harbors.

By Mr. DENVER: Petition of Albert J. Brown and other citizens of Wilmington, Ohio, favoring the passage of the Jones-Works bill limiting the number of saloons in the District of Columbia; to the Committee on the District of Columbia.

By Mr. DIFENDERFER: Petition of Calvary Baptist Church, Morristown, Pa., favoring the passage of the Kenyon "red-light" injunction bill for the cleaning up of Washington for the inauguration; to the Committee on the District of Columbia.

By Mr. DRAPER: Petition of Andrew Jackson Council, No. 64, Junior Order of United American Mechanics, New York, N. Y., favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. ESCH: Petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, preventing discriminations in the Panama tolls; to the Committee on Interstate and Foreign Commerce.

By Mr. FORNES: Petition of the National Civic Federation, New York, favoring the passage of the workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of Andrew Jackson Council, No. 64, Junior Order of United American Mechanics, New York, favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of the Merchants' Association of New York, favoring the passage of legislation for the adoption of a national budget, securing a change in the laws and practices now regulating Federal expenditures; to the Committee on Ways and Means.

By Mr. FULLER: Petition of Charles N. Prouty, New York, protesting against the passage of legislation for the reduction of tariff on leather and shoes; to the Committee on Ways and Means.

Also, petition of the Rockford (Ill.) Germania, G. S., the German Republican League, Rockford, Ill., and Charles K. Johnson, publisher of North Star, New York, N. Y., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. GRIEST: Petition of the Lancaster (Pa.) Leaf Tobacco Board of Trade, favoring the passage of legislation for the reduction of tariff on imported wrapper tobacco; to the Committee on Ways and Means.

By Mr. HAYES: Petition of Carma J. Gibson, Morgan Hill, Cal., favoring the passage of the Kenyon "red-light" bill, for the cleaning up of the city of Washington for the inauguration; to the Committee on the District of Columbia.

Also, petition of the California State Board of Forestry, favoring passage of legislation making further appropriations for Federal aid in the protection of forested watersheds of navigable streams; to the Committee on Agriculture.

Also, petition of the Board of Trade of Winston-Salem, N. C., favoring the passage of legislation for immediate reform in the national banking system of the United States; to the Committee on Banking and Currency.

Also, petition of Kirk, Geary & Co., Sacramento, Cal., protesting against the passage of legislation reducing the present tariff on fine and medical chemicals; to the Committee on Ways and Means.

By Mr. HIGGINS: Petition of the Connecticut Public Library Committee, favoring the passage of legislation to extend the parcel post to include books of libraries; to the Committee on the Post Office and Post Roads.

Also, petition of the Socialists of Stonington, Conn., favoring legislation for an investigation of the action of the Department of Justice against the editors of the Appeal to Reason; to the Committee on Expenditures in the Post Office Department.

By Mr. LAFEAN: Papers to accompany bill (H. R. 28516) granting an increase of pension to John Hector; to the Committee on Invalid Pensions.

By Mr. LAFFERTY: Petition of the International Union of Steam Engineers, Local Union No. 372, Portland, Oreg., favoring the passage of legislation for the repeal of the Dick military law, compelling all able-bodied citizens to be subject to serving in the militia; to the Committee on Military Affairs.

By Mr. LEVY: Petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, preventing discrimination in the Panama tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Board of Trade and Business Men's Association, Portsmouth, favoring the passage of legislation adopting the Norfolk Navy Yard as the site for the new dry dock; to the Committee on Naval Affairs.

By Mr. LINDSAY: Petition of the National Civic Federation, New York, N. Y., favoring the passage of the Federal workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of the Merchants' Association of New York, favoring the passage of legislation for the adoption of a national budget, and for securing a change in the laws and practices regulating Federal expenditures; to the Committee on Ways and Means.

Also, petition of John Kovacs, Brooklyn, N. Y., and Charles K. Johnson, publisher of North Star, New York, N. Y., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Andrew Jackson Council, No. 64, Junior Order United American Mechanics, New York, favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. MOTT: Petition of the Indiana Sealers' Association, Indianapolis, Ind., favoring the passage of legislation for the establishment of a standard barrel for fruit, vegetables, etc.; to the Committee on Coinage, Weights, and Measures.

Also, petition of Andrew Jackson Council, No. 64, Junior Order United American Mechanics, New York, N. Y., favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of the Italo-American Alliance of the United States of America, Philadelphia, Pa., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. NORRIS: Petition of citizens of Harlan County, Nebr., favoring the passage of legislation to make an investigation of the persecution of the editors of the Appeal to Reason by the Government; to the Committee on Expenditures in the Post Office Department.

By Mr. O'SHAUNESSY: Petition of the Oliphant Club, Middleton, R. I., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. SMITH of New York: Petition of the Chamber of Commerce, Buffalo, N. Y., favoring the passage of Senate bill 6099, to empower the Interstate Commerce Commission to determine a uniform classification of freight rates, and propose suggestions relative to appointment of committee for same; to the Committee on Interstate and Foreign Commerce.

By Mr. STEPHENS of California: Petition of the Chamber of Commerce of Los Angeles, Cal., favoring the passage of legislation providing for the building of two battleships instead of one; to the Committee on Naval Affairs.

By Mr. STEPHENS of Texas: Petition of Joe E. Johnston Camp, No. 259, United Confederate Veterans, Childress, Tex., favoring the passage of legislation granting pensions to the remnants of the Confederate veterans; to the Committee on Invalid Pensions.

SENATE.

TUESDAY, *February 18, 1913.*

Prayer by the Chaplain, Rev. Ulysses G. B. Pierce, D. D.

Mr. GALLINGER took the chair as President pro tempore under the previous order of the Senate.

The Journal of the proceedings of the legislative day of Tuesday, February 11, 1913, was read and approved.

Mr. OLIVER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Pennsylvania suggests the absence of a quorum, and the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dixon	McLean	Shively
Bacon	du Pont	Martin, Va.	Simmons
Bradley	Fall	Martine, N. J.	Smith, Ga.
Brady	Fletcher	Nelson	Smith, Mich.
Brandegee	Gallinger	Newlands	Smith, S. C.
Bristow	Gardner	O'Gorman	Smoot
Brown	Gronna	Oliver	Stephenson
Bryan	Jackson	Overman	Stone
Burton	Johnston, Ala.	Owen	Thomas
Catron	Jones	Page	Thornton
Clark, Wyo.	Kavanaugh	Paynter	Tillman
Clarke, Ark.	Kenyon	Penrose	Townsend
Crawford	La Follette	Percy	Webb
Cullom	Lea	Perkins	Williams
Cummins	Lippitt	Pomerene	
Curtis	Lodge	Richardson	
Dillingham	McCumber	Sheppard	

The PRESIDENT pro tempore. Sixty-five Senators have answered to their names. A quorum of the Senate is present.

FINDINGS OF THE COURT OF CLAIMS.

The PRESIDENT pro tempore laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusion filed by the court in the following causes:

The trustees of the Corinth Methodist Episcopal Church South, of Dinwiddie County, Va., *v.* United States (S. Doc. No. 1090); and

G. W. Chipman and W. J. Chipman, sole heirs of Joseph Chipman, deceased, *v.* United States (S. Doc. No. 1091).

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

IMMIGRATION OF ALIENS.

The PRESIDENT pro tempore presented a telegram, in the nature of a petition, from members of the Polish Women's Alliance of America, praying that Congress sustain the President's veto of the immigration bill, which was ordered to lie on the table.

SENATOR FROM NEVADA.

Mr. NEWLANDS. Mr. President, my colleague, Mr. PITTMAN, is present and desires to be sworn in. His credentials are on file.

The PRESIDENT pro tempore. The Senator elect will present himself at the desk for that purpose.

Mr. PITTMAN was escorted to the Vice President's desk by Mr. NEWLANDS, and the oath prescribed by law having been administered to him he took his seat in the Senate.

IMMIGRATION OF ALIENS—VETO MESSAGE.

The PRESIDENT pro tempore. Under the unanimous-consent agreement the message of the President of the United States, returning to the Senate without his approval the bill (S. 3175) to regulate the immigration of aliens to and the residence of aliens in the United States is now before the Senate for consideration. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. STONE. Mr. President, I arise to speak in support of the President's veto. From the time that this particular bill first came before the Senate I have felt constrained to oppose what is known as the literacy test incorporated in the bill. There were two or three other objectionable provisions in the bill, but generally I have believed that the bill contained so many excellent provisions, calculated greatly to improve our immigration laws and the character of immigrants coming to this country that I have been reluctant to withhold my assent to it, but to this particular provision, the one which establishes the literacy test, I can not agree. I am as much opposed to it now as when the bill first came before the Senate, and I feel obliged to indorse the strenuous opposition of President Taft and Secretary Nagel to inserting a provision of that nature into our immigration laws.

Mr. President, Mr. Taft does not stand alone as to this policy among our Chief Executives. When Mr. Cleveland was the President a bill embodying substantially the same literacy test incorporated in this bill, and exactly the same as it appeared in the bill as at first presented to the Senate, was passed by Congress and sent to him. Mr. Cleveland vetoed that bill and on substantially the same ground taken by President Taft. I do not know that the opinion of even two Presidents of the United States, although of different political parties, should have any particular influence on the minds or judgment of Senators; in fact, I think Senators should act on their own judgments on all questions; but I think the fact referred to is entitled to most respectful consideration. It shows, at least, that, so far as the Chief Executives of the country to whom this question has been submitted are concerned, and this without regard to party distinction, they have expressed their disapproval of this so-called literacy test. I quote them as I might quote any man of great personal or official prominence whose judgment ought to weigh with us. But aside from what President Cleveland or President Taft may have thought or said, I take the position that this provision of this bill—the literacy test—is a radical and most undesirable departure from the established, traditional policy of this Government. I may, of course, be mistaken, but I regard this change in our policy as bad.

Mr. President, illiteracy is not to be desired; illiteracy, in fact, is a misfortune; but illiteracy is not a test, much less a decisive test, of either bad citizenship or good citizenship. I would rather have a hundred or a thousand illiterate men, women, and children come to this country from abroad with good, honest purposes—that is, with the thought in their minds and the purpose in their hearts of identifying themselves with our civilization and of making good citizens—I would rather have a thousand such, though they did not know a letter of any alphabet, than to have one educated agitator or anarchist, who comes to wave a red flag and who is bent on mischief and the fomenting of public disorder. All these and such as these men and women I would exclude with strong hand. I would shut the door in their faces. Mr. President, it is a fact, and every Senator knows it to be a fact, that it is the smart, half-educated, wild-eyed anarchist we have reason to dread. Who are the people who commit the revolting crimes we shrink from? You find them in the Black Hand, the Camorra, the nihilist organizations; and these, in large measure, are composed of men and women who could easily pass this literacy test. These you would not exclude by this test, and yet these are the people who commit the crimes we protest against as subversive of our ideas of government and likewise subversive of all public order. These are the people who commit the crimes that have disgraced civilization in their native lands, and they are the people who are importing their monstrous criminal practices to our shores.

Mr. President, I read, as I suppose most Senators did, recently, the harrowing, tragic story of a celebrated trial some place in Italy of a band of ruffians who had murdered a noted woman and her husband for some alleged treason to their organization; I believe this was in Naples, or mayhap in some other city of Italy. We read the story of the trial of those criminals before the court and wondered at the scenes enacted there, almost incomprehensible to us. Who were those criminals? They were educated men, of the Camorra, among them being even a priest, pity though it be. They were educated people. Who murdered Garfield? Who assassinated McKinley? Who committed nearly all these frightful crimes that have startled our people and aroused a natural and proper spirit of resentment among them and excited a just demand that all such should be excluded from our shores? Mr. President, there is not one of this class who could not easily and laughingly stand this educational test. An honest man, unhappily illiterate by force of circumstances, would be deported, but such as I speak of would come walking in.

Mr. President, I believe it to be absolutely safe to say that most of the people who come from Europe to the United States come with honest purposes. They frequently come—and this Senators should keep in mind—to give to their children better opportunities than they had at home. Let me read at this point, and in support of this statement, an extract from the letter of Secretary Nagel to the President—the Secretary who

has had charge for several years of the administration of our immigration laws:

My observation leads me to the conclusion that, so far as the merits of the individual immigrant are concerned, the test is altogether overestimated. The people who come from the countries named are frequently illiterate because opportunities have been denied them. The oppression with which these people have to contend in modern times is not religious, but it consists of a denial of the opportunity to acquire reading and writing. Frequently the attempt to learn to read and write the language of the particular people is discouraged by the Government, and these immigrants in coming to our shores are really striving to free themselves from the conditions under which they have been compelled to live.

Mr. President, here I wish to say something along my own very recent experience, supporting what the Secretary says. About two weeks ago I had the privilege, while in St. Louis, of attending a large gathering of Polish citizens in that city, commemorating an anniversary in connection with some great achievements accomplished in his native land by Kosciusko. There were about 3,000 people there, all Poles, with very few exceptions. They had songs, speeches, recitations, and all that; children from about 8 to 16 years participated in the exercises. It would be difficult to find an assembly of that number anywhere characterized by a higher degree of intelligence or patriotism, if one could judge by the spirit manifested in song and speech. Most of these people were immigrants.

Mr. SMITH of Michigan. Forced from their country.

Mr. STONE. Yes; and they brought with them their little children, no doubt many of them babes at the breast. These children are being educated in the public schools of our State; and like children are being educated in the schools of all our States, being fitted, and well fitted, for the duties and responsibilities of good citizenship. What happened in St. Louis at the time I speak of you can find happening in Michigan, in New Jersey, and in most of the States.

Mr. SMITH of Michigan. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Michigan?

Mr. STONE. I do.

Mr. SMITH of Michigan. I should like to remind the Senator from Missouri that when the statues of Kosciusko and Pulaski were unveiled in Washington, this city was literally filled with patriotic Polish-American citizens, who came here to pay their respect both to this Government for what it had done and to the distinguished Polish heroes who did so much for our liberty and Union.

Mr. STONE. Mr. President, the men named by the Senator from Michigan performed a part so heroic in the history of this country that it ought in itself make us hesitate to say that the oppressed poor of their native land, with their very meager opportunities for schooling should not come to this land of ours, for which these men gave their blood and one gave his life, because, forsooth, their descendants can not stand a literacy test of this kind.

Mr. President, we hear it said that this test is intended to exclude undesirable people from certain states in Europe or parts of states; but, mark you, it applies to all Europe. It applies to the English, the French, the German, the Scandinavian—it applies to all. No one questions that these people I have named, when they come, make good citizens and contribute much to the intellectual, industrial, and moral development of the country.

Mr. President, there is one clause in this bill so very bad that it ought in itself to move the Senate to reject the whole measure. To present this briefly, let me read from the letter of Secretary Nagel to the President:

In some measure the group system is adopted—that is, one qualified immigrant may bring in certain members of his family—but the effect seems to be that a qualified alien may bring in members of his family who may themselves be disqualified, whereas a disqualified member would exclude all dependent members of his family, no matter how well qualified they might otherwise be. In other words, a father who can read a dialect might bring in an entire family of absolutely illiterate people, barring his sons over 16 years of age, whereas a father who can not read a dialect would bring about the exclusion of his entire family, although every one of them can read and write.

Senators, think of that. I favor that clause of this provision; that is, if the literacy test remains in the bill, which provides that when the father can read he can bring in his family; except I do not agree to the provision that his sons over 16 years of age and under 21 shall be excluded any more than that his daughters over 16 years of age shall be excluded.

This question of excluding sons over 16, while admitting daughters, was before the Senate when the preliminary report of the conference committee was made some weeks ago and was then discussed. The Senator from Massachusetts [Mr. LODGE], in charge of the bill, was then asked why a son 16 years of age and a day over should be excluded and a daughter of like age should be admitted.

Mr. SMITH of Michigan. Sixteen years was the average age of the soldiers in the Rebellion.

Mr. STONE. My friend says 16 years was the average age of soldiers in the great Civil War between the States.

To shut away from parental association and influence a boy 16 years of age, instead of admitting him with his parents and to here have the opportunities that would come to him to learn, to equip and prepare himself for good citizenship according to our standards would, to my mind, be a cruel provision of law.

Senators, let me draw a mental picture: Imagine a ship landing at the port of New York with a father and mother aboard, and with them a daughter 18 years of age and a boy 16 years of age——

Mr. SMITH of Michigan. Healthy and sound.

Mr. STONE. Healthy, strong, vigorous, ambitious, full of hope. And now see the Commissioner of Immigration, or whatever the authority might be, admit the father, the mother, and the daughter, but turn back the 16-year-old boy—deport him, and thus separate and break up the family. Can you see the old mother, father, sister, watch the ship sail away with the boy? Can you see the tears in their eyes? Can you see the mother and father limping away with their little girl, broken hearted, to seek their fortunes somewhere in the wide expanse of this great land of ours? To my mind a law that would do this would be a cruel, barbarous law, and no such law should be in our statute books.

Mr. President, I said I should speak but a few moments. Here is a subject that could be dwelt upon at great length; but I wish to hurry to a close, keeping faith with my promise and observant of the rights of other Senators who desire to speak.

However, before I close, there is one phase of this subject to which I wish to advert. We all well know that too many of our young men, and even our older men, for that matter, are leaving the farms and going to towns and cities to live. We are also hearing much talk about high prices for food and the incidental distress of that. Speaking from experience, every man and family might well think of that. The more industrious, honest farmers we have to occupy and cultivate our lands, and produce food to feed the vast multitudes in our America and throughout the world, the better. Would it not be wise for us to have sturdy farmers come to us from Germany, Scotland, Scandinavia, and other lands, to enter upon this great work of helping to feed mankind? Let me read again what Secretary Nagle said on this subject. This Secretary has had chief charge of this whole business of immigration for nearly four years. He has been the head of it, studying it, and ought to be and reasonably is familiar, more familiar than most of us, with the subject. Here is what he says:

The census will disclose that with rapid strides the foreign-born citizen is acquiring the farm lands of this country. Even if the foreign-born alone is considered, the percentage of his ownership is assuming a proportion that ought to attract the attention of the native citizens. If the second generation is included it is safe to say that in the Middle West and West a majority of the farms are to-day owned—

Now, think of that!

In the Middle West and West a majority of the farms are to-day owned by foreign-born people or their descendants of the the first generation.

That is a very important statement. In the Middle West and West we find the fields from which our people are fed. Native Americans are leaving these fields to reside in towns and cities. It boots little just now to ask why this is so; it is sufficient to know that it is so. These sturdy immigrant farmers come not only to take the place of those who are quitting farm life for urban residence, but, in due course, they come also to settle and colonize what is now vacant territory. Would we not make a mistake to stop this line of most useful progress and development?

Mr. SMITH of Michigan. And yet the claim is made that all the farmers favor this bill.

Mr. STONE. Yes; that claim is made. But, Senators, listen to this further message from the Secretary—a part of what I was reading:

This does not embrace only the Germans and the Scandinavians, but is true in large measure, for illustration, of the Bohemians and the Poles. It is true in surprising measure of the Italians; not only of the northern Italians, but of the southern.

This is what the Secretary—the head officer of our Immigration Service—says. Is he honest, informed, sincere? Why should he seek to mislead the President or the Congress?

Mr. SMITH of Michigan. It is also true that the Dutch, the Hollanders, make the best of farmers.

Mr. STONE. Yes; that is true; the Dutch make the best of farmers. Everyone knows of the sturdy character and industrious habits of the Dutch, and every one of that kind we get into this country is one more fortunately added to our population. The Scotch, French, Germans, Scandinavians, Dutch, and many others from abroad constitute a large percentage of our

farming population. They are born farmers, have always been farmers. They come here to buy farms or to colonize waste places and make farms and farming communities. We would not do well, I think, to stop or seriously interfere with a forward movement of that kind.

Let me make this suggestion to the honorable members of the Immigration Committee and to the Senate: Instead of applying a drastic and almost inexcusably cruel test of admission, such as we are considering, would it not be better if we should give more attention to the distribution of the immigrants who come to our shores, so as to prevent, or at least greatly to minimize, the evil of congestion, by turning the tide to the agricultural sections, where labor is sorely needed, instead of allowing it to flow unchecked into overcrowded industrial centers?

Let me read again from the letter of Secretary Nagel to the President:

> We received farm laborers, 184,154—

That is, last year—

> and only 3,978 returned.

Nearly 185,000 farm laborers came here last year from Europe, and only a few returned. We ought to look after immigrants of this character and direct them to where they can find the best employment.

Mr. DILLINGHAM. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Vermont?

Mr. STONE. Certainly.

Mr. DILLINGHAM. Does the Secretary anywhere in his letter to the President tell where that large number of foreign laborers went to settle and the employment they went into?

Mr. STONE. I did not find a statement as to the exact countries from which these particular farm laborers came.

Mr. DILLINGHAM. If the Senator would like to know—I do not want to interrupt his speech——

Mr. STONE. It will not interrupt me.

Mr. DILLINGHAM. The records show that 72 per cent of all that vast number came from southeastern Europe, and that 82 per cent of those coming from southeastern Europe went into the Atlantic Division States, where the manufacturing establishments are located; not to the Central or North Central States, where agriculture so much prevails.

Mr. STONE. Does the Senator mean that they went into manufacturing or into farming?

Mr. DILLINGHAM. They went into manufacturing. Taking the 37 leading industries of America, as investigated by the commission, where they came into contact with over 620,000 individual employees, 59.9 per cent, almost 60 per cent, were foreign born.

Mr. STONE. Does the Senator from Vermont——

Mr. DILLINGHAM. I do not wish to interrupt the Senator and get into an argument with him, but I thought that the statement on the part of the Secretary was a misleading one, and that the Senator would be glad to have it corrected.

Mr. STONE. That is all right; the Senator does not interrupt me. It is not at all disagreeable. I should like to ask the Senator whether he joins issue with the Secretary on the statement that in the year named 184,154 farm laborers were received in this country?

Mr. DILLINGHAM. As to their being farm laborers in the countries from which they came, I have no doubt his statement is correct. I have not examined the record. But I thought the unfairness of the statement of the Secretary of Commerce and Labor to the President, in asking him to veto this bill, was in not telling him where these men had gone upon reaching the United States, and that they could not be found in the agriculture of the United States.

Mr. STONE. How many went into agriculture?

Mr. DILLINGHAM. I do not think any of them did.

Mr. STONE. Does the Senator mean to say that none of these immigrants——

Mr. DILLINGHAM. When I say none of them I mean no considerable number of them. Eighty-five per cent of all that came from southeastern Europe went into the Atlantic Division of States, and they are found at the seats of the great basic industries.

Mr. STONE. Where did you get that information?

Mr. DILLINGHAM. From the report of the Immigration Commission and from the statistics of the department.

Mr. STONE. Where did the Secretary who heads this service get his information?

Mr. DILLINGHAM. He has given only a small amount of the information. He has neglected to state a great number of things that should have been said, if he is the adviser of the President of the United States.

Mr. STONE. That is a rather serious indictment——

Mr. DILLINGHAM. It is my opinion.

Mr. STONE. To accuse the Secretary of trying to mislead the President. He speaks with great positiveness as to the number of farm laborers who came. I do not care, for the purposes of this argument, whether the 184,000 and more came from Italy or Germany or Scotland or any other particular country or whether they came from many countries. The point I had in mind was the statement made by the Secretary of Commerce and Labor, under whom the whole administration of our immigration laws is carried on, that 184,000 and over of farm laborers came last year into the country. This is the main point. These farm laborers came. Did these farmers come and then go into other and less profitable employments of the whole character of which they were ignorant? Do not the alleged statistics of my friend prove too much? Do they not prove that there is somewhere "a nigger in the woodpile"? Why were not these young farmer boys directed away from overcrowded manufacturing employments into pursuits to which they had been accustomed and where better wages and better conditions awaited them? There must be some fault in the administration of our law or in the law itself if the Senator's statistics are entitled to great credit.

Mr. DILLINGHAM. If the Senator will permit me, I will say that I am in full sympathy with him in his desire to have a proper distribution. If he will look at the records for the last 10 years, during which time we have admitted into this country substantially a million aliens, he will probably find that 65 per cent of the whole have been common or farm laborers abroad, but when he traces the points to which they have gone, the occupations in which they have engaged, and where they are now living he will find them not on the American farms, but he will find them doing the cheapest labor in the great manufacturing industries of the country.

Mr. STONE. That statement presents a rather startling situation to me, namely, that 65 per cent of these people of whom we are speaking, all of whom all their lives in their native lands were engaged in some form of agriculture, should preferably on coming here go into manufacturing pursuits and, moreover, into the cheapest labor of manufacturing; or, in other words, take the worst that manufacturing offers. That means they go into something they do not understand instead of going into agricultural or horticultural pursuits West or South to engage in work with which they are familiar and where at least as good wages, and I think better wages, could be obtained. I am warranted, Mr. President, in saying where better wages could be had, if we may judge by testimony taken in Congressional hearings as to wages received in Lawrence, Mass., and in other industrial centers, where the average wage has been scarcely enough for the working man and his family to subsist upon. What pitiful stories we have read about all this. Why should these farmers go into this class of work? If it be true, then it must be that some inducements were offered to them from some quarter, some effort made by somebody to pull them in that unnatural direction; and if that was done it was contrary to the laws of the United States——

Mr. DILLINGHAM. Will the Senator suffer a suggestion on that point?

The PRESIDENT pro tempore. Does the Senator from Missouri yield further to the Senator from Vermont.

Mr. STONE. Yes.

Mr. DILLINGHAM. If the Senator will look at the report of the Immigration Commission which relates to the place which he has mentioned in Massachusetts—Lawrence—I think he will find that probably 60 per cent are foreign born. I have not the figures before me, but a very large percentage—60 per cent and above, I think, of the male population of that town are foreign born, and while three-fourths are made up of English, Scotch, Irish, Scandinavian, and French-Canadians, we have one-fourth of that population that is of the recent immigration I have spoken of, who were farm laborers in their own country and have come here and have gone to these congested sections, and they have overcrowded the local market for labor until the prices for that common labor have been so low that they had a right to complain of them.

I never would criticize anyone for complaining of the wages paid to that class of labor, but it has resulted in the overcrowding of that class of labor in this country. That is the very basis upon which the commission recommended the literacy test as being the most feasible one to relieve that pressure in those centers.

Mr. STONE. Does the Senator think that these people were taken to these manufacturing centers as the result of some covert agreements or because of some underhanded, unlawful contracts?

Mr. DILLINGHAM. Not at all; not at all.

Mr. STONE. How did they ever happen to go there?

Mr. DILLINGHAM. It comes in this way: This incoming immigration is made up of men who wanted to come here, and who were in correspondence with their brothers, their cousins, and their friends, who had come before.

Mr. STONE. Yes; I have heard all that before.

Mr. DILLINGHAM. They correspond with them, and they tell them what is going on in this country, what the opportunities are, and they come; and it is probably true that 80 per cent of all who come know where they are going.

Mr. STONE. I have heard all that before.

Mr. DILLINGHAM. The Senator has heard it before, and it is true. It appears that about 90 per cent of them give their destination as some point where they are going to join friends or relatives. They go to these centers. They should go out to the farms, but they go to people of their own nationality, to those who speak their language, to whom they can communicate their thoughts, who lived abroad under the same conditions they had lived.

Mr. STONE. As I have had occasion to say before to-day, when other issues were before the Senate, it is exceedingly remarkable that the kindred of these Europeans residing here should write and invite their people to come over here and enjoy with them a feast of starvation. There must be something wrong about this story. It is unreasonable and unnatural.

Mr. DILLINGHAM. Mr. President, in answer to the inquiry of the Senator from Missouri, I should like to say——

Mr. STONE. There must have been some unlawful contract, some misuse of the law somewhere.

Mr. DILLINGHAM. They come here because they can do so much better than they could at home.

Mr. STONE. Better! A man can not do worse industrially than to starve.

Mr. DILLINGHAM. It appears that in 1907 this very class, the men employed in factories, sent home through the immigrant banks—not through the post office or the express companies or regular banks, but through what they call immigrant banks—$141,000,000, and they saved it by living on a plane that was un-American in character.

Mr. STONE. I think this much, at least, is evident, that if approximately 185,000 farm laborers—I say farm laborers—came to the United States last year and were by some means, of design or negligence, diverted to overcrowded manufacturing districts, where there was no demand for their labor and where wages were already on a starvation basis, instead of directing them along a different current out into the Middle West and the West, or down into the fruit regions of the South, where they could have found employment at remunerative wages, the authorities administering our immigration laws and having charge of this great business must have been derelict and fallen far short of their great responsibilities. I speak only of a situation, without intending either to accuse or defend.

Mr. DILLINGHAM. The Senator understands, of course, that the law provides that the Secretary of Commerce and Labor may establish a division of distribution and use his best efforts to bring about that result.

Mr. STONE. Yes; I understand that.

Mr. DILLINGHAM. But he has been able to accomplish but little along that line. In the law of 1907 we provided for that very fully.

Mr. STONE. Now, Mr. President——

Mr. DILLINGHAM. I beg the Senator's pardon. I will not interrupt him again.

Mr. STONE. No; the Senator has my absolute permission. He can proceed, if he wishes. I was just going to conclude. I have already taken too much of the time, and so I will conclude with this one statement and give way to others.

Mr. President, I am unwilling to overturn our old, wise, traditional, and humane policy in this particular respecting immigration, thus entailing, as this literacy test would, many grievous hardships upon honest immigrants, at the same time largely increasing the expenditures of the Government in administering the law, and all without any well-founded hope of accomplishing any substantial good to our own country. I feel constrained, with all due deference to what is manifestly a strong majority sentiment in the Senate against my view, to record my vote in favor of sustaining the position taken by the President of the United States.

Mr. CLARKE of Arkansas. Mr. President, I take advantage of this opportunity to say a word in explanation of my position on this question and of the vote I shall give. I am opposed to the literacy test as a matter of principle. It is not a rule as applied here that will remedy the evils against which it is now directed. I am aware that there exists a widespread dissatisfaction with the character of the present foreign immigration to this country. This in large measure is founded upon the misconduct of a large element of the foreigners who have sought our shores in recent years. An investigation of the circumstances of some of the most conspicuous of these outbreaks which have most distinctly accentuated that opposition to the further influx of that character of population discloses the fact that the events were not under the control and the outbreaks were not made by persons who are illiterate under the provisions of this act.

Ours is a Government which investigates things with care and acts generally in matters of such moment as this one is with deliberation and a perfect understanding of the effects and consequences of what it is that is to be done. The adoption of the literacy test is no test at all when it comes to excluding undesirable citizens. It is a part of the history of the assembling of the population which has made this splendid Republic what it is that many of them were foreigners and that a multitude of these could not enter our domain under the test which it is now proposed to apply.

There are still many more such who are anxious to seek our shores as a place of residence and who would constitute in the future, as their fellow countrymen have constituted in the past, some of the most loyal, most worthy, and most enterprising citizens that we have.

If it is the desire of the National Government to restrict the further admission of immigrants to our country at this time, it will best comport with the courage, candor, and dignity and, withal, sense of fairness of this country to adopt a discriminating system of selection as between individuals, classes, and countries that will condemn to exclusion people because of the opinions they hold or the tendencies that they possess that we can not tolerate here, or because they are deficient in things which are necessary to render their residence here as part of our body politic safe and wholesome. Possibly this involves a course of investigation that may be difficult to make, but better that than an erroneous and unjust system should be adopted, having no merit to commend it save its simplicity and the cheapness of its administration. It is better that it should be endured rather than gross injustice should be inflicted on a large element of people whose countrymen by their past fidelity and industry have given an earnest to the assurance that a further influx of that particular class of foreigners would not be objectionable. The criminal element of any foreign country that is being driven from home need not find a resting place here if we shall establish adequate rules for detection and identification and provide faithful and courageous officers to enforce these rules when they are promulgated.

Every nation owes it to itself as a primary duty to preserve and perfect itself, and it is the judge of the means that it will invoke to accomplish that end. If it is a fact that the immigration problem has become acute and serious to a degree that will warrant this country in saying to the world that we have for the present enough foreigners within our borders to answer all purposes of national development and progress, and that time is required to properly assimilate into our collective activities our foreign-born residents, then say so courageously and plainly and exclude for a given number of years all foreigners. That course would challenge the respect and considerate acquiescence of the countries of the world and meet the requirements of duty to ourselves. If this necessity can be shown to exist, I am willing to join those who would apply that character of remedy to existing evils, but I will not exclude anybody, otherwise capable of making a peaceable and industrious citizen, on account of his misfortune.

The lessons of my own personal observation and experience would convict me of insincerity if I did, because I know that some of the best citizens in this country to-day are persons who came here from foreign countries wholly unable to stand this proposed educational test, and I know as well that many of them have all over this country founded families who are an honor to the country and constitute in all the relations and vocations of life the very backbone and foundation of its greatness among the nations of the earth. I should think less of myself than I am willing to admit if I should be tempted into a position that would thus shame my own convictions and penalize any class of worthy people because of deficiency due more largely to oppression and misfortune than to neglect of opportunity.

I represent in part a State that has no prejudice against its foreign-born citizens. Some of the very best people in the State of Arkansas to-day are foreigners and the descendants of foreign-born people. They live in indiscriminate harmony with their native-born neighbors, and together with them they constitute a body of citizenship that can not be excelled on the globe in respect to peace, industry, self-respect, and all the ele-

ments that make for a God-fearing, upright, and progressive people. There is no condition there that calls for an imposition upon the rights of their kinsmen elsewhere in order to relieve conditions which, as the Senator from Vermont has said, exist in other sections of the country and that are wholly unsatisfactory.

We of Arkansas are willing to contribute much to restore a condition of peace and prosperity and a law-abiding spirit to other sections of our common country, but we are not willing to have it said that in attempting to make this contribution we permitted our judgment to be so swayed by the clamor of the hour as to select a means of doing so that will not only prove futile when subjected to a practical test but will in the effort inflict injustice on a large class of deserving people who are still welcome to our Commonwealth. The application of the so-called literacy test provided for in this bill will, in my opinion, prove ineffective for the purpose, for authentic information shows that a very large percentage of the most vicious and dangerous foreigners who come here can stand the test successfully. On the other hand, it is common knowledge that many worthy immigrants, possessing in the rough all the elements of manhood and industry necessary to make them good citizens here, will be excluded for a deficiency that is in nearly every case more a misfortune than a fault. There is no necessary connection between the misfortune of illiteracy and criminal and indolent habits and tendencies in life. I think the two situations should be more closely scrutinized and a juster process of discrimination adopted. In my humble opinion the justice and sound policy of the case can be more nearly approximated and our traditional policy of liberality to worthy foreigners more nearly maintained by a different method.

That is about all I intended to say. I voted against this literacy test every time it has been presented and upon grounds that were perfectly satisfactory to me and perfectly understood by me. It might have been best that this bill should have passed out of consideration without now being subjected to another vote here, but the vote is here without my choosing, and I must either vote the distinct convictions I hold or I must reverse myself. I am not willing to do the latter. I am opposed to the literacy test as a condition upon which worthy persons may enter this country as immigrants, and the only way by which I can make my vote harmonize with my convictions is to vote to sustain the veto of the President, and I shall accordingly do so.

The PRESIDENT pro tempore. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. NELSON. I suggest the absence of a quorum, Mr. President.

The PRESIDENT pro tempore. The Senator from Minnesota suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Martin, Va.	Smith, Mich.
Bacon	Foster	Martine, N. J.	Smith, S. C.
Bourne	Gallinger	Nelson	Smoot
Bradley	Gamble	Newlands	Stephenson
Brandegee	Gardner	O'Gorman	Stone
Brown	Gore	Oliver	Sutherland
Bryan	Gronna	Overman	Swanson
Burnham	Guggenheim	Page	Thomas
Chamberlain	Jackson	Paynter	Thornton
Clark, Wyo.	Johnson, Me.	Perkins	Tillman
Clarke, Ark.	Jones	Pomerene	Townsend
Crawford	Kavanaugh	Sheppard	Wetmore
Cullom	Kern	Shively	Williams
Dillingham	La Follette	Simmons	Works
du Pont	Lea	Smith, Ariz.	
Fall	Lodge	Smith, Md.	

Mr. STONE. My colleague [Mr. REED] is unavoidably absent. I have a telegram from him saying that if he were present he would vote to sustain the President's veto. He is paired with the Senator from Michigan [Mr. SMITH].

The PRESIDENT pro tempore. Sixty-two Senators have answered to their names. A quorum of the Senate is present.

Mr. DILLINGHAM. Mr. President, I observe that in the very brief message sent to Congress by the President of the United States, in which he withholds his approval of the measure under consideration, he says:

> I do this with great reluctance. The bill contains many valuable amendments to the present immigration law which will insure greater certainty in excluding undesirable immigrants.
>
> The bill received strong support in both Houses and was recommended by an able commission after an extended investigation and carefully drawn conclusions.
>
> But I can not make up my mind to sign a bill which in its chief provision violates a principle that ought, in my opinion, to be upheld in dealing with our immigration. I refer to the literacy test. For the reasons stated in Secretary Nagle's letter to me, I can not approve that test. The Secretary's letter accompanies this.

I wish to call attention, in connection with this fact, to the circumstance that the Secretary of Commerce and Labor, in addressing the President on this subject as his adviser, does not in a single instance take up any of the questions reported by the Immigration Commission regarding the existing conditions in the United States—those conditions were fully set out in its reports and upon them were based the recommendations of that commission—but everything that he says in relation to such findings is in criticism of them. His letter to the President is distinguished chiefly for a failure to discuss any of those questions or to bring them to the mind of the Chief Executive. He discusses the question of the literacy test from the standpoint from which it has been discussed on the floor of the Senate this morning, that it will not tend to elevate the standard of individual immigrants who are coming to the United States. He also goes so far in his letter as to call attention to the great number of immigrants who have been admitted in the last year who are farmers, and leaves it to be inferred that they have gone to the farms of this country. Had that been so, the recommendation of the reading test would never have been made. That would have been a result which all the commissioners would have been glad to report; it is a result that we have aimed at in all legislation of recent years. The act of 1907 provided for a Bureau of Distribution, giving almost unlimited powers to the department to institute measures to divert the stream of immigration at the ports of entry and send it into the different States where land was for sale and where farm labor was in demand, but it has largely failed of its purpose. Even the Secretary does not claim that the scheme has been successful.

The truth is that the immigration which has been coming into the United States in the last 10 years has almost wholly gone to the Atlantic division of States where the great basic industries of this country are more largely conducted. The immigrants have gone to the centers, each class and each race to the center where his class and his race most predominate. The commission found that there was an oversupply of common, unskilled labor in those centers and that the conditions were un-American, not elevating in any sense. They looked about for a remedy for this evil, and they state in their report, after reciting all the different remedies which had been suggested, that, in their judgment the most feasible measure was the educational test, because it would exclude about one-third of those particular classes which are most a menace to the institutions of the United States; in other words, the most undesirable classes of immigrants.

Mr. President, I want to call attention to the fact that since the beginning of the Civil War we have admitted into this country something over 23,000,000, probably 24,000,000, of alien immigrants. The number that have been received may perhaps be more fully understood when I say that they constituted seven-tenths of the population of the United States at the outbreak of the Civil War. Down to 1882 the largest proportion of all the immigration to this country came from Great Britain, Ireland, Scotland, and the Scandinavian countries, Germany, Holland, and France, all of which was of the same basic stock as that of which the population of America is so largely made up. That immigration entered into all the industries, agricultural and otherwise, of the country, so that now it has been fully assimilated, and represents one of the strongest and best elements in American citizenship.

Nobody can say aught against the character of that immigration. Previous to 1882 we had admitted five or six millions, and probably 75 or 80 per cent of them came from the Netherlands, France, Scandinavia, Germany, Great Britain, and Ireland.

The height of the wave of that immigration was reached in 1882. Since that time the proportion coming from those countries has decreased, and the number coming from southern and southeastern Europe has been constantly increasing. That is owing to the fact that since 1870, when the great manufacturing, mining, and smelting industries of our country had become firmly established and were rapidly expanding, and a great demand for common and unskilled labor had been created, and immigrants from southern Europe have come to engage in those particular lines of industry, and the stream of such immigration has increased year by year to a most remarkable degree.

In order to plant that fact a little more firmly in the RECORD, I want to say that prior to 1882, what is termed the "old immigration," made up of the races I have indicated, constituted 87½ per cent of all that came. Only 13 per cent of that immigration came from other sections of Europe. Since that time, in a period of 25 years prior to 1907, the "old immigration" from northwestern Europe decreased from 87 per cent to 20 per cent of the whole, while the immigration from southern Europe increased from 13 per cent to 80 per cent of the whole. So, that at the present time substantially 80 per cent of our immigration

is from southern and eastern Europe rather than from northwestern Europe.

In this connection it should be understood to what sections of our country these immigrants have gone, what they have engaged in, and how far they have been assimilated. I find that prior to 1880, that being the census year, almost 56 per cent of the old class settled in the Central and North Central States, where the homestead act was under operation and where now in many of the States they and their descendants, as has been well stated here to-day, constitute a majority, perhaps, of the agricultural classes. During those years only 31 per cent, substantially one-third of it, came into the Atlantic division of States, showing that a large majority of the immigration entered into the development of the great West—the construction of railroads, the opening up of farms, and the establishment of the mining and smelting industries. But between 1880 and 1900, instead of 56 per cent going into the Central States, only 29.3 per cent went there, and 61.9 came into the Atlantic division of States, where the manufacturing interests were more largely developed.

Mr. THOMAS. I would like to inquire of the Senator from Vermont what proportion of that 29.3 engaged in the farming business—going into the States the Senator mentioned—really devoted themselves to the development of agriculture.

Mr. DILLINGHAM. Mr. President, it is impossible to state that accurately, for this reason: One of the statisticians of our Government has said that there was never a week day for a period of 20 years after the close of the Civil War that did not record the investment of a million dollars in railroad building and construction. I only quote him to show the intense activity there was in railroad construction following the adoption of the homestead law and the opening of the Pacific railroads.

Mr. THOMAS. My question had reference to the distribution of immigration during the last 20 years.

Mr. DILLINGHAM. Oh! I thought the Senator was referring to the old immigration.

Mr. THOMAS. No; the immigration of the last 20 years.

Mr. DILLINGHAM. I am coming to that. I will answer the Senator's question as I proceed. I had intended to discuss that question.

We must remember that from 1900 to 1911, a period of about 12 years, 72 per cent of this new immigration came from southern and western Europe. Of that 72 per cent of the entire immigration, 82 per cent went into the Atlantic division of States, where the manufacturing industries are so fully developed, and of this number substantially 60 per cent were farm laborers in the countries from which they came. And yet this 82 per cent have avoided our farms and have gone to these great manufacturing centers and have taken possession of the unskilled branches of labor and receive the lowest wages of any of those who are engaged in the manufactures. About one-third of our present immigration is of the old type; and they are almost wholly skilled laborers, and take the higher and better-paid branches of labor in the industries of the country.

The change that has come about since 1882 is shown in the last census, which speaks of the old element of immigration and the new element—that is, the foreign born still living in this country—in this way:

According to the last census it appears that in the 10 years preceding 1910 there has been a decrease to the extent of 300,000 in foreign-born residents coming from Great Britain, Ireland, Scotland, Germany, and the Scandinavian States, while the increase of those coming from southern and western Europe has gone from 1,800,000 to 5,000,000, or an increase of 3,200,000 in the 10 years.

I stated, in an interruption that I made while the Senator from Missouri [Mr. STONE] was speaking, that the Immigration Commission made an investigation of 37 of the principal industries of the United States east of the Rocky Mountains. They came in contact with 620,000 individual operatives in these industries. They found that taking them all together 59.9 per cent, almost 60 per cent, were foreign born; but they also found that the immigrants of the old immigration were occupying the good positions, those requiring skilled labor, while those of the new immigration, those who have been coming in such numbers during the last 10 years, were performing the lower grades of work, and were receiving correspondingly low prices for their labor. In the iron and steel industries, slaughtering, meat-packing, wool and the manufacturing of wool and worsted, coal, copper, leather, cotton goods, clothing, and silk goods, the average number of foreign born found in those industries amounted to 65.6 per cent of the whole.

Mr. GRONNA. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Vermont yield to the Senator from North Dakota?

Mr. DILLINGHAM. Gladly.

Mr. GRONNA. No one, I think, disputes the fact that the immigration from northwestern Europe has decreased, and that the immigration from southern Europe has increased. But that does not prove anything unless it can be shown that the people who come from that particular section of Europe are really undesirable.

Mr. DILLINGHAM. I shall deal with that question before I conclude my remarks.

Mr. GRONNA. That is why I wanted to make this observation at this time.

Mr. DILLINGHAM. I find that in the case of those who have come since 1899, of the Roumanians 93½ per cent were reported as being common or farm laborers; of the Bulgarians and the Servians, 92 per cent; of the Slovaks, 80 per cent; of the south Italians, 77 per cent; of the Russians, 82½ per cent. But there is nothing in the record to show that they have gone to the farms. As I stated a little while ago, the records at Ellis Island show that probably 90 per cent of them have gone to join friends or relatives, and most of them had railroad tickets from New York to the place of their destination. They knew in advance just where they were going. They went to the Atlantic division of States, to the seats of the great industries, where they found brothers, cousins, and friends—men who speak their own language and live under the conditions to which they have been accustomed.

That the labor market in all these places has become overcrowded can not be doubted by anyone who will take the reports of the Immigration Commission and patiently examine the facts there set forth. A comparison of the yearly and the weekly wages shows that fact very clearly. I have in my hand a statement showing that in the iron and steel industry—these are statistics gathered by the Immigration Commission—the weekly wage was $14.35; but, on an average, the men received for a year's service only $346, showing that they were employed less than one-half of the time; and, of course, there was an overcrowding of that class of labor if that was the fact. In the bituminous coal industry, while they were receiving $2.19 daily, we found that upon an average they were receiving only $443 annually, which indicated that they worked less than two-thirds of the time. The same was true of those engaged in silk manufacturing, and in woolen and worsted, and in leather, while those engaged in the manufacture of clothing probably worked substantially three-fourths of the time.

So I might go on down through the different industries; but all the testimony was of the character of that which I have just cited, in that a comparison of the yearly wages with the weekly wage showed that the men were largely out of employment.

I want to remark just here that the commission investigated 200 different communities where they found this overcrowded condition of common, unskilled labor, the result of the great increase in immigration during the last 10 years. When we had examined those 200 different localities where the foreign element predominated and conditions were so unwholesome, we sought to find a typical American manufacturing community, that we might compare the conditions existing in each. We searched the country over, but we failed to find such an American community in the manufacturing sections. It does not exist. Everywhere, in every place where these different industries have been planted and are flourishing, this cheap labor from southern Europe has, in the last 10 years, been coming in and crowding out the labor that was formerly employed. It has come in such numbers that the common labor market is actually overcrowded.

I have in my hand a statement I have made from the commissioner's report, showing the annual earnings of the Lithuanians, the Magyars, the Mexicans, the Polish, the Portuguese, the Roumanians, the Russians, the Ruthenians, the Servians, the Slovaks, the Slovenians, the Syrians, the Turkish, and the south Italians, employed in the manufacturing industries of the United States, investigated by the commission, doing the common labor of which I have spoken.

From this it appears that the annual average earnings of the men of these nationalities so employed was $396. Yet those men have lived under such conditions that they have saved from even those small earnings. In the year 1907 there was remitted to Europe through the immigrant banks alone $141,000,000. By "immigrant banks" I do not mean our national banks, nor savings banks, nor the express companies, nor money orders. I mean what they call the immigrant banks, oftentimes agents of steamship companies, whom they trust, being of their own nationality. In the year 1907, as I stated, there was remitted through those immigrant banks $141,000,000. That vast sum had been saved in spite of the small wages they had been paid, because they have lived in this country the life that they

lived in the old country. They have lived in communities, 20 in a family, with a boarding boss; they have cut their expenses to the very lowest point; their mode of life has been far below the American standard—far below any desirable standard. Fifty-five million dollars of that vast sum went to Austria-Hungary, $52,000,000 of it went to Italy, and $15,000,000 of it went to Russia.

It is necessary, in order that we may understand these conditions, to know something of the financial characteristics of this class of immigrants. They are unlike the old immigration, which came in family groups, looking for a home, for the education of their children, for the general growth and development and advancement of their higher interests. Of the 955,000 alien immigrants admitted between 1899 and 1910, 69.5 per cent, almost 70 per cent of the whole, were males. Of those coming from south Italy, Russia, Bulgaria, and Servia, 85¼ per cent were males; and it is probably true of the Greeks that there are a thousand men to one woman in this country.

What does this mean? It means that this late immigration is not of the type that built up American States, American industries, American institutions, and American citizenship. It is a new type, temporary in its character, that lives under conditions which the old class would not tolerate or submit to.

What about the wage earners with whom we came in contact? I have stated what a large proportion of the immigration is male, but we also found that, despite the fact that 55 per cent of all those examined were married, three-fourths of them had left their wives in Europe. A careful computation discloses the fact that substantially 86 per cent of the men that have gone into these communities in the last 10 years, and are living as I have already described, are either single men or are living single lives.

It is for the Congress of the United States to say whether that is a desirable immigration, particularly when it overcrowds the industries and reduces wages below a point consistent with good citizenship. We want every man engaged in American industries to have a wage that will help him to become an American citizen, that will enable him to live upon an American scale. I repeat, 86 per cent of these immigrants are either single or living a single life.

Comparing them with the old immigration, we find also that only 36 per cent of the new immigration seeks naturalization, while 85 per cent, almost 86 per cent, of the men of the old immigration have sought this privilege.

Having found, as the commission did, that in all of these great centers there was an overproduction of common labor, an amount of common labor that did not minister to the good of the community, the commission looked about to see how best they might limit the number of that class of immigrants coming into the United States. They considered an increase in the head tax, but such an increase would accomplish just that which we wish to avoid. Should we increase the head tax and make it $20, for instance, that would debar the man who wants to bring his wife and children—the man we most want, the man who intends to make a home and become one of us. If he has a wife and five children the head tax would amount to $140, which might prove prohibitive. So we could not accomplish the desired result in that way. We considered the various other measures that might be adopted to limit the number of immigrants of the more undesirable classes, and, as a result, all but one of the members of the commission—Mr. Bennet dissenting—said that, in their judgment, the most feasible single method was the literacy test, not as it would affect the individual, making him a better or a worse citizen by reason of his being able to read or write, but that the literacy test would reach those classes that constitute this great influx which has overcrowded the seats of industry.

How will it work? This bill does not affect the citizens of Great Britain or of Ireland or of Scotland or of Scandinavia or of Germany. Only 2.6 per cent of all that have come from those countries in the recent years are illiterates. Of this new immigration that has been coming in, including north Italians, where the degree of illiteracy is only between 2 and 3 per cent, to make a perfectly fair statement, 35.6 per cent are unable to read or write.

So it appears this provision simply reaches this latest type of immigration and will probably reduce its numbers to the extent of one-third of those who are now coming.

I might take time to say how this will apply to the different nationalities, but it is necessary to do so in detail; it would apply in varying degrees from 20 per cent in the case of some of the nations of southern and eastern Europe up to 68 per cent of certain others. Of those coming in in the last 10 years probably 68 per cent of the Portuguese were illiterate, and nearly 59 per cent of the Turkish. About 54 per cent of the south Italians and 48 per cent of the Roumanians were also illiterate. I will not weary the Senate by naming the different races, but will content myself with the statement that the average illiteracy of the races that come in largest numbers would be in the neighborhood of 41 per cent.

When I say that the old immigration is entirely different and that only a fraction over 2 per cent would be rejected, it will be seen that the purpose of this bill is simply to relieve the congestion in the congested districts of the United States where this recent immigration is mostly found, and to relieve us of that type of immigration that is transient in its character and which is not at all adapted to aid in building up and maintaining American institutions.

If we apply this test to the following nations, we get this result: Including south Italians, Poles, Slavs, Slovaks, north Italians, and the Croatians the average number debarred would be about 33 per cent, basing this estimate upon the illiteracy of those who have been coming during the last 10 years; but it is worthy of notice that this percentage is considerably lowered by including the north Italians, among whom the degree of illiteracy is only 2.6 per cent.

That reminds me of a significant fact which should not pass unnoticed, viz., that in Italy, north and south Italy, the same laws exist relating to education, but the north Italian is educated, while the south Italian is not educated. This result comes from a difference in the two races and in the environments surrounding them.

Mr. President, I have thus briefly and directly tried to bring to the attention of the Senate the conditions found to exist by the immigration commission, and upon which conditions the recommendation was based that this test be adopted. It remains only to examine two or three things that were said by the Secretary of Commerce and Labor in his most remarkable letter to the President of the United States.

It is a matter of common knowledge that the Secretary of Commerce and Labor has been opposed to the educational test from the beginning. I find upon consulting the newspapers that as early as January 18, 1911, in a speech made by him to the Union of the American Hebrew Congregations in New York, he used this expression:

> I wish to put myself on record as unqualifiedly opposed to a literacy test.

That was before the question was debated in Congress; before this bill was introduced; and some of the newspapers of the following day commented upon the great applause that greeted the Secretary's effort. His letter shows that he entertains the old-time feeling, an old-time prejudice, if I may use that expression, against the writing test.

My friend from Missouri [Mr. STONE] has quoted from that portion of his letter in which the Secretary criticizes the provisions of the bill, and in which he says that if the head of a family is admitted it may also admit the children who may be illiterate. If that is deemed to be an objection to the bill, I beg to call attention to the statistics I have already cited, showing the character of our immigration. We admitted 9,955,000 aliens in the last 10 years; of these almost 70 per cent were males. Three-fourths of those coming from southern Europe left their wives at home; 86 per cent of those examined were single or lived a single life. Where is the danger from illiterate children that would come with that class of immigration?

Even if children were to come uneducated we could take care of them. We have compulsory education established as a system in every State in the Union. Yet a great cry comes up here in the American Congress, that while we are adopting every means imaginable to build up our citizenship by promoting education, thus making our people intelligent, we should not close our doors to the class that do more to lower American standards than any other influence that can come.

The whole tenor of Secretary Nagel's letter to the President is one of pity for the immigrant. It is an argument for the foreigner, without a single word concerning the standards which we have established in the United States, of which we are proud and which ought to be maintained. It does not contain a word of sympathy for the American workingman, nor give evidence of any fear regarding our institutions. He suggests to the President that the enforcement of this law may cost us a million dollars annually. I say, in reply to that, if in the judgment of the American Congress the law is required, it is not for any officer of the executive branch of the Government to offer that criticism. But suppose, for the sake of argument, that the Secretary is correct in his estimate. We are turning a million dollars back into the Treasury every year that is derived from the head tax, and which is not required in the administration of the present law. Moreover, under the provisions of this bill, we have raised the head tax from $4 to $5,

which will give us an addition of $1,000,000 a year for this purpose.

But that is not the worst side of the Secretary's proposition. I do not know whether he knew the fact; if he did, he concealed it from the President. But in section 7 of the bill is a provision that every steamship company bringing to the United States a person who is unable to read in some language or dialect shall be fined $100 for so doing, and shall be compelled to take that person back to Europe free of charge. In view of that provision in the law, what additional work is to be laid upon his officials at the ports of entry of the United States? Years ago we applied that principle to steamship companies to prevent them from bringing those who suffered from contagious diseases; we have since extended the list until it covers almost every disease that can be discovered by a competent medical examination. What is the result?

In a single year the medical examinations given by steamship companies at the ports of embarkation prevented the embarkation of 40,000 intended immigrants. How was it done? The steamship companies employed at their own expense surgeons, who gave all intended immigrants the most thorough medical examination, knowing that if they permitted any immigrant to come who could not successfully meet the requirements of our law the company must take that person back to Europe and in addition pay the United States a fine of $100 for having brought such diseased person.

That medical examination abroad is an instrument for good to us that can not be measured. Under it the rejections at the German ports were so great as to alarm that Government. Intended immigrants from Russia, Austria, and Italy who came to take the German lines, who were rejected by the steamship surgeons, were so great in number that Germany became alarmed. To meet this danger Germany compelled the steamship companies to establish control stations all along the German frontier, and they compelled the examination to be had there, so that if the intended immigrant is rejected he will go back to his own country and not be left a public charge in Germany.

The result of our law has been such that in a period of 13 months preceding December 31, 1907, there were rejected at the ports of embarkation in Europe 27,799 intended immigrants and at the stations I have spoken of 11,882, making a total of 39,681, while we were rejecting at our ports only 13,000.

We have applied that same principle and the same obligation to the steamship companies in the case of immigrants who can not read, and it is in mercy to the immigrant as well as in justice to ourselves that we have done so. He needs no sympathy. He knows whether he can read before he starts. He may not know whether he is physically sound, but he does know whether he can read, and if he attempts to deceive it is the easiest thing in the world for those steamship companies to ascertain the fact whether he can read or not. If he can not read, the test is certain, and he will not present himself at our doors, and we do not need additional inspectors to enforce the provisions of this law.

Secretary Nagel advances another argument against the bill. He does not think that the reading test should be adopted until we have exhausted the possibilities of a rational distribution of this new immigration.

The Senator from Massachusetts [Mr. LODGE] and myself spent a great deal of time before the law of 1907 was adopted to frame and make just as strong as we could the provisions establishing a division of information, whose duty it is to promote a beneficial distribution of aliens admitted into the United States among the several States desiring immigration. If five years' trial has failed to induce our latest type of immigrants to seek the farms, what hope have we for the future?

The aliens will not go on farms. They do not come here for that purpose. You can not get them to leave those of their own nationality to lead a lonely life on a farm in an American family. They want to be with their own.

I have already called attention to the fact that before 1880 55⅞ per cent of the old immigration went to the North Central States and only 31⅛ per cent to the manufacturing States, and that in 1900, while only 29 per cent were going to the agricultural sections, 62 per cent, substantially, were coming to the manufacturing sections.

It appears also that between 1900 and 1910 there has been an actual decrease of 300,000 in the foreign-born races of the old classes resident in the United States, while there has been a net increase of the newer classes to the number of 3,200,000.

The census discloses another fact bearing upon this question. Down to 1890 the foreign born in the North Central States exceeded the foreign born in the Atlantic States, but in 1910 there were 2,000,000 more foreign born in the Atlantic division of States than there were in the Central and North Central States.

I do not think that I need to refer to the remarkable statement made by the Secretary as to the large number of agricultural laborers who came into this country last year. In my interruption of the Senator from Missouri [Mr. STONE] I called attention to the fact which I have already demonstrated, that the great body of them came to the Atlantic States and went to the seats of our great industries, and that it can not be demonstrated that any considerable number of them went to our farms.

Mr. President, it is not my disposition to criticize anybody unjustly, but it seems to me a strange thing that, when both branches of the Congress of the United States have passed this bill by a large majority, and when the RECORD shows that the literacy test was adopted in the Senate of the United States with only nine votes against it, the President of the United States should have interposed a veto based upon a letter from the head of one of his departments.

If Congress is to accept this veto as a finality, it is to say that the head of any one of the executive departments of the Government may determine what the laws of the United States shall provide, regardless of the opinion of the Congress of the United States upon the subject.

Mr. President, I have said all I care to on this subject. I hope I have made clear the grounds upon which the commission recommended this particular provision as a remedy for the evils which they have discovered.

Mr. LODGE obtained the floor.

Mr. THOMAS. I should like to make an inquiry of the Senator from Vermont.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). Does the Senator from Massachusetts yield to the Senator from Colorado?

Mr. LODGE. Certainly.

Mr. THOMAS. I have been greatly interested in this discussion and very much edified by it; but I should like to ask to what extent the commission ascertained that emigration from the southern and southwestern portion of Europe had been stimulated either by manufacturers or steamship companies, or by both.

Mr. LODGE. The southeastern portion?

Mr. THOMAS. And the southwestern, including Portugal.

Mr. LODGE. Oh, yes; Portugal.

Mr. DILLINGHAM. There was a large amount of evidence discovered in Europe when the commission was there, indicating that the agents of steamship companies in Europe were stationed in almost every country; that they were active and aggressive; that they held out inducements to men to emigrate; aided them all they could; advised them how to disregard the law successfully; and generally stimulated emigration from those countries to this. Then it is undoubtedly true that a great deal of the immigration to this country is stimulated by correspondence between friends and relatives. The conditions here are so much better than they are abroad that they are advised to come.

Mr. LODGE. Mr. President, the President in his message rests his objection to this bill upon the illiteracy test. He speaks of the rest of the bill and of the administrative features in high terms of praise, and expresses his reluctance to veto it on account of these other provisions.

Mr. President, attention has been so concentrated upon the illiteracy test that it is very easy to overlook the great importance of the rest of the bill, which would all be lost if the veto should be sustained. The administrative provisions represent the work of years; they embody the best conclusions of what the President calls a very "able commission," which devoted three years of hard work and careful investigation to this subject.

At the time of the last immigration act, in 1907, this same matter of an illiteracy test for admission was presented to Congress. It was then determined by the committees and by Congress that it was not wise to introduce the test into legislation without a special and further examination of conditions. A commission of nine members was appointed, three from the Senate, three from the House, and the Commissioner of Labor, Dr. Jenks, professor at Cornell, a very distinguished publicist and statistician, and Mr. Wheeler, afterwards Assistant Secretary of Commerce and Labor. That commission worked for three years; it employed experts through all parts of the country to examine every phase of immigration and the condition of the immigrant population; it sent a subcommittee abroad to investigate conditions at all the sources of immigration. The commission made a report of great value which fills 40 volumes, giving all the statistics and all the facts.

I mention this, Mr. President, because I wish to bring home to the Senate the fact that this bill represents the work of a

commission created by Congress and the President for the sole purpose of considering the advisability of imposing the illiteracy test or some other form of restriction. After the investigation was concluded the commission was unanimous that the condition of labor in our basic industries demanded restriction, and eight members of the nine agreed that the best form of restriction was the illiteracy test.

These administrative provisions represent also, Mr. President, the best opinion of the commissioners of immigration at our various ports, of the Commissioner General, and of the department. The administrative provisions, indeed, were very largely prepared in the department. All methods of administration are improved by this bill, but it contains additions and amendments to the existing law in certain respects which are of vital importance and to which very briefly I would fain call the attention of the Senate.

One of the great abuses of the immigration laws has been that there were no provisions in regard to seamen and stowaways. Immigrants excluded for physical defects or for disease were in the habit of getting employment on some steamship for a single voyage. Then, when they reached New York or some other port, they left the ship, and came in over the wharf without any examination whatever. The number of immigrants who have come in in that way in disregard of the laws of the United States has reached, it is estimated, 15,000.

Mr. President, this bill makes suitable provision for the case of seamen and stowaways. The laws excluding criminals have also been strengthened. There has, of course, long been on our statute books a provision for the exclusion of the insane, but it has been found very inadequate, and it has long been apparent that the examination of such cases made by the Government was insufficient.

That the Senate may realize how serious this matter is, they should understand that in the State of New York alone 47 per cent of the patients in the insane asylums in that State are of foreign birth, not of foreign parentage, but of foreign birth. They have come in as immigrant aliens. I think I am not wrong in saying that there are some 30,000——

Mr. ROOT. Thirty-five thousand.

Mr. LODGE. Thirty-five thousand persons in the insane asylums of the State of New York, and 47 per cent are immigrant aliens. By this bill the law in regard to insanity has been greatly improved. Provision has been made for a better and more thorough examination. All the health officers, all the experts in the different States charged with the care of the insane have advocated the passage of this bill and urged its signature upon the President.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Massachusetts yield to the Senator from Missouri?

Mr. LODGE. I do.

Mr. STONE. I should like to inquire how, in the opinion of the Senator from Massachusetts, did it ever happen that 47 per cent of the insane in the asylums in New York were immigrants? How did they get in?

Mr. LODGE. They got in because they were people who passed the examination in that respect; it was not discovered that they were insane. For that reason the provisions for examination have been improved. Now, Mr. President, here is another thing.

Mr. TOWNSEND. Before the Senator leaves that point, can he inform the Senate as to what proportion of that 47 per cent can read or write?

Mr. LODGE. Mr. President, I am not now discussing the illiteracy test; I am pointing out the other valuable features of the bill. I am coming to the illiteracy test immediately. Of course, insanity has nothing to do with the illiteracy test.

Tuberculosis is excluded under existing law. It was found, however, that many cases of tuberculosis have come in because the examination has been confined to that which appears in the lungs. We have added the words "in any form." Thousands of dollars are being spent by private subscription, by private munificence, and by the States to crush out so far as possible the ravages of that dread disease. And yet that simple change has been opposed by many of the very men who are disturbed about the illiteracy test. Much of the opposition to this bill has been to even such a salutary proposition as to add the words "in any form" after "tuberculosis."

We have also put into the bill a provision excluding all persons who can not become eligible for naturalization unless it is otherwise provided by treaties, conventions, or passport arrangements. Mr. President, the meaning of that is very plain. If for any reason treaties, conventions, and passport arrangements should not protect us in that regard, if for any reason they should fail, then this law would come into operation and Asiatic immigration would be excluded from this country. That is one of the most important and far-reaching provisions in the bill. It will be lost if the bill is lost.

We have also provided for the better care of immigrants on ships, so that they may come here under the best conditions and arrive in as good health as it is possible to secure. All these great improvements, agreed on substantially by all who have given attention to the subject, will be lost if the bill fails to become a law, and months, perhaps years, will elapse before we can get these provisions, framed with care and patience, after years of investigation, upon the statute books.

Mr. President, the sole objection of the President, as I have already said, is to the illiteracy test, and for his reasons he refers us to the letter of the Secretary of Commerce and Labor addressed to him. With all respect, I must say that no argument advanced on that point by the Secretary of Commerce and Labor is new. He speaks of this test in the close of his letter as new. It is not new, and the objections which he brings forward are in fact very old. They have been made; they have been discussed; they have been debated for years; they have been passed upon by Congress; they have been weighed and carefully considered.

Why, Mr. President, a bill containing the illiteracy test has passed the Senate in past years three times. I merely call attention to that fact to show that it is not new. Some of us have given attention to the study of this question for a much longer period than four years. Not only long before the present Secretary became the head of the Department of Commerce and Labor, but before that department was established, before it was even thought of, some of us had considered very carefully the illiteracy test as a method of intelligent restriction. If it could be said that this was a case of the wisdom of youth as opposed to the prejudices of age and experience, of course to that argument I could make no reply; but as the Secretary of Commerce and Labor has the misfortune to be nearly a year older than I am, that fatal argument can not be made of the superior knowledge of the young.

I repeat, sir, this is no new question to many of us. I began my work upon it when we had only just got beyond the point of making some little restriction against the diseased and the criminal, and had levied a small head tax for the maintenance of the service. Even those provisions were objected to at the start. It was argued that it was an outrage to levy a tax for the maintenance of the service and that no diseased person ought to be kept out of the country unless he actually had the cholera or the smallpox, which would send him to quarantine. The same arguments were made in those days against these provisions, the wisdom of which everyone to-day acknowledges, which are now made against the illiteracy test.

To illustrate the fact that this is no new question, I hold in my hand, Mr. President, a speech that I made on February 19, 1891, in the House of Representatives, in which I discussed the change in the character of our immigration which has just been set forth by the Senator from Vermont [Mr. DILLINGHAM]. I then called attention to the fact, which all men know, that this country was settled and built up by the people from Great Britain and Ireland, from Scandinavia, from Holland, from Germany, and from France. They were the people who made the American colonies; they created the country which has opened its gates so freely to the poor and oppressed of all nations. I pointed out that immigration was then, as it is now, coming into this country from eastern and southeastern Europe which had never been assimilated or brought seriously into contact with the people who had made the United States; that these new immigrants were the offspring of a different civilization, the civilization of Greece and Asia, as against the civilization of Rome, to which western Europe was the heir. I then said that the admission of these new elements demanded thought and care; that we ought not to run the risk of taking in these new elements faster than they could be properly assimilated with the body politic.

Again, in 1896 in the Senate, nearly 20 years ago, Mr. President, I discussed with great fullness this question of the illiteracy test. I think I then considered all the objections now brought against it. Whether I met them successfully or not, I certainly knew of them and considered them. I am not going to rehearse an old and forgotten speech to the Senate, but I will repeat a few lines of verse which I then quoted and which were printed on the outside of the pamphlet copy. The imagination of the poet, Mr. President, sometimes penetrates farther into the future and sees the central fact in a great question more clearly than the minds of even the ablest men of affairs. These lines were written by one of the men who has been an honor to American letters, by a poet much beloved

of all his fellow citizens—Thomas Bailey Aldrich. This is what I placed on the outside of the speech I made at that time:

O Liberty, white Goddess, is it well
To leave the gates unguarded? On thy breast
Fold Sorrow's children, soothe the hurts of fate,
Lift the down-trodden, but with hand of steel
Stay those who to thy sacred portals come
To waste the gifts of freedom. Have a care
Lest from thy brow the clustered stars be torn
And trampled in the dust. For so of old
The thronging Goth and Vandal trampled Rome,
And where the temples of the Cæsars stood
The lean wolf unmolested made her lair.

I mention this, Mr. President, merely to prove that some of us have given long and patient thought to this question, with no desire to discriminate against any race or any nation, but with an earnest wish to render the immigration to this country as valuable as possible, and at the same time as little harmful as possible.

Objections can be made to this legislation as they can be made to any other form of restriction or selection. All other forms have been carefully examined, but this is the best practicable form of selection and restriction which it has been possible to devise after 20 years of careful consideration. It has been proved over and over again, and beyond question by successive investigations, that the illiteracy test would exclude more who are undesirable and fewer who are desirable immigrants than any other. It has been shown over and over again that the illiterates form a very large proportion of those immigrants who are congested in the worst parts of our great Eastern cities.

The objection is constantly made that the illiteracy test would not exclude criminals or anarchists, because criminals and anarchists usually read and write. It seems to me that no objection more inept than this can be made. The purpose of the illiteracy test is not to exclude criminals; the exclusion of the criminal is provided for by other sections of the existing law, which have been improved and amended in this bill. Nevertheless, Mr. President, although it is not the purpose of the illiteracy test to exclude criminals, although it is not framed with that object in view, we have statistics to show that a very large proportion of those aliens who find themselves in the criminal courts are illiterate. The census of 1890 and the census of 1900 show that 21 per cent of the alien criminals are illiterates. I have here, however, something much more recent—a letter from the prosecuting officer of Somerset County, N. J., Frederick A. Pope, prosecutor of pleas, Somerset County, N. J., in which he says:

My duties as prosecuting attorney of Somerset County, N. J., have given me an excellent opportunity to check up in one important particular the investigations and conclusions of the Immigration Commission with reference to the illiteracy test. During the last two years I have kept a careful record of the last 114 criminal cases that I have prosecuted against aliens—

Of course, those are statistics relating only to alien criminals; they do not deal with the native born—

with the following interesting results:

	Illiterate.	Literate.
Homicide	3	
Atrocious assault and battery	34	6
Simple assault and battery	9	2
Larceny	14	2
Sexual crime	7	1
Perjury	2	1
Excise	11	5
Marriage	3	1
Frauds	2	4
Miscellaneous	6	1
Total	91	23

The following conclusions are deducible from the above:

(1) Of the 114 crimes committed by aliens 54 were acts of personal violence; and of these 54, 46 were committed by illiterates, while only 8 were chargeable to those able to read and write.

(2) Of the 46 committed by illiterates, 3 were homicides, 34 were atrocious assaults (by maiming and wounding with a deadly weapon), and only 9 were simple assaults, showing conclusively that the illiterate alien 37 times out of 46 makes use of a deadly weapon in order to avenge his wrongs, fancied or real.

(3) Out of 16 cases of larceny (stealing of all kinds), 14 defendants were illiterate.

(4) Out of 8 sexual crimes, 7 were committed by illiterates, 3 of these being carnal abuse of infants under 10 years of age.

(5) Out of 3 perjury cases, 2 were against illiterates; that is, of those brought to justice.

(6) Out of 16 cases for violation of excise laws, 11 were illiterates, showing an utter disregard for laws.

(7) Of the 4 crimes against the institution of marriage, 3 were illiterates.

(8) Only in cases of fraud did the literate exceed the illiterate.

I am, Mr. President, sincerely yours,

FREDERICK A. POPE,
Prosecutor of Pleas, Somerset County, N. J.

Now, last and most important of all, is the fact which was proven by the investigations of the commission, and which the Senator from Vermont has set before the Senate with such force and clearness, that the presence of illiterates in the basic industries is lowering the standard of living for American labor. I have here a copy of the letter addressed to the President by Dr. Jenks, of the Immigration Commission, who had charge of many of these investigations, which I shall read. He says:

FEBRUARY 8, 1913.

MY DEAR MR. PRESIDENT: I have noted in the papers that you have before you for consideration the new immigration bill, and that February 6 you gave a hearing on the bill. As a former member of the Immigration Commission, who gave a great deal of time to the consideration of the subject, I trust that I may express an opinion regarding the bill. The fundamental reason why there should be at the present time a rather widely extended restriction of immigration is the fact that *the number of unskilled workers coming in at the present time is sufficient to check decidedly the normal tendency toward an improved standard of living in many lines of industry.*

Of course I am well aware of the fact that Mr. Hourwich in his new book, as often before, and many others claim that the bringing in of these laborers simply fills the demand for unskilled workmen and that the American laborers and the earlier immigrants go to higher positions. That was doubtless true earlier; that is doubtless true in part now, but the figures collected by the Immigration Commission, on a sufficient number of industries in different sections of the country to give general conclusions, *prove beyond doubt that in a good many cases these incoming immigrants actually drive out into other localities and into other unskilled trades large numbers of American workingmen and workingmen of the earlier immigration who do not get better positions, but, rather, worse ones.* My own judgment and that of a number of our investigators when the work of the Immigration Commission began was substantially that upheld now by Mr. Hourwich and those who agree with him. But Prof. Lauck, our chief superintendent of investigators in the field, and, so far as I am aware, *every single investigator in the field, before the work ended reached the conclusion from personal observation that the tendency of the large percentage of immigration of unskilled workers is clearly to lower the standard of living in a number of industries, and the statistics of the commission support this impression.* I therefore changed my earlier views.

I think the illiteracy test is theoretically sound. It is, of course, true that it does not reach the criminal. It is not intended for that purpose. It is also true that at times it excludes the good laborers. The fundamental fact, however, is this—that on the whole it excluded the laborers from southern Italy and Austria-Hungary of the type *that the commission unanimously thought ought to be excluded at the present time*, especially the single man who comes here to stay only temporarily and who, in consequence, having no permanent interest in the country, eagerly accepts living conditions lower than those which would be accepted by Americans or the earlier immigrants. It should be kept in mind that the *Immigration Commission was absolutely unanimous in the opinion that there should be restriction;* also unanimous in the further opinion that this class of immigrants whom I have mentioned were the ones who should be excluded, *and the illiteracy test would exclude just this class.*

Mr. Bennet objected to the illiteracy test and wished to reach the same result by other means, and I should have agreed with him, as I think would Dr. Neill and perhaps other members of the commission, had we believed that it was practicable to reach that result in any other way. Considering the temper of Congress and the other measures proposed, *the illiteracy test seemed the only practical way.* The present action of Congress seems to confirm that view.

I notice in yesterday's morning paper that Mr. Bennet suggested that, inasmuch as this bill is faulty in certain minor particulars, it would be wise for you to veto it and let the incoming Congress pass another bill to the same effect if it wishes to do so. It strikes me that the argument should rather be that if this bill is in its main principle of exclusion sound, and on that point Mr. Bennet agreed with all the other members of the commission, Republicans and Democrats, it would be wise for you to sign the bill and let the incoming Congress make such minor changes in the laws as it might see fit to make.

I trust that *since this bill is in the main in accord* with the unanimous opinion of the Immigration Commission, *the one body of men that has really made a thoroughly sound, scientific study of the question,* you will see your way clear to giving it your approval, even though it may have minor defects.

Very respectfully and sincerely, yours,

JEREMIAH W. JENKS.

The PRESIDENT,
Executive Mansion, Washington, D. C.

In that conclusion, as Dr. Jenks says, the entire commission agreed; in fact, there was no escape from it. It is not a question of what wages they earn, although in many cases they accept very low wages, but whether their wages are good or bad they voluntarily live in a manner which lowers the standard of living of the American wage earner. Wherever the investigation was pursued, whether in Lawrence, Mass., or in the mines of Pennsylvania or elsewhere, the same facts come to the surface. That is the reason, Mr. President, that the American Federation of Labor, with its more than 2,000,000 members, has, through its national officers, given its cordial support to this bill. No better arguments than theirs were made before the commission. The best argument made at the general meeting at the White House was that of the secretary of the Federation, and the president of the Federation presented the case at great length to the President in more than one interview.

The outside opposition in the couniry to this test, now active in the dispatch of telegrams, is, at bottom, the same opposition that is made to every effort to improve our immigration laws or to restrict in any degree the number of immigrants. It comes from the steamship companies. For 25 years we have met that opposition at every turn. It is here to-day. The representatives of the companies are here in Washing-

ton. The counsel of one company has been with both committees, has pervaded the Capitol, has been present at the hearings which the President gave the conferees and also to the commissioner of immigration from New York. It is they who furnish the funds for the agitation, who fill the newspapers with advertisements, especially the newspapers published in foreign languages. I do not know why it is, but while great resentment is felt toward any representatives of American railroads or American manufacturers who come here in behalf of their interests, none is apparently ever felt toward those who come in behalf of foreign steamships. These companies are particularly interested in this matter, because the illiteracy test would bear more hardly on the birds of passage, as they are called, than on any others. One source of opposition to this bill has been from the railroads of the Southwest, who want to bring in citizens of that nation which is just now exhibiting such marked capacity for self-government to work on their roads. Even under existing law there has been great indignation at what has been done in that direction as violating our contract-labor laws. They tell us in excuse that these men are only seasonal laborers. Mr. President, the seasonal laborers are the worst element that are allowed to come in. In many branches of immigration 30 per cent go back, thus making a double profit to the steamship companies.

I put it at 30 per cent, but the Secretary of Commerce and Labor puts it higher. He says:

> During the last fiscal year 838,172 aliens came to our shores—

The figures, as I get them from the official reports, are that 1,017,155 came. Nonimmigrants and immigrants, of course, are all included in the word "aliens." Then the Secretary says:

> Although the net immigration of the year was only a trifle above 400,000.

He makes the number who returned nearly 50 per cent. These birds of passage do not come here, as the men of '48 came in the great immigration of that period, to make their homes, build up the country, and become part of our citizenship. They come here simply to take money out of the country. They come for the summer; they go back in the autumn. They live in a way which no American workman could endure, and then in the autumn gather up the money they have made here and go away, taking it back to their own country. They are an injury to the country, not a help, and on that class the illiteracy test would be particularly effective.

In the short time permitted to me I can not argue this question as it deserves to be argued. It has been argued so much that it should need no more argument. But, Mr. President, I fail to understand, for my part, why it is that the United States alone among nations is not thought to have the right that all nations have to say who shall come within its borders. It is the only country in the world where it is argued that people born in other countries who have never seen the United States are entitled to certain rights therein. It is for the citizens of the United States to say who shall come into their country. That is a primary right of every sovereign nation. Still less do I understand this extreme opposition to requiring that a man shall be able to read before he enters the United States. We do not allow a man to become a part of our body politic unless he can read and write his name. In my State for 60 years—and in many, if not most, of the States of the Union to-day—there is an illiteracy test applied as a prerequisite for voting. We do not hesitate to apply it to our own people. We force them to learn to read, no matter what their age, before they can vote or be naturalized. Why is it that we should hesitate to apply the same test to a foreigner who is coming here to receive the great privilege of living and working in this country and perhaps of becoming a citizen?

Mr. President, the belief in education in this country is one of our great beliefs. Why should we, in the case of foreigners alone, set a premium on ignorance? The rates of wages, the standards of living for the American workman, are affected now by this cry for more and cheap labor. It is better to go a little more slowly in the development of this country, in piling up fortunes, and see to it that we assimilate our citizenship as we go along. The rates of wages are affected. That is why we have excluded the Chinese, and also because they lower the standard of living; but most of all, Mr. President, under present conditions is the quality of American citizenship at stake. Congress, by an overwhelming majority, has decided that this is a reasonable defense of the quality of American citizenship, and I for one, Mr. President, hope that this body and the other House will place this bill upon the statute books.

Mr. WILLIAMS. Mr. President, I want to add one word only to what has been said. This morning, in one of the arguments made by one of the Senators against the literacy test, he either charged or intimated that it was being advocated because of a "prejudice against foreigners." I want to say that, so far as I am concerned, that charge falls hurtless. I have no sort of prejudice against foreigners. I am, upon the contrary, of the absolute conviction that a German or a Frenchman is as good as I am, or as any other American is, in every respect. I believe that within certain broad race lines human nature is the same everywhere. The white man's human nature is the same on the Mississippi, on the Hudson, on the Seine, on the Tiber, and on the Thames. The Chinaman's human nature is the same in Hongkong, Nanking, San Francisco, and New York. Negro human nature is about the same in Mississippi, in Cape Colony, in Senegambia, and in New York. The prejudice that I have is not a prejudice against foreigners; it is a prejudice against ignorance, and I do not care whether the ignorance is foreign or native.

Mr. President, I am not peculiarly a coward; but there is one thing that I am afraid of—I am as much afraid of ignorance as a delicate woman is of a drunken man staggering upon a narrow sidewalk. She knows that he has no fixed design to hurt her, but he may stagger against her; moreover, he may ignorantly imagine that she has struck him and resent it in blows. I am afraid of the man, whether foreign or native, who gropes about blindly, striking blindly against the wrongs that exist in the world without any information to teach him how or whither to strike. We have got enough of that ignorant resentfulness at home; we do not want to import any more of it from abroad. My advocacy of the literacy test is not based upon animosity and antagonism or prejudice against foreigners or any class of foreigners, but is grounded upon an absolute distrust and fear of, as well as an absolute antagonism to, ignorance itself—blind, groping, brutally striking, crass ignorance—whether it is here or whether it is imported from abroad; and there is no reason why, as legislators of a free American country, we should submit further to its importation.

A very great man once said that no nation can ever hope to live free and ignorant at the same time. You can not only not hope to live free and ignorant at the same time, but you can not hope to live largely free and largely ignorant at the same time. Intelligence, somehow or other, will rule, and must rule; but it is better that it should rule by a majority vote of intelligence, thus maintaining the symmetry of democratic and republican institutions. If it can not rule in any lawful way, it will and must rule, anyhow, even though the majority be a majority of ignorance.

I see no reason why any man who loves American institutions should want anybody added to its citizenship or to its residency hoping for citizenship, who is unable to read the Constitution of the country to which he comes. Why, even men are dangerous whom a little learning makes dangerous things, and who have not drunk deep of the Pierian spring. Men who can read and write, but can not read the Constitution and understand the institutions of the country to which they come are dangerous. How much more dangerous must be the men who can not read anything? They come here having "clean minds," it is said; oh, yes; but they are too clean; they are as clean as a blackboard that has been newly rubbed off. It is tabula rasa, and any demagogue and any scoundrel can write anything on it that he is cunning enough to suggest and able enough to impress, and controls and expresses all that there is on it.

The PRESIDENT pro tempore. In accordance with the unanimous-consent agreement, the vote will now be taken. The question is——

Mr. O'GORMAN. Mr. President, before taking the vote I ask the Secretary to read the telegram which I send to the desk.

The PRESIDENT pro tempore. Without objection, the telegram will be read.

The Secretary read as follows:

NEW YORK, *February 18, 1913.*

Senator O'GORMAN,
Capitol, Washington, D. C.:

The Order of the Sons of Italy in America, in the name of its 30,000 members, protests against the passage of the Burnett bill as unnecessarily oppressive and against the interests of the Union. Please to communicate this protest to the Senate.

FRANCIS MEZZATESTA,
Supreme Venerable of the Order.

Mr. JOHNSTON of Alabama. I ask that the telegram which I send to the desk be read.

The PRESIDENT pro tempore. The Senator from Alabama asks unanimous consent for the reading of a telegram. Without objection, the Secretary will read.

The Secretary read as follows:

DECATUR, ALA., *February 18, 1913.*

Senator JOHNSTON,
Washington, D. C.:

The thousands of Junior Order United American Mechanics of Alabama urge on you to cast your vote against Taft's veto on immigration.

WALTER J. NESBIT,
Past National Representative.

Mr. FALL. I ask that the letter and telegram which I send to the desk be read.

The PRESIDENT pro tempore. Without objection, the letter and telegram submitted by the Senator from New Mexico will be read.

The Secretary read as follows:

ROGERS, ARK., *February 14, 1913.*

R. F. DUCKWORTH,
National Hotel, Washington, D. C.:

Call attention of Senators and Congressmen to farmers' desire to have immigration bill on statute books, even over President's veto.

A. C. DAVIS,
National Secretary Farmers' Educational and Cooperative Union of America.

FARMERS' EDUCATIONAL AND COOPERATIVE UNION OF AMERICA,
Washington, D. C., February 14, 1913.

MY DEAR SENATOR: I beg to call your attention to the inclosed copy of a telegram signed by the national secretary of the above organization with reference to S. 3175.

The extensive membership of the above organization, as well as that of the National Grange and Farmers' National Congress, have been petitioning for the very legislation contained in S. 3175, and their legislative committees have appeared before congressional committees arguing for it annually with increasing interest.

The President in his 12-line veto message states that it is "with great reluctance" that he withholds his signature, and his only difficulty is the reading test recommended by eight or nine distinguished members of the Immigration Commission, after its searching four years' investigation, "as the most feasible single method of restricting undesirable immigration."

The farmers of the country believe we have enough illiteracy without importing any to further increase taxation burdens, and are strongly of the opinion arrived at by the commission that something ought to be done to better regulate our present enormous immigration along the lines of S. 3175. The fact that there were only 11,649 "farmers" in last year's immigration of 1,017,155 (Annual Report, p. 73) and that we lost to Canada alone over 130,000 better farmers shows that something ought to be done to bring about a better balance in immigration.

Certainly a rudimentary education better fits for the struggle for existence and for participation in our public affairs. It must be true that 1,000,000 literates are more desirable on the average than 1,000,000 illiterates.

Trusting that you may be interested in our attitude, which is contained in Senate Document No. 251 of this Congress, as well as the House committee hearings, and that you may be disposed to see this bill that was passed so decisively by the Senate last April, after three months' consideration, become a law this session, I am, with the highest esteem,

Very truly, yours, R. F. DUCKWORTH,
Chairman National Legislative Committee.

Mr. WEBB. I send to the desk a telegram, which I ask to have read.

The Secretary read as follows:

NASHVILLE, TENN., *February 18, 1913.*

Senator WILLIAM R. WEBB,
Washington, D. C.:

Thousands of Tennessee's best citizens will gratefully remember it you pass the immigration bill over Taft's veto.

JOHN W. HANCOCK.

Mr. MARTINE of New Jersey. Mr. President——

SEVERAL SENATORS. Regular order!

The PRESIDENT pro tempore. The regular order having been demanded, the question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding? As the Constitution requires that this vote shall be taken by yeas and nays, the roll will be called.

Mr. O'GORMAN. Mr. President, I ask unanimous consent to have read the telegrams tendered by the Senator from New Jersey.

Mr. OLIVER. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The regular order having been demanded, it can not be entertained, and the roll will be called.

The Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. I am informed that he is for this bill, and desires that I shall vote, and I will do so. I vote "yea."

The roll call having been concluded, the result was announced—yeas 72, nays 18, as follows:

YEAS—72.

Ashurst	Cullom	La Follette	Richardson
Bacon	Cummins	Lea	Root
Bankhead	Dillingham	Lippitt	Sheppard
Borah	Dixon	Lodge	Simmons
Bourne	Fall	McLean	Smith, Ariz.
Bradley	Fletcher	Martin, Va.	Smith, Ga.
Brady	Foster	Myers	Smith, S. C.
Brandegee	Gallinger	Nelson	Smoot
Bristow	Gamble	Newlands	Sutherland
Brown	Gardner	Overman	Swanson
Bryan	Gore	Owen	Thomas
Burnham	Jackson	Page	Thornton
Burton	Johnson, Me.	Penrose	Tillman
Chamberlain	Johnston, Ala.	Percy	Townsend
Clark, Wyo.	Jones	Perkins	Webb
Crane	Kavanaugh	Pittman	Wetmore
Crawford	Kenyon	Poindexter	Williams
Culberson	Kern	Pomerene	Works

NAYS—18.

Catron	Gronna	Oliver	Stephenson
Clapp	Guggenheim	Paynter	Stone
Clarke, Ark.	McCumber	Shively	Warren
Curtis	Martine, N. J.	Smith, Md.	
du Pont	O'Gorman	Smith, Mich.	

NOT VOTING—5.

Briggs	Hitchcock	Reed	Watson
Chilton			

The PRESIDENT pro tempore. The bill is passed, more than two-thirds of the Senators present having voted in the affirmative. [Manifestations of applause in the galleries.] The Chair will admonish the occupants of the galleries that no demonstrations are allowed on their part.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented a petition from sundry residents of Porto Rico and representatives of commercial and industrial enterprises located in the city of San Juan, P. R., praying for the enactment of legislation limiting the jurisdiction of the United States District Court for Porto Rico, and also providing for an increase in the salary of the judge thereof, which was referred to the Committee on the Judiciary.

Mr. PERKINS. I present resolutions adopted by the Legislature of the State of California, which I ask may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the resolutions were referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

The following resolution was offered by Mr. Guiberson:

"Whereas a bill has been introduced in the Senate of the United States by Hon. FRANCIS G. NEWLANDS, of Nevada, which, according to its title, proposes 'to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies'; and

"Whereas it has been proposed by the leading supporters of said bill that it be amended so as to provide for an appropriation of $5,000,000 annually for 10 years for the control of the Sacramento and San Joaquin Rivers and their tributaries and for a like appropriation for the control of the Colorado River; and

"Whereas this legislature is in hearty accord with the principles embodied in said bill and believes that the money proposed to be expended under it and the cooperation provided for in it will promote the general welfare; and

"Whereas the vastness and variety of the interests that will be benefited by the expenditures contemplated in the proposed amendments fully justify such participation by the National Government in the work of making the navigable streams of California as useful as possible to the public: Therefore be it

"*Resolved by the Assembly of the State of California*, That the Congress of the United States be, and both branches of said body hereby are, requested to pass said bill, with the amendments aforesaid, and that the Representatives of California in the Senate and the House of Representatives be requested to use their best efforts to that end; and be it further

"*Resolved*, That the chief clerk of the assembly be, and he hereby is, directed to send a copy of this resolution to each Senator and Representative in Congress from this State, to Hon. FRANCIS G. NEWLANDS, to the Vice President of the United States, and to the Speaker of the House of Representatives."

Adopted this 4th day of February, 1913.

L. B. MALLORET, *Chief Clerk.*

Mr. PERKINS presented a memorial of sundry citizens of California, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. CULLOM presented petitions of sundry citizens of Westville, Chicago, Elgin, Danville, Peru, Moline, Springfield, Rockford, and Peoria, and of the editor of the Daily Jewish Courier, of Chicago, all in the State of Illinois; of the publishers of the North Star, of New York, N. Y.; of members of the Polish National Alliance of America; and of the Polish Alma Mater of America, praying that Congress sustain the President's veto of the immigration bill, which were ordered to lie on the table.

He also presented petitions of John A. Logan, Jr., Camp, No. 17, of Danville; Robert M. Dyer Camp, No. 20, of Aurora; Schley Naval Camp, No. 58, of Chicago; and of Lincoln Home Camp, No. 64, of Springfield, Department of Illinois, United Spanish War Veterans, all in the State of Illinois, praying for the enactment of legislation granting pensions to widows and orphans of soldiers of the Spanish-American War, which were referred to the Committee on Pensions.

He also presented a petition of members of Rochelle Chapter, Daughters of the American Revolution, of Rochelle, Ill., praying for the enactment of legislation to prevent the desecration of the American flag, which was referred to the Committee on the Judiciary.

He also presented a petition of the Manufacturers' Association of Illinois, praying for the establishment of a court of

patent appeals, which was referred to the Committee on Patents.

He also presented a resolution adopted by the Manufacturers' Association of Illinois, favoring the establishment of a tariff commission, which was referred to the Committee on Finance.

He also presented resolutions adopted by the Manufacturers' Association of Illinois, favoring the creation of a national drainage commission, which were referred to the Committee on Irrigation and Reclamation of Arid Lands.

He also presented a petition of sundry citizens of Elgin, Ill., praying for the enactment of legislation to increase the compensation allowed railroads for carrying the mails, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of New Canton, New Boston, Peoria, Pleasant Hill, Monmouth, Rockfort, Biggsville, Oquawka, and Jacksonville, all in the State of Illinois, and of sundry citizens of Hannibal, Mo., praying for the enactment of legislation extending the jurisdiction of the Mississippi River Commission as far north as Rock Island, Ill., which were ordered to lie on the table.

Mr. ASHURST presented a resolution passed by the Chamber of Commerce of Prescott, Ariz., favoring the adoption of a national budget system tending to provide better business methods for operating the finances of the Government, which was referred to the Committee on Finance.

He also presented a petition of sundry citizens of Glendale, Ariz., praying for the enactment of legislation restoring to the public domain a certain part of the Gila River Indian Reservation embraced in township 2 south, ranges 3 and 4, and sections 1 to 12, both inclusive, etc., which was referred to the Committee on Public Lands.

Mr. NELSON presented a petition of sundry citizens of Pipestone, Minn., praying that an appropriation of $60,000 be made for the erection of a post-office building in that city, which was referred to the Committee on Public Buildings and Grounds.

He also presented memorials of the congregations of the Seventh-day Adventist Churches of Pipestone, Bath, and Staples, all in the State of Minnesota, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

He also presented a petition of members of the Dakota County Good Roads Association, of Minnesota, praying that an appropriation be made for the construction of good roads throughout the country, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of members of the General Federation of Women's Clubs, of Crookston, Minn., remonstrating against the transfer of the control of the national forests to the several States, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. BRISTOW presented memorials of sundry citizens of Kincaid, Lebo, and Logan, all in the State of Kansas, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. WARREN presented a memorial of sundry citizens of Buffalo, Wyo., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. JONES presented a memorial of sundry citizens of Seattle, Wash., remonstrating against the enactment of legislation providing for the parole of Federal life prisoners, which was ordered to lie on the table.

He also presented a petition of members of the Woman's Wilson and Marshall Club, of Seattle, Wash., praying for the recognition by the United States of the Republic of China, which was referred to the Committee on Foreign Relations.

Mr. POMERENE. I present a joint resolution passed by the Legislature of the State of Ohio, which I ask may be printed in the RECORD and be referred to the Committee on Agriculture and Forestry.

There being no objection, the joint resolution was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

Senate joint resolution 9, requesting Senators and Representatives from Ohio in the National Congress to urge the enactment of a Federal law regulating the exportation of food products.

Resolved by the General Assembly of the State of Ohio, That the Senators and Representatives of Ohio in the Congress of the United States be, and they are hereby, requested to urge the enactment of a Federal law permitting the exportation of meat and all other necessary food products only during such periods when same are selling at reasonable prices in this country, and prohibiting the exportation of such food products before the average retail price of same becomes so high as to be out of proportion to the average wages of the working people of this country.

Be it further resolved, That the secretary of the State of Ohio transmit, immediately upon the passage of this resolution, a copy thereof to each of the Senators and Representatives from Ohio in the Congress of the United States.

C. L. SWAIN,
Speaker of the House of Representatives.
HUGH L. NICHOLS,
President of the Senate.

Adopted January 22, 1913.

Mr. OWEN. I present a resolution adopted by the Legislature of the State of Oklahoma, which I ask may be printed in the RECORD and be referred to the Committee on the Judiciary.

There being no objection, the resolution was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

House resolution 16.

Whereas the Supreme Court of the United States has nullified the passage of an act by the lawmaking power of the State of Texas that no contract made with an individual in the State of Texas was binding on said individual or corporation providing for the sale of articles or merchandise manufactured or controlled by a trust, it being held that the exercise of this power by a State was an interference with an interstate commerce: Be it

Resolved, First, that it is the sense of the Legislature of the State of Oklahoma, and we hereby memorialize the Congress of the United States, that that body passed an act at this session of Congress to regulate trusts in the following manner, to wit: (a) First. That it be provided in said act that any contract or obligation made with any individual or corporation or association in reference to the sale, barter, or handling in any manner whatsoever of any product controlled or manufactured or bartered or sold by any trust or any corporation or individual belonging to or associated with in any manner whatsoever in carrying on his business with a trust, shall be void; and that it shall be a complete defense to the payment exacted for any article or merchandise, or any product of any trust so controlled, manufactured, or sold to plead as a defense to the payment of said obligation in any court of competent jurisdiction in any State of the United States as matter of fact that said subject matter of said contract was contracted for and with such corporation, individual, association, or trust.

Second. That Congress authorize in said act that State courts have concurrent jurisdiction with the district Federal trial courts of the United States.

Adopted by the house of representatives February 3, 1913.

I hereby certify that this is a true and correct copy of the above and foregoing resolution.

GUS POOL, *Chief Clerk.*

Mr. MYERS. I present a joint resolution passed by the Legislature of the State of Montana, which I ask may be printed in the RECORD and be referred to the Committee on the Judiciary.

There being no objection, the resolution was referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

House joint resolution 2.

A joint resolution ratifying an amendment to the Constitution providing that Senators shall be elected by the people of the several States.

Whereas both Houses of the Sixty-second Congress of the United States of America, at its second session, by a constitutional majority of two-thirds thereof, made the following proposition to amend the Constitution of the United States of America in the following words, to wit:

"Joint resolution proposing an amendment to the Constitution providing that Senators shall be elected by the people of the several States.

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That in lieu of the first paragraph of section 3 of Article I of the Constitution of the United States, and in lieu of so much of paragraph 2 of the same section as relates to the filling of vacancies, the following be proposed as an amendment to the Constitution, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the States:

"The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

"When vacancies happen in the representation of any State in the Senate the executive authority of each State shall issue writs of election to fill such vacancies: *Provided*, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

"This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution."

Therefore be it

Resolved by the Senate and House of Representatives of the State of Montana, That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the Legislative Assembly of the State of Montana: And further be it

Resolved, That certified copies of this joint resolution be forwarded by the governor of this State to the Secretary of State at Washington and to the presiding officers of each House of the National Congress.

A. D. MACDONALD,
Speaker of the House.
W. W. MCDOWELL,
President of the Senate.

Approved, February 7, 1913.

S. V. STEWART,
Governor.

Filed February 7, 1913, at 3.20 o'clock p. m.

A. M. ALDERSON,
Secretary of State.

UNITED STATES OF AMERICA, *State of Montana, ss:*

I, A. M. Alderson, secretary of state of the State of Montana, do hereby certify that the above is a true and correct copy of house joint

resolution No. 2, ratifying an amendment to the Constitution providing that Senators shall be elected by the people of the several States, enacted by the Thirteenth Legislative Assembly of the State of Montana, and approved by S. V. Stewart, governor of said State, on the 7th day of February, 1913.

In testimony whereof I have hereunto set my hand and affixed the great seal of said State.

Done at the city of Helena, the capital of said State, this 7th day of February, A. D. 1913.

[SEAL.] A. M. ALDERSON,
Secretary of State.

Mr. BRADY. I present a joint memorial adopted by the Legislature of the State of Idaho, which I ask may be printed in the RECORD and be referred to the Committee on Public Lands.

There being no objection, the memorial was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

[Certificate of certified copy.]

STATE OF IDAHO, DEPARTMENT OF STATE.

I, Wilfred L. Gifford, secretary of state of the State of Idaho, do hereby certify that the annexed is a full, true, and complete transcript of house joint memorial No. 1, by Mason. Passed the house January 23, 1913; passed the senate January 31, 1913; which was filed in this office on the 5th day of February, A. D. 1913, and admitted to record.

In testimony whereof, I have hereunto set my hand and affixed the great seal of the State. Done at Boise City, the capital of Idaho, this 7th day of February, A. D. 1913, and of the independence of the United States of America the one hundred and thirty-seventh.

[SEAL.] WILFRED L. GIFFORD,
Secretary of State.

House joint memorial 1.

To the honorable the Senators and Representatives of the United States, in Congress assembled:

Your memorialists, the legislators of the State of Idaho, respectfully represent that—

Whereas a bill known as the three-year homestead bill was passed by the Senate of the National Congress on February 5, 1912, said bill being without any requirements as to the cultivation of homesteads; and

Whereas the said bill was afterwards amended in the National House of Representatives so as to require cultivation, and was finally approved on June 6, 1912; and

Whereas said cultivation clause works a hardship upon settlers who have taken up, or who will take up, homesteads in the timbered sections of the State of Idaho and in other Western States in that those settlers who are dependent upon their own resources and labor to maintain their families and to improve their homesteads can not comply with the provisions of said law;

We therefore pray and earnestly urge that relief be granted to these homesteaders by appropriate amendment so as to make the provisions of the said law applicable to the timbered sections of this and other Western States.

The secretary of state of the State of Idaho is hereby instructed to forward copies of this memorial to the Senate and House of Representatives of the United States, and copies of the same to our Senators and Representatives in Congress.

This memorial passed the house of representatives on the 23d day of January, 1913.

C. S. FRENCH,
Speaker of the House of Representatives.

This memorial passed the senate on the 31st day of January, 1913.

HERMAN H. TAYLOR,
President of the Senate.

I hereby certify that the within house joint memorial originated in the house of representatives during the twelfth session of the Legislature of the State of Idaho.

[SEAL.] DAVID BURRELL,
Chief Clerk of the House of Representatives.

Mr. WORKS presented resolutions adopted by the General Assembly of the State of California, favoring the passage of the so-called Newlands river-regulation bill with certain proposed amendments, which were referred to the Committee on Commerce.

Mr. CUMMINS. I present a number of telegrams from citizens of my State which I ask may be printed in the RECORD.

There being no objection, the telegrams were ordered to lie on the table and to be printed in the RECORD, as follows:

BURLINGTON, IOWA, *February 14, 1913.*

ALBERT B. CUMMINS,
The Wyoming Apartments, Washington, D. C.:

The Senate Committee on Commerce has cut out our levee item in the House bill. This is a very important measure for the Mississippi River throughout southeastern Iowa, and goes from the State line to Rock Island, I wish you would do all you possibly can to have same restored by working with your fellow Senators and vote for same. An answer will be appreciated.

ALEX MOIR.

MUSCATINE, IOWA, *February 15, 1913.*

Senator A. B. CUMMINS,
Washington, D. C.:

Muscatine unanimously urges your help in restoring House provision extending Mississippi River Commission's jurisdiction up to Rock Island.

JOHN P. BREEN,
Chairman Rivers and Harbors Committee, Muscatine Commercial Club.

MUSCATINE, IOWA, *February 15, 1913.*

Senator A. B. CUMMINS,
Washington, D. C.:

Muscatine unanimously urges your assistance in restoring House provision extending Mississippi River Commission jurisdiction up to Rock Island because of the levee and needs of Muscatine Island and the bottom lands of Illinois opposite Muscatine.

WM. HOFFMAN,
F. D. THROOP,
W. S. HILL,
G. M. TITUS,
J. L. GIESLER,
CONRAD KOELER, *Mayor.*

WAPELLO, IOWA, *February 15, 1913.*

Hon. A. B. CUMMINS,
United States Senate, Washington, D. C.:

Senate Committee on Commerce has left out item in House bill involving interests of southeastern Iowa; very important to this county; restoration of this will be appreciated by eastern Iowa.

O. C. FARMER,
Chairman Board of Supervisors.
W. H. HURLEY,
County Attorney.
H. W. BAKER,
County Auditor.
J. A. BIGGER,
Editor Tribune.

BIGGSVILLE, ILL., *February 15, 1913.*

Hon. A. B. CUMMINS,
United States Senate, Washington, D. C.:

Kindly use influence to restore levee item in House bill.

FRANK E. ABBEY.

MOUNT PLEASANT, IOWA, *February 15, 1913.*

Hon. ALBERT B. CUMMINS,
United States Senate, Washington, D. C.:

The Senate Committee on Commerce has cut out our levee item in the House bill. This is a very important measure for the Mississippi River throughout southeastern Iowa and goes from the State line to Rock Island. I wish you would do all you possibly can to have same restored by working with your fellow Senators and vote for same. An answer will be appreciated.

JAS. T. WHITING.

FORT MADISON, IOWA, *February 15, 1913.*

Hon. A. B. CUMMINS,
United States Senate, Washington, D. C.:

The Senate Committee on Commerce has cut out levee item in the House bill. This is a very important measure for the Mississippi River throughout southeastern Iowa, and goes from the State line to Rock Island. We wish you would do all you possibly can to have same restored by working with your fellow Senators and vote for same. An answer will be appreciated.

J. R. FRAILEY,
Secretary Fort Madison First Association.

Mr. OLIVER presented a petition of the Chamber of Commerce of Pittsburgh, Pa., praying for the passage of the so-called Page vocational education bill, which was ordered to lie on the table.

He also presented a petition of the Ministerial Association of Altoona, Pa., praying for the enactment of legislation providing for the retirement of aged and infirm civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of the Grain and Hay Exchange of Pittsburgh, Pa., praying for the enactment of legislation to fix the requirements governing the receipt, transmission, delivery, and preservation of messages of interstate telegraph and telephone companies, which was referred to the Committee on Interstate Commerce.

Mr. BURTON presented the petition of A. H. Reed, chairman of the executive committee of the Lake Superior and Mississippi River Canal Commission, praying for the enactment of legislation relative to the improvement of navigable rivers, which was referred to the Committee on Commerce.

Mr. CRAWFORD presented a petition of members of the Commercial Club of Webster, S. Dak., praying for the adoption of a 1-cent letter postage, which was referred to the Committee on Post Offices and Post Roads.

Mr. BRANDEGEE presented a petition of the Little River Grange, Patrons of Husbandry, of Hampton, Conn., praying for the enactment of legislation providing for the extension of agricultural colleges, which was ordered to lie on the table.

He also presented memorials of sundry citizens of Derby and Ansonia, in the State of Connecticut, remonstrating against the passage of the so-called Dillingham-Burnett immigration bill, which were ordered to lie on the table.

Mr. TOWNSEND presented telegrams in the nature of petitions from the Polish National Benevolent Society, of Grand Rapids, Mich., and from Charles K. Johanson, publisher of the North Star, of New York, N. Y., praying that Congress sustain the veto of the President on the immigration bill, which was ordered to lie on the table.

Mr. GALLINGER presented a petition of members of Old Number Four Chapter, Daughters of the American Revolution, of Charlestown, N. H., praying for the enactment of legislation to prohibit the desecration of the flag of the United States, which was referred to the Committee on the Judiciary.

He also presented a petition from members of the Park View Citizens' Association, of the District of Columbia, praying for the removal of the Tuberculosis Hospital from its present site to available grounds adjacent to the present workhouse at Occoquan, which was referred to the Committee on Appropriations.

He also presented a petition of Rev. J. Henning Nelms, pastor of the Church of the Ascension, of Washington, D. C., praying for the construction of a cross-town line of cars along M Street in the city of Washington, which was referred to the Committee on the District of Columbia.

He also presented a memorial of members of the Park View Citizens' Association, of the District of Columbia, remonstrating against the establishment of a penal institution or similar establishment in the vicinity of Park View, in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a telegram, in the nature of a petition, from members of Grand Lodge, No. 4, Independent Order of B'nai B'rith, of San Francisco, Cal., praying that Congress sustain the President's veto of the immigration bill, which was ordered to lie on the table.

He also presented a petition of members of the North Washington Citizens' Association, of the District of Columbia, praying for the enactment of legislation to regulate the price of water in the District, which was referred to the Committee on the District of Columbia.

He also presented a memorial of the National Association for the Advancement of Colored People, remonstrating against the enactment of legislation prohibiting intermarriage between the races, which was referred to the Committee on the Judiciary.

SENATOR FROM TENNESSEE.

Mr. LEA. Mr. President, I rise to a question of privilege. I desire to present the credentials of Senator Elect JOHN K. SHIELDS, elected a Senator from the State of Tennessee for the term beginning March 4, 1913, and ask that they may be read.

The credentials of JOHN K. SHIELDS, chosen by the Legislature of the State of Tennessee a Senator from that State for the term beginning March 4, 1913, were read and ordered to be filed.

REPORTS OF COMMITTEES.

Mr. DU PONT. I am directed by the Committee on Military Affairs, to which was referred the bill (H. R. 28699) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1914, and for other purposes, to report it with amendments, and I submit a report (No. 1223) thereon. I give notice that I will call up the bill for consideration at the first opportunity.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

Mr. GALLINGER, from the Committee on the District of Columbia, to which the subject was referred, submitted a report (No. 1225), accompanied by a bill (S. 8516) to amend sections 801, 808, and 1199 of the Code of Law for the District of Columbia, which was read twice by its title.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 8227. A bill for the relief of Charlotte J. Pile, Eastmond P. Green, and Easie C. Gandell, owners of lots Nos. 53, 54, and 55, in square No. 753, Washington, D. C., with regard to assessment and payment of damages on account of change of grade due to construction of the Union Station in said District (Rept. No. 1227);

H. R. 23939. An act to legalize titles in the District of Columbia to certain citizens (Rept. No. 1226);

H. R. 21714. An act to amend Subchapter II of Chapter XIX of the Code of Law for the District of Columbia (Rept. No. 1228);

H. R. 21709. An act to amend Subchapter II of Chapter XIX of the Code of Law for the District of Columbia (Rept. No. 1229); and

H. R. 16319. An act to extend and widen Western Avenue NW., in the District of Columbia (Rept. No. 1230).

Mr. GALLINGER, from the Committee on the District of Columbia, to which was referred the bill (S. 7891) to provide for annual assessments of real estate in the District of Columbia, reported it with an amendment and submitted a report (No. 1231) thereon.

He also, from the same committee, to which was referred the bill (S. 8306) to amend an act entitled "An act to require the erection of fire escapes in certain buildings in the District of Columbia, and for other purposes," approved March 19, 1906, as amended by the act approved March 2, 1907, reported it with amendments and submitted a report (No. 1232) thereon.

He also, from the same committee, to which were referred the following bills, submitted adverse reports thereon, which were agreed to, and the bills were postponed indefinitely:

S. 6537. A bill for the relief of Catherine Maroney (Rept. No. 1233); and

S. 7566. A bill to authorize the widening and opening of Western Avenue, District of Columbia (Rept. No. 1234).

Mr. McCUMBER, from the Committee on Pensions, to which was referred the bill (H. R. 17470) to pension widow and minor children of any officer or enlisted man who served in the War with Spain or Philippine insurrection, reported it with amendments and submitted a report (No. 1235) thereon.

He also, from the same committee, to which was referred the bill (H. R. 28093) to amend the general pension act of May 11, 1912, reported it with an amendment and submitted a report (No. 1236) thereon.

He also, from the same committee, to which was referred the bill (S. 234) amending section 2 of an act entitled "An act to increase the pension of widows, minor children, etc., of deceased soldiers and sailors of the late Civil War, the War with Mexico, the various Indian wars, etc., and to grant a pension to certain widows of the deceased soldiers and sailors of the late Civil War," approved April 19, 1908, reported it with an amendment and submitted a report (No. 1237) thereon.

Mr. CURTIS. From the Committee on Appropriations I report back favorably, with amendments, the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, and I submit a report (No. 1224) thereon. I give notice that I will call up the bill for consideration as soon as possible after to-morrow.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

Mr. CATRON, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 7767. A bill for the relief of G. L. Taneyhill (Rept. No. 1238); and

S. 8002. A bill for the relief of Byron W. Canfield (Rept. No. 1239).

Mr. JONES, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 7492. A bill for the relief of John E. Johnson (Rept. No. 1240); and

S. 8233. A bill authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912 (Rept. No. 1241).

Mr. JONES, from the Committee on the District of Columbia, to which was referred the bill (S. 7889) to authorize the widening and opening of Rhode Island Avenue from Fourth Street east to the District line, reported it with an amendment, and submitted a report (No. 1242) thereon.

Mr. POMERENE, from the Committee on the District of Columbia, to which was referred the bill (S. 7723) to regulate the hours of employment and safeguard the health of females employed in the District of Columbia in any mill, factory, manufacturing or mechanical establishment, or workshop, laundry, bakery, printing, clothing, dressmaking, or millinery establishment, mercantile establishment, store, hotel, restaurant, office, or where any goods are sold or distributed, or by express or transportation company, or in the transmission or distribution of telegraph or telephone messages or merchandise, reported it with amendments and submitted a report (No. 1243) thereon.

Mr. BRYAN, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 7051. A bill for the relief of I. H. Aiken (Rept. No. 1244); and

S. 7480. A bill for the relief of the legal representatives of Thomas B. McClintic, deceased (Rept. No. 1245).

Mr. BRYAN, from the Committee on Claims, to which was referred the bill (S. 6554) for the relief of Mrs. L. D. Goldsberry, submitted an adverse report (No. 1246) thereon, which was agreed to, and the bill was postponed indefinitely.

Mr. BRISTOW, from the Committee on Claims, to which was referred the bill (H. R. 25264) for the relief of W. A. Kelly, reported it without amendment and submitted a report (No. 1247) thereon.

He also, from the Committee on Military Affairs, to which was referred the bill (H. R. 21315) for the relief of Robert

Ross, reported it with an amendment and submitted a report (No. 1248) thereon.

Mr. CHAMBERLAIN (for Mr. HITCHCOCK), from the Committee on Military Affairs, to which was referred the bill (S. 7747) for the relief of Charles Dudley Daly, reported it with an amendment and submitted a report (No. 1249) thereon.

Mr. BRADLEY, from the Committee on Claims, to which was referred the bill (S. 3201) for the relief of Marion B. Patterson, reported it with an amendment and submitted a report (No. 1251) thereon.

He also, from the same committee, to which was referred the bill (H. R. 12131) for the reimbursement of Ralph E. Hess for two horses lost while hired by the United States Geological Survey, reported it without amendment and submitted a report (No. 1250) thereon.

Mr. OVERMAN, from the Committee on the Judiciary, to which was referred the bill (S. 8487) to prevent the desecration of the flag of the United States, and to provide punishment therefor, asked to be discharged from its further consideration and that it be referred to the Committee on Military Affairs, which was agreed to.

MAURICE EDGAR ROSE.

Mr. PERKINS. From the Committee on Naval Affairs, I report favorably, without amendment, the bill (S. 8357) for the relief of Maurice Edgar Rose, late assistant surgeon, United States Navy, and I submit a report (No. 1221) thereon. I call the attention of the junior Senator from New York [Mr. O'GORMAN] to the bill.

Mr. O'GORMAN. This bill is a very worthy measure and is reported favorably by the committee. I ask unanimous consent for its present consideration.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes the President to reinstate Maurice Edgar Rose as an assistant surgeon in the United States Navy and to place him on the 75 per cent pay list of retired officers of the United States Navy, the transfer to take effect at the date of the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. CULBERSON. Let the report be read.

The PRESIDING OFFICER. The report will be read.

The Secretary read the report submitted by Mr. PERKINS February 18, 1913, as follows:

[Senate Report No. 1221, Sixty-second Congress, third session.]

MAURICE EDGAR ROSE.

Mr. Perkins, from the Committee on Naval Affairs, submitted the following report, to accompany S. 8357:

The Committee on Naval Affairs, to whom was referred the bill (S. 8357) for the relief of Maurice Edgar Rose, late assistant surgeon, United States Navy, having considered the same, report thereon with a recommendation that it pass.

The bill has the approval of the Navy Department, as will appear by the following communication:

DEPARTMENT OF THE NAVY,
Washington, February 12, 1913.

MY DEAR MR. CHAIRMAN: In further reference to the bill (S. 8357) for the relief of Maurice Edgar Rose, late assistant surgeon, United States Navy, I have the honor to inform you that the Bureau of Navigation of this department, which has general supervision of the personnel of the Navy, has reported on this measure as follows:

"Maurice Edgar Rose was born June 15, 1884, and is now approximately 28½ years of age. He was appointed an assistant surgeon in the Navy June 27, 1907, and resigned from the service June 8, 1911. On January 15, 1912, he was appointed an acting assistant surgeon in the Navy, and served in that capacity until December 10, 1912, when he resigned. In all, Dr. Rose served in the Navy for approximately 4 years and 10 months.

"The bureau is satisfied from its records and the records of the Bureau of Medicine and Surgery that there has been a gradual development of mental disease in this case since Dr. Rose was first admitted to the sick list April 1, 1909, while serving as an assistant surgeon in the regular service; and there are reasonable grounds for belief that his mental deterioration had so far progressed at the time he submitted his resignation from the regular service, June 8, 1911, that he could not fully appreciate the consequences of his action.

"In view of the record in this case, and particularly of the fact that the disability originated in the line of duty, the bureau recommends that the department favorably indorse the proposed legislation for the relief of Dr. Rose now pending before both Houses of Congress."

The department approves the recommendation of the Bureau of Navigation.

Faithfully, yours, G. v. L. MEYER.

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
United States Senate."

FREDERICK H. LEMLY.

Mr. PERKINS. I am also directed by the Committee on Naval Affairs, to which was referred the bill (S. 8384) to appoint Frederick H. Lemly a passed assistant paymaster on the active list of the United States Navy, to report it favorably without amendment, and I submit a report (No. 1222) thereon. I call the attention of the Senator from North Carolina to the bill.

Mr. OVERMAN. I ask unanimous consent for the present consideration of the bill.

Mr. WARREN. I do not wish to object to the consideration of these bills, but with six appropriation bills here waiting, one of them half through, after the consideration of this bill I certainly shall feel that I must object to taking them up out of order. I hope this is not a long bill or that it will not lead to any extended debate.

Mr. OVERMAN. It is a short bill.

The PRESIDING OFFICER. It was the understanding of the Chair that the morning business was proceeding under a unanimous-consent agreement.

Mr. WARREN. But the morning business does not contemplate the passage of bills when reported from committees.

The PRESIDING OFFICER. Only unobjected bills. The bill will be read.

The Secretary read the bill, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to appoint Frederick H. Lemly a passed assistant paymaster on the active list of the Navy to take the same rank and position on the list of passed assistant paymasters that he occupied on March 5, 1908 (the date upon which his resignation as a passed assistant paymaster in the Navy was accepted): *Provided*, That the said Frederick H. Lemly shall establish to the satisfaction of the Secretary of the Navy by the usual examinations required for promotion to the grade of passed assistant paymaster his fitness in all respects to perform the duties thereof: *And provided further*, That the said Frederick H. Lemly shall be carried as additional to the number of the grade to which he may be appointed or at any time thereafter promoted: *And provided further*, That nothing in this act shall be construed as entitling said Frederick H. Lemly to any pay or allowances from the date of the acceptance of his resignation herein referred to and the date of the passage of this act.

Mr. BRISTOW. Mr. President, of course I dislike to object to anything the Senator from North Carolina might want to do, but I understand that this man has been out of the service and it is proposed to bring him back again and put him in the same rank he would have held if he had continued in the service.

Mr. OVERMAN. He is not to be placed in exactly the same position. This man resigned to go home to see his father, who had been stricken with paralysis. He wants to get back in the Navy. The bill is strongly recommended both by the Secretary of the Navy and the bureau. He was a very faithful officer—one of the best in the Navy. He resigned on account of the condition of his father's health.

Mr. BRISTOW. If an officer in the Navy can resign and be out of the service for any purpose and then in the course of time, when years go by, be reinstated to the same place he would have held if he had continued in the service, it seems to me to be unjust.

Mr. OVERMAN. It is only the place of assistant paymaster. If he should go in now he would only get that position. That is the lowest position.

Mr. BRISTOW. If that is all it is I do not care anything about it.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. PERKINS. I ask that the report of the committee be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[Senate Report No. 1222, Sixty-second Congress, third session.]

FREDERICK H. LEMLY.

Mr. PERKINS, from the Committee on Naval Affairs, submitted the following report to accompany S. 8384.

The Committee on Naval Affairs, to whom was referred the bill (S. 8384) to appoint Frederick H. Lemly a passed assistant paymaster on the active list of the United States Navy, having considered the same, report thereon with a recommendation that it pass.

The bill has the approval of the Navy Department, as will appear by the following communication:

DEPARTMENT OF THE NAVY,
Washington, February 12, 1913.

MY DEAR MR. CHAIRMAN: Referring to your letter transmitting a bill (S. 8384) to appoint Frederick H. Lemly a passed assistant paymaster on the active list of the United States Navy, I have the honor to inform you that the facts in his case are as follows:

Frederick H. Lemly was born on May 12, 1880, and is now approximately 32 years and 6 months of age. He was appointed an assistant paymaster in the Navy on February 17, 1903; was promoted to passed assistant paymaster on June 16, 1903, and voluntarily resigned from the naval service on March 5, 1908. His total naval service was therefore approximately five years. The professional record of Mr. Lemly as an officer in the Pay Corps of the Navy is excellent.

The bill in question, if enacted into law, will place Mr. Lemly No. 6 on the list of passed assistant paymasters on the date of its approval, as an additional number in grade. It will give the Navy the services of an additional experienced pay officer of unquestioned ability. While it

is special legislation in favor of an individual, the department believes that the facts in the case warrant its recommendation of favorable action upon this measure as being also in the interests of the Government.

In view of the above, the department recommends that favorable action be taken upon this measure (S. 8384).

Faithfully, yours,

PHILIP ANDREWS,
Acting Secretary of the Navy.

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
United States Senate.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WEBB:

A bill (S. 8506) granting an increase of pension to Margaret A. Bennett (with accompanying paper); to the Committee on Pensions.

By Mr. MARTIN of Virginia:

A bill (S. 8507) for the relief of William Allman and others; to the Committee on Claims.

By Mr. SHIVELY:

A bill (S. 8508) granting an increase of pension to Henry Fairley (with accompanying papers); and

A bill (S. 8509) granting an increase of pension to George A. Marks (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 8510) granting an increase of pension to Sarah A. Griswold (with accompanying papers);

A bill (S. 8511) granting an increase of pension to Sophronia E. Sawyer (with accompanying papers); and

A bill (S. 8512) granting an increase of pension to Catherine A. French (with accompanying papers); to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 8513) to authorize certain changes in restricted allotments of the Indians of the Five Civilized Tribes of Oklahoma; to the Committee on Indian Affairs.

By Mr. CURTIS:

A bill (S. 8514) granting a pension to Esther M. Campbell (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 8515) providing for the purchase of a site and the erection of a public building thereon at Calumet, in the State of Michigan; to the Committee on Public Buildings and Grounds.

By Mr. CHAMBERLAIN:

A bill (S. 8517) making lands within the State of Oregon that have been withdrawn or classified as oil lands, subject to entry under the homestead or desert-land laws; to the Committee on Public Lands.

By Mr. WARREN:

A bill (S. 8518) to amend an act entitled "An act providing that the State of Wyoming be permitted to relinquish to the United States certain lands heretofore selected and to select other lands from the public domain in lieu thereof," approved April 12, 1910 (with accompanying papers); to the Committee on Public Lands.

By Mr. SMOOT:

A bill (S. 8519) relating to the temporary filling of vacancies occurring in the offices of register and receiver of district land offices; to the Committee on Public Lands.

By Mr. CUMMINS:

A bill (S. 8520) granting a pension to William H. Spencer (with accompanying papers); to the Committee on Pensions.

By Mr. BRADY:

A bill (S. 8521) granting a pension to John Orr (with accompanying papers); to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 8522) to prevent the employment of females in mills, factories, or manufacturing establishments for a longer period than eight hours; to the Committee on Education and Labor.

A bill (S. 8523) for the relief of John Dauberman; to the Committee on Military Affairs.

A bill (S. 8524) granting a pension to Kate Hauchett; and

A bill (S. 8525) granting an increase of pension to Joanna Kramer; to the Committee on Pensions.

By Mr. CLARK of Wyoming:

A bill (S. 8526) to provide for the punishment of certain crimes against the United States (with accompanying papers); to the Committee on the Judiciary.

By Mr. BRADLEY:

A bill (S. 8527) authorizing and directing the purchase of a site for a Government building in Barbourville, Ky.; to the Committee on Public Buildings and Grounds.

A bill (S. 8528) granting an increase of pension to Adeline Stoker (with accompanying papers);

A bill (S. 8529) granting an increase of pension to Elender B. Gabbard (with accompanying papers);

A bill (S. 8530) granting an increase of pension to Mary Hammack (with accompanying papers);

A bill (S. 8531) granting an increase of pension to Katie Royston (with accompanying papers);

A bill (S. 8532) granting an increase of pension to Caroline Adams (with accompanying papers);

A bill (S. 8533) granting an increase of pension to Levi Hoskins (with accompanying papers);

A bill (S. 8534) granting a pension to Juliet S. White; and

A bill (S. 8535) granting an increase of pension to Alfred Lewis (with accompanying papers); to the Committee on Pensions.

By Mr. NELSON:

A bill (S. 8536) to authorize the construction of a bridge across the Mississippi River in Beltrami County, in the State of Minnesota; to the Committee on Commerce.

By Mr. JONES:

A bill (S. 8537) to extend the time for the completion of the Alaska Northern Railway, and for other purposes; to the Committee on Territories.

By Mr. STONE:

A bill (S. 8538) to authorize the St. Louis & Western Traction Co. to construct a bridge across the Missouri River near Weldon Springs Landing, in the State of Missouri (with accompanying papers); and

A bill (S. 8539) to authorize the St. Louis Belt, Illinois & Eastern Traction Co. to construct a bridge across the Mississippi River near the mouth of the Missouri River (with accompanying papers); to the Committee on Commerce.

By Mr. WETMORE:

A joint resolution (S. J. Res. 162) to exempt the National Academy of Sciences from the payment of duty on medals imported for presentation by it in recognition of research work; to the Committee on Finance.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. BRISTOW. On yesterday I submitted an amendment providing an appropriation for a pavement around the post office and courthouse at Salina, Kans., intended to be proposed to the sundry civil appropriation bill, and it was referred to the Committee on Public Buildings and Grounds. I move that that committee be discharged from its further consideration and that it be referred to the Committee on Appropriations.

The motion was agreed to.

Mr. BROWN submitted an amendment proposing to appropriate $68,000 for the construction of a United States post-office building at Auburn, Nebr., intended to be proposed by him to the omnibus public-buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $125,000 for the construction of a United States post office, land office, and weather bureau building at Alliance, Nebr., intended to be proposed by him to the omnibus public-buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $100,000 for the construction of a United States post-office building at Wahoo, Nebr., intended to be proposed by him to the omnibus public-buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. CLARKE of Arkansas submitted an amendment providing that hereafter the salary of the United States district attorney for the western district of Arkansas shall be $4,000 per annum, and that hereafter the salary of the United States marshal for the western district of Arkansas shall be $4,000 per annum, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. FLETCHER submitted an amendment proposing to appropriate $85,000 for the purchase of a site and the erection of a public building thereon at Apalachicola, Fla., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. CURTIS submitted an amendment proposing to appropriate $71,000 for the purchase of a site and the erection thereon of a post-office building at North Topeka, Kans., etc., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. GALLINGER submitted an amendment proposing to appropriate $1,750,000 for the construction of an armory building for the National Guard of the District of Columbia, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to amend section 9 of the act of March 1, 1911, relative to the protection of the watersheds of navigable streams, etc., intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. BRADLEY submitted an amendment proposing to appropriate $250,000 to carry into effect the provisions of the act of April 2, 1912, providing for the celebration of the semicentennial anniversary of the act of emancipation, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment providing for the establishment and operation of dispensaries in Knott and Perry Counties, Ky., by the Public Health Service of the United States, for the purpose of demonstrating, investigating, treating, and preventing trachoma, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. JONES submitted an amendment providing for the retirement of Thomas Harrison, a clerk in class 4 at the United States Naval Observatory, who has served in that department for 60 consecutive years, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

He also submitted an amendment proposing to appropriate $70,000 to provide for medical and sanitary relief of Eskimos, Aleuts, Indians, and other natives of Alaska, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $400 to purchase for the Skagit Tribe of Indians in the State of Washington a tract of land used by them as a tribal burial ground, etc., intended to be proposed by him to the Indian appropriation bill, which was ordered to lie on the table and be printed.

Mr. WETMORE submitted an amendment providing that the appropriation in the sundry civil act approved March 4, 1911, for removing the fence and wall around the Botanic Garden, etc., is hereby made available for the fiscal year 1914, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. PERKINS submitted an amendment providing for the participation of the United States in the Panama Pacific International Exposition, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Industrial Expositions and ordered to be printed.

Mr. OVERMAN submitted an amendment proposing to appropriate $2,810.20 for an additional amount required for the care and treatment of indigent patients under the contract made with the George Washington University Hospital for the fiscal years 1909, 1910, 1911, and 1912, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CRAWFORD submitted an amendment proposing to appropriate $2,000 for cement sidewalks and electric-light post lamps and fixtures about the new post-office building at Huron, S. Dak., etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. GUGGENHEIM submitted an amendment proposing to appropriate $100,000 for the erection of a United States post-office building at Montrose, Colo., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $15,000 for a United States post-office building at Sterling, Colo., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $15,000 for a United States post-office building at Canon City, Colo., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $15,000 for a United States post-office building at Monte Vista, Colo., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to increase the appropriation for the United States post office at Fort Morgan, Colo., from $55,000 to $75,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. PAYNTER submitted an amendment proposing to appropriate $5,000 for a United States post-office building at Falmouth, Ky., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. PENROSE submitted an amendment proposing to appropriate $75,000 to acquire a site and erect thereon a United States post-office building and other Government offices at State College, Pa., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. POMERENE submitted an amendment proposing to increase the appropriation for demonstrating the best method of preventing hog cholera from $45,000 to $100,000, etc., intended to be proposed by him to the agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. DILLINGHAM submitted an amendment proposing to increase the appropriation for nutrition investigations from $16,000 to $19,000, etc., intended to be proposed by him to the agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

He also submitted an amendment providing that nothing contained in the act approved June 26, 1912, shall be so construed as to prohibit the payment from the appropriation for the Department of Agriculture of expenses incidental to the delivery of lectures, etc., intended to be proposed by him to the agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

He also submitted an amendment proposing to appropriate $150,000 for the purchase of the right of the United States to use the Winestock process in the recovery of Government waste paper, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. ROOT submitted an amendment proposing to increase the appropriation for the United States post office at Oneida, N. Y., from $15,000 to $25,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. THOMAS submitted an amendment proposing to increase the appropriation for the United States post office at La Junta, Colo., from $10,000 to $25,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. LODGE submitted an amendment proposing to increase the appropriation for the United States post office at South Framingham, Mass., from $15,000 to $25,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to increase the appropriation for the United States post office at Milford, Mass., from $15,000 to $18,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to increase the appropriation for the United States post office at Malden, Mass., on a site to be donated, from $90,000 to $175,000, intended to be proposed by him to the omnibus public buildings bill, which was ordered to be printed and, with the accompanying papers, referred to the Committee on Public Buildings and Grounds.

Mr. JACKSON submitted an amendment proposing to increase the appropriation for the construction of an immigration station at Baltimore, Md., from $100,000 to $200,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

AIDS TO NAVIGATION.

Mr. GARDNER submitted an amendment intended to be proposed by him to the bill (H. R. 27789) to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

MEDALS OF HONOR.

Mr. O'GORMAN submitted an amendment intended to be proposed by him to the bill (S. 8031) providing for the presentation of medals to all surviving soldiers of the Battle of Gettysburg, which was ordered to be printed, and, with the accompanying paper, referred to the Committee on Military Affairs.

WITHDRAWAL OF PAPERS—BENJAMIN H. NORMAN.

On motion of Mr. WEBB, it was

Ordered, That the papers accompanying the bill S. 765, Sixty-second Congress, first session, granting an increase of pension to Benjamin H. Norman, be withdrawn from the files of the Senate, no adverse report having been made thereon.

INAUGURAL REVIEWING STANDS.

Mr. SHEPPARD. I offer a concurrent resolution and ask that it be read.

The PRESIDING OFFICER. The concurrent resolution will be read.

The Secretary read the concurrent resolution (S. Con. Res. 42), as follows:

Resolved by the Senate, the House of Representatives concurring, That the inaugural committee in charge of the reviewing stands upon Lafayette Square is hereby directed to set aside for the use of the press, the distribution to be under the direction of the standing committee of correspondents, 250 seats directly opposite the stand in which the President will review the inaugural parade, the seats to be sold at the prices prevailing in other portions of the same stand.

Mr. SHEPPARD. I will simply say in connection with the concurrent resolution that, having been a member and chairman of the Committee on Public Buildings and Grounds in the House when the bill for the usual inaugural permits was pending, if the House committee had not been assured that the members of the press would have been given sufficient accommodations the committee would have inserted the necessary reservation in the law at the time. I therefore submit the concurrent resolution in order that the members of the press may get proper accommodations.

Mr. SMOOT. Does the resolution provide for the expenditure of money? If so, it ought to go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. SHEPPARD. It does not.

The PRESIDING OFFICER. The Secretary informs the Chair that the concurrent resolution does not incur any expenditure.

Mr. SMOOT. Then I have no objection to the concurrent resolution.

Mr. SHEPPARD. I ask for its immediate consideration.

The concurrent resolution was considered by unanimous consent, and agreed to.

GOVERNMENT PROPERTY IN FOREIGN CAPITALS.

Mr. GALLINGER. I submit a resolution for which I ask present consideration.

The resolution (S. Res. 465) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Secretary of State is hereby directed, through the diplomatic and consular officers of the Government, to ascertain the system of taxing Government property in the several capitals of the leading countries of the world, a full and complete report on the subject to be transmitted to the Senate at the earliest practicable day.

OSAGE INDIAN CLAIMS.

Mr. OWEN. I wish to move that the bill (S. 5728) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in claims of the Osage Nation of Indians against the United States, reported by the Committee on Indian Affairs, relative to the Osage Indian fund, be referred to the Court of Claims for a finding of fact under the Tucker-Bowman Act.

Mr. SMOOT. Is that motion in order at this time?

The PRESIDING OFFICER. It is not in order. The Senator made it as out of order. It can only be entertained if there is no objection.

Mr. SMOOT. After the committee has reported a bill, without the action of the committee should such action be taken upon the motion of a Senator? Should not the bill be referred back to the committee and then have the committee take the action?

Mr. OWEN. I will state to the Senator from Utah that this bill was reported from the committee, authorizing the sending of the claims to the Court of Claims for the rendition of judgment on the facts and the law. Possibly the parliamentary objection made by the Senator is right, and that without the authority of the committee the motion may not be made, but the committee having authorized the larger authority to be exercised by the court in the bill they did recommend to the Senate, I thought it would be in order to make the motion. It is the best thing that can be done so late in the session.

Mr. SMOOT. If the Senator would not object, I am quite sure it would be the proper procedure to have the bill recommitted to the committee.

Mr. OWEN. I think the objection of the Senator is well taken, and I will withdraw the proposed motion.

The PRESIDING OFFICER. The motion is withdrawn.

EXPENSE OF THE DISTRIBUTION OF SEEDS, ETC.

Mr. KENYON. I ask unanimous consent to take up two Senate resolutions, Senate resolution No. 422 and Senate resolution No. 423. If they lead to any discussion I will withdraw the request.

Mr. CURTIS. I shall have to ask for the regular order. I dislike to do it, but I will have to insist on proceeding with the appropriation bill.

Mr. KENYON. This is information I am seeking from the Postmaster General and the Secretary of Agriculture, which, owing to circumstances over which we have no control on this side, will not be available after the 4th of March. The resolutions have been on the calendar for some time. I had expected to speak on them, but I am not going to inflict the Senate with a speech now.

Mr. CURTIS. If it will not take time, I have no objection.

Mr. KENYON. It will not take two minutes.

The PRESIDENT pro tempore. The Senator from Iowa asks unanimous consent for the present consideration of the resolution, which will be read.

The Secretary read Senate resolution No. 422, submitted by Mr. KENYON January 6, 1913, as follows:

Resolved, That the Postmaster General furnish to the Senate an estimate, if possible for him so to do, of the expense to the Government for the last four years of the carrying of seeds, plants, and bulbs franked through the mails.

The resolution was considered by unanimous consent and agreed to.

The PRESIDENT pro tempore. The Senator from Iowa asks unanimous consent for the present consideration of the following resolution, which will be read.

The Secretary read Senate resolution No. 423, submitted by Mr. KENYON January 6, 1913, as follows:

Resolved, That the Secretary of Agriculture furnish to the Senate an estimate of the expense to the Government for the last four years of purchasing or securing seeds, bulbs, plants, trees, etc., for free distribution by Members of Congress and the total number of packages so furnished. Also the expense of preparing the same for such free distribution and delivery of same to the mails.

The resolution was considered by unanimous consent and agreed to.

RIVER AND HARBOR BILL.

Mr. NELSON. Mr. President, I desire to state that I gave notice heretofore that I would call up the river and harbor bill to-day, but inasmuch as the District of Columbia appropriation bill is now before the Senate and has been partially considered, I give notice that I shall call up the river and harbor bill after the District appropriation bill has been disposed of.

REFERENCE OF TREATIES.

Mr. CULLOM. Mr. President, I ask unanimous consent, as in executive session, to refer to the Committee on Foreign Relations two treaties which have been sent to the Senate.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the treaties will be so referred and, together with the message and accompanying papers, ordered to be printed in confidence for the use of the Senate.

MEMORIAL ADDRESSES ON THE LATE SENATOR JEFF DAVIS.

Mr. CLARKE of Arkansas. I give notice that on March 1 I shall ask the Senate to consider resolutions commemorative of the life and public character of the late Senator JEFF DAVIS, from the State of Arkansas.

THE ELECTORAL COLLEGE (S. DOC. NO. 1092).

Mr. SHIVELY. Mr. President, I have here a thesis in a few pages by John Walker Holcombe on the subject of "The Electoral College." This work represents much research, thought, and reflection, and bears on a question of current public interest. I do not subscribe to all the conclusions of the author, but I regard the article as a valuable contribution on a live subject. I ask unanimous consent of the Senate that the paper be printed as a Senate document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CITIZENSHIP IN PORTO RICO.

Mr. POINDEXTER. I present an article from the Porto Rico Review relative to citizenship in that island. I ask that the article be printed in the RECORD.

There being no objection, the article was ordered to lie on the table, and to be printed in the RECORD, as follows:

CITIZENSHIP—A REPRINT.

The interest in our last editorial on "Citizenship" is fully appreciated by the Review. We have been requested to leave out other editorials to make its reproduction possible and this we cheerfully do.

CITIZENSHIP.

A citizenship bill passed the House at the last session of Congress, and was promptly sent to the Senate. In its natural course it was referred to the committee having in charge the affairs of Porto Rico. It is said that immediately upon the assembling of Congress the committee will report this measure back with a recommendation that it pass. It is also said that a majority of the Senate have expressed an intention of supporting the bill, but this is no doubt more or less hearsay.

We sincerely hope that the action of the Senate will be both speedy and favorable. It has been 12 years since civil government was established in this island, and for more than half of that time citizenship has been one of our constant expectations, this result being anticipated, because it had been promised by the great political parties of the United States, and because those organizations are believed to make good all promises of that character. As a matter of fact they have, in most instances, done so in the past. But many Porto Ricans became tired of waiting. Many lost confidence altogether, and some have taken advantage of the delay of Congress to act in which to work up various schemes. We do not apprehend that the Senate will care to hear more evidence as to the actual desire of our people. The question has been presented to Congress so many times, by so many different interests, and by men of all parties, with such force and clearness as to leave no doubt as to a large majority of our people.

We trust that Senators will not be impressed by stories to the effect that there has been a serious change of sentiment in Porto Rico. It is true that new schemes have been organized. It is a mistake to suppose that the people down here are any different from the people of the rest of the world. Some folks want a change of sovereignty every time they have a change of luck. There are men who change their party affiliations every time they meet with business misfortunes. Some men leave their associates in one party and join another, because they think they are not appreciated, and in such cases these men no sooner enter the lines of a new organization than they hoist a lightning rod, hoping that it may be struck by office. Human nature is the same here that it is in the States.

We urge the Senate to pass the bill, and to do so promptly, because it is a just measure, and for the reason that each day of delay makes more difficult the efforts of those who are struggling for the upbuilding of Porto Rico in the educational, political, and health-giving walks of life. Commercially, and in a business way generally, Porto Rico is all right, and as able to look out for herself as any other subdivision of our Nation; but to make money is not all of life for many people.

When Gen. Miles came here he promised citizenship. It may be said that he had no authority to make the promise. Perhaps not; but in throwing out this utterance, he responded only to the eager, cheering thousands that welcomed the flag he stood for, and listened for the one word they sought to hear. The entrance of Gen. Miles and his associates and comrades was not an invasion; it was a prolonged and thrilling reception by a people waiting for the advent of the flag which they had been taught represented equality before the law.

We urge the immediate passage of the bill, because we believe it is the best thing that the Senate can do for the United States. There will be something doing in this part of the world with the completion of the canal, and it will be well for Uncle Sam to have loyal friends in the West Indies who are to the "manor born." There are thoughts in connection with this phase of the question well worthy of consideration, but it is not wise to discuss them, and they will suggest themselves.

The Porto Rican is neither a citizen nor a subject of any nation, and he feels most keenly the humiliation of his position. And his humiliation is equaled by disappointment over the failure of the Congress to act. Do you not think, Senators, that the delay has been sufficient? And do you expect loyalty from a people to whom you deny the dignity and character of citizenship?

But you say, "Have we not legislated liberally for Porto Rico?" and we answer, "Financially; yes." But the money has been wisely expended. You may speed over our splendid roads in every or any direction, and as there is no speed limit outside the towns and cities, the schoolhouses will seem to be passed as frequently as the telegraph and telephone poles. You can always tell them, because the flag under which you legislate floats over every building. We have built roads and bridges in every direction, and the church buildings, the old ones have been burnished up until they look like new structures. Beside the big cathedrals that have been here for all of these years, and are now working as if under a new inspiration, you may hear the Methodists singing from the amen corner of their little churches, you may see the Baptists marching to the river, you may hear the Presbyterians reiterating the austere doctrines of Calvin and John Knox, while the Episcopal is here with his church, in which he chants the old prayers, and they all have their schools and hospitals.

We urge the passage of the bill in behalf of the laboring men of Porto Rico, who constitute two-thirds of the population. We, and no doubt you, hear much about our being a "proud people" and all of that sort of rot. But the fact is that the proud class is limited to a very few, comparatively, who believe that they have been born to the position of privilege, and the responsibility of living well and proper lives at the expense of those who toil; and Porto Rico is a land of workers, with but few of the really "proud," and we may add, not very essential, class. We urge the bill for the sake and in the names of those who actually work for a living and who in producing the great export figures that astonish even those at home. The laborers of the island desire citizenship. They will feel safe after the fact is realized. Their children, well dressed, full of hope and happiness, fill our schoolhouses to the number of 100,000, and their prospects have nerved the arm of labor to its greatest tasks. These are the men who have faith in the Stars and Stripes, and who have, through your committees, besought you for something tangible in the shape of future stability in the life that has been shown to them, and opened to their children the doors of opportunity.

Now, we know just what you will say, Senators. You will say that no sooner will this bill be signed than we will be wanting something else.

And there you are right. What? Oh, we do not know; but that we will want something is as sure as fate. And would you have us be content with this? No, indeed; for our work will have but just begun. We propose to make of Porto Rico the ideal commonwealth. Here we already have the finest climate in the world. We are not particularly proud of that fact, because we not produce the climate nor in any way assist in bringing about its perfections. But we do claim some credit for the finest automobiling, the best grapefruits, the sweetest oranges, and the rarest pineapples in the world. We do swell ourselves a little on the fact that we have made so few mistakes in working out the problems of self-government without much previous experience. We are not a little elated over the volume of trade of which you have heard so much. And then, we boast over the fact that we have no more cockfights on Sunday, not only because the people attend church nowadays, but because we have the best police force in the world, considering that it is only about 10 years old. And when every child in the island can read and write, and nearly every man owns his own home, we shall be a "proud people," indeed, and proudest of all of the dear old flag under which all of these wonderful achievements have been made possible.

So, Senators, please pass the bill without delay.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed, without amendment, the bill (S. 1589) to authorize the exchange of conveyances between the Florida East Coast Railway Co. and the United States.

The message also announced that the House had passed the following bills, each with amendments, in which it requested the concurrence of the Senate:

S. 8089. An act permitting the building of a railroad bridge across the Yellowstone River from a point on the east bank, in section 15, to a point on the west bank, in section 16, township 151 north, range 104 west, of the fifth principal meridian, in McKenzie County, N. Dak.; and

S. 8090. An act permitting the building of a bridge across the Missouri River from a point on the east bank, in section 14, Mountrail County, N. Dak., to a point on the west bank of said river, in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west, of the fifth principal meridian.

The message further announced that the House had passed the joint resolution (S. J. Res. 143) authorizing the Secretary of War to loan certain tents for use at the meeting of the Imperial Council of the Ancient Arabic Order of the Nobles of the Mystic Shrine to be held at Dallas, Tex., in May, 1913, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 27941) making appropriations for the support of the Army for the fiscal year ending June 30, 1914; asks a conference with the Senate on the disagreeing votes of the two Houses thereon; and had appointed Mr. HAY, Mr. SLAYDEN, and Mr. PRINCE managers at the conference on the part of the House.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 25762. An act for the construction of a bridge across the Mississippi River at or near Baton Rouge, La.;

H. R. 25781. An act to amend section 77 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 27827. An act to amend section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River in the State of West Virginia;

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes;

H. R. 28335. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 28469. An act granting two condemned cannon to the Wallkill Valley Cemetery Association, of Orange County, N. Y.;

H. R. 28635. An act to amend section 81 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes; and

H. R. 28766. An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes.

The message also announced that the House had passed the concurrent resolution (No. 38) of the Senate providing for the printing of the laws of the United States applicable to the Territory of Alaska, etc.

The message further announced that the House had passed the concurrent resolution (No. 34) of the Senate providing for the printing of the Judicial Code of the United States, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a concurrent resolution (No. 68) providing for the printing of 15,000 additional copies of Report No. 98, United States Department of Agriculture, on systems of marketing farm products and demand for such products at trade centers, etc., in which it requested the concurrence of the Senate.

The message further announced that the House had passed a joint resolution (H. J. Res. 365) to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

S. 104. An act for the relief of Carl Krueger; and

S. 2733. An act for the relief of the estate of Almon P. Frederick.

ARMY APPROPRIATION BILL.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 27941) making appropriations for the support of the Army for the fiscal year ending June 30, 1914, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. DU PONT. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. DU PONT, Mr. WARREN, and Mr. JOHNSTON of Alabama conferees on the part of the Senate.

MISSOURI RIVER BRIDGE, NORTH DAKOTA.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 8090) permitting the building of a railroad bridge across the Missouri River from a point on the east bank in section 14, Mountrail County, N. Dak., to a point on the west bank of said river in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west, of the fifth principal meridian, which were, on page 1, line 8, after "point," to insert "suitable to the interests of navigation"; on page 2, to strike out lines 9 to 12, inclusive; and on page 2, line 13, to strike out "3" and insert "2."

Mr. GRONNA. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

YELLOWSTONE RIVER BRIDGE, NORTH DAKOTA.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 8089) permitting the building of a railroad bridge across the Yellowstone River from a point on the east bank in section 15 to a point on the west bank in section 16, township 151 north, range 104 west, of the fifth principal meridian, in McKenzie County, N. Dak., which were, on page 1, line 8, after "point," to insert "suitable to the interests of navigation," and on page 2 to strike out lines 8 to 11, inclusive.

Mr. GRONNA. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

LOAN OF TENTS.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the joint resolution (S. J. Res. 143) authorizing the Secretary of War to loan certain tents for use at the meeting of the Imperial Council of the Ancient Arabic Order of the Nobles of the Mystic Shrine to be held at Dallas, Tex., in May, 1913, which was, on page 2, lines 9, 10, and 11, to strike out "*Provided further*, That hereafter no loan of tents shall be made except to the Grand Army of the Republic and the Confederate Veterans' Association."

Mr. BRISTOW. I think the bill and amendment had better go over, because the proviso is one of the desirable features. The proviso has been stricken out, and the Committee on Military Affairs insisted upon its going in.

Mr. DU PONT. I concur absolutely in what the Senator from Kansas has said.

Mr. CULBERSON. I desire to call the attention of Senators to the fact that one Congress can not bind another on the subject of this proviso. I have no objection to the proviso itself.

Mr. BRISTOW. No; but the proviso is the important thing, and I shall insist that it be retained in the bill. I ask that the action of the House be disagreed to.

Mr. CULBERSON. I suggest to the Senator from Alabama that the bill should go to conference.

Mr. JOHNSTON of Alabama. I move that the Senate disagree to the amendment of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. DU PONT, Mr. WARREN, and Mr. JOHNSTON of Alabama conferees on the part of the Senate.

THE JUDICIAL CODE.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to Senate concurrent resolution 34, providing for the printing of 25,000 copies of the Judicial Code, which were, in line 1, to strike out "fifteen" and insert "twenty," and, in lines 6 and 7, to strike out "5,000 copies for the use of the Senate document room."

Mr. SMOOT. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

MARKETING OF FARM PRODUCTS.

The PRESIDENT pro tempore laid before the Senate the following concurrent resolution (No. 68) of the House of Representatives, which was read and referred to the Committee on Printing:

Resolved by the House of Representatives (the Senate concurring), That there be printed 15,000 additional copies of Report No. 98 of the United States Department of Agriculture, being a report on systems of marketing farm products and demand for such products at trade centers, 10,000 copies for the use of the House of Representatives and 5,000 copies for the use of the Senate.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Commerce:

H. R. 25762. An act for the construction of a bridge across the Mississippi River at or near Baton Rouge, La.;

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River, in the State of West Virginia; and

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes.

The following bills were severally read twice by their titles and referred to the Committee on the Judiciary:

H. R. 25781. An act to amend section 77 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 27827. An act to amend section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 28335. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; and

H. R. 28635. An act to amend section 81 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes.

The following bill and joint resolution were severally read twice by their titles and referred to the Committee on Military Affairs:

H. R. 28469. An act granting two condemned cannon to the Wallkill Valley Cemetery Association, of Orange County, N. Y.; and

H. J. Res. 365. Joint resolution to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador.

H. R. 28766. An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes, was read twice by its title and referred to the Committee on Public Buildings and Grounds.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. CURTIS. I move that the Senate proceed to the consideration of the District of Columbia appropriation bill, House bill 28499.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28499) making appropriations to provide for the expenses of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes.

Mr. BORAH. I wish to ask the Senator in charge of the bill if he can give any estimate as to how long it will take to dispose of the bill?

Mr. CURTIS. I think the bill will be passed in the course of the afternoon. There are only three or four contested items; there are not many, at least.

Mr. BORAH. I understand the Senator from Minnesota [Mr. NELSON] has given notice that he will call up the river and harbor bill immediately thereafter. I only suggest at this time that it seems quite apparent to me we shall have to meet earlier the next day or two if we are not going to confine ourselves entirely to passing appropriation bills.

Mr. CURTIS. There is an amendment pending, Mr. President.

The PRESIDENT pro tempore. The pending amendment will be stated.

The SECRETARY. On page 33, line 14, before the word "thereof," the Committee on Appropriations report to strike out "one-third" and insert "15 per cent," so as to read:

And the Capital Traction Co. is authorized and required, within 90 days after said bridge shall be ready for the reception thereof, to remove its track from Twenty-sixth Street NW. between Pennsylvania Avenue and M Street and from M Street NW. between Twenty-sixth and Twenty-ninth Streets, and relocate the same in Pennsylvania Avenue and across the bridge herein provided for to a junction with their present tracks at Twenty-ninth Street and Pennsylvania Avenue NW., and to repave the said street space and the space on the M Street Bridge over Rock Creek from which said tracks are removed, all in accordance with plans to be approved by the Commissioners of the District of Columbia and to their satisfaction, and the same law now governing the paving and repairing of street pavements between rails and for a distance of 2 feet exterior thereto shall govern on the bridge herein provided for. And the Capital Traction Co. shall, after the completion of said bridge, pay into the Treasury of the United States, one-half to the credit of the District of Columbia and one-half to the credit of the United States, a portion of the total cost of said bridge and all incidental work thereto equal to 15 per cent thereof, and the same shall be a valid and subsisting lien against the franchises and property of said Capital Traction Co., and shall be a legal indebtedness of said company in favor of the District of Columbia, jointly for its use and the use of the United States, as aforesaid, and the said lien may be enforced in the name of the District of Columbia by bill of equity brought by the Commissioners of the said District of Columbia in the Supreme Court of said District or by any other lawful proceedings against the said Capital Traction Co.

Mr. CURTIS. Upon yesterday I had read a letter from the company stating that they had first erected their road across this bridge and then had removed it upon the direction of the District Commissioners and had built a bridge at their own expense over M Street. This cost the company about $12,000 after they had asked permission to go back to the Pennsylvania Avenue Bridge, which request was denied. They say they have no desire to go back to Pennsylvania Avenue and build their line across that bridge. The District Commissioners in their estimates ask for only 15 per cent, and the Senate committee recommend reducing the amount from one-third to 15 per cent to make it correspond with the estimate of the commissioners.

Mr. SMITH of Georgia. Mr. President, I think the House has taken the proper view of this matter. If in the progress of the city it becomes necessary to abandon an old bridge and change the thoroughfare to another point and build there a good bridge, it is but fair that the street car companies using that bridge should pay one-third of the cost.

Now, there is a large amount given to the street car companies for which they pay nothing. The original streets were built at public expense. Their franchises are known to be the most valuable franchises that are held in the land. All the growth of a city in which they have franchises adds to the value of their franchise.

There are particular points from time to time when, under equitable arrangement, if applied to that point alone, it might not be proper to charge the usual one-third of the cost of the construction of the bridge to the street car company; but, nevertheless, I think it is the practice in the cities to follow that course. That is the practice with which I am familiar. If you charged them everywhere all the benefit they received you would be charging them far more than you do charge.

The fact that in an occasional place when a public improvement is to be used by a street car company and the public also, the one-third practice places more upon the street car company than at that point might seem to be its proportionate charge is still fair, because there is such a large part of its use where the street car company does not pay any part of the great benefits which it receives.

Now, let us see just for a moment what is the effect of building a new bridge, improving the street. It is for the purpose of accommodating the public. It is for the purpose of stimulating the erection of new houses, the increase of passage of the people, the increase of population using the street. It will therefore necessarily eventually be for the benefit of the street car company, the patronage of which will increase in proportion to the value of the new improvement.

I think the view taken by the House is right, and that the one-third charge ought to be made. Therefore I urge it.

Mr. SMOOT. Mr. President, the House provision requiring the railroad to pay one-third was considered very carefully by the committee. I want to say to the Senator from Georgia that we had very little evidence to base the action of the committee on. If he will look at the hearings in the House, he will find there were about half a dozen questions asked. Col. Judson, who appeared in behalf of the item, told the members of the committee that 15 per cent was the amount that they intended to charge, and, also, he says:

In cases heretofore covered by law, 15 per cent has been the rule, but there is no general law on the subject.

I wish to say that with the meager amount of evidence that we had it was the opinion of the committee that the amount charged should be placed at 15 per cent, as recommended by Col. Judson, and in the meantime look into the matter. I will say to the Senator that I have on foot now an inquiry for additional evidence as to whether 15 per cent or whether one-third is the proper amount to charge.

Of course, if it goes into conference, the proper amount to charge can be agreed on there.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Ohio?

Mr. SMOOT. Certainly.

Mr. POMERENE. Can the Senator from Utah inform us what has been the practice heretofore in this city?

Mr. SMOOT. The practice has been to charge 15 per cent.

Mr. CURTIS. May I add also that Commissioner Judson says the 15 per cent provided in the amendment would probably be an ample amount for them to pay.

Mr. POMERENE. Upon what premises do they base their conclusion that 15 per cent would be the proper proportion?

Mr. SMOOT. I wish to say to the Senator that the details as to why 15 per cent is a just compensation for the railroads to pay are not given in the testimony, and that is what I want to find out. That is what I have already asked for.

There is one thing about this particular item, however, that I wish to mention. The Senator no doubt knows that the tracks originally were on Pennsylvania Avenue, in the same place as proposed in this bill. For some unaccountable reason, which I never could understand, they were taken from Pennsylvania Avenue and run on M Street and then returned to Pennsylvania Avenue at an exceedingly great cost to the railroad company.

Mr. POMERENE. It is a matter of common knowledge that all these bridges must be made very much heavier and very much stronger, in order to accommodate the street cars, than they otherwise would have to be. It does seem to me that 15 per cent is a remarkably small proportion to charge this company.

Mr. SMOOT. There is no question as to the strength of the present bridge. I will say to the Senator that several changes have already been made in the bridge on M Street. I do not wish to stand here pleading for the traction company, because I am in sympathy with the statement made by the Senator from Georgia. They ought to pay every cent that is just; but I do not believe, after the statement we have from Col. Judson, that we should, without any additional evidence, increase the usual charge from 15 per cent to 33⅓.

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Georgia?

Mr. SMOOT. Certainly.

Mr. SMITH of Georgia. Is it not the practice in other cities where bridges are built across streets of ordinary width, and street car companies are given the privilege of using them with double tracks, to charge them one-third? Is not that about the rule?

Mr. SMOOT. That is one of the questions about which I have already asked for information; and if that is the case, I think they ought to pay one-third, and I shall insist that they do pay it, if I should happen to be on the conference.

Mr. SMITH of Georgia. My own view of the matter is this: The commissioner simply suggested 15 per cent because that small proportion has been the usual charge here, when, in point of fact, the usual charge has been larger in other cities

The truth is the street car company gets the benefit of one-third of the traffic across a bridge of that sort, and it is right that the company should contribute that proportion of the cost.

Mr. SMOOT. The commissioners say that they are making this bridge longer and very much wider than would be necessary for the railroad because they anticipate future parking between the tracks.

Mr. BRISTOW. Mr. President——

Mr. SMOOT. Now, I am not going to insist upon this question. I am not here trying to say that the railroad company shall pay only 15 per cent if they should pay more. But I do say that, on the evidence that was before the committee, they did feel that the proper way to proceed was to accept the recommendation of the commissioners, leave it for future conference, and then decide in conference as to what the proper amount was.

Mr. BRISTOW. I should like to inquire of the Senator from Utah if the fact that the bridge has to be made very much wider is not due to the traffic of the street cars over the bridge more than to anything else, and the bridge has to be wider or the other traffic would be certainly very much interfered with because of the street cars running over the bridge?

Mr. SMOOT. No, Mr. President; all I say is what the commissioners say that they propose to make the bridge wider because of the fact that they anticipate that it will be parked.

Mr. BRISTOW. Then, I ask this for information: Will not this change in the street car lines eliminate a very inconvenient curve that is now there?

Mr. SMOOT. Mr. President, whoever made the change in the first place made a very grave and serious mistake.

Mr. BRISTOW. It will be a great convenience, not only to the street car company, but to everybody else, to have this bridge constructed, will it not?

Mr. SMOOT. I think the street car company itself would have preferred to have remained on Pennsylvania Avenue. There is no question about that.

Mr. SMITH of Georgia. I should like to ask the Senator if it is not true that the increasing traffic was such on the old bridge at that point, the double tracks so interfered with traffic, that it was almost impossible for the public and the company both to use it?

Mr. SMOOT. I did not understand that that was the reason it was changed from Pennsylvania Avenue to M Street; but I will say that the increasing traffic at M Street, with that curve as it is to-day, of course, makes it absolutely necessary now that the tracks should be removed back to Pennsylvania Avenue.

The PRESIDENT pro tempore. The question is on the amendment of the committee.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 34, after line 17, to insert:

And the Chief of Engineers, United States Army, is authorized and directed to transfer to the Commissioners of the District of Columbia the land under his jurisdiction in square 1194 which is necessary, in the judgment of said commissioners, for the construction of the aforesaid bridge and approaches.

Mr. SMITH of Georgia. Mr. President, I should like to ask the Senator in charge of the bill what he thinks is the value of this land that the Government contributes to this enterprise without compensation?

Mr. CURTIS. As I understand, it is not a very valuable tract of land, and it is absolutely necessary to carry out the former provision.

Mr. SMITH of Georgia. I shall not object to that amendment, Mr. President.

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 34, after line 23, to strike out:

That hereafter whenever, under appropriations made by Congress, the roadway of any street, avenue, or road in the District of Columbia is improved by laying a new pavement thereon or by resurfacing an existing pavement from curb to curb or from gutter to gutter, where the material used is sheet asphalt, asphalt block, asphaltic or bituminous macadam, concrete, or other fixed roadway pavement, such proportion of the total cost of the work, including the expenses of the assessment, to be made as hereinafter prescribed, shall be charged against and become a lien upon the abutting property, and assessments therefor shall be levied pro rata according to the linear frontage of said property on the street, avenue, or road or portion thereof upon the roadway of which said new pavement is laid or the existing roadway of which is resurfaced: *Provided, however,* That there shall be excepted from such assessment the cost of paving or resurfacing the roadway space included within the intersections of streets, avenues, and roads, as said intersections are included within building lines projected, and also the cost of paving the space within such roadways for which street railway companies are responsible under their charters or under law on streets, avenues, or roads where such railways have been or shall be constructed.

The assessments hereinbefore provided for shall be levied in the following manner, namely, where the average width of roadway is 32 feet or less between curbs, or between gutters where no curb exists, one-half of the total cost of the work, including the expenses of the assessment, shall be assessed as hereinbefore provided; where the average width of roadway is greater than 32 feet between curbs, or between gutters where no curb exists, one-half of the proportion of the total cost of the work which the width of 32 feet bears to the total width of the roadway between curbs, or between gutters where no curbs exist, together with one-fourth of the proportion of the total cost of the work which the balance of the roadway width in excess of 32 feet bears to the total width of the roadway, including the expenses of the total assessment, shall be assessed as hereinbefore provided.

Assessments levied under the provisions hereof shall be payable and collectible in the same manner and under the same penalty for nonpayment as is provided for assessments for improving sidewalks and alleys in the District of Columbia, as set forth on page 248 of volume 28, United States Statutes at Large: *Provided,* That the cost of publication of the notice of such assessment upon the failure to obtain personal service upon the owner of the property to be assessed therein provided for, and of the services of such notices, shall be paid out of the appropriation for the work, and such assessments when collected shall be deposited in the Treasury of the United States to the credit of the United States and the District of Columbia in equal parts.

Mr. SMITH of Georgia. Mr. President, I am very much opposed to striking out that provision. That is the provision which requires when property is improved, when new streets are built, and also when an entirely new street is made where an old street was, if the street is not over 30 feet wide, that one-fourth of the expense shall be charged to adjacent property holders on either side of the street and one-half be paid out of the Treasury.

Mr. President, that is a liberal rule to the property holder. In many of the growing cities one-third of the expense is charged to each of the adjacent property holders and one-third to the city proper.

I want to state that I have nothing but regard for the city and the District, and I do not intend to seek in any way to obstruct the progress of the city or to obstruct such legislation as will help to develop the city and to beautify it; but I only ask that property holders here be treated as well and no better, with regard to improvements, than the treatment property holders receive in the average city where the people control their own affairs. If you build a new street through any of the suburban property, to whom does the benefit principally go? It goes to the adjacent property owner; it does not go to the public. If I have a piece of acreage at the edge of the city and a splendid new street is built through it, who derives the chief benefit from that new street? I do, as the owner of the adjacent property, and I do not know——

Mr. BRISTOW. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. I do.

Mr. BRISTOW. Let me inquire of the committee when these acreage tracts are laid out do not the owners of that property contribute practically all of these streets? That is my understanding as to tracts outside of the city proper.

Mr. SMOOT. You mean the property itself?

Mr. SMITH of Georgia. Some of these streets I have driven over have practically no houses on them.

Mr. BRISTOW. As I understand it, the property owners receive no benefit from general taxation for those streets at all.

Mr. SMITH of Georgia. Certainly, the proposition is to pay all of the expenditure out of the Treasury.

Mr. BRISTOW. I do not think so.

Mr. SMITH of Georgia. Oh, yes; it is so under this bill.

Mr. BRISTOW. I think not.

Mr. CURTIS. I think the Senator from Kansas wants to know—perhaps the Senator from Georgia misunderstood him—if in certain additions the streets have not been donated. I understand such to be the case in certain additions to the city.

Mr. SMITH of Georgia. Yes.

Mr. CURTIS. As I shall desire to answer the Senator's argument later, I will not take up any more time now.

Mr. BRISTOW. In order that I may be understood I will say, to illustrate, that there is an addition to the city within the District of Columbia known as Massachusetts Avenue Heights. I happen to be acquainted with some parties who laid out that property, and they tell me they are paying for all of the improvements, that they contribute all of the streets at their own expense, that they have macadamized the streets and put down the sidewalks without it costing the District a cent.

Mr. SMITH of Georgia. All the House provision requires is that in such improvements one-half should be charged to the property holders and one-half to the Treasury.

Mr. BRISTOW. Let me understand. Does the Senator think that if New Jersey Avenue should be resurfaced, the property owners on either side should pay for that resurfacing?

Mr. SMITH of Georgia. I think the property holders even on that street should pay part of it, but not all of it.

Mr. BRISTOW. Mr. President, it seems to me that is simply a public highway in which the whole community is interested.

Mr. SMITH of Georgia. But the passage over the street by the public gives the adjacent property its value; the more who pass over it the more valuable the property that abuts upon it. It is the passage in front of a man's property in a city which makes the value of the property; the more who pass over it the more the property increases in value as compared with the property of other citizens in other parts of the city. I do not deny that ordinary repairs should be kept up by the District; that the District should maintain and keep the streets in condition, repairing ordinary breaks until finally the surface is so worn out that new surfaces must be made. While the public has used the street, the use by the public has increased the value of the adjacent property.

Take a store property; and what makes its value? It is the number of people who pass in front of it; it is the use by the public in front of it that makes it valuable for the merchant and increases the rent.

Some of these appropriations are to build new streets. Some of the appropriations which, I understand, the committee have added are for renewing old streets that are worn out, while some are for entirely new streets. I can not discuss each of these streets in detail, but I insist where the public has used to such an extent a street in front of a store property as to wear it out, they have added to the rental value of the property, and the owner has derived a benefit that the public at large have not had. I think the division of one-fourth to the property owners on each side of a street and one-half to the public at large is just about an equitable arrangement between the two.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Nevada?

Mr. SMITH of Georgia. I do.

Mr. NEWLANDS. I do not know to what item in the bill the Senator from Georgia is addressing himself, but I should like to set him right regarding some facts within my knowledge as to the development of Washington. I happen to have some familiarity with this subject. Long before I entered Congress, over 20 years ago, I became interested as a trustee of an estate in what is called the Chevy Chase enterprise, involving a strip of land on both sides of Connecticut Avenue from the Zoological Park out to Chevy Chase. That enterprise involved the construction of a railroad from the intersection of Seventh and U Streets to Chevy Chase, Md., a part of it underground, the first underground electric railroad that was constructed in the city—a railroad which was afterwards consolidated with the Capital Traction Co., the old Washington & Georgetown Railroad Co. I am, therefore, familiar with the entire operations along the line of Connecticut Avenue from the Zoological Park out to the District line, a distance of about 3 miles.

I wish to say as to that enterprise that the owners of it dedicated Connecticut Avenue from Rock Creek out to the District line without cost to the District, even acquiring, where they did not own the land, the property of others, paying for it and then dedicating it to the District. They also graded, at their own expense, that entire avenue at a cost of about $250,000, without any aid whatever from the District. They also built steel bridges across Rock Creek and across Klingle Valley for the railway without cost to the District. Those bridges afforded accommodation to the public as well as to the railway. The Senator will observe on that line of development a number of side streets.

Mr. SMITH of Georgia. I yield the floor temporarily to the Senator.

Mr. NEWLANDS. A number of side streets have been macadamized and supplied with water pipes, sidewalks, trees, and everything of that kind. I wish to say that all that work was done at the expense of the parties in this enterprise without participation, so far as I can recollect, upon the part of the District government. There might have been some work done by the District in a few places, but not upon the streets within the limits of the lands of this company, if my recollection is right. The custom is in laying out a suburban region to lay out the streets, dedicate them to the public without cost to the District, to improve them, and then to sell the lots on long time to purchasers who are seeking homes. So, the Senator will perceive that in the suburban sections almost the entire improvement is made, in the first instance, by the property holders. Then, after the streets are developed and accepted, their maintenance is provided for by the District. The property gradually drifts into the hands of the home seekers and they become taxpayers. In that way very large values were built up out in that section. I think the assessed value of that region has probably within the last 15 years been increased tenfold—at all events it has been very largely increased, and the public burdens are distributed in that way.

The streets and avenues are laid out and improved in the first instance by the property owners themselves, and then their maintenance falls on the District government, which collects constantly increasing taxes for this and other public purposes. I do not mean to say that that has been the universal rule.

There have been some exceptions in the District, but not, I think, of late years. There have been some avenues which have been largely improved at the expense of the District government. For instance, I believe Sixteenth Street extended and Massachusetts Avenue extended were in considerable degree improved after dedication at the expense of the District. That was some years ago, when it was thought advisable for the District government to share in the development of the great arteries of travel; but the Senator will observe that the great improvements recently made on both sides of Massachusetts Avenue extended near the Naval Observatory have been put there by a private company. I understand that all that work has been done by the owners of the property, and that they have not only dedicated the streets without cost to the District, but they have done also the work of macadamizing, pipe laying, pavement making, and so forth, and the District has been to comparatively no expense. So also with the subdivisions on both sides of Sixteenth Street extended.

I think a general impression prevails to the contrary regarding those regions—the impression of the casual observer—that this is public work, being done for the public at public expense, when, as a matter of fact, so far as I know, it is being done at private expense; and so far as this enterprise with which I became identified before I became a Member of Congress and in which I am still interested is concerned, I may say that there was a scrupulous effort to avoid in any degree any imposition whatever upon the public. Of course after subdivision takes place and the lots are improved by structures, the revenue of the District is largely increased through the taxes derived from these subdivisions, and it is but fair that the streets and sidewalks should be maintained out of the general fund into which these taxes go.

Mr. SMITH of Georgia. Mr. President, the statement of the Senator from Nevada simply shows that my position is right. The people with whom he has been interested paid the entire expense of building their streets. I am only asking, and the House provision only asks, that where other new streets are being improved the District do not pay all the expense.

Mr. NEWLANDS. But I think the Senator will find that the District Commissioners will not, in the first instance, help to lay out any street; they insist upon the property owners doing it.

Mr. SMITH of Georgia. There is in this bill a proposition to pave with asphalt a number of roads that are now practically impassable and which have not before been paved, and to do it entirely at the expense of the District and National Government.

Mr. NEWLANDS. But I think the Senator will probably find that those are streets that were laid out originally and improved by the property owners.

Mr. SMITH of Georgia. No.

Mr. NEWLANDS. And that now they are simply to be subjected to the expense of resurfacing.

Mr. SMITH of Georgia. I am coming to that later on. Some of these streets have never had asphalt on them; have never been made really passable streets. They are short, and 90 per cent of the improvement inures to the adjacent property. Some of the short streets in this list will not be public highways at all.

What I am insisting upon is, first, as to the streets that have never been asphalted, that have never really been made first-class streets, and that are now to be put in that condition, that the property holders who derive a large part of the benefit should pay half. In the case of the company with which the Senator was connected they paid it all.

One of the objections to permitting the District to build a complete street, short though it may be, entirely at the expense of the public is that they can asphalt all the District streets. They will do it for some and refuse it for others, and that encourages the practice of special privileges to a few at the expense of the many.

Mr. SMOOT. Mr. President, no doubt the Senator has already noticed that the provision he is supporting has reference to every street in Washington, whether it is to be improved or whether it has already been improved or whether it is to be repaired.

Mr. SMITH of Georgia. And the Senate committee has stricken it entirely out, but have put in no substitute providing that in the new streets that may be built the property owner shall pay his part.

Mr. SMOOT. Mr. President, the committee have left the law just as it is to-day. They are not changing the law that has been in existence in the District of Columbia for over a third of a century. It seems to me that the position the Senator is taking amounts to this: That a building like the New Willard Hotel, for instance, standing on property worth $30 to $40 a square foot and with 100 feet facing upon the street, would not pay one cent more for the repair or the construction of the street in front of it than the poorest man in the outskirts of the District would have to pay upon his property, and that seems to me unjust——

Mr. SMITH of Georgia. I will answer the Senator.

Mr. SMOOT. It seems to me unjust after all the streets in the principal parts of the city have been constructed under the present system, now to say to the people in the more remote parts of the District, where the property is cheap, where perhaps it is not worth more than a dollar a front foot that they shall in turn pay just as much per front foot for the construction and maintenance of a road as would the owners of the New Willard Hotel, or of the Highlands, or of some of the great buildings in the city of Washington that cost half a million dollars each.

Mr. SMITH of Georgia. I am glad that the Senator is interested in the little places on the outside and thinks that the owners of the New Willard Hotel and of the big property on the inside should pay their share. I shall assume that they will pay their share. The small houses in the outlying sections are on narrower streets, as a rule, and the character of the streets is different. You do not put asphalt on streets away out in the suburbs, and the expense is far less. When you put down sidewalks or improve streets there they do not have the volume of use and will last much longer, and by adopting the proposition that when they wear out they are to be repaved at the expense of adjacent property holders, you put upon the property in the center of the city, of much more value, the burden of repaving when the increased traffic wears out the roadway.

Mr. SMOOT. Mr. President——

Mr. SMITH of Georgia. Mr. President, I do not yield to the Senator now. I want to go on with my line of thought.

The PRESIDENT pro tempore. The Senator from Georgia declines to yield.

Mr. SMITH of Georgia. Now, what has made the property on the outside of any value? It is the streets leading to it. By the growth of the city and central improvements farms have been changed to city lots. The Senator from Nevada [Mr. NEWLANDS] says that upon the outside property to which he has referred the owners actually did all the improvements themselves; they paid all the expense for streets themselves.

If they once have a good pavement opposite the small properties on the outside at an ordinary place, if properly kept up by the District authorities, it will last a lifetime, while here in the center an asphalt pavement adjacent to the more valuable property, such as the New Willard, constantly used by great travel, will wear out speedily. If we will call upon this property when the asphalt wears out to contribute its part for renewal, and if we will tax it for what it is worth, or 65 per cent of what it is worth, making the percentage of tax it pays equal in proportion to its actual value to the assessment on the outside property, we will even up the burdens.

Mr. President, I have had some experience in this matter. I am fortunate enough to own some central real estate in quite a growing and prosperous city. The sidewalks are made and charged to my property. When the street in front is improved two-thirds of the expense is charged to the adjacent property holders and one-third to the city at large. I think that is a practice that exists in all cities except this.

I am only asking that there be applied to the city of Washington the same rule with regard to taxing and paving and improvements, and the same rules with regard to traction companies, that are applied in other cities. When we say that the property owners on each side of a street are to pay one-fourth for improvements of this kind, we do not even then make the property holders pay for all of the benefit they receive. It is an equitable arrangement.

Take some of the short streets that it is proposed by this bill to pave. The public at large are not concerned in them. The real value is to the adjacent property; and these are, in so far as I have been able to judge them, the kinds of property, away out on the outskirts where the poor man's home, to which the Senator from Utah refers, has been built.

I am asking only, and the House provision will require only, that where a street improvement is made the benefit of which goes especially to the adjacent property holder he shall pay somewhat in proportion to the benefit he gets; and where it goes but in small part to the public at large the Public Treasury shall carry only a part of the burden. That is what the House provision means.

I stated before that my own experience has been to pay one-third—to pay all for the sidewalk, all for the curbing, all for the renewal of the sidewalk from time to time, and one-third for the street unless there is a street car track on it, in which event the street car company pays for the paving between its rails and 2 feet on each side of them; if it is a double-track railroad it pays for 2 feet on each side of the double track, and the balance of the expense of paving the street is charged up, one-third each to the adjacent property holders, and one-third to the people at large.

This is simply an effort to let those who get the benefit pay for the benefit rather than to take the money of the whole people and distribute it as special gifts to a few people.

Mr. CURTIS. Mr. President, the Senate committee, in reporting this bill, struck out this amendment because it changes the organic law of the District. I want to read the organic law, and then I want to call attention to the difference of the rights in the streets in the city of Washington as compared with other cities. I propose to take only a few moments.

The organic act provides:

> The cost of laying down said pavement, sewers, and other works, or of repairing the same, shall be paid for in the following proportions and manner, to wit:
>
> When any street or avenue through which a street railway runs shall be paved, such railway company shall bear all of the expense for that portion of the work lying between the exterior rails of the tracks of such roads and for a distance of 2 feet from and exterior to such track or tracks on each side thereof, and of keeping the same in repair; but the said railway companies, having conformed to the grades established by the commissioners, may use such cobblestone or Belgian blocks for paving their tracks, or the space between their tracks, as the commissioners may direct. The United States shall pay one-half of the cost of all work done under the provisions of this section, except that done by the railway companies, which payment shall be credited as part of the 50 per cent which the United States contributes toward the expenses of the District of Columbia for that year; and all payments shall be made by the Secretary of the Treasury on the warrant or order of the Commissioners of the District of Columbia, or a majority thereof, in such amounts and at such times as they may deem safe and proper in view of the progress of the work.

That is the organic act. The organic act was so provided in that way because of the peculiar conditions existing in the city of Washington. I judge that this is the only city in the United States where the absolute title to the streets in fee simple is in the Government.

Mr. SMITH of Georgia. I do not know about that. In my own State the title to all the streets is in the State, not the municipality.

Mr. CURTIS. Yes; but when a street is vacated, the title to the land goes to the adjoining property holders, does it not? That is not true in this District.

Mr. SMITH of Georgia. No; it does not, unless the legislature consents.

Mr. CURTIS. It does in several States in which I have looked up the law. When a street is vacated, the title to the land goes to the abutting property owners.

I read from the case of Van Ness *v.* City of Washington (4 Pet., p. 286):

> But it is sufficient for us, that here there is a solemn conveyance, which purports to grant an unlimited fee in the streets and squares, to the use of the United States; and we know of no authority which would justify us in disregarding the terms or limiting their import where no mistake is set up and none is established.

Mr. President, there is another reason why this change should not be made, and that is the peculiar conformation of the streets and lots in the city of Washington. Some of the lots, with a frontage, we will say, of 25 or 50 feet, or whatever it may be, have a depth of only 10 or 15 or 20 feet. Under this bill the owner of a lot 15 or 20 feet deep would pay just as much for paving the street in front of it as a man who owns a lot of the same frontage 110 or 125 feet deep.

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Georgia?

Mr. CURTIS. Certainly.

Mr. SMITH of Georgia. What would a man do with a lot 15 feet deep? Where is such a lot located?

Mr. CURTIS. Oh, there are plenty of them here. Their shape results from the conformation of the streets, and some of them have very small buildings on them. I doubt if there is any other city in the country where the streets are laid out just as they are in this city, leaving so many small tracts as they have here. If the Senator has gone over the city he has found in many places little squares or small tracts, often not built up with houses, but used simply as storage places or dumps. You will find lots of them here in the city. I went around myself and saw many of them, and, thinking that they belonged to the city, I asked the District Commissioners if they could not clean

them out. The commissioner who was with me said they could not do so, because the property did not belong to the Government; it was owned by some private individual and was used simply as a storage place. Some of these places are eyesores to the community.

Mr. SMITH of Georgia. I will ask the Senator whether it would not be a good plan, then, to sell them out under execution and get rid of them, if they are eyesores to the community?

Mr. CURTIS. If the party had bought them it would hardly be fair to sell them out. It would hardly be fair to a poor man, who might have his last dollar invested there, to sell him out.

I should like to have read, in this connection, a letter on this subject written by George Truesdell, chairman of the committee on municipal finance. I think it answers some of the questions raised here much better than I can, and covers the situation fully.

The PRESIDENT pro tempore. Without objection, the letter will be read.

The Secretary read as follows:

WASHINGTON BOARD OF TRADE,
Washington, D. C., February 12, 1913.

Hon. FRANCIS E. WARREN,
Chairman Committee on Appropriations, United States Senate.

DEAR SIR: Your letter to Mr. Eynon, secretary of the Washington Board of Trade, stating that on account of pressure of business upon the members of the subcommittee in charge of the District of Columbia appropriation bill and in view of the lateness of the session it has not been definitely determined that hearings on the District bill will be granted has been referred to the committee on municipal finance.

Following your suggestion that the matter which the board of trade desires to present to the subcommittee be typewritten in as concise form as possible and sent to the committee by messenger at the very earliest moment possible, I have, as chairman of the committee on municipal finance, been requested to submit the following:

One of the objectionable amendments to the District bill adopted by the House of Representatives which the board of trade believes will work great hardship and injustice if enacted into law is the Borland amendment (p. 31, after line 6), which proposes to permanently change the plan of paying for paving and resurfacing streets in the District of Columbia by assessing one-half the cost of the same upon the abutting property instead of paying the whole cost from the general fund, as has been the practice under the organic act since 1878. The method of paying for such work by assessing a part of the cost upon the abutting property similar to the one proposed in the Borland amendment was given a thorough trial in the District during the reign of the board of public works, and after a searching investigation of District affairs by a joint select committee of Congress, lasting for several months, it was found it had wrought so much distress and injustice upon small property holders and so many inequalities upon all classes of property that it was discarded, and the plan now in vogue of paying for the same out of the general fund was substituted therefor.

However successful the Borland method may have been elsewhere, the plan upon which the city of Washington is laid out, with broad, rectangular streets and wide radiating avenues, varying in width from 85 to 160 feet, with numerous public squares, circles, and triangular reservations, does not lend itself to any equitable system of assessing the cost of paving the carriageways on a front-foot basis. Aside from the distress wrought upon the small property holders under this system, it was found, under the vast system of improvements inaugurated by the board of public works, impossible to devise any uniform and equitable method of applying the law to the large number of irregularly shaped lots varying greatly in depth and frontage in proportion to depth. In some instances triangular lots with broad sides on a paved street were eaten up by excessive taxation. Numerous suits grew out of this system of assessing, and it required several years to revise the assessments and a special act of Congress under which drawbacks aggregating hundreds of thousands of dollars were issued to property holders for overpayments.

No one who is familiar with the operation of this ill-advised system in Washington would ever advocate a return to it. On its face it appears to be reasonable that some part of the cost of paving the carriageways should be assessed upon the abutting property, because there is unquestionably some benefit resulting from the improvement. But it is impracticable to assess the benefits equitably, and in the long run complete justice will be done to all by defraying the cost from the general fund. Under the present law, in force for 35 years, the small property holder in the suburbs and on many of the unimproved streets of the city has contributed toward the payment in the older portions of the city, and now, when he is about to have his own street paved, he is, if the proposed change is made, to be assessed for costs. There is no demand for this change, and it would work great hardship and injustice upon a deserving class of small property holders in the suburbs and elsewhere who are paying for their homes in monthly installments. Moreover the proposed change would not reduce the tax on any property in the District a single dollar, and there is no public necessity for such a change, nor is there much analogy between this system and the existing law under which sidewalks and alleys are paved where the benefits are almost wholly local. The present revenues are adequate for all the work estimated for by the commissioners and aggregating several millions of dollars more than the House of Representatives has appropriated in the present bill.

Some charges have been made on the floor of the House of Representatives in support of this change that primeval forests have been leveled and streets paved through them and through waste places for the benefit of speculators, one-half at the expense of the United States, and that the Borland amendment, if it becomes a law, will check such expenditures. The charge is absolutely without foundation, all such work having been done wholly at the expense of the property holders, so far as paving streets is concerned, thereby increasing largely the revenues of the District. Moreover, under the existing law no street can be paved in the District at the expense of the public without a specific appropriation therefor, which, of course, is wholly under the control of the Appropriation Committees and Congress.

There are a number of items in this bill as it passed the House of Representatives which are made payable wholly from the revenues of the District in violation of the organic act. The Washington Board of Trade pleads for the integrity of that compact and protests vigorously against each and every departure from it by Congress. In behalf of the people of this Federal District, who are without direct representation in Congress, it respectfully urges upon your honorable committee to permit no infractions of that just measure, which has been pronounced a constitution by the Supreme Court of the United States in Ecklog v. The District of Columbia (135 U. S., 24, 243, 244).

The maintenance of the half-and-half plan, the vital feature of this constitution, is absolutely essential to the health, comfort, and convenience of the inhabitants of this Capital, and of all those persons who come here on public or private business, if it is to be maintained on the scale intended by its founders. In this connection your attention is invited to a report of the board of trade upon the financial relations of the District of Columbia and the Federal Government from 1871 to 1912, unanimously adopted January 19, 1912, a copy of which is sent herewith, with a request that it be considered a part of this communication and included in the printed record of the hearings.

Yours, very respectfully,

GEO. TRUESDELL,
Chairman Committee on Municipal Finance,
Washington Board of Trade.

Mr. SMITH of Georgia. Mr. President, I must say that I consider that a very rare letter. Some parts of it are really humorous. The writer says nobody is demanding this change; that the present arrangement is satisfactory. He actually says there is a constitution binding the United States Government to carry half of the entire expenses of the District, and he cites a Supreme Court decision. I shall take occasion later on to call attention to that decision; and I think I shall show that the writer of the letter is at least not an accurate lawyer.

There is some demand for this change. The House of Representatives have demanded it. This gentleman does not seem to think anybody has demanded it, even though the House of Representatives have seen fit to put it into an act of Congress. It is their duty to demand it. Some one else is interested in this matter besides the local board of trade. The people of the entire country are contributing one-half of the money that supports this District, and the people of the entire country have a right to say that the citizens of this District, when property holders, shall be treated as citizens of other cities are treated.

The writer of this letter undertakes to point out some peculiarity about the streets of this city that takes them entirely out of the ordinary rule. There are narrow places and sharp corners in other cities as well as in this city. But I do not desire to pursue the discussion further, just at this time, with such a scant attendance. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Georgia suggests the absence of a quorum, and the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	du Pont	O'Gorman	Smith, Ga.
Bacon	Gallinger	Oliver	Smith, Md.
Bourne	Gamble	Overman	Smith, S. C.
Bradley	Gardner	Owen	Smoot
Brady	Johnson, Me.	Page	Thomas
Brandegee	Jones	Penrose	Thornton
Bristow	Kenyon	Percy	Townsend
Burton	Kern	Pomerene	Warren
Chamberlain	Lea	Richardson	Webb
Clapp	Lippitt	Root	Works
Clarke, Ark.	Martin, Va.	Sheppard	
Curtis	Myers	Shively	
Dillingham	Nelson	Smith, Ariz.	

The PRESIDENT pro tempore. Forty-nine Senators have answered to their names. A quorum of the Senate is present.

Mr. SMITH of Georgia. Mr. President, I have hurriedly looked through this decision in 135 United States. There is nothing in it that conflicts with the early case in 20 Howard, Smith against The Corporation of Washington, in which the Supreme Court of the United States held that the title to the streets was in the Federal Government as trustee for the people, and that there was no difference between the relation of the Federal Government to the streets here and the relation of the sovereignty to the streets in most cities. The court held that the Federal Government was merely trustee for the benefit of the people, and that no different relation was created here from that which exists elsewhere.

We have, therefore, no basis sustained for applying a different rule here with reference to street improvements than exists in other cities, except that the National Government pays one-half of all of the expenses, and therefore the people of the entire country, rather than the people of the District of Columbia, bear this burden.

In urging that the House provision be adopted, I am asking only to apply to the District of Columbia the same rule in regard to street improvements that other cities apply, and that the individual property holder whose property is especially improved by a street placed in front of it shall carry a special part of the burden incident to the expense of making the improvement. The House provision puts the rule in a form that is

liberal to the property holder when it requires only one-fourth of the expense to be paid by each of the adjoining property holders, and one-half from the Treasury.

Mr. WORKS. Mr. President, I should like to ask the Senator from Georgia how the expense of paving streets in front of Government property is paid.

Mr. SMITH of Georgia. Here in the District of Columbia, or in other cities?

Mr. WORKS. Here in the District.

Mr. SMITH of Georgia. It is paid out of the Treasury, one-half by the General Government and one-half by the District of Columbia.

Mr. WORKS. Is any part of it, in that case, assessed against individuals?

Mr. SMITH of Georgia. Not at all; but the Government, owning the property, has paid one-half of the whole cost of it, an amount equal to that which this bill would assess to the adjoining property holders.

Mr. WORKS. And the property owners of the District have been taxed to pay the other half. Under those circumstances why should the Government insist that from this time on the property owners shall pay the whole expense of improving the streets?

Mr. SMITH of Georgia. I am not asking for that at all. I am asking only that they shall pay half of it.

Mr. WORKS. Half of it, then. Why should there be any change made from existing conditions, under which the Government has had its property improved, and other property owners within the District have not been compelled to pay one-third or one-half of the expense, or any other amount? If from this time on the property owners are compelled to pay one-third of the expense, of course they are put at an entirely unjust disadvantage as compared with improvements that have been made heretofore under the rules that have previously existed.

Mr. SMITH of Georgia. And because we have been improperly taking the money of all the people and giving it to part of the people, having had the fact brought to our attention, according to the argument of the Senator from California we must continue to follow that policy, even though it is apparent that it has not been fair; and in the future we must not compel the property holder to bear his just burden because in the past we have not done it.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from California?

Mr. SMITH of Georgia. Yes.

Mr. WORKS. I am not putting it solely upon that ground. I agree thoroughly with what is stated in the letter that has been read here, that it is next to impossible to assess the property equitably when we come to consider the irregular condition of the streets and the irregular shapes and sizes of the lots. It will be next to impossible, it seems to me, to make any equitable assessment under those circumstances by which the people are required to pay according to the frontage of their ownership.

Mr. SMITH of Georgia. Mr. President, that line of argument has already been presented here, and I have replied to it and shown that in other cities where this practice is followed you find triangular lots. They are discovered in nearly every city. It is not suggested even that the application of this provision to the proposed improvement would create any injustice at all. No places are pointed out where the charges put against the property holders who are to be benefited by one-half of the improvement would in any sense be an injustice to them. At a later time, if there are peculiar triangular lots here, we could modify this rule when we come to improvements around them and take care of anything that would be unjust.

I see in this bill the expenditure of money to build new streets in front of practically unimproved property at a number of places where the money is not spent for the public at large, but more than half of it for the benefit of the individuals owning property on those streets. It is in this condition that the House sought to impose upon the people whose property is to be benefited a rule similar to that which stands in other cities, but more liberal and with a smaller charge than the rule applied in other cities.

As I said before, the rule with which I am acquainted is to charge one-third on all the adjacent property holders and one-third to the city. The House provision places only one-fourth upon each of the adjacent property holders and one-half on the Public Treasury. I think it is fair and it is equitable. There may be some criticism upon it occasionally, but it is far more equitable than to take the money of all the people to improve this property for a few of the people.

Mr. SMOOT. Mr. President, when I referred to the injustice of assessing property by the linear-foot frontage, the Senator from Georgia undertook to show that the reference cited by me was rather an erroneous one, because the paving which is outside the center of the city was not traveled upon so much and therefore did not wear out so quickly, hence did not cost so much to maintain, and that being the case it became a just assessment. He stated that the paving in front of the Willard Hotel wore out much more rapidly and the expense of repairing was much greater than the paving would be upon one of the side streets in the northwestern or northeastern part of the city.

Let me call the Senator's attention to the fact that there is almost as much injustice in the case of the property on the two sides of the street in front of the New Willard Hotel or upon Sixteenth Street or upon Connecticut Avenue under the system of assessment that he proposes as there is if we compare the assessment at the New Willard Hotel to the streets he referred to.

Take the New Willard Hotel property. Say that it has a frontage of 100 feet; then take the property on the other side of the street. There is just as much wear and tear upon the pavement of one side of the street as the other. The New Willard Hotel cost, no doubt, over a million dollars to erect. On the other side of the street the property cost very little indeed. Yet under the system the Senator proposes the property on both sides of the street would pay exactly the same amount for keeping the pavement in order.

Take Sixteenth Street, which we all know, and which will perhaps be known hereafter as the Avenue of the Presidents. We find a little shanty on one side—and there are a number of them—and perhaps the depth of the property is not more than 45 feet; upon the other side of the street, with perhaps no more frontage, but with a residence that cost a quarter of a million dollars upon the land.

Under the system that the Senator proposes the assessment for maintaining repairs of the street upon Sixteenth Street would be exactly the same to the little cottage as it is to the palace upon the other side.

Take Connecticut Avenue, let us refer to the Highlands, a building that cost over a half a million dollars, with perhaps a hundred feet frontage. Immediately across the street we find a vacant lot. Under the system proposed the maintenance of the street would be just as expensive on the vacant property as it would be upon the property known as the Highlands.

So I could take the Senator all over the city and show him that he is proposing a system of taxation unjust to the landowner of the District.

The Senator says that the people of the entire country pay the expense. I believe the American people from one end of the land to the other take as much interest in the beautifying of Washington, their Capital, as do the people living directly in the city; and it seems to me that the people of the United States are not unjustly taxed when we take into consideration the property in the District that is owned by the Government and which it does not pay taxes upon. Take the great parks around Washington——

Mr. SMITH of Georgia. Does the Senator say it does not pay a single cent of tax?

The PRESIDENT pro tempore. Will the Senator permit the Chair to suggest that before interrupting a Senator he must address the Chair and obtain permission. The rule requires it. Does the Senator from Utah yield to the Senator from Georgia?

Mr. SMOOT. Gladly.

Mr. SMITH of Georgia. Does the Senator claim that the Government pays nothing as a tax on its property? What does it pay?

Mr. SMOOT. Not outside of one-half. It pays it for the maintenance of the city government because of the very fact that the Government owns so much property in the District. As I was about to say, take Rock Creek Park and all the other parks that we have around the city, as well as all the Government buildings and vacant property. You do not find them in any other city of the United States. The conditions in this city are not to be compared with any other city, because a comparison of that kind would be unjust indeed.

Therefore, Mr. President, I think that the provision of the House was absolutely unjust to the District of Columbia. This has been often thrashed out. It has been referred to by the Senator from Kansas. In 1874 it was decided, and decided after a most exhaustive investigation, that the only just way of taxing the District was the half-and-half system.

I sincerely trust, Mr. President, that the Senate will disagree to the provision put in the bill by the House.

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. The Senator from Georgia will pardon the Chair for a moment. In view of the condition of the public business, the Chair feels constrained to read Rule XIX, or a portion of it:

No Senator shall interrupt another Senator in debate without his consent, and to obtain such consent he shall first address the Presiding Officer; and no Senator shall speak more than twice upon any one question in debate on the same day without leave of the Senate, which shall be determined without debate.

The Chair reads this rule to admonish Senators.

Mr. SMITH of Georgia. Mr. President, I desire to take only two minutes to reply to one part of the speech of the Senator from Utah.

The PRESIDENT pro tempore. The Senator from Georgia will proceed.

Mr. SMITH of Georgia. The Senator referred to the proposition that the Government pays no tax on property. He then said it was true the half-and-half doctrine existed, and he called attention to the fact that the Government owns the parks. What does it own them for? The people. If the Government owns them, then it is simply that much contribution to the city; and it is entirely an unsound view of the Senator that the Government should pay taxes on parks that it gives to the city.

I am not attacking the half-and-half principle; I am applying my argument solely to the street improvements, and asking that the same rule which exists practically everywhere else shall exist in the District of Columbia.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. SMITH of Georgia. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary called the roll.

Mr. DILLINGHAM (after having voted in the affirmative). I withhold my vote, owing to the general pair I have with the senior Senator from South Carolina [Mr. TILLMAN], who has not voted.

Mr. SUTHERLAND. Has the Senator from Arkansas [Mr. CLARKE] voted?

The PRESIDENT pro tempore. That Senator has not voted.

Mr. SUTHERLAND. I have a pair with that Senator, and therefore withhold my vote.

Mr. SMITH of Michigan (after having voted in the affirmative). I voted inadvertently. I notice my pair, the junior Senator from Missouri [Mr. REED], has not voted. I take the liberty of transferring that pair to the Senator from Connecticut [Mr. MCLEAN], and will allow my vote to stand.

Mr. DILLINGHAM. I transfer my pair with the senior Senator from South Carolina [Mr. TILLMAN] to the Senator from Nebraska [Mr. BROWN] and vote. I vote "yea."

The result was announced—yeas 45, nays 19, as follows:

YEAS—45.

Bankhead	Dillingham	Martin, Va.	Smoot
Bourne	du Pont	Nelson	Stephenson
Bradley	Fall	Oliver	Swanson
Brandegee	Fletcher	Page	Thornton
Bristow	Foster	Penrose	Townsend
Burnham	Gallinger	Percy	Warren
Burton	Gamble	Perkins	Wetmore
Catron	Gardner	Poindexter	Williams
Chamberlain	Johnston, Ala.	Richardson	Works
Clapp	Jones	Root	
Crane	Lodge	Smith, Md.	
Curtis	McCumber	Smith, Mich.	

NAYS—19.

Ashurst	Kern	Owen	Smith, S. C.
Bacon	La Follette	Sheppard	Stone
Gore	Martine, N. J.	Shively	Thomas
Gronna	Myers	Simmons	Webb
Kenyon	Overman	Smith, Ga.	

NOT VOTING—31.

Borah	Crawford	Johnson, Me.	Pittman
Brady	Culberson	Kavanaugh	Pomerene
Briggs	Cullom	Lea	Reed
Brown	Cummins	Lippitt	Smith, Ariz.
Bryan	Dixon	McLean	Sutherland
Chilton	Guggenheim	Newlands	Tillman
Clark, Wyo.	Hitchcock	O'Gorman	Watson
Clarke, Ark.	Jackson	Paynter	

So the amendment was agreed to.

The Secretary resumed the reading of the bill.

The next amendment was, under the head of "Sewers," on page 37, line 10, after the word "sewers," to strike out "$130,000" and insert "$155,000," so as to make the clause read:

For suburban sewers, $155,000.

The amendment was agreed to.

Mr. SHEPPARD. Mr. President, I want to insert in the RECORD at this point a statement showing the per capita expense of administration in cities in the United States of 300,000 or over. The statement shows that the only cities in this class with a larger per capita expense than Washington are New York, Boston, San Francisco, Cincinnati, and Los Angeles. Washington has a larger per capita expense than any of the remaining 12.

The PRESIDENT pro tempore. Without objection, the statement will be printed in the RECORD.

The statement referred to is as follows:

1. New York	$50.55
2. Chicago	27.45
3. Philadelphia	27.27
4. St. Louis	28.04
5. Boston	44.10
6. Cleveland	28.65
7. Baltimore	27.65
8. Pittsburgh	35.01
9. Detroit	23.39
10. Buffalo	33.29
11. San Francisco	42.43
12. Milwaukee	25.21
13. Cincinnati	41.50
14. Newark	31.88
15. New Orleans	25.62
16. Washington	35.04
17. Los Angeles	49.71
18. Minneapolis	29.66

Mr. OWEN. I should like to call the attention of the Senate to the fact that the District of Columbia has no practical organized government. Its authority is exercised by 17 different heads. The city ought to be given a charter that will be a model charter for the cities of the United States. I simply make that suggestion while this matter is up, because it accounts for the very high cost of the per capita of expenditures in this city. At a future time I shall call the attention of the Senate more directly to it.

Mr. WORKS. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Senator from California offers an amendment, which will be stated.

The SECRETARY. After line 15, on page 38, it is proposed to insert the following proviso:

Provided, That laborers on the streets shall be paid not less than $2 per day.

Mr. CURTIS. I accept that amendment, if the Senate does not object.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from California [Mr. WORKS].

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Streets," on page 39, after line 3, to insert:

Bathing beach: For superintendent, $600; watchman, $480; temporary services, supplies, and maintenance, $2,250; for repairs to buildings, pools, and the upkeep of the grounds, $1,500, to be immediately available; in all, $4,830.

For the construction, by contract or otherwise, of an underground drain from the fountain lying south of the White House, across the grounds of the White House (reservation No. 1) and of the Washington Monument (reservation No. 2) to the bathing beach near Seventeenth and B Streets NW., $2,500; and the Commissioners of the District of Columbia are authorized to enter said reservations for the purpose of installing said drain.

The commissioners shall submit for the consideration of Congress, in the annual estimates for the government of the District of Columbia for the fiscal year 1915, detailed estimates for the construction of not exceeding two public bathing beaches, with all necessary buildings, on separate sites other than that now used and where tidal water shall be constantly available for bathing purposes.

Mr. CURTIS. I offer the amendment to the amendment which I send to the desk.

The PRESIDENT pro tempore. The Senator from Kansas offers an amendment to the amendment, which will be stated.

The SECRETARY. On page 39, line 15, after the word "drain," in the amendment reported by the committee, it is proposed to insert:

Provided, That the time, plans, and manner of doing the work shall first be approved by the officer in charge of public buildings and grounds in accordance with such restrictions as he may decide to be necessary for the protection of the property and interests of the United States.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 40, line 11, after the word "playgrounds," to strike out "$5,000" and insert "including not to exceed $100 for rent of storage houses, under the direction and supervision of the commissioners, $7,535," so as to make the clause read:

Playgrounds: For maintenance, equipment, supplies, tools, construction of toilet facilities and wading pools, fencing, grading, and repairs, including labor and materials, and necessary incidental and contingent expenses for all playgrounds, including not to exceed $100 for rent of storage houses, under the direction and supervision of the commissioners, $7,535.

The amendment was agreed to.

The next amendment was, on page 41, line 3, after the word "playgrounds," to strike out "$26,275" and insert "$28,810," so as to make the clause read:

In all, for playgrounds, $28,810, which sum shall be paid wholly out of the revenues of the District of Columbia.

The amendment was agreed to.

The next amendment was, under the head of "Public schools," on page 46, line 15, after the words "public schools," to strike out "$5,000" and insert "$6,000," and in line 22, after the words "in all," to strike out "$52,700" and insert "$53,700," so as to make the clause read:

Officers: Superintendent of public schools, $6,000; 2 assistant superintendents, at $3,000 each; director of intermediate instruction, 13 supervising principals, and supervisor of manual training, 15 in all, at a minimum salary of $2,200 each; secretary, $2,000; clerks—1 $1,400, 2 at $1,000 each, 1 to carry out the provisions of the child-labor law, $900; 2 stenographers, at $840 each; messenger, $720; in all, $53,700.

Mr. SMITH of Georgia. Mr. President, I desire to call attention to the word "minimum" found in line 19, where the language is "at a minimum salary of $2,200 each." I am satisfied that is a misprint and that the word should be "maximum." They fall below the assistant superintendents, and they only get $3,000.

Mr. CURTIS. The word "minimum" is correct. They go up from that.

Mr. SMOOT. That is the lowest amount paid, and they go from that amount up.

Mr. SMITH of Georgia. There is no maximum?

Mr. CURTIS. That is the lowest. They go up from that.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 53, after line 13, to strike out "Conduit Road, Chain Bridge Road, Fort Road, and Fort Slocum Schools, four janitors, at $150 each; in all, $600"; and in lieu thereof to insert, "Conduit Road, Chain Bridge Road, and Fort Slocum Schools, three janitors, at $150 each; in all, $450."

The amendment was agreed to.

The next amendment was, on page 53, line 25, after the words "In all," to strike out "$122,940" and insert "$122,790," so as to read:

In all, $122,790.

The amendment was agreed to.

The next amendment was, on page 54, line 5, before the word "medical," to strike out "Chief medical inspector of public schools, $1,800; twelve," and insert "Thirteen," and in line 9, after the words "in all," to strike out "$7,800" and insert "$6,500," so as to read:

Medical inspectors: Thirteen medical inspectors of public schools, one of whom shall be a woman, two of whom shall be dentists, and four of whom shall be of the colored race, at $500 each; in all, $6,500.

The amendment was agreed to.

The next amendment was, on page 55, line 14, after the words "provided for," to strike out "including an allowance of $300 for livery of horse for the superintendent of janitors," so as to make the clause read:

For contingent expenses, including furniture and repairs of same, stationery, printing, ice, purchase and repair of equipment for high-school cadets, and other necessary items not otherwise provided for, and including not exceeding $1,000 for books, books of reference, and periodicals, $47,500.

The amendment was agreed to.

The next amendment was, on page 56, after line 14, to strike out:

For the purchase of a motor car for the superintendent of schools at a cost not exceeding $1,000, and for the purchase of a motor delivery vehicle, at a cost not exceeding $2,000, the maintenance of the said motor vehicles, including the hire of drivers of both vehicles, not exceeding $600 per annum each, $4,200.

The amendment was agreed to.

The next amendment was, on page 57, after line 13, to insert:

Toward the construction of a new Central High School on the site purchased for that purpose and toward the grading and other work necessary to prepare the site, the grading of an athletic field, the construction of retaining walls, and the construction of an athletic stadium, and the total cost of said work shall not exceed $1,200,000 under contracts which are hereby authorized therefor, $300,000.

Toward the construction of a new M Street High School for colored pupils, on the site purchased for that purpose, and toward the grading of said site, and the total cost of said building shall not exceed $550,000, under contracts which are hereby authorized therefor, $150,000.

Mr. SMITH of Georgia. Mr. President, as to the high-school amendments, I desire to submit a point of order. As to the grammar school, however, beyond the Soldiers' Home, I do not desire to raise any objection at all.

Mr. CURTIS. I ask unanimous consent to pass over the items in reference to the Central High School and the M Street High School.

Mr. SMITH of Georgia. As to the items in reference to the two high schools, I should like to state just this much with reference to the matter: My objection is not to the high schools; I should be glad to vote money for high schools of smaller size; but I am opposed to congregating 2,600 children in one high school.

The PRESIDENT pro tempore. Without objection, the two items referred to will be passed over for the present.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 58, after line 5, to insert:

For the erection of a 16-room building on the site purchased west of Soldiers' Home Grounds, south of Rock Creek Road, $128,000.

The amendment was agreed to.

Mr. CURTIS. I offer an amendment, to come in on page 61, line 13.

The PRESIDENT pro tempore. The Senator from Kansas offers an amendment, which will be stated.

The SECRETARY. On page 61, line 13, before the word "privates," it is proposed to strike out "forty-nine" and insert in lieu thereof "fifty-eight."

Mr. CURTIS. I will say that I offer that amendment because, if they are not provided for in this bill, nine men may have to be discharged on the 1st of July.

Mr. SMITH of Georgia. What is the purpose of the amendment?

Mr. CURTIS. I offer the amendment because there are now nine extra men, and I am advised that if they are not provided for they may have to be discharged on the 1st of July, and it is not desirable to have them discharged.

Mr. POMERENE. May I ask that the amendment be again stated?

The PRESIDENT pro tempore. The Secretary will again state the amendment.

The SECRETARY. On page 61, line 13, before the words "privates of class 1," it is proposed to strike out "forty-nine" and to insert "fifty-eight."

The PRESIDENT pro tempore. Without objection, the amendment is agreed to, and the Secretary will correct the total.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Fire department," on page 65, after line 2, to insert:

Hereafter no member of the fire department shall, unless on leave of absence, go beyond the confines of the District of Columbia or be absent from duty without permission; and leaves of absence exceeding 20 days in any one year shall be without pay and require the consent of the commissioners, and such year shall be from January 1 to December 31, both inclusive, and 30 days shall be the term of total sick leave in any year without disallowance of pay; and leave of absence with pay of members of the fire department of the District of Columbia may be extended in cases of illness or injury incurred in line of duty upon recommendation of the board of surgeons, approved by the Commissioners of the District of Columbia, for such period exceeding 30 days in any calendar year as in the judgment of the commissioners may be necessary.

The amendment was agreed to.

The next amendment was, on page 66, line 7, after the word "items," to strike out "$25,000" and insert "$26,000," so as to make the clause read:

For contingent expenses, horseshoeing, furniture, fixtures, oil, medical and stable supplies, harness, blacksmithing, gas and electric lighting, flags and halyards, and other necessary items, $26,000.

The amendment was agreed to.

The next amendment was, on page 66, line 8, after the words "in all," to strike out "$130,800" and insert "$131,800," so as to read:

In all, $131,800.

The amendment was agreed to.

Mr. CURTIS. Mr. President, I offer an amendment to come in on page 66, line 16.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 66, after line 16, it is proposed to insert:

For one combination chemical engine and hose wagon, $6,000.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Health Department," on page 68, line 1, after the word "exceeding," to strike out "$10,000" and insert "$15,000," so as to read:

For the enforcement of the provisions of an act to prevent the spread of contagious diseases in the District of Columbia, approved March 3, 1897, and an act for the prevention of scarlet fever, diphtheria, measles, whooping cough, chicken pox, epidemic cerebrospinal meningitis, and typhoid fever in the District of Columbia, approved February 9, 1907, and an act to provide for registration of all cases of tuberculosis in the District of Columbia, for free examination of sputum in suspected cases, and for preventing the spread of tuberculosis in said District, approved May 13, 1908, under the direction of the health offi-

cer of said District, and for the prevention of other communicable diseases, including salaries or compensation for personal services, not exceeding $15,000.

The amendment was agreed to.

The next amendment was, at the top of page 71, to insert:

The action of the commissioners in locating a pound and stable for the health department on reservation No. 290, located along James Creek Canal at the intersection of South Capitol and I Streets SE., under the authorization contained in the District appropriation act approved March 2, 1911, is ratified and confirmed, and the jurisdiction and control over said reservation is transferred to the Commissioners of the District of Columbia: *Provided*, That the District of Columbia shall pay to the United States as compensation for the land contained in said reservation one-half the estimated value thereof, namely, $4,100, and there is hereby appropriated, entirely from the revenues of the District of Columbia, said sum of $4,100, which shall be deposited in the Treasury of the United States to the credit of the United States, and thereafter the title to said reservation shall be in the name of the District of Columbia.

Mr. SMITH of Georgia. Mr. President, I should like to have that amendment go over.

Mr. CURTIS. I have no objection to passing it over.

The PRESIDENT pro tempore. It will be passed over, without objection.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Courts," on page 72, line 2, after the words "District of Columbia," to strike out "$1,800" and insert "$2,000," and in line 5, after the words "in all," to strike out "$5,000" and insert "$5,200," so as to make the clause read:

Probation system: Probation officer, Supreme Court, District of Columbia, $2,000; probation officer, police court, District of Columbia, $1,500; assistant probation officer, police court, District of Columbia, $1,200; contingent expenses, $500; in all, $5,200.

The amendment was agreed to.

The next amendment was, on page 72, line 23, after the word "clerk," to strike out "$2,000" and insert "$2,200"; in the same line, after the word "one," where it occurs the first time, to strike out "$1,500" and insert "$1,600"; and on page 73, line 3, after the words "in all," to strike out "$28,380" and insert "$28,680," so as to make the clause read:

Police court: Two judges, at $3,600 each; clerk, $2,200; deputy clerks—1 $1,600, 1 $1,500, 2, at $1,200 each; deputy financial clerk, $1,500; 7 bailiffs, at $900 each; deputy marshal, $1,000; janitor, $600; engineer, $900; assistant engineer, $720; fireman, $480; 2 assistant janitors, at $300 each; matron, $600; 3 charmen, at $360 each; in all, $28,680.

The amendment was agreed to.

The next amendment was, on page 74, after line 13, to insert:

INTEREST AND SINKING FUND.

For interest and sinking fund on the funded debt, $975,408.

Mr. CURTIS. Mr. President, I understand there will be a contest upon that amendment, and I therefore ask that it go over.

The PRESIDENT pro tempore. It will go over, without objection.

Mr. BRANDEGEE. Mr. President, I send to the desk an amendment, which I offer, to come in after line 10, on page 76.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. After line 10, on page 76, it is proposed to insert the following:

For the expenses of the jury commission of the District of Columbia, including stationery and clerical assistance, $400.

The amendment was agreed to.

Mr. BRANDEGEE. I should like, in this connection, to have inserted in the RECORD a short statement which was inserted in the RECORD of last year when a similar amendment was adopted. I will send it to the desk.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

JURY COMMISSION, DISTRICT OF COLUMBIA,
May —, 1912.

Hon. FRANCIS E. WARREN,
Chairman Committee on Appropriations,
United States Senate.

SIR: The jury commission of the District of Columbia respectfully request that an item be inserted in the legislative, executive, and judicial appropriation bill, to read as follows:

"Jury commission, District of Columbia: For expenses of the jury commission, including stationery and clerical assistance, $400, one-half of which shall be paid from the revenues of the District of Columbia."

The sections of the code providing for a jury commission and the selection of jurors in this District are as follows:

"SEC. 198. Jurors: The clerk of the Supreme Court of the District of Columbia, the United States marshal, and the collector of taxes for said District are hereby constituted a commission to from time to time make the list of jurors for service in said court and fix the number of jurors to be listed therefor.

"SEC. 199. The said jurors shall be selected, as nearly as may be, from the citizens in the different parts of the District.

"SEC. 200. Jury box: The names shall be written on separate and similar pieces of paper, which shall be so folded or rolled up that the names can not be seen, and placed in a box to be provided for the purpose.

"SEC. 201. The box shall be sealed and, after being thoroughly shaken, shall be delivered to the clerk of the supreme court for safe-keeping."

From the above provisions it will be seen that a large amount of clerical work is increasingly involved in compiling and sifting the lists of competent jurors for two criminal, two circuit, one police, one juvenile courts and grand jury, keeping the lists and records of service, comparing said lists, and preparing the slips for the jury box. The entire list of names has not only to be tabulated, but the name of each juror entered upon a card index together with such information as to his age, occupation, and previous record of jury service. It is impossible for the clerk of the court, the marshal, and the collector of taxes to perform properly the detailed clerical work involved in preparing and keeping the jury records.

The compensation of jury commissioners before the code went into effect amounted to over $400 per annum, but the new commissioners have not received any compensation for their personal services, and no provision has been made for the necessary expenses of the commission.

Very respectfully,

JOHN R. YOUNG,
AULICK PALMER,
C. C. ROGERS,
Jury Commission, District of Columbia.

The court has requested me to earnestly indorse the above.

HARRY M. CLABAUGH,
Chief Justice.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Charities and corrections," on page 77, line 2, after the word "Secretary," to strike out "$3,000" and insert "$3,500"; in line 3, before the word "clerk," to strike out "chief"; in line 6, after the word "expenses," to strike out "including attendance on conventions"; and in line 7, after the words "in all," to strike out "$17,560" and insert "$18,060," so as to make the clause read:

Board of Charities: Secretary, $3,500; clerk, $1,200; stenographer, $1,200; messenger, $600; inspectors—1 at $1,200, 3 at $1,000 each, 2 at $900 each, 2 at $840 each; drivers—1 at $780, 3 at $720 each; hostler, $540; traveling expenses, $400; in all, $18,060.

Mr. CURTIS. Mr. President, I offer an amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 77, line 3, it is proposed to strike out "$1,200," where it occurs the second time, and insert in lieu thereof "$1,300," and to change the total so as to read "$18,160."

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 77, after line 7, to insert:

Columbia Polytechnic Institute: For the instruction and employment of the blind of the Columbia Polytechnic Institute who are actual residents of the District of Columbia, and for the purchase and repair of machinery and tools which may be needed to equip a workshop for the blind of said District, $3,000, to be expended under the direction of the Commissioners of the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 80, after line 11, to insert:

For road construction, $850.

The amendment was agreed to.

The next amendment was, on page 80, line 16, after the words "Home for Aged and Infirm," to strike out "$53,952" and insert "$54,682," so as to make the clause read:

In all, for Home for Aged and Infirm, $54,682.

The amendment was agreed to.

The next amendment was, on page 81, line 15, after the word "warehouse," to strike out "$600" and insert "$800," so as to make the clause read:

For the erection of a barn and warehouse, $800.

The amendment was agreed to.

The next amendment was, on page 81, line 17, after the words "National Training School for Girls," to strike out "$23,910" and insert "$24,110," so as to make the clause read:

In all, for National Training School for Girls, $24,110.

The amendment was agreed to.

The next amendment was, under the subhead "Medical charities," on page 83, after line 21, to insert:

For purchase and installation of disinfecting plant, $800.

The amendment was agreed to.

The next amendment was, on page 84, line 3, after the words "Tuberculosis Hospital," to strike out "$54,020" and insert "$54,820," so as to make the clause read:

In all, for Tuberculosis Hospital, $54,820.

The amendment was agreed to.

The next amendment was, under the subhead "Child-caring institutions," on page 86, line 24, after the words "Board of Charities," to strike out "$5,000" and insert "$6,000," so as to make the clause read:

For the care and maintenance of children under a contract to be made with the Washington Home for Foundlings by the Board of Charities, $6,000.

The amendment was agreed to.

Mr. CURTIS. I offer two amendments, to come in on lines 6 and 7, page 87. I ask that the Secretary may read them.

The PRESIDENT pro tempore. The amendments will be stated.

The SECRETARY. In the item for superintendent of municipal lodging house, on page 87, line 7, it is proposed to strike out "$900" and insert in lieu thereof "$1,200."

The amendment was agreed to.

The SECRETARY. After "cook, $360," in the same line, it is proposed to insert "foreman, $360."

The amendment was agreed to.

Mr. CURTIS. I now move to strike out, in line 6, the words "who shall also act as foreman."

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On line 6, page 87, it is proposed to strike out the words "who shall also act as foreman."

The amendment was agreed to.

Mr. POINDEXTER. I offer the amendment which I send to the desk, and ask that it be inserted at the end of line 13, page 87.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 87, after line 13, after the words "District of Columbia," it is proposed to insert a colon and the following:

Provided, That any honorably discharged soldier, sailor, or marine of the United States who served in the War with Spain or the Philippine insurrection shall be admitted thereto on the same terms and conditions as other inmates.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Temporary homes," on page 88, after line 12, to insert:

The reimbursement required to be made to the United States by the District of Columbia under the provisions of the sundry civil appropriation act approved August 24, 1912, on account of deficiencies in payments for the care and maintenance of the insane of said District during the fiscal years 1881 to 1911, inclusive, is hereby fixed at $719,536.09.

Mr. SMITH of Georgia. I should like to have that amendment passed.

Mr. CURTIS. I have no objection.

The PRESIDENT pro tempore. Without objection, the amendment will be passed for the present.

Mr. SMITH of Georgia. By calling the attention of the chairman of the subcommittee to my objection to this provision we may be able to dispose of it without calling for a quorum. I am not going to call for a quorum at this time. A report just received from the expert of the House who has been investigating these figures indicates that the sum is much larger than the one stated. For that reason I think we ought not to fix it at this amount.

Mr. CURTIS. I suggest that it be passed over, and I will examine it later.

Mr. SMITH of Georgia. Very well. I simply wanted to make that suggestion with a view of speeding the matter.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Anacostia River Flats," on page 93, after line 14, to insert:

In connection with said reclamation and development of the Anacostia River and flats from the Anacostia Bridge to the District line, the Secretary of War is authorized to acquire by purchase or by condemnation, for highway and park purposes, the fee simple and absolute title to the land along the Anacostia River on both sides thereof between the high-water lines of said river, as determined by the United States Coast and Geodetic Survey, and lines following approximately the contour of 10 feet elevation on each side of said river above mean low water at the United States Navy Yard, from the Anacostia Bridge to the northeast boundary line between the District of Columbia and Maryland; and also all land below the high-water lines on each side of said Anacostia River between the limits named that is not now owned by the United States; and the appropriation herein made for the reclamation and development of the Anacostia River and flats from the Anacostia Bridge northeast to the District line, and all appropriations heretofore made for said purpose are hereby made available for the purchase or condemnation of said land and for the payment of amounts awarded as damages for said land and the costs and expenses of the condemnation proceedings in the event that it is necessary to institute such condemnation proceedings: *Provided*, That if said land or any part thereof can not be acquired by purchase from the owners thereof at a price satisfactory to the Secretary of War, the Commissioners of the District of Columbia, upon the request of the Secretary of War, shall institute condemnation proceedings to acquire such land under the provisions of chapter 15 of the Code of Law for the District of Columbia.

Mr. SMITH of Georgia. I desire that that amendment go over, too.

Mr. CURTIS. I have no objection to its going over.

The PRESIDENT pro tempore. Without objection, the item will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Klingle Valley Park," on page 94, after line 22, to insert:

Under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, the Commissioners of the District of Columbia are authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land that may be necessary for highway and park purposes to preserve the Klingle Road Valley, comprising approximately 26½ acres, as shown on plans filed in the office of the Engineer Commissioner of the District of Columbia: *Provided*, That the tract of land hereinafter described, containing about 2 acres, shall be excepted from condemnation for such park, viz, a detached portion of said described park lying at the extreme eastern end thereof, east of the east line of a proposed street 90 feet wide, said described land being land now assessed in the name of Thomas Armat.

There is appropriated an amount sufficient to pay the necessary costs and expenses of said condemnation proceedings taken pursuant hereto and for the payment of amounts awarded as damages: *Provided*, That of the amount found to be due and awarded by the jury in said condemnation proceedings as damages for and in respect of the land to be taken in the condemnation proceedings herein authorized, plus the costs and expenses of the proceedings, not less than one-third shall be assessed by the jury as benefits against those lots, pieces, or parcels of land situated, lying, or being within an assessment area hereby created, which assessment area shall embrace all of the area lying within the distance of one-fourth of a mile from any point of said park: *Provided further*, That all land owned by the United States or the District of Columbia lying within said assessment area shall be exempt from assessment, which benefits, when collected, shall be covered into the Treasury of the United States to the credit of the revenues of the District of Columbia and the United States in equal parts.

Mr. CURTIS. I have no objection to both park provisions going over, including the one on page 96.

The PRESIDENT pro tempore. In the absence of objection, then, the Klingle Valley Park item goes over.

Mr. BRISTOW. I should like to inquire when these items which are going over will be taken up. There are quite a number of them.

Mr. CURTIS. They will be taken up the first thing in the morning when we call up the bill, in the order in which they have been passed over.

Mr. BRISTOW. Some of the items I wish to look into myself. The Klingle Valley Park item goes over, then?

The PRESIDENT pro tempore. It has gone over.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "Piney Branch Valley Park," on page 96, after line 18, to insert:

Under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, the Commissioners of the District of Columbia are hereby authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land along and adjacent to the Piney Branch Valley and between Sixteenth Street and Fourteenth Street NW., and the land adjacent to the Municipal Hospital grounds between Fourteenth Street and Georgia Avenue NW., for park purposes, comprising in all approximately 42 acres of land, as shown on plans filed in the office of the Engineer Commissioner of the District of Columbia.

There is appropriated an amount sufficient to pay the necessary costs and expenses of said condemnation proceedings taken pursuant hereto and for the payment of the amounts awarded as damages: *Provided*, That of the amount found to be due and awarded by the jury in said proceedings as damages for and in respect of the land to be taken in the condemnation proceedings herein authorized, plus the costs and expenses of the proceedings, not less than one-third shall be assessed by the jury as benefits against those lots, pieces, or parcels of land situate, lying, or being within an assessment area hereby created, which assessment area shall embrace all of the area lying within the distance of one-fourth of a mile from any point of said park: *Provided further*, That all land owned by the United States or the District of Columbia lying within said assessment area shall be exempt from assessment, which benefits, when collected, shall be covered into the Treasury of the United States to the credit of the revenues of the District of Columbia and the United States in equal parts: *Provided further*, That the Commissioners of the District of Columbia are authorized to abandon for highway purposes any existing streets or parts of streets within the territory before described except Fourteenth Street: *Provided further*, That the Commissioners of the District of Columbia are authorized to prepare a new highway plan for that portion of the District of Columbia lying west of Fourteenth Street, south of Taylor Street, east of Rock Creek Park, and north of Newton Street NW., under the provisions contained in the act of Congress approved March 2, 1893, entitled "An act to provide a permanent system of highways in that part of the District of Columbia lying outside of cities," and an amendment to said act approved June 28, 1898: *Provided*, That section 4 of said amendment shall not apply to the territory above described: *Provided further*, That under this authority Mount Pleasant Street may be extended with a minimum width of 45 feet; that Perry Place may be extended with a minimum width of 50 feet; and that Fourteenth Street Road may be established with a minimum width of 50 feet; that upon

the completion and recording of said new highway plan it shall take the place of and stand for any previous plan for said portion of said District of Columbia.

Mr. BRISTOW. Should not that go over the same as the others? I make the request. The same principle is involved.

Mr. CURTIS. I have no objection to its going over.

The PRESIDENT pro tempore. The amendment will go over.

Mr. JONES. Mr. President, after the amendment ending on page 98, I desire to offer an amendment which would more properly come in on page 22. As I happended to be out when that page was reached, I will offer it at this time.

The PRESIDENT pro tempore. By unanimous consent, the Senator can insert it in the bill on page 22.

Mr. CURTIS. I ask the Senator to withhold his amendment and offer it to-morrow. It should go in on page 22.

Mr. JONES. That will be satisfactory.

The PRESIDENT pro tempore. The Senator from Washington withholds his amendment.

Mr. SMITH of Georgia. Can we not, by unanimous consent, have it read at this time?

The PRESIDENT pro tempore. The amendment will be read.

The Secretary read as follows:

For paving with sheet asphalt K Street north between Washington Circle and the bridge at Twenty-eighth Street west, $30,000.

Mr. CURTIS. That is not estimated for, and I regret to have to make the point of order against it.

Mr. JONES. I simply wish to make a brief statement in regard to the amendment. I should like to do so to-morrow.

The PRESIDENT pro tempore. The Senator can make it now.

Mr. JONES. I thought I would not take up the time to make it to-night.

The PRESIDENT pro tempore. Very well.

Mr. SMITH of Georgia. Mr. President, we are anxious to devote as much time as we can to the bill to-night, so as to get through with as much of it as possible.

The reading of the bill was continued to line 20, on page 99.

Mr. BRISTOW. Before we leave the small parks, I wish to make a suggestion to the Senator in charge of the bill. It seems that $15,000 is here appropriated for small parks and that the necessities for parks in Washington are for small parks. There are a lot of amendments which the committee seem to have incorporated in the bill enlarging the parks out in the vicinity of Rock Creek, where there are 1,600 or 1,700 acres of magnificent forest park, and in the city, where there is a congested population, there are no recreation grounds provided. Fifteen thousand dollars is appropriated for the small parks, when for parks that are really not needed there will be hundreds of thousands of dollars appropriated, if the bill is passed as reported, to get parks out where people do not live.

Mr. CURTIS. Forty thousand dollars was estimated for this purpose. Does the Senator wish to offer an amendment?

Mr. BRISTOW. In line 7, page 99, before the word "thousand," I move to strike out "fifteen" and insert "forty."

Mr. SMITH of Georgia. That is for little parks?

Mr. BRISTOW. Yes; for small parks.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 99, line 7, before the word "thousand," strike out "fifteen" and insert "forty," so as to read "$40,000."

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, under the head of "Water Department," on page 100, line 10, to strike out "$1,500" and insert "$1,600," and in line 19, after the words "in all," to strike out "$84,785" and insert "$84,885," so as to make the clause read:

For distribution branch: Superintendent, $3,300; draftsman, $1,600; foreman, $1,800; clerks—2 at $1,500 each, 4 at $1,200 each, 1 at $1,000, 1, $900; time keeper, $900; assistant foreman, $900; 3 steam engineers, at $1,100 each; assistant engineers—1 at $2,400, 1 at $1,600; leveler, $1,200; 2 rodmen, at $900 each; 2 chainmen, at $675 each; draftsman, $1,050; storekeeper, $1,000; assistant storekeeper, $750; assistant foremen—1, $1,275, 1, $1,200, 1, $1,125; chief steam engineer, $1,750; 3 assistant steam engineers, at $875 each; 4 oilers, at $610 each; 3 firemen, at $875 each; inspector, $1,200; janitor, $900; watchmen—1, $875, 1, $760, 1, $610; driver, $700; 2 messengers, at $540 each; driver, $630; chief inspector of valves, $1,400; in all, $84,885.

The amendment was agreed to.

The next amendment was, in section 6, page 106, after line 8, to strike out:

Bathing beach: For superintendent, $600; watchman, $400; temporary services, supplies, and maintenance, $2,250; for repairs to buildings, pools, and the upkeep of the grounds, $1,500, to be immediately available; in all, $4,750.

Mr. CURTIS. That is provided for in another part of the bill and of course should go out here.

The amendment was agreed to.

The next amendment was, on page 106, after line 12, to strike out:

INTEREST AND SINKING FUND.

For interest and sinking fund on the funded debt, $975,408, which sum shall be paid out of funds and accounted for in accordance with the acts of Congress in relation thereto.

Mr. CURTIS. I ask consent to pass over the amendment contained in lines 13 to 16, inclusive, as that question is involved in another amendment.

The PRESIDENT pro tempore. Without objection, it will be passed over.

Mr. SMITH of Maryland. I offer an amendment and also present a letter in regard to it. I will say in regard to this matter that there has been information gotten since yesterday, and the Senator from Massachusetts [Mr. LODGE] and the Senator from Georgia [Mr. SMITH] have been informed of it, and they will offer no opposition to the amendment. It is an item that was struck out on a point of order.

I will say in regard to this appropriation that these buildings can be removed within a very short time. There are thousands of people in the District of Columbia who are asking for these shelters, and the farmers of Maryland and Virginia are very anxious for them. It is a means of bringing the producer and the consumer together, a means of giving cheap food and healthy food. We hear talk about the high cost of living, and this is one proposition that helps to solve the problem, as there is no middle man in it. As I said, it brings the producer and consumer together.

I wish to state, so far as the cost of this item is concerned, that the revenue now at 10 cents a day produces over $5,400. The revenue at 20 cents a day will be about $11,000, and the whole amount of the expenditure would be reimbursed in less than three years.

The PRESIDENT pro tempore. The Chair will inquire of the Senator if the proposed amendment is identical with the amendment that went out on a point of order?

Mr. CURTIS. I understand that it is the identical amendment.

Mr. SMITH of Maryland. I move to reconsider the vote.

The PRESIDENT pro tempore. The Chair will suggest that the point of order be withdrawn, if he will arrange it with the Senator from Georgia.

Mr. SMITH of Georgia. I consent to that.

The PRESIDENT pro tempore. The point of order is then withdrawn, and the question is on agreeing to the amendment.

Mr. SMITH of Georgia. I understood the Senator from Maryland also to state that although the Senator from Massachusetts is one of the Regents of the Smithsonian, after further information he does not object.

Mr. BRISTOW. I should like to inquire of the Senator in charge of the bill if it should not be 10 cents instead of 20 cents a day?

Mr. CURTIS. The commissioners think that 10 cents a day is too small a charge and that we had better make it 20 cents a day. I understand there is no objection to the amendment. It is recommended by the commissioners.

Mr. BRISTOW. I am in favor of making it as cheap as it can be made, because I am in thorough sympathy with the purpose in view.

Mr. SMITH of Maryland. I will state to the Senator the number of wagons that go to that shelter as it stands, without any shelter——

Mr. BRISTOW. I am in sympathy with the amendment, only I wanted to know if the charge could not remain at 10 cents if practicable instead of being increased to 20 cents.

Mr. SMOOT. All of the records show that they are perfectly willing to pay 20 cents; and that they would prefer to than to pay 10 cents for the accommodation they have to-day.

Mr. BRISTOW. All right.

The amendment was agreed to.

Mr. SMITH of Michigan. I offer an amendment to come in as a new section.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 106, after line 8, insert a new section in the bill, as follows:

SEC. 7. Hereafter not more than one painted or printed sign shall be placed on any piece of property in the District of Columbia advertised for sale or to rent, and then only when the owner of the property and the Commissioners of the District of Columbia consent thereto, and upon the payment of a license fee of $5 per year to the collector of taxes of the District of Columbia.

Mr. CURTIS. I make the point of order against that amendment. I will ask the Senator from Michigan to let the amendment go over until to-morrow.

Mr. SMITH of Michigan. Why? What is to be gained by it?

Mr. CURTIS. Then I make the point of order.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. CURTIS subsequently said: I wish to withdraw the point of order I made against the amendment offered by the Senator from Michigan.

The PRESIDENT pro tempore. The point of order having been withdrawn——

Mr. SMITH of Georgia. I should like to have the amendment read.

The PRESIDENT pro tempore. It will be again read.

The Secretary again read the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Michigan.

The amendment was agreed to.

Mr. OLIVER. I offer the amendment I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 28, line 18, after "$8,500" insert:

From Connecticut Avenue to Ross Place, $6,000.

Mr. SMITH of Georgia. I make the point of order that that was not estimated for.

Mr. CURTIS. I understand that it was estimated for.

Mr. OLIVER. It has been estimated for. It is in the Book of Estimates.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Pennsylvania.

The amendment was agreed to.

Mr. POMERENE. On page 106, after line 8, I move to amend the pending bill by inserting Senate bill 3812, to regulate public utilities in the District of Columbia and to confer upon the Commissioners of the District of Columbia the duties and powers of a public utilities commission, as it passed the Senate April 20, 1912. No legislation, I dare say, since I have been a Member of this body was given such careful consideration as that bill. As I remember, it passed the Senate unanimously. The need for this legislation it is not necessary to dwell upon to-night. I hope that the point of order will not be made against the amendment. It seems to me the only way in which we can get the legislation through at the present session. I feel that we will be doing a great service to this city if the amendment could be adopted to the pending bill.

We all recognize the fact that there is need of a thorough investigation of the public utilities in this District. This measure is in keeping with the progressive legislation which has been adopted in all or nearly all the important States in the Union.

Mr. SMOOT. Mr. President, in the first place I wish to say to the Senator from Ohio that I cheerfully voted for that bill when it was before the Senate. The bill has been before the other House for some time. The other House have not seen fit to pass it yet, nor did they see fit to put it upon this bill.

I know of a great many other amendments that are going to be offered to this appropriation bill; it is purely legislation, and for that reason, Mr. President, and for no other, I feel that I must make a point of order against the provision.

Mr. BRISTOW. I desire to offer——

The PRESIDENT pro tempore. The Senator will suspend a moment until this matter is disposed of.

Mr. CURTIS. If this matter is to lead to discussion, I ask the Senator to let it go over until to-morrow. There is not a quorum here.

Mr. LA FOLLETTE. I rose to make a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Wisconsin.

Mr. LA FOLLETTE. Is that one of the questions which the President pro tempore was submitting to the Senate for its decision?

The PRESIDENT pro tempore. The present occupant of the chair will say that it is in the discretion of the Chair to submit any point of order to the Senate.

Mr. LA FOLLETTE. I know that is true; but it occurred to me that in the discussion on some amendment a few days ago the present occupant of the chair, then on the floor, stated that in this particular class of amendments, involving the question of new legislation, it had been customary to submit the matter to the Senate. I was not entirely clear in my recollection about it, and I wanted to make inquiry.

Mr. SMITH of Georgia. If the Senator will allow me, is not the question he submits to the Chair not whether the Senate wants the amendment put on but whether they honestly believe as Senators that the rules exclude it?

Mr. LA FOLLETTE. Certainly.

Mr. SMITH of Georgia. Then we have to vote it down.

Mr. LA FOLLETTE. But I have seen the Senate pretty liberal in its construction of that rule.

Mr. SMITH of Georgia. I should like to put it on, but——

Mr. FLETCHER. Rule XVI, if the Senator from Wisconsin will allow me, does seem to make it obligatory on the part of the Chair to submit the question to the Senate. It says:

3. No amendment which proposes general legislation shall be received to any general appropriation bill, nor shall any amendment not germane or relevant to the subject matter contained in the bill be received; nor shall any amendment to any item or clause of such bill be received which does not directly relate thereto; and all questions of relevancy of amendments under this rule, when raised, shall be submitted to the Senate and be decided without debate.

Mr. LA FOLLETTE. I think that is the rule.

Mr. FLETCHER. This is an amendment to a general appropriation bill.

Mr. CURTIS. I judge that this objection is made under the clause of Rule XVI, which relates to general legislation and not that which requires the question of relevancy to be submitted to the Senate. But I ask unanimous consent that the whole matter may go over until to-morrow morning.

The PRESIDENT pro tempore. Without objection, the amendment will go over.

Mr. CURTIS. We have worked hard to-day, and I wish to move an adjournment.

Mr. BRISTOW. I have an amendment I wish to offer.

The PRESIDENT pro tempore. The Chair will ask if there is objection to passing over the amendment offered by the Senator from Ohio?

Mr. CURTIS. On the point of order.

The PRESIDENT pro tempore. That will be considered as pending.

Mr. BRISTOW. I have an amendment that I desire to offer. I do not think it will cause any debate at all. After line 23, page 34, I move to insert what I send to the Chair.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 34, after line 23, it is proposed to insert:

That the Commissioners of the District of Columbia are hereby authorized to open, extend, or widen any street, avenue, road, or highway to conform with the plan of the permanent system of highways in that portion of the District of Columbia outside of the cities of Washington and Georgetown, adopted under the act of Congress approved March 2, 1893, as amended by the act of Congress approved June 28, 1898, by condemnation under the provisions of subchapter 1 of chapter 15 by the Code of Law for the District of Columbia: *Provided*, That the entire amount found to be due and awarded by the jury under such proceeding as damages for and in respect of the land condemned, plus the cost and expenses of said proceeding, shall be assessed by the jury as benefits: *And provided further*, That the costs and expenses of the condemnation proceedings taken under the provisions thereof, and the amounts awarded as damages for and in respect of the land condemned, shall be paid entirely from the revenues of the District of Columbia, and shall be repaid to said District of Columbia from the assessments for benefits and covered into the Treasury of the United States to the credit of the revenues of the District of Columbia; and such sum as is necessary for said purpose during the fiscal year to end June 30, 1914, is hereby appropriated, payable entirely from the revenues of the District of Columbia.

Mr. SMOOT. I ask the Senator from Kansas to let the amendment go over and be printed. It involves quite a question.

Mr. BRISTOW. I am willing that it shall go over.

Mr. SMOOT. I will reserve any point of order upon it.

Mr. CURTIS. I rose to move that the Senate adjourn.

Mr. BRISTOW. If the Senator will yield just a moment, I wish to say the amendment simply gives the commissioners authority to open up a street outside the cities of Washington and Georgetown, where they think it is necessary, and assess the benefits instead of having to come to Congress for every little street that they have to open.

The PRESIDENT pro tempore. The amendment will go over.

Mr. NEWLANDS. I have two amendments, which I should like to have printed in the RECORD and printed for the use of the Senate.

The amendments submitted by Mr. NEWLANDS were ordered to be printed, and to be printed in the RECORD, as follows:

That the Commissioners of the District of Columbia are hereby authorized, whenever in their judgment the public interests require it, to prepare a new highway plan for any portion of the District of Columbia, and submit the same for approval, after public hearing, to the Highway Commission created by act of Congress approved March 2, 1893, entitled "An act to provide a permanent system of highways in that part of the District of Columbia lying outside of cities"; that such highway plans shall be prepared under the provisions of said act of Congress and an amendment thereto approved June 28, 1898, and that upon approval and recording of any such new highway plan it shall take the place of and stand for any previous plan for the portion of the District of Columbia affected.

And the following:

That the Superintendent of Public Buildings and Grounds and the Engineer Commissioner of the District of Columbia, with the advice and the cooperation of the Commission of Fine Arts, are hereby authorized to prepare and submit to Congress a plan for the gradual acquisition and development of parks and playgrounds in the District of Columbia, with a view to meeting present and future requirements for health and

recreation, designating in such plan the areas which they deem it desirable to acquire, the probable cost of purchase, and the probable cost of improvement, and designating such parks in the order of their importance as to the time of acquisition.

Where disagreement shall exist between such officials and the commission the grounds of disagreement shall be stated. The landscape architect in the office of the Superintendent of Public Buildings and Grounds shall cooperate with such officials and such commission in such work, and the sum of $5,000, or so much thereof as may be necessary, is hereby appropriated from any funds in the Treasury not otherwise appropriated for the expense of such inquiry and investigation.

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, February 19, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

TUESDAY, *February 18, 1913.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Eternal God, our heavenly Father, to whom our thoughts and ways are as an open book, strengthen every worthy ambition, discourage every ignoble desire, that the pages of this day's transactions may be free from stains or blots, that at its close we may read them with an approving conscience and feel deep down in our hearts the approving smile of Heaven. Hear us and answer our petition, O God our Father. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. NEELEY, indefinitely, on account of illness in his family.

To Mr. GRAY, indefinitely, on account of illness.

WITHDRAWAL OF PAPERS.

By unanimous consent, Mr. ANDERSON was granted leave to withdraw from the files of the House the papers in the case of H. R. 24032, granting a pension to Lucie Boscian, no adverse report having been made thereon.

DIRECT ELECTION OF UNITED STATES SENATORS.

The SPEAKER. The Chair has in his hand communications from the secretaries of state of Texas, Montana, and Idaho, announcing the ratification of the seventeenth constitutional amendment, in reference to the direct election of Senators by the people.

DAILY HOUR OF MEETING.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the following order.

The SPEAKER. The Clerk will report the order.

The Clerk read as follows:

Ordered, That, until otherwise provided, the daily hour of meeting shall be 10.30 o'clock a. m.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The question was taken, and the order was agreed to.

Mr. FITZGERALD. Mr. Speaker, I wish to give notice that, commencing to-morrow, I shall ask the House to remain in session late at night until the sundry civil bill is disposed of.

The SPEAKER. The gentleman from New York gives notice that, beginning to-morrow, he will ask the House to stay in session until late to get through with the sundry civil appropriation bill.

Mr. MANN. Why not begin to-night?

The SPEAKER. The Chair does not know.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 8033. An act to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut; and

S. 7278. An act providing that the pay of officers of the Navy commence from the date they take rank as stated in their commissions.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to bills of the following titles, asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. MCCUMBER, Mr. BURNHAM, and Mr. SHIVELY as the conferees on the part of the Senate.

S. 8178. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors;

S. 8274. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors;

S. 8275. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors; and

S. 8314. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

The message also announced that the Senate had passed the following resolution, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 41.

Resolved by the Senate (the House of Representatives concurring), That there shall be printed and bound, under the direction of the Joint Committee on Printing, 14,100 copies of the proceedings and the eulogies delivered in Congress on James Schoolcraft Sherman, late Vice President of the United States, with illustration, of which 4,000 copies shall be for the use of the Senate, 8,000 copies for the use of the House of Representatives, 2,000 copies for the use of the Senators and Representatives of the State of New York, and 100 copies, bound in full morocco, for the use of Mrs. James Schoolcraft Sherman: *Provided*, That there shall be included in such publication the proclamation of the President and the proceedings in the Supreme Court of the United States upon the death of Vice President Sherman, and an account of the funeral services at Utica, N. Y.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 16127. An act for the relief of William Kaiser;

H. R. 19191. An act for the relief of Christian Hedges; and

H. R. 22939. An act for the relief of John K. Wren.

ARMY APPROPRIATION BILL.

Mr. HAY. Mr. Speaker, I am directed by the Committee on Military Affairs to report back to the House the Army appropriation bill (H. R. 27941, H. Rept. 1535) with Senate amendments and to ask unanimous consent that the Senate amendments be disagreed to and ask for a conference thereon.

The SPEAKER. The gentleman from Virginia states that he is authorized by the Committee on Military Affairs to report back the Army appropriation bill and to ask unanimous consent to disagree to the Senate amendments and ask for a conference. Is there objection?

Mr. PRINCE. Mr. Speaker, I would like to ask the chairman of the committee if he will give opportunity on the floor of the House when the conference report comes in to discuss some of the disagreements in case we desire to do so?

Mr. HAY. Undoubtedly.

Mr. PRINCE. I have no objection.

Mr. RODDENBERY. Mr. Speaker, reserving the right to object, may I ask the gentleman how many Senate amendments there are?

Mr. HAY. There are 39 Senate amendments——

Mr. MANN. Forty.

Mr. RODDENBERY. Do they appear in the RECORD?

Mr. HAY. They do; they appear in the CONGRESSIONAL RECORD of last Friday, February 14.

Mr. RODDENBERY. Does the gentleman mean in the House part of the RECORD?

Mr. HAY. No; I mean in the transactions of the Senate.

Mr. RODDENBERY. But they nowhere appear in the House proceedings?

Mr. HAY. No; because they were offered and agreed to in the Senate. These are Senate amendments.

The SPEAKER. The House bill is printed with Senate amendments.

Mr. HAY. The House bill is also printed with Senate amendments, and the gentleman can examine them if he desires to do so.

Mr. RODDENBERY. Mr. Speaker, I would like to have a vote of the House or the committee on each amendment——

Mr. HAY. I can not hear the gentleman.

Mr. RODDENBERY. Mr. Speaker, it occurs to me that in the nature of the Senate amendments all increasing the amount of the bill, although the Committee on Military Affairs recommends the nonconcurrence in the amendments, that it would be calculated to more nearly enable the members of the Committee on Military Affairs and the other end of the Capitol to understand the sense of the House and the committee with reference to those amendments if a vote of the House or committee were taken on each of those amendments, either by a roll call or by a division, so that it might appear what strength of sentiment there is behind the nonconcurrence of the House in these several amendments.

Mr. HAY. I will say to the gentleman from Georgia [Mr. RODDENBERY] that the Senate has increased this bill by $684,000, which is quite a moderate increase upon a bill carrying over $90,000,000, and that the House conferees will endeavor just as earnestly to curtail that as far as it is possible to curtail it, whether we have a vote on it in the House or not. And I will say to the gentleman that I will do everything possible to cut that amount down as much as possible. And I will say further to the gentleman that, in response to a question by the gentleman from Illinois [Mr. PRINCE], I stated if anybody desired a vote to be had on any specific amendment I would be glad to give that opportunity.

Mr. RODDENBERY. I appreciate that the chairman of the Committee on Military Affairs, and the committee itself, have labored arduously to hold this bill down and to frame it for the good of the country, as well as for the performance of some high political obligations on this side. In view of the gentleman's statement and assurance in the matter, so far as I am concerned, I shall not object.

The SPEAKER. Is there objection?

Mr. COX. Mr. Speaker, there is one item in the bill concerning which I wish to make an inquiry, and that is an item of $25,000 for the shooting match——

Mr. HAY. At Camp Perry, Ohio?

Mr. COX. Yes. I would like to ask the gentleman whether or not, before he finally disposes of the Senate amendment, he will bring it back and give the House a chance to vote on it?

Mr. HAY. I will do so. I have no objection to the House voting on it now.

Mr. COX. I am not prepared to have the House vote on it now.

Mr. KAHN. It is always customary to take up a conference report, and if any Member of the House can find objections to any of the provisions of the conference report, they can ask that it be sent to another conference. That is always within the rights of Members.

Mr. HAY. I understand the gentleman from Indiana [Mr. Cox] wants a separate vote on that particular item.

Mr. COX. On that particular item. I am opposed to it.

Mr. HAY. If we should come to a full agreement the gentleman could not get his separate vote. Therefore, if the gentleman insists on it, and is not ready to go on now, I will bring it back and let the gentleman have his opportunity.

Mr. AUSTIN. I would like to ask the chairman of the committee having this bill in charge——

The SPEAKER. Is there objection?

Mr. AUSTIN. Reserving the right to object, I wish to say to the chairman that I would like to ask that the House be given an opportunity to have a separate vote on the Senate amendment to place the National Soldiers' Home in southern California under the War Department.

Mr. HAY. I do not know that the gentleman will gain anything by that.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will announce the conferees.

The Clerk announced the following conferees: Mr. HAY, Mr. SLAYDEN, and Mr. PRINCE.

THE LATE REPRESENTATIVE LEGARE.

Mr. FINLEY. Mr. Speaker, I present the following order.

The SPEAKER. The Clerk will report the same.

The Clerk read as follows:

Ordered, That Sunday, February 23, 1913, be set apart for addresses on the life, character, and public services of the Hon. GEORGE S. LEGARE, late a Representative from the State of South Carolina.

The SPEAKER. The question is on agreeing to the order.

The order was agreed to.

MARKETING FARM PRODUCTS.

Mr. FINLEY. Mr. Speaker, I desire to call up the House concurrent resolution No. 68 from the Committee on Printing.

The SPEAKER. The gentleman from South Carolina [Mr. FINLEY] calls up a House concurrent resolution, which the Clerk will report.

The Clerk read as follows:

House concurrent resolution 68 (H. Rept. 1532).

Resolved by the House of Representatives (the Senate concurring), That there be printed 15,000 additional copies of Report No. 98 of the United States Department of Agriculture, being a report on systems of marketing farm products and demand for such products at trade centers, 10,000 copies for the use of the House of Representatives and 5,000 copies for the use of the Senate.

The SPEAKER. The question is on agreeing to the resolution.

Mr. FOSTER. I would like to inquire of the gentleman from South Carolina [Mr. FINLEY] if these are to be distributed through the document room or folding room?

Mr. FINLEY. Through the folding room. I will say also that the estimate of cost is $2,085.61.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

LAWS APPLICABLE TO ALASKA.

Mr. FINLEY. Mr. Speaker, I also offer the following privileged Senate resolution, which I send to the Clerk's desk.

The SPEAKER. The gentleman from South Carolina offers a resolution, which the Clerk will report.

The Clerk read as follows:

Senate concurrent resolution 38.

Resolved by the Senate (the House of Representatives concurring), That there be printed 4,000 copies of the laws of the United States applicable to the Territory of Alaska, compiled by the Committee on Territories of the Senate and the Committee on the Territories of the House of Representatives in compliance with Public Act No. 334, 1,500 copies of which shall be for the use of the Senate and 2,500 copies for the use of the House of Representatives.

Mr. FINLEY. Mr. Speaker, I think the report should be read, so as to give the estimated cost.

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

House report 1536, to accompany Senate concurrent resolution 38.

The Committee on Printing having had under consideration the Senate concurrent resolution (S. Con. Res. 38) providing for the printing of the laws of the United States applicable to the Territory of Alaska, reports the same back to the House with the recommendation that the resolution be agreed to with the following amendment: On line 2, after the word "printed," insert the words "and bound in buckram."

The estimated cost will be $8,394.66.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. FINLEY. Yes.

Mr. MANN. How much of a volume is this, or how many volumes are there to be?

Mr. FINLEY. It contains the laws of the Territory of Alaska. The exact number of pages I do not remember.

Mr. MANN. I understand that it will be in three large volumes.

Mr. FINLEY. I believe there are to be three volumes. The cost is stated here in the report, and under the law we are compelled to report the cost of any item which the House or Senate orders printed.

Mr. MANN. Of course three large volumes of laws relating to Alaska will be of very little benefit to the majority of the Members of the House.

Mr. FINLEY. I suggest to the gentleman from Illinois that there are very few Members of this House who will ever open a volume or look at a page.

Mr. MANN. I think the gentleman is correct.

Mr. FINLEY. The purpose of this item of printing is to give to the people who are interested and to people who need these laws, particularly to those in office and in authority in the Territory of Alaska, the benefit of the publication. Of course, there are a few other people interested, but the number is comparatively small. I think the average Member of this House—in fact, nine-tenths of the Members—will never see a copy of this publication.

Mr. MANN. Here are three volumes of laws relating to Alaska, to be distributed through the folding room to the Members of the House. Most of the Members of the House will have no use for them, nor will their constituents have any use for them.

Mr. FINLEY. I will say to the gentleman that my first public service in this House was on the Committee on Territories, and I found then that there was a way to get whatever the people of the Territories wished by way of publications by Congress. In other words, the documents may be secured through Members of the House. If these publications were sent to the document room there would be criticism of the committee here on the floor.

Mr. MANN. I understand that; but I do not see any more reason for printing the laws relating to the Territory of Alaska, to be given away, than for printing the laws relating to anything else.

Mr. FOSTER. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield?

Mr. FINLEY. Yes.

Mr. FOSTER. Will these volumes of laws relating to Alaska be used in Alaska or in this country?

Mr. FINLEY. They will go to the folding room and be distributed.

Mr. FOSTER. They are not for the use of the people of Alaska?

Mr. FINLEY. The resolution speaks for itself.

Mr. FOSTER. Does not the gentleman think that this report recommending an edition of 1,000 copies is sufficient? As suggested by my colleague [Mr. MANN], nobody particularly will have use for the copies of these laws. It seems to me that to print $8,000 worth of the laws relating to Alaska which will be of no particular benefit to anybody is just that much money spent where it will do no good.

Mr. FINLEY. I think my friend from Illinois will have no cause to complain about the distribution or the use of this publication. It is sought for largely by the people who have charge in the committees of the House and Senate of legislation for the Territory of Alaska.

Mr. FOSTER. Well, it seems to me that 4,000 copies is a large number to print for that particular purpose.

Mr. FINLEY. I would suggest to the gentleman that he has had service on committees at home in his own State and here in Congress, and he knows that it is quite impossible to absolutely meet the views of everybody who may read a resolution and have the right to vote on it. However, we do the best we can.

Mr. FOSTER. Oh, I am not censuring the gentleman from South Carolina or any member of his committee. I was simply suggesting that 4,000 copies is a good many.

Mr. FINLEY. I think the gentleman is mistaken. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on agreeing to the amendment.

Mr. MANN. Mr. Speaker, may we have the amendment read?

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend the resolution, in line 2, by inserting, after the word "printed," the words "and bound in buckram."

Mr. MANN. Now, Mr. Speaker, if that resolution were not adopted, how would these volumes be bound? Would they be bound in paper?

Mr. FINLEY. There are three estimates. They would not be bound in sheep, I will say to the gentleman.

Mr. MANN. Would they be bound in paper?

Mr. FINLEY. Substantially.

Mr. MANN. Why should we pay the expense of printing and expensively binding volumes that are purely for the personal benefit of gentlemen outside?

Mr. FINLEY. If this publication is worth anything, it should be made in permanent form.

Mr. MANN. If it is worth anything, gentlemen who obtain it ought to be willing to pay for binding it.

Mr. FINLEY. We do not do that with all the publications that are issued by Congress.

Mr. MANN. We get our own congressional documents bound in paper.

Mr. BORLAND. Reserving the right to object, I should like to ask the gentleman——

The SPEAKER. The gentleman can not object. This is not a matter for unanimous consent. It is privileged matter.

Mr. BORLAND. I should like to ask the gentleman where this demand comes from for the printing of these laws.

Mr. FINLEY. Largely from people who are interested in the Territory of Alaska, some of them being Members of Congress and many of them not Members of Congress.

Mr. BORLAND. Interested in the way of prospective or actual investments?

Mr. FINLEY. Oh, well, I have served on the Committee on the Territories, and if the gentleman ever has such service he will find that there are hundreds of thousands of people who do not live in the Territory, yet are interested in it and in its affairs and laws. I am glad to say that we now have practically but one Territory, that of Alaska.

Mr. BORLAND. Is it not possible for the Territory to print its own laws and pay for the printing out of its Territorial funds?

Mr. FINLEY. I do not know about that. Congress has printed such publications as this heretofore. This resolution was introduced in the usual way, and I will say to the gentleman that it is an unusual thing to expect a Territory, when Congress passes the laws governing it, to print those laws.

Mr. BARTLETT. Mr. Speaker, I should like to ask the gentleman from South Carolina how long since this Code of Laws of the District of Alaska has been revised and approved by the Congress. My recollection is that it has been some 10 years since that was done.

Mr. FINLEY. I am sure the gentleman from Georgia will recollect that laws are passed at every session of Congress which relate to the Territory of Alaska.

Mr. BARTLETT. Will the gentleman permit me to say that I do not see why we should bind these laws in this costly binding for the District of Alaska when we do not bind our own laws in any such expensive form? It seems to me this is done to satisfy the aesthetic tastes of some Senator or Representative who expects to have a large number allotted to him as his quota.

Mr. FINLEY. The difference between binding in paper and in buckram is less than $2,000.

Mr. COX. The gentleman has answered the very question I wanted to ask him.

Mr. BARTLETT. That may be true. If we add $2,000 to this resolution and $2,000 to another resolution, 100 such resolutions will cost the Treasury $200,000. Perhaps gentlemen apprehend that when the Government is spending so much money it does not make any difference, that we will spend it all anyway.

The SPEAKER. The question is on the amendment.

The question being taken, the Speaker announced that the noes appeared to have it.

Mr. FINLEY demanded a division.

The SPEAKER. A division is demanded. Those in favor of this buckram amendment will rise and stand until counted.

The House divided; and there were—ayes 25, noes 37.

Mr. FINLEY. I ask for tellers, Mr. Speaker.

Tellers were refused, seven Members—not a sufficient number—rising to second the demand.

Accordingly the amendment was rejected.

The resolution was agreed to.

ANTITYPHOID VACCINATION.

Mr. FINLEY. Mr. Speaker, I send up another privileged resolution from the Committee on Printing.

The SPEAKER. The gentleman from South Carolina sends up another privileged resolution, which the Clerk will report.

The Clerk read as follows:

House resolution 785.

Resolved, That there be printed as a House document 100,000 copies of an article entitled "Antityphoid vaccination in the Army and in civil life," by F. F. Russell, major, Medical Corps, United States Army, to be distributed through the folding room of the House of Representatives.

Mr. FINLEY. I ask for the reading of the report (H. Rept. 1546).

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

The Committee on Printing, having had under consideration the House resolution (H. Res. 785) providing for the printing as a House document of 100,000 copies of an article entitled "Antityphoid vaccination in the Army and in civil life," report the same back to the House with the recommendation that the resolution be agreed to. The estimated cost will be $284.96.

The resolution was agreed to.

RULES OF PRACTICE IN COURTS OF EQUITY.

Mr. FINLEY. Mr. Speaker, I present the following privileged resolution from the Committee on Printing.

The Clerk read as follows:

House resolution (H. Res. 745) to provide for printing additional copies of Senate Document No. 972, Rules of Practice for the Courts of Equity.

Resolved, That there be printed for the use of the House document room 47,000 additional copies of Senate Document No. 972, Sixty-second Congress, third session, same being Rules of Practice for the Courts of Equity of the United States promulgated by the Supreme Court of the United States November 4, 1912.

Mr. FINLEY. Mr. Speaker, I ask for the reading of the report.

The Clerk read the report (H. Rept. 1537), as follows:

The Committee on Printing having had under consideration the House resolution (H. Res. 745) providing for the printing of additional copies of Senate Document No. 972, Rules of Practice for the Courts of Equity of the United States, reports the same back to the House with the recommendation that the resolution be agreed to with the following amendment: On line 2, strike out the words "House document room" and insert the words "House folding room." The estimated cost will be $457.37.

The committee amendment was agreed to.

The SPEAKER. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

HEARINGS AGRICULTURAL EXTENSION DEPARTMENTS.

Mr. FINLEY. Mr. Speaker, I present also House resolution 769, authorizing the printing of 2,000 additional copies of hearings on H. R. 18160, agricultural extension departments.

The Clerk read the resolution, as follows:

House resolution 769.

Resolved, That the Committee on Agriculture shall be, and hereby is, empowered to procure the printing of 2,000 additional copies of the hearings before the House Committee on Agriculture in February and March, 1912, on H. R. 18160, agricultural extension departments.

Mr. FINLEY. Mr. Speaker, I ask that the report be read.

The Clerk read the report (H. Rept. 1539), as follows:

The Committee on Printing, having had under consideration the House resolution (H. Res. 769) authorizing the printing of 2,000 additional copies of hearings before the House Committee on Agriculture, reports the same back to the House with the recommendation that the resolution be agreed to. The estimated cost is $183.45.

The resolution was agreed to.

TRACHOMA.

Mr. FINLEY. Mr. Speaker, I present the following resolution authorizing the printing of a special article on trachoma among the Indians and others in the United States.

The Clerk read the resolution, as follows:

House resolution 774.

Resolved, That there shall be printed and bound in volume form, with accompanying illustrations, 100,000 copies of the special article on trachoma, etc., among the Indians and others in the United States, for the use of the House of Representatives, to be delivered to the House document room for distribution.

Mr. FINLEY. Mr. Speaker, I ask for the reading of the report.

The Clerk read the report (H. Rept. 1538), as follows:

The Committee on Printing having had under consideration the House resolution (H. Res. 774) providing for the printing of an article on trachoma among the Indians and others in the United States, report the same back to the House with the recommendation that the resolution be agreed to with the following amendment:

On lines 2, 3, and 4, strike out the words "100,000 copies of the special article on trachoma, etc., among the Indians and others in the United States" and insert the following: "28,000 copies of an article entitled the 'Nature, diagnosis, and treatment of trachoma among the Indians and others in the United States, by John Joseph Kindred.'" The estimated cost will be $500.

Mr. FINLEY. Mr. Speaker, I want to say to the House that since the 1st of January the state of the calendar has been such that the Printing Committee has been on the floor hardly at all. We have given way to everyone. Now, the pressure by Members of the House has become such that the Committee on Printing feels that it is its duty to bring in such resolutions as the committee think should pass, and give the House the opportunity to vote upon them. If there are any Members who think the Committee on Printing is unnecessarily taking up the time of the House, I want to say that I do not agree with them.

Mr. MANN. Neither do we. I should like to ask the gentleman whether this article mentioned in this resolution is by a Member of this House.

Mr. FINLEY. It is by a Member of this House, but was never printed in the CONGRESSIONAL RECORD.

Mr. MANN. Is it not rather unusual for the House to print a large number of copies of an article by a Member of the House to go to the document room, where presumably they will be largely under the control of the Member? I would like to have some articles printed for myself.

Mr. FINLEY. I will say to the gentleman that the present Committee on Printing of the House has not printed a speech delivered by a Member of the House as a public document, and will not while the committee consists of its present membership.

Mr. MANN. I heard the gentleman, the author of this article, deliver a speech on the subject of trachoma in the House.

Mr. FINLEY. This is a magazine article, and the gentleman who is the author of the article is a distinguished physician and the head of a great institution.

Mr. MANN. Mr. Speaker, I have no doubt of all that, but it is very unusual for the House to print free articles by Members of Congress. If that policy is to be adopted, I do not know where it will end, but I suspect that we will all have articles that we will want printed.

Mr. FINLEY. Mr. Speaker, the Committee on Printing is more often called upon to print articles relating to the public health than articles on all other subjects combined, and so far as I am concerned any article that appeals to me as being in the interest of the public health will have my support both in the committee room and in the House. I ask for a vote.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken; and on a division, demanded by Mr. FINLEY, there were—ayes 46, noes 31.

So the resolution was agreed to.

STUDY OF SOILS OF UNITED STATES.

Mr. FINLEY. Mr. Speaker, I present another privileged resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 831.

Resolved, That there shall be printed 2,100 copies of Bulletin No. 85, Bureau of Soils, United States Department of Agriculture, entitled "A Study of the Soils of the United States," for the use of the House document room.

The Clerk read the report (H. Rept. 1542), as follows:

The Committee on Printing having had under consideration the House resolution (H. Res. 831) providing for the printing of additional copies of Bulletin No. 85, Bureau of Soils, United States Department of Agriculture, reports the same back to the House with the recommendation that the resolution be agreed to.

The estimated cost will be $365.61.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ANTIMALARIAL MEASURES FOR FARMHOUSES, ETC.

Mr. FINLEY. Mr. Speaker, I present the following privileged resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 788.

Resolved, That there be printed for the use of the House of Representatives, to be distributed through the document room, 25,000 copies of the reprint from Public Health Report No. 105, same being an article by Henry R. Carter, senior surgeon of the Public Health Service, entitled "Antimalarial Measures for Farmhouses and Plantations."

The Clerk read the report (H. Rept. 1541), as follows:

The Committee on Printing having under consideration the House resolution (H. Res. 788) providing for the printing of Public Health Report No. 105, being an article entitled "Antimalarial measures for farmhouses and plantations," reports the same back to the House with the recommendation that the resolution be agreed to.

The estimated cost will be $83.60.

The SPEAKER. The question is on agreeing to the resolution.

Mr. FOSTER. Mr. Speaker, I desire to inquire of the gentleman if these are to be distributed through the document room?

Mr. FINLEY. They are to be distributed through the document room.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

FRIEDMAN'S CURE FOR TUBERCULOSIS.

Mr. FINLEY. Mr. Speaker, I present the following privileged resolution which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 834.

Resolved, That there be printed for the use of the House of Representatives, to be distributed through the document room, 36,000 copies of Friedman's cure for tuberculosis, the same being a reprint of Senate Document No. 1018, Sixty-second Congress, third session.

The Clerk read the report (H. Rept. 1543), as follows:

The Committee on Printing having had under consideration the House resolution (H. Res. 834) providing for the printing of Senate Document No. 1018, Sixty-second Congress, third session, reports the same back to the House with the recommendation that the resolution be agreed to.

The estimated cost will be $500.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. FINLEY. Yes.

Mr. DYER. Mr. Speaker, I would inquire of the gentleman why this document can not be printed and distributed through the folding room. There is no way by which Members can get notice that these documents are available in the document room. If they are put in the folding room we get a card.

Mr. FINLEY. Mr. Speaker, I will say to the gentleman that so far as I am concerned, and I am sure the committee is of the same mind, I shall be perfectly willing to have them distributed through the folding room.

Mr. SHERLEY. Mr. Speaker, I noticed from the reading by the Clerk that the document is referred to as Dr. Friedman's "cure." I understand from the public prints and from some informal talks with the heads of the Bureau of Health that there has been none of this culture yet obtained in America, and no proof of this cure. While I think publicity is well to be had, it occurs to me that a document so headed is apt to be very misleading and perhaps to do as much harm as good.

Mr. FINLEY. Mr. Speaker, I will be glad to have some of the physicians in the House discuss that question with the gentleman. I am not a physician.

Mr. SHERLEY. I understand that, and I do not expect the gentleman to discuss it from that viewpoint, but I am calling attention to the fact that the gentleman is proposing, apparently, to publish a document entitled a "cure" touching something about which it appears we have only very meager reports.

Mr. FINLEY. Mr. Speaker, I can say this: I have read both sides of the question, and if what I have read on one side in favor of the cure is correct, then I think the document should be printed and distributed to everybody throughout this country.

Mr. ROBERTS of Massachusetts and Mr. FOSTER rose.

The SPEAKER. To whom does the gentleman from South Carolina yield?

Mr. FINLEY. To the gentleman from Illinois [Mr. FOSTER].

Mr. FOSTER. Mr. Speaker, I would like to suggest to the gentleman from South Carolina that he ought to change the

word, as suggested by the gentleman from Kentucky, and instead of saying "cure for consumption" or "cure for tuberculosis" say "treatment" or "Dr. Friedman's treatment of tuberculosis," because that treatment has not yet been established as a cure for tuberculosis.

Mr. SHERLEY. As a point of fact, we have none of the culture yet.

Mr. FOSTER. And it has not been tried in this country.

The SPEAKER. Does the gentleman from South Carolina yield to the gentleman from Massachusetts [Mr. ROBERTS]?

Mr. FINLEY. I do.

Mr. ROBERTS of Massachusetts. I will state for the information of the gentleman from Illinois that the resolution now under consideration was introduced by myself, and the language "Friedman's cure" is taken from the language in the Senate document, of which this is to be a reprint, and this information that is contained in the Senate document is transmitted from the Secretary of State, it being the result of investigations and reports that have come to the State Department from abroad with regard to this treatment. Now, I agree with the gentleman that possibly the use of the language may be improper——

Mr. FOSTER. I think so.

Mr. ROBERTS of Massachusetts (continuing). But I tried to fix and identify the document so reprinted and therefore used the same language that I found in this Senate document.

Mr. FOSTER. But I suggest to the gentleman from Massachusetts that when we print a document of that kind and send it out and head it "Cure for tuberculosis," by Congress or whoever it may be done, it is misleading and it ought not to be done——

Mr. SHERLEY. If the gentleman will permit——

Mr. FOSTER (continuing). Especially at this time, when it is in an experimental stage.

Mr. SHERLEY. I would like to make this statement in order that the public may not be misled. I had a talk just two days ago with Dr. Blue, the head of the Marine-Hospital Service, touching this matter. The Government had been unable at that time to obtain any cultures, and I understand that Dr. Friedman is either on his way here to America or will shortly be here and that he proposes to demonstrate the efficacy of his remedy, but I have been getting letters, and I have no doubt other men have been getting letters, from people who are affected with tuberculosis who have been led by reports to the belief that the Government is in possession of some certain cure. Now, I do not think in advance of some further investigations we ought to give further credence to the belief, because it may result in bitter disappointment to people.

Mr. HAMILTON of Michigan. Mr. Speaker, I think the gentleman will recall that fraud orders have been issued against the use of the mails in the circulation of alleged "cures," and properly issued, where perhaps they came as near being cures as this may turn out to be.

Mr. ROBERTS of Massachusetts. At the time I introduced the resolution the Senate document had not been printed; it was in the hands of the Printer; but in my efforts to ascertain its title I referred to the CONGRESSIONAL RECORD giving the Senate proceedings of the date when that resolution was ordered to be printed and found in the article the language which I put into the resolution. Just a moment ago there has been placed in my hands a copy of this Senate document, and I see it is headed "Dr. Friedman's new treatment for tuberculosis." Now, in order that there may be no misunderstanding, I would move that the resolution be amended by striking out "Friedman's cure" and inserting "Dr. Friedman's new treatment for tuberculosis" to remedy the objection of the gentleman.

The question was taken, and the amendment was agreed to.

Mr. COX. Mr. Speaker, is the gentleman willing to offer an amendment so that this may be distributed from the folding room instead of the document room, so it may be available to every Member?

Mr. FINLEY. Mr. Speaker, I move to strike out "document room" and insert "folding room."

The question was taken, and the amendment was agreed to.

The resolution as amended was agreed to.

JUDICIAL CODE OF THE UNITED STATES.

Mr. FINLEY. Mr. Speaker, I send up the following privileged concurrent resolution of the Senate.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Senate concurrent resolution 34.

Resolved by the Senate (the House of Representatives concurring), That there be printed 30,000 copies of the Judicial Code of the United States, prepared under the direction of the Judiciary Committee of the Senate, 10,000 copies of which shall be for the use of the Senate and 15,000 copies for the use of the House of Representatives, and 5,000 copies for the use of the Senate document room.

Mr. FINLEY. Mr. Speaker, I ask for the reading of the report.

The report (H. Rept. 1540) was read as follows:

Report to accompany Senate concurrent resolution 34.

The Committee on Printing having had under consideration the Senate concurrent resolution (S. Con. Res. 34) providing for the printing of 30,000 copies of the Judicial Code of the United States, reports the same back to the House with the recommendation that the resolution be agreed to with the following amendments: On line 6, strike out the word "fifteen" and insert "twenty"; and on lines 7 and 8, strike out the words "and five thousand copies for the use of the Senate document room."

The estimated cost will be $3,865.61.

Mr. MANN. How much will we have to pay the gentleman who compiled this work?

Mr. FINLEY. Nothing, so far as I know.

Mr. MANN. Sometimes these resolutions come in for the purpose of having the printing done, apparently, but for the purpose of paying somebody for preparing the work.

Mr. FINLEY. That has not been the case for two years, and will not be, so far as I can prevent it. I ask for a vote, Mr. Speaker.

The SPEAKER. The question is on agreeing to the amendments.

Mr. DYER. Mr. Speaker, what are the amendments?

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

In line 6, strike out the word "fifteen" and insert "twenty," so that it will read: "Twenty thousand copies for the use of the House of Representatives."

In lines 7 and 8 strike out the words "and 5,000 copies for the use of the Senate document room."

Mr. DYER. Mr. Speaker, I ask that the gentleman offer an amendment that these be distributed through the folding room instead of the document room.

Mr. FINLEY. According to the original resolution these are for the use of the House of Representatives, and that means the folding room.

Mr. DYER. We never got them through the folding room before.

Mr. FINLEY. A resolution was not passed in this form before, but you will get them through the folding room under this resolution.

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

The resolution as amended was agreed to.

PENSION APPROPRIATION BILL.

Mr. BARTLETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28730, the pension appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, with Mr. DAVIS of West Virginia in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28730. The general debate having expired, the Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That the following sums be, and the same are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the payment of pensions for the fiscal year ending June 30, 1914, and for other purposes, namely:

For Army and Navy pensions, as follows: For invalids, widows, minor children, and dependent relatives, Army nurses, and all other pensioners who are now borne on the rolls, or who may hereafter be placed thereon, under the provisions of any and all acts of Congress, $180,000,000: *Provided*, That the appropriation aforesaid for Navy pensions shall be paid from the income of the Navy pension fund, so far as the same shall be sufficient for that purpose: *Provided further*, That the amount expended under each of the above items shall be accounted for separately.

Mr. RODDENBERY. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Georgia [Mr. RODDENBERY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Add, at the end of line 7, page 2, the following amendment as a limitation:

"*Provided*, That no pension shall be paid to any person out of this appropriation who is receiving a salary or wage in excess of $1,200 per annum, whether paid annually, monthly, or at other periods of time, except such person be on the pension roll for actual disabilities received in the service."

Mr. BARTLETT, Mr. AUSTIN, and Mr. KAHN reserved points of order on the amendment.

Mr. RODDENBERY. Mr. Chairman, this amendment, if gentlemen will observe it, merely provides that persons having a fixed earning of $1,200 a year shall not receive any money under this appropriation. It also provides that this limitation shall not be enforced if that soldier sustained actual injury in the line of his duty. If this amendment be adopted, it will save in this bill $12,500,000 and not withdraw a pension from any soldier now receiving a pension, provided that soldier saw actual service and sustained any injury therein. Moreover, last year, when the Sherwood bill was under consideration, the gentleman from Ohio [Mr. SHERWOOD] stated, as I remember, that from investigations that he made at certain Army posts from 15 to 30 per cent of them were receiving incomes in excess of $1,000. With that as a fair basis, calculated on the minimum per cent, if this amendment is adopted we will save in this bill $12,500,000, as stated, and not deny to one disabled soldier—a one-armed soldier, a one-legged soldier, an infirm soldier who contracted his infirmity in the line of service—a pension, but it will simply withdraw pensions from those who receive them solely and only on account of having served 30 days, 60 days, or 70 days when never wounded or never in a hospital. I merely desire to give Members an opportunity to carry out our platform, which declared for a generous pension policy and for honest retrenchment in public expenditures. [Cries of "Vote!" "Vote!"]

Mr. BARTLETT. Mr. Chairman, I reserved a point of order, but I am aware that amendments of like character to this have been held by former occupants of the chair to be a limitation even when the Holman rule was not in force. I can not call the Chair's attention just now to a particular case, but refer the Chair to questions of like character that are likely to arise on this bill.

It is proper that I should say to the Chair that while I reserved a point of order I do not believe the amendment is subject to a point of order, either under the Holman rule or without the Holman rule. Therefore I state frankly my views on the subject to the Chair, and I will not make the point of order to the Chair, and some one else who may not agree with my view and who may make the point can argue the question.

Mr. RODDENBERY. Mr. Chairman, if the Chair is not ready to rule, I would like to be heard.

Mr. BARTLETT. Mr. Chairman, without prejudicing anybody in the right to make a point of order, I will reserve it and allow some one who desires to make it to make it.

Mr. AUSTIN. Mr. Chairman, I made the point of order awhile ago. I now insist upon the point of order, and ask that the Chair rule on it.

Mr. RODDENBERY. Mr. Chairman, it would be superfluous for me to take up the time of the House to read to the Chair the Holman rule or the general rules of the House touching appropriations. This is a general appropriation bill appropriating money from the Treasury for pensions. The amendment offered limits the expenditure of this money. In an appropriation bill Congress, if it desires to do so, can decline to appropriate any money or all money that may be authorized by law. That, we might say, is one of the inherent powers of Congress, to decline, if it wants to, to appropriate. In other words, Mr. Chairman, if the Congress wanted to, it could decline to appropriate at all for the Army and the Navy and yet not violate any rules of the House.

That proposition will not be controverted by any gentleman. It has been so held by precedent after precedent. But particularly under the Holman rule is this amendment in order, even if it were not otherwise in order, as the effect of this amendment will be to reduce expenditures by declining to use a part of this appropriations upon conditions which are clearly stated in the amendment.

I do not desire to consume the time of the committee in discussing the point of order which has time and time again been ruled on. I could cite, if the Chair desired, a particular rule that is almost identical with this.

Mr. BARTLETT. Mr. Chairman, I desire to say in reference to the point of order that I did not make it because I did not believe under the precedents and practice and rules of the House that it was to be sustained. I have myself in legislation offered amendments upon appropriation bills of like character with this, limiting the expenditure to certain specified purposes and preventing the moneys from being expended otherwise. I deem this amendment a limitation on the expenditure of the money provided for in this bill.

I have stated that if the Chair desired I could call the attention of the Chair to cases where the exact point has been made in instances of like character. So far as I am concerned I do not propose to discuss it with the Chair when I can not bring to that discussion a conviction of the right of the position I am required to assume to the House.

Mr. SHERWOOD. Mr. Chairman, I doubt very much whether this amendment comes under the Holman rule, for this reason: That it would be the duty of the Pension Office, if this amendment should be adopted, to take measures to ascertain among all the 475,000 pensioners whether their income in each case is $1,200 a year or less.

That would delay the payment of the whole list, and when the expense of ascertaining the facts in every individual case is taken into account it is very doubtful whether it would not cost vastly more than would be saved by the amendment. Therefore I do not believe that it comes under the Holman rule.

The CHAIRMAN. Does the gentleman from Tennessee wish to be heard?

Mr. AUSTIN. No, Mr. Chairman; the gentleman from Ohio has covered the point I had in mind.

The CHAIRMAN. In the opinion of the Chair, the amendment is not necessarily in order under the Holman rule, but the Chair thinks it is a limitation of the purpose to which it is to be devoted, and therefore overrules the point of order.

Mr. MANN. Mr. Chairman, I entirely agree with the Chair that it is clearly a limitation on the appropriation. But even if the amendment is agreed to it would not in the end deprive the pensioners of their pensions, because they would have a claim to be prosecuted through the Court of Claims.

The adoption of this amendment, however, would do this: It would require the Pension Office to ascertain, before any pension was paid after the 1st of July, whether the pensioner was in receipt of a salary or wage to the amount of $1,200. We all know that the Pension Office is now congested with the disposition of applications under the Sherwood law, and to assume that the Pension Office will be prepared to determine whether every pensioner now on the rolls is in the receipt of a salary or wage to the extent of $1,200 by the 1st of July next is to assume an impossibility.

The gentleman from Georgia is very insidious in his opposition to the payment of pensions. If his amendment should prevail the majority of the pensioners would receive no pension after the 1st of July for many months, no matter if they starved before the pensions could be paid to them. It would be an insult to the pensioners to agree to a proposition like this. [Applause.]

Mr. BORLAND rose.

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. BORLAND. I rise to oppose the amendment.

The CHAIRMAN. Debate on this amendment is exhausted.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word. This matter has been considered by the House and by the subcommittee of the Committee on Appropriations having charge of the construction of the pension bill, and I believe that I am right in saying that the majority of that committee are in favor of the spirit of this amendment. We want to proceed as rapidly as we can to reduce this enormous pension roll to some sort of a basis of equity and justice among the pensioners of this country and the nonpensioners.

Every man is willing to go to the full extent that other civilizations have gone in compensating those who have lost a limb or their usefulness, or health, or earning power in the service of their country That is the full basis of pensions according to the idea of the civilized nations.

Every man in this House, whatever his position may be upon the questions involved in the Civil War, is agreed upon that principle of pensions, and that principle of pensions alone. But we have entered upon a system of paying old-age pensions, not for any disabilities contracted in the service, not because the pensioner is less able to earn a livelihood than before, but simply because he has lived to a certain specified age. I am free to say, however, that if a man was in the Civil War and is now living, that is some proof that the Civil War did him no particular harm either in health or earning power. Thousands of good citizens all over the country who have been paying taxes for years, laying bricks for 40 years, pushing a plow for 40 years, honest, sustaining citizens of the Government for 40 years, are not drawing old-age pensions, but we are paying old-age pensions to a limited class of citizens only.

I do not believe that justice requires, in fact, I believe that justice forbids our paying that class of pensions to men now in the enjoyment of earnings amounting to more than that of the average American citizen. If a man at the age of these pensioners can earn $1,200 he can scarcely contend that his services to the Government in the Army have limited or impaired his earning power, and justice is all on the side of this amendment.

But we have been considering these problems from time to time, cutting down the expense of the administration of the pension roll and eliminating these evils. The last time the pension bill was up, the first time it was proposed by a Democratic committee, we eliminated the pension agents and reduced that expense. Now the Pension Commissioner reports that that

change has been a most efficient one in his department. No matter what fight was had on the floor of this House or in another body, when it gets into operation the justice of it is recognized by the officials in charge and by the American people. In this bill we have eliminated a million dollars that would go to foreign pensioners, and that may cause a considerable fight on the floor of this House and elsewhere.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BORLAND. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. WILLIS. Will the gentleman yield?

Mr. BORLAND. I will.

Mr. WILLIS. I understood the gentleman to say that in his opinion justice was altogether on the side of this amendment, in which I entirely disagree with him. But will the gentleman explain how this amendment could be practically applied? This amendment says that if a man is receiving more than $1,200 a year by way of salary or wage, the pension shall not be paid to him. How could the Pension Office determine that?

Mr. BORLAND. To this extent, at least: I have had in mind for some time that men who are receiving more than $1,000 a year from the Federal Government by way of salary or emolument should not also receive a total disability pension from the Government, and that could be readily ascertained without very much expense or delay.

Mr. WILLIS. But this amendment says "$1,200 by way of salary or wage." How could the Pension Office determine that in the case of persons not in the employ of the Federal Government?

Mr. BORLAND. I think that is the only practical difficulty involved. The Pension Office is now wrestling with the problem of enforcing the Sherwood pension law. It is also wrestling with the problem of combining the agencies and paying the pensions by check to the pensioner, saving him from 48 hours to a week's time and some expense in getting his pension. It is solving these two great reforms as rapidly as possible; but I doubt whether the Pension Office at this time, without a large increase of its force, is able to meet this problem of ascertaining the facts in each particular case as to the wage that a man is drawing. When we have the machinery in operation to ascertain that fact, in my opinion it should go into the pension bill.

Mr. CAMPBELL. Does not the gentleman from Missouri know that just now the matter of 10 days, 2 weeks, or a month is a matter of great importance to a very large number of these pensioners. They are dying at the rate of thousands every month, and if you cause a delay of a month or six weeks in ascertaining whether or not a man is eligible for a pension you will find many new-made graves and pensioners in those graves, and the Government will be relieved from the payment of the pensions. Is that the policy we should pursue?

Mr. BORLAND. Let me say to the gentleman from Kansas that he has gone away beyond the point I make that the Pension Office is not equipped at this time to do this. When the Pension Office has solved the problem now before it, the question raised by the gentleman from Kansas will not be important. The pensioners are paid now in groups. It is three months between payments, and there will not be a month's delay for each pensioner at all. In the interim of 90 days between the last payment and the next payment these facts ought to be ascertained.

Mr. CAMPBELL. Would they not have to ascertain every three months whether a man was drawing a salary or having an income of $1,200 a year, which would bar him from drawing his pension?

Mr. BORLAND. I think not. When the rolls have been revised once the changes would be very slight from quarter to quarter.

Mr. MANN. Certainly you would have to ascertain every three months.

Mr. CAMPBELL. Certainly that fact would have to be ascertained every three months.

Mr. SHERWOOD. If the gentleman will allow me, there are a hundred thousand cases under the service-pension law that have not yet been adjudicated, and it would be impossible for the Pension Office to ascertain the facts demanded by this amendment between now and the 1st of July, so that the payment of pensions would be delayed from three to four months if this amendment should be adopted.

Mr. BARTLETT. Mr. Chairman, I should like to suggest that the name of every man drawing a salary from the Government and also drawing a pension can be ascertained in five minutes.

Mr. BORLAND. Of course, there is no trouble in ascertaining the names of those pensioners who are drawing salaries from the Government.

Mr. BARTLETT. None whatever.

Mr. DYER. The gentleman says it would be no trouble to ascertain the names of those in the Government service who are drawing this amount and also drawing pensions; but in a few months a great many of these pensioners will probably lose their positions. How will they then get back upon the pension roll?

Mr. BORLAND. They would get back by reapplication, I suppose, under rules that would be formulated for the enforcement of this order. If a man is stricken from the rolls and he becomes eligible to reinstatement, I presume a method will be provided for his reinstatement.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BARTLETT. I ask that the gentleman have two minutes more.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the gentleman from Missouri may have two minutes more. Is there objection?

There was no objection.

Mr. BORLAND. Mr. Speaker, I intend to vote against this motion at this time, but I desire to say to the Members of the House that if they adopt such an amendment, whether they limit it generally to a salary of $1,200 or to a salary and emolument from the Government amounting to $1,200, the members of the Committee on Pensions will feel that the Members of the House have bound them to have this amendment written into the law.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. RODDENBERY. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Add at the end of line 7, page 2, the following amendment as a limitation:

"*Provided*, That no pension shall be paid to any person out of this appropriation who is receiving or has an income that amounts to $1,000 per annum, except such person be on the pension roll for actual disabilities received in the service."

Mr. RODDENBERY. Mr. Chairman, Members will observe that the amendment just voted down related to a $1,200 per annum salary or wage where the party performed actual labor to earn it—by the month or by a stated period. This amendment applies to a person who may or may not labor himself, but who has a fixed income of $1,000 per annum. If this amendment be adopted, it will not affect the pension of a soldier who sustained an injury in the line of duty as a soldier. This amendment, from the best sources obtainable, if adopted, will save to the Treasury $3,750,000. That saving will be made at the expense of no infirm, no crippled, no maimed, and no poverty-stricken soldier, but it will be made at the expense of those persons who now draw pensions from the Treasury who are recipients of a fixed income of as much as $1,000 a year, and they may on the side presumably be able to earn other sums.

Mr. BURKE of South Dakota. Mr. Chairman, will the gentleman yield for a question?

Mr. RODDENBERY. I yield.

Mr. BURKE of South Dakota. How would the gentleman ascertain who should be dropped from the rolls, and what would be the expense?

Mr. RODDENBERY. I was coming to that in a minute. The gentleman has raised the question as to how this can be ascertained. If the gentleman will read the report of the Commissioner of Pensions for 1910, he will see that it shows that without any specific authorization of law he undertook to purge the pension rolls. His own report shows, according to what it says—but I doubt the full facts of it—that he sent inspectors, now in the employment of the Government, over the country seeking them out, found many, convicted some, and removed others from the rolls. They ascertain now under the law when a widow who is drawing a pension has been married and is fraudulently drawing it. They find out now when persons are by fraudulent means on the pension roll drawing pensions. With the vast money at the command of that department, with the great number of special pension agents all over the country doing this service, they can administer this amendment as they do other branches of work of the Pension Bureau. If the Commissioner of Pensions should see fit, in his judgment, to provide that on the payment of these certificates there should be attached to them an affidavit of the applicant or the affidavit of the pensioner, that within the last current year his income had not equaled $1,000, and there should be affixed thereto the signatures of others intimately acquainted, verifying the truth of that affidavit, so far as they knew, it would at least comply

with the law so as to prevent everybody who was getting a pension under this act and at the same time drawing an income of $1,000 from doing so except one class. If the Pension Bureau made that regulation, there is but one class of pensioners in the country on their own affidavit who could draw this pension, and that class of pensioners would be the men who would perjure themselves. I am here to say that I do not believe the 470,000 men on these rolls would commit perjury. You may think so, and by your vote you may say so, but I do not.

Mr. WILLIS. Mr. Chairman, will the gentleman yield?

Mr. RODDENBERY. I have not the time now. I would be glad to do so otherwise. This is a fair proposition. It will save money to the Treasury. I have offered an amendment that will not only carry out the Democratic policy of generous pensions to soldiers, but at the same time, if you will adopt it, will help us live up to our promise to the people to retrench expenditures and obviate extravagant appropriations.

Mr. CANNON. Mr. Chairman, I have listened to the amendment and I have listened to the speech of the gentleman from Georgia [Mr. RODDENBERY]. I hope and believe that his attitude touching pensions does not voice the attitude of the majority of that side of the House. You can not disburse $180,000,000 of money to eight or nine hundred thousand pensioners without here and there finding an individual who, in God's chancery, ought not to receive the money paid to him. You legislate for the great mass of people. Where a man receives $1,000, either from a little property that he has or from a wage, I would by no means cut off his pension.

The great mass of them do not receive $1,000; the great mass of them are dependent entirely upon their pensions and for relief under the laws touching them. I recollect very well when a service pension of $8 a month was given by legislation to the soldiers of the Mexican War. Visiting Gen. Oglesby, then Senator of the United States, who became general during the great contest for the preservation of the Union, coming from the State of Illinois, a man whose memory is revered by all men and whose personality they respected, one evening in company with two or three others, laughingly it was suggested: "Senator, you will get $8 a month under this law." "Yes," he said, "I will get it, and I will never draw a dollar from any effort of mine in public or private life that I prize so greatly as I do that $8 a month." It showed how he felt about it. Afterwards he told me, saying, "Why, a thousand dollars will not compensate me for the relief that is given by me to my comrades in the war for the preservation of the Union, to say nothing about an occasional something that is asked from the comrades in the War with Mexico." I think, and I want to suggest modestly and not unkindly to the gentleman from Georgia, that it is a waste of time, in my judgment, to seek to place these limitations upon the law. He says in the future, and my colleague from Missouri, Mr. BORLAND, gives notice that in the future, as soon as they can get ready, they are going to purge this roll. I do not believe that the roll will be disturbed by any additional legislation. God is rapidly diminishing the roll, and, in my judgment, probably the last pension legislation has been enacted that will be enacted. However, I will not prophesy as to that matter. I hope the amendment will not be agreed to.

Mr. BARTLETT. Mr. Chairman, I move to strike out the last word, and I ask, if I may desire so much time, to proceed for 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia? [After a pause.] The Chair hears none.

Mr. BARTLETT. Mr. Chairman, this paragraph carries $180,000,000 for pensions to be paid under all existing laws of the United States. Mr. Chairman, I have been here some 18 years. I come from one of the States which formed the Confederacy. My father, friends, and kindred took part in that struggle for the Confederacy. I am the son of a Confederate officer who dedicated all he had—his life, his fortune, and his sacred honor—to undertaking to carry to a successful determination the cause of the Confederacy.

I am proud of that fact, Mr. Chairman, and if my life be lengthened beyond the span allotted to me I will not desire any better or more glorious epitaph than the simple fact that I was the son of a Confederate officer. I have not in these years of my service, however much I have disagreed with the policy of pensions and granting them as has been followed out, felt called upon to resist except by my vote and by my non acquiescence the efforts made to pension or to increase pensions. I have my own views with reference to what should be granted as pensions. I believe that pensions ought to be given for services and for injury or disability. It is true, I have not the slightest doubt, that if the cause for which my father and his comrades fought had been successful, that government, if established, would have pensioned those who fought for the Confederacy. It is a distinction which my State enjoys that she was the first amongst the Confederate States that pensioned liberally those who fought in the Confederate Army from Georgia, and that she now liberally contributes to them and to their widows pensions for their service. They, in receiving that pension, had no government to look to except the State for which many thousands gave their lives, for which they suffered and endured the toils of the march and the struggles of battle, for that government which rose so fair and pure and fell so free of crime could not pension them, and the only relief they had was from the State. I have here, and I shall put it in the RECORD, what the States in 1911 paid from their treasuries to Confederate soldiers. I do not agree to the bill for which we are compelled by reason of its having been passed at the last session to add $30,000,000 to this pension roll; I did not vote for it; I did not think it was necessary; I voted against it, and I would vote against it to-morrow, but I realize that it had its inception and came from our Democratic colleagues, and it could not have become a law but for the overwhelming vote it received at the hands of the Democrats. I realize also that after that law had been enacted a Democratic national convention met at Baltimore, and, in dealing with this subject, with a full knowledge of what the pension law then was, with a statement of the record of this House and public documents of this Congress that the proposed Sherwood bill would cost over $75,000,000 a year, and if we enacted the law known as the McCumber bill it would cost at least $28,000,000 a year, the Democratic Party in convention assembled did not see fit to criticize it except to pledge itself to liberal pensions for soldiers and their widows.

I have no criticism to make of that platform. I have simply the duty placed upon me as a Member of this House and of that committee, and as chairman of this subcommittee, to report to this House the sums necessary to meet the requirements of the Government in the payment of pensions under the existing law.

We were told on Friday last by the distinguished gentleman from Ohio [Mr. SHERWOOD] that we appropriated about $8,000,000 too much. The estimate in this bill by the Pension Commissioner was $185,000,000. Upon inquiry and investigation before the subcommittee he reduced that estimate $5,000,000. My friend from Ohio says we have appropriated too much. I hope he can show that we have. I hope anyone who voted for the Sherwood bill or for the Senate bill with an idea that it would not increase the amount we put in here, and, if they believe it is too much, will rise in his place and offer an amendment to reduce it to $22,000,000 or $25,000,000, or any amount to which he believes it can be reduced.

Let us see what this committee has done in order to meet the requirements of the Pension Office.

It will be admitted, I apprehend, because the experts tell us it is true, that the increase by reason of the act of May 11, 1912, is $72 per pensioner. If anyone says it is any less, notices that it is any less, believes it is any less, I will thank him now to say how much less per pensioner the act of 1912 increases the amount he is entitled to receive under that act. I pause for any suggestion of that sort.

Then there were 470,000 applications under the act of 1912, which would increase the amount $33,840,000. It is estimated that a hundred of these old veterans die every day, making about 36,500 who will probably pass away in a year.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER. Will the gentleman permit an interruption?

Mr. BARTLETT. If I can get my time extended. Mr. Chairman, I might as well ask for 10 minutes more, and after that I shall have nothing more to say on this matter.

The CHAIRMAN. The gentleman from Georgia [Mr. BARTLETT] asks unanimous consent to proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BARTLETT. Certainly; I yield to the gentleman from Wisconsin with pleasure.

Mr. COOPER. The gentleman from Georgia says that the death rate approximates 36,000 a year?

Mr. BARTLETT. One hundred a day.

Mr. COOPER. That will increase very rapidly in the next few years.

Mr. BARTLETT. I think it will, undoubtedly.

Mr. COOPER. It will increase very rapidly in the next few years, because the pensioners of the Civil War will be approaching 80 years of age.

Mr. BARTLETT. I suppose by natural causes there will be an increase.

Mr. SHERWOOD. Will the gentleman allow an interruption?

Mr. BARTLETT. Certainly. I want to say, though, I am giving the figures of this particular bill for the next fiscal year.

Mr. COOPER. I have here a report of the hearings just handed to me by the gentleman from Iowa [Mr. GOOD], which shows that in 1912 the losses by death were 52,863.

Mr. BARTLETT. I had reference to all the pensioners in the Civil War, and that is offset by the gains. I had reference to that.

Mr. SHERWOOD. Will the gentleman allow an interruption?

Mr. BARTLETT. Yes.

Mr. SHERWOOD. The gentleman misapprehends what I said on Saturday. I said that $30,000,000 was too much on account of the Sherwood pension bill, but I did not say $180,000,000 was too much in the aggregate.

Mr. BARTLETT. I did not misunderstand the gentleman and I have not misquoted him. If the gentleman is right about it, or if the gentleman thinks that $32,000,000 or $1 or $1,000,000 or $8,000,000 or any sum is too much, I invite him to move to decrease it down to the amount that ought to be put on this bill; because according to the statement I have made, according to the evidence of the Pension Commissioner and the experts in the commissioner's office, the pension bill that left the House known as the Sherwood bill, and that came back here known as the McCumber bill, is responsible for this increase of $30,000,000. That is where the officials put it, there is where it belongs, and you can not escape it, because it increases the amount paid under that bill to $72 per soldier per annum, and we have to allow for these applications. If 470,000 applications were granted, we ought to have allowed $33,840,000, and if we allow for 70,000 applications which they say will be rejected—and the experience under this law is that there will not be that many rejected—we will have $28,000,000. So that we have not appropriated in this bill anything more than we did last year, except solely for the reason that this House saw fit by a large majority to put upon the statute book the act of May 11, 1912. There is no question about it.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. Yes; of course.

Mr. MANN. The appropriation for the fiscal year 1912 was $153,000,000, I believe?

Mr. BARTLETT. Yes, and something over.

Mr. MANN. Regardless of the Sherwood bill, there would have been a natural decrease of probably in the neighborhood of $10,000,000.

Mr. BARTLETT. A witness who appeared before us said $2,000,000.

Mr. MANN. Ah, the deaths would amount to a good deal more than $2,000,000. At one time heretofore, without any increase, the amount dropped off $10,000,000 a year. Now, this year, on account of the Sherwood bill, there is not only $12,000,000 of actual increase, but also over what decrease would otherwise have occurred?

Mr. BARTLETT. Yes, sir.

Now, Mr. Chairman, reading from the testimony of Mr. Thompson, these facts are brought out:

Mr. BARTLETT. Will you explain to the committee how you arrive at the conclusion that you will require $180,000,000 to meet the expenditures on account of pensions for the next fiscal year?

Mr. THOMPSON. The annual value of the pension roll at this time, exclusive of the increase under the act of May 11, 1912, is about $150,000,000. While there will be a decrease on account of losses to the roll on account of death, this is overcome by the first payments made on the new certificates issued during the year. These first payments amount to some $5,000,000 each year. Add the $30,000,000 increase under the new law to the $150,000,000, and we arrive at the amount required for 1914, or $180,000,000.

The CHAIRMAN. Do you mean the act of May 11, 1912?

Mr. THOMPSON. Yes, sir. Now, this bill adding $30,000,000 to the annual value of pensions, the annual value of pensions has been increased to $180,000,000. That is as near as we can get at it. The average increase by this bill is about $72 per claim.

Now, that is what this committee has acted on and that is what we have done, realizing the full requirements of the law, for which two members of this subcommittee that reported this bill, as I know, did not vote, and for which they are not responsible. Speaking of this bill, which is increasing instead of decreasing and growing each year, my friend from Illinois, Mr. CANNON, said that it would not increase. Why, gentlemen, the Senate just yesterday passed two bills that will add $7,000,000 more to the pension roll. There is no end to it.

For myself, I am impelled solely by my duty to meet the requirements of the law in regard to pensions, although differing with those who have advocated and passed this system of pension laws and differing with the policy of it. The payment of pensions in large amounts to people simply for services does not meet my approval. But I reported this bill and shall vote for it, because as a Member of the House and as a member of the committee having jurisdiction of the bill I am compelled to report the money necessary for carrying out the obligations of the Government. It has been the policy of the Congress, during both Republican and Democratic control, to vote for these large pensions. For the law under which we are now appropriating $180,000,000, additional, for the next fiscal year, and for the present fiscal year we must provide a deficiency of $15,000,000 in the deficiency bill, Democrats are more responsible than Republicans.

I desire to submit a table showing the number of pensioners on the roll on June 30, 1912, and their geographical distribution:

Number of pensioners in each State and Territory, each insular possession, and each foreign country on the rolls June 30, 1912, and the amounts paid therein during the fiscal year 1912.

State or Territory.	Number.	Amount.
Alabama	3,585	$608,703.59
Alaska	74	13,310.53
Arizona	852	117,785.71
Arkansas	10,438	1,715,960.27

SUMMARY.

	Pensioners.	Payments.
Pensioners residing in States and Territories and payments to them	854,622	$151,985,425.89
Pensioners residing in insular possessions and payments to them	207	32,815.44
Pensioners residing in foreign countries and payments to them	5,465	967,863.89
Total	860,294	152,986,105.22
Payments by Treasury Department (Treasury settlements)		328.50
Total payments on account of Army and Navy pensions for the fiscal year		152,986,433.72

The number of Civil War pensioners on the roll at the end of the fiscal year 1911 was 529,884, and at the end of the fiscal year 1912 was 497,263.

The number of Civil War survivors on the pension roll who died during the fiscal year ended June 30, 1911, was 35,243, and the number who died during the fiscal year ended June 30, 1912, was 33,891.

It may be interesting, Mr. Chairman, to contrast the amount of pensions paid to the survivors of the Confederate Army with the amount paid to the survivors of the Union Army now residing in 11 Southern States, and accordingly I submit a table for that purpose:

	Confederate pensions.	Federal pensions.
Alabama	$875,000.00	$596,445.74
Arkansas	531,139.50	1,642,605.59
Florida	650,000.00	815,836.77
Georgia	944,694.08	543,352.41
Louisiana	175,000.00	1,024,613.60
Mississippi	400,000.00	724,961.82
North Carolina	450,000.00	654,072.49
South Carolina	264,000.00	302,562.44
Tennessee	520,000.00	3,190,810.87
Texas	521,000.00	1,504,851.68
Virginia	450,000.00	1,489,553.80
Total	5,780,833.58	12,489,667.21

In the above table are included pensions paid on account of the War with Mexico and the various Indian wars to residents of these States, under the heading "Federal pensions." Of course, for the purposes of fair comparison, pensions other than Civil War pensions should not be included. I regret that I have been unable to ascertain from the Commissioner of Pensions information upon which a proper deduction could be based. If, however, all pensioners of these other wars were residents of these 11 States, which, of course, they are not, there would have to be deducted—

On account of War with Mexico	$1,322,918.11
On account of Indian wars	575,086.52
Making a total of	1,898,004.63

If this overestimated amount be subtracted, we would have in these States the following result:

Federal pensions on account of the Civil War	$10,591,662.58
Confederate pensions on account of the Civil War	5,780,833.58
A difference in 1911 of	4,810,829.00

So, therefore, it is safe to say that the amount paid out last year by the Federal Government on account of Civil War pensions to residents in the 11 States which constituted the Confederacy is at least double the amount paid out by these States on account of State pensions to ex-Confederate soldiers.

Going back to the remote beginning of the pension system, it is interesting to know that the amount disbursed for pensions from July 1, 1790, to June 30, 1865, was $96,445,444.23. The amounts disbursed each year since that date, the cost of administration, including the entire expenses of the bureau in the settlement of claims, the cost of the pension-agency service and fees, and expenses of examining surgeons, and the number of pensioners on the roll at the close of each fiscal year are shown in the following table:

Disbursements for pensions and maintenance of pension system, 1866 to 1912.

Fiscal year.	Paid as pensions.	Cost, maintenance, and expenses.	Total.	Number of pensioners.
1866	$15,450,549.88	$407,165.00	$15,857,714.88	126,722
1867	20,784,789.69	490,977.35	21,275,767.04	155,474
1868	23,101,509.36	553,020.34	23,654,529.70	169,643
1869	28,513,247.27	564,526.81	29,077,774.08	187,963
1870	29,351,488.78	600,997.86	29,952,486.64	198,686
1871	28,518,792.62	863,079.00	29,381,871.62	207,495
1872	29,752,746.81	951,253.00	30,703,999.81	232,229
1873	26,982,063.89	1,003,200.64	27,985,264.53	238,411
1874	30,206,778.99	966,794.13	31,173,573.12	236,241
1875	29,270,404.76	982,695.35	30,253,100.11	234,821
1876	27,936,209.53	1,015,078.81	28,951,288.34	232,137
1877	28,182,821.72	1,034,459.33	29,217,281.05	232,104
1878	26,786,009.44	1,032,500.09	27,818,509.53	223,998
1879	33,664,428.92	837,734.14	34,502,163.06	242,755
1880	56,689,229.08	935,027.28	57,624,256.36	250,802
1881	50,583,405.35	1,072,059.64	51,655,464.99	268,830
1882	54,313,172.05	1,466,236.01	55,779,408.06	285,697

The CHAIRMAN. Does the gentleman withdraw his pro forma amendment?

Mr. BARTLETT. Yes; unless the gentleman from Ohio [Mr. SHERWOOD] wants to speak in opposition to it.

Mr. SHERWOOD. Mr. Chairman, according to the report of the Commissioner of Pensions there was paid out for pensions last year something over $155,000,000. That was before the so-

called Sherwood pension bill went into operation and before a dollar had been paid out under that bill.

Now, the proposed appropriation this year of $180,000,000 is not, I think, too large. I have never said so. It is an increase over last year of $24,564,709. That includes not only the pensions that have been allowed under the Sherwood law, but it also includes all the private pension bills that have been passed by the Committee on Invalid Pensions and by the other Committee on Pensions of this House. It includes all the increases under the McCumber Act also. It includes all the increases allowed by the Pension Office for the soldiers who lost their health in the Philippine Islands and in the Spanish War. So that the whole increase, added to the increases under the Sherwood bill, is $24,564,709.

Mr. AUSTIN. Does not that also include the increase to the soldiers who served in the War with Mexico?

Mr. SHERWOOD. Certainly. Now, the number of private pension claims allowed in this Congress under House and Senate bills is 4,985. The whole amount paid out for these private pensions is $804,307. I tried to get the statistics of the other Pension Committee, without avail, but the probable amount all told will be about $1,000,000.

The gentleman from Georgia [Mr. BARTLETT] states the number of pension claims that have been filed. That is no basis from which to argue or estimate. The basis of estimate is the number of pension claims that have been allowed. When we gave the Pension Office a large extra force last July they agreed to have these pension claims under the Sherwood Act adjudicated by the 1st of February or by the 1st of March. Now, they have allowed 300,000 claims, and as stated by the gentleman from Georgia, the average increase to every soldier is $6 a month, or $72 a year. Multiply that by 300,000 and you have $21,600,000 of increase.

What as to the balance? There are probably about 80,000 soldiers getting pensions by private bills, and they are getting more than they would be allowed under the Sherwood law. So they will not cause any increase. There are 100,000 cases pending now, and 50,000 of these claims are probably under the disability clause. Under the ruling of the Secretary of the Interior a soldier has to prove to the satisfaction of the Pension Bureau that he contracted his disability during the war, and it is estimated that not over 10,000 of those claims will be allowed.

So that as stated by myself on the floor of the House when this bill was up for final consideration, it will not carry over $22,000,000 increase; and these figures from the Pension Office, giving an increase of $24,000,000 for all increases, absolutely verifies what I said on the floor of the House last May.

Mr. BARTLETT. May I ask the gentleman a question?

Mr. SHERWOOD. Not now. By the 1st of July there will not be alive of my old comrades over 465,000 soldiers.

Mr. BARTLETT. May I ask the gentleman a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. SHERWOOD. I will not ask the indulgence of the House any further.

Mr. MADDEN. Mr. Chairman, I rise to oppose the amendment of the gentleman from Georgia.

The CHAIRMAN. Debate on that amendment has expired.

Mr. MADDEN. I move to strike out the last two words.

The CHAIRMAN. The gentleman from Illinois is recognized for five minutes.

Mr. MADDEN. Mr. Chairman, when a man offered himself as a sacrifice that the Nation which needed his services might live, he offered everything he had. No man could offer more than his life to the service of his country. It would be a great pity now if, by some chance or other, because a man happens to be fortunate enough to earn a thousand dollars a year, he should be cut off from the pension which the law allows to men who served in the Civil War.

The payment of a pension to a man who served the Nation in the time of its greatest need is no charity. It is a very inadequate compensation for the service rendered. It should be the proud boast of the Nation that it offers to every man who served during its time of greatest need some consideration in his declining days.

Mr. BARTHOLDT. If we propose to discriminate between those who receive a thousand dollars a year and those who do not, does not that make the whole pension roll a charitable institution?

Mr. MADDEN. Without any question. When the Government needed the services of men to preserve the Nation, no man was asked whether his income was a thousand dollars or a dollar. The question asked him then was, "Are you willing to fight and are you able to fight? Are you willing to give all you have to the service of your country that it may live?" The men from the South, as well as the men from the North, should be proud that we live to-day under a single flag.

They have opportunities which they would not be able to enjoy except for the condition in which we find ourselves to-day. We should be glad to have an opportunity to vote pensions to the soldiers and to their widows. If a man who earns $1,000 is not to be allowed a pension he would be required to make an affidavit every year as to what his income is. He might have $1,000 this year and next year only $500. Are you going to take him off the pension roll this year because, forsooth, he earns $1,000, and how are you going to put him on the roll again next year if he earns only $500? The proposition is impracticable and unworthy of the Congress of the United States; it ought not to be considered seriously on the floor of this House.

The soldiers of the Nation are deserving of every honor we can confer upon them. They have enabled us to live in a land of plenty; in a land protected by a single flag. They have enabled us to live in a land that is a power among the nations of the earth. They were the saviors of the country. We owe them a debt of gratitude. They are receiving no favor from the Nation when they draw their pensions. There is no charity in these pensions. We are giving them but a meager recognition for the services they rendered to the Nation.

Ah, the old soldiers ought to be given every comfort that can be given by the Nation in the few days they have to remain with us. They say that 52,500 died last year, and next year probably 100,000 will die, and the day is not far distant when all of these men will have passed away. While they remain we should be proud to do them honor. [Applause.] Mr. Chairman, I withdraw the pro forma amendment.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent that all debate on the paragraph and amendments thereto be closed in one minute.

Mr. CULLOP. Mr. Chairman, reserving the right to object, we are not aware what other amendments will be offered.

Mr. BARTLETT. I move that all debate on the paragraph and amendments thereto be closed in 5 minutes.

Mr. RODDENBERY. Mr. Chairman, I make the point of order that no quorum is present.

Mr. BARTLETT. Mr. Chairman, I withdraw my motion.

Mr. RODDENBERY. And I withdraw the point of no quorum.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. RODDENBERY].

The question was taken, and the amendment was rejected.

Mr. RODDENBERY. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Add, at the end of line 7, page 2, the following:
"*Provided*, That no person shall be paid or receive any part of this appropriation who is receiving or receives a salary or emolument from the Federal Treasury in excess of $1,200 per annum as an officer or employee of the Government."

Mr. RODDENBERY. Mr. Chairman, I want to say that Members need not attempt unduly to expedite this matter. I am only consuming five minutes on each amendment; other Members are utilizing the time. I have a few amendments that I think are entitled to be considered. The amendment that you just voted down is the identical amendment that the Democratic Committee on Pensions last year brought in with a favorable recommendation to this House. And you vote it down. It is nothing that originated with me. Your own Democratic Invalid Pensions Committee brought in the same amendment on a bill.

Mr. BORLAND. Will the gentleman yield?

Mr. RODDENBERY. I can not yield. I was struck by the remark of my distinguished friend from Illinois, who said that $8 a month to these old captains and majors and generals was not so much for the money, but the mark of honor that went with it. I have here "Who is Who" and "Who's Who in America" for 1910, 1911, and 1912, and I find captains, and colonels, and generals, with their biographies, telling the high officials that they are and what big officers they are and what big offices they are now holding, among them Gen. Black, of the Civil Service Commission, and Col. Davenport, of the Pension Department, and not one of them puts in his autobiography that such has been his service that he is now drawing a pension. They seem to forget to chronicle in their biographies the great honor it is for them also to be drawing a pension. They tell of the great jobs they are holding now, but they forget the pensions.

This amendment, Mr. Chairman, is not subject to the objection that was raised to the others. Gentlemen said that you could not enforce the other amendments, because the Pension Department could not find the facts. You do not have to have any inspectors or detectives in respect to this amendment. This amendment provides that no officer or employee of the Government who is drawing a salary of over $1,200 a year—

$100 a month—shall receive any part of this pension appropriation. The fact that he is drawing a salary shows that he is not crippled or unable to work. The twelve-hundred-dollar limit is $500 a year more than the average man of a family in this country makes, and the man of family is supporting himself, his family, and paying the pensioners beside.

If you propose to vote this amendment down and say you will give a pension to a man holding down a fat job in the Government at more than $1,200 a year and add to it this invalid, old-age, or service pension, you can do it, but bid farewell forever to the pledge of the Democratic Party to form an honest, generous pension policy. You know what our platform said on Republican lavish appropriations and Democratic economy. Judge Parker, in opening the Baltimore convention last year, said of the Republican expenditures:

For their lavish expenditure of public funds they should be destroyed.

And that great auditorium of Democrats roared. When the campaign was being closed by President elect Wilson at Madison Square Garden October 28 he said:

God pity the man who promises the American people what he is not able to perform.

I make an axiomatic paraphrase, God pity the party that promises the American people what it will not perform.

Mr. BORLAND. Mr. Chairman, the gentleman from Georgia [Mr. RODDENBERY] said that the Democratic Pension Committee had brought in the Sherwood bill containing the provision just voted down. In that he is slightly mistaken. They limited the provisions of the Sherwood bill which gave the increase of pensions to those who had an income of less than the specified amount, but they left untouched the pensions under previous laws. The previous amendments of the gentleman from Georgia would have stricken down the pensions under previous laws, as well as under the act of May 11, 1912, and in that they went further than the amendment brought in by the Democratic committee. I want to say that in justice to the Democratic committee.

As to the amendment which the gentleman has offered now, I do not feel that the Committee on Appropriations ought to offer any objection to it. This pension bill calls now for $180,000,000. In addition to that, there will be $15,000,000 in the deficiency appropriation bill to make up the pensions of the year 1913, or a total of $195,000,000. Yesterday the Committee on Appropriations reported a bill for the sundry civil expenses of the Government carrying $113,000,000. That sundry civil appropriation bill is supposed to cover all of the activities of the Federal Government outside of the city of Washington and some inside of it; $113,000,000 covers all of the activities of the Federal Government outside of the city of Washington, but it takes $195,000,000 to pay the pensions alone. We have considerable dispute among ourselves about whether we will have two battleships or no battleship. A two-battleship bill for the Navy, the great policeman of the commerce of the Nation, would not bring the Navy bill much over $150,000,000, and leaving out one or two battleships would bring it down below $140,000,000. This bill calls for nearly $200,000,000. There is no justification, as the gentleman from Georgia says, for paying a pension to a man who is already drawing a salary or emolument from his Government for services that he is presumed to be performing to the value of that emolument.

If a man can draw $1,200 from the Federal Government, presumably earning that $1,200, he is drawing nearly twice as much as the average citizen outside of the Government service who is supporting himself, his family, and the Government. I do not believe we can face the American people and vote down this amendment which says that a man who is already drawing $1,200 from the Federal Government shall not be entitled to a pension based primarily upon the theory that he is in some way disabled by reason of his military service. I shall not oppose this amendment.

Mr. AUSTIN. Mr. Chairman, may I ask the gentleman how he would treat a public servant who is serving the State or the municipality who is receiving that sum of money?

Mr. BORLAND. We have not the same direct reach that we have in this instance.

Mr. AUSTIN. But it can be done.

Mr. RODDENBERY. Mr. Chairman, I will state to the gentleman from Tennessee that I will accept such an amendment if he will draw it.

Mr. BORLAND. Mr. Chairman, the question now is whether the same Government shall with one hand pay a salary and with the other hand pay a pension to the same identical officer. The Committee on Appropriations is not willing to oppose this amendment. We leave it to the judgment of the House.

I ask unanimous consent that debate on this be limited to 10 minutes.

Mr. AUSTIN. Oh, there are a number of us here who wish to speak.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that debate be limited to 10 minutes. Is there objection?

Mr. AUSTIN. Mr. Chairman, I object.

Mr. BORLAND. Mr. Chairman, I ask unanimous consent that debate be limited to 15 minutes.

The CHAIRMAN. The gentleman requests that debate on this amendment be limited to 15 minutes.

Mr. HOWARD. Mr. Chairman, I object.

Mr. BORLAND. Mr. Chairman, I move that debate be limited to 15 minutes.

The CHAIRMAN. The gentleman moves that debate be limited to 15 minutes.

The question was taken, and the Chairman announced the ayes seemed to have it.

On a division (demanded by Mr. AUSTIN) there were—ayes 80, noes 10.

So the motion was agreed to.

Mr. MANN. Mr. Chairman, if there are any old soldiers in the service of the Government, as there are, drawing their salaries from the Government, they are at least presumed to be performing the duties of their offices and earning their salaries. If they are not, the new administration about to come in will have the power to dismiss them. If they earn that money they ought to receive it, but the gentleman from Georgia [Mr. RODDENBERY], who, I regret to say, has not discovered that the Civil War is over and that good feeling is supposed to prevail between the sections of the country, still has the same spirit toward the northern soldiers that he would have had during the heat and excitement and animosity of the war. He wants to punish the old soldiers. He wants to injure the northern soldiers; he feels a hatred toward the men who wore the blue. We are willing, on our side, to treat with kindness and love the men who wore the gray in that great conflict, but it remains for the gentleman from Georgia, I suppose born since the Civil War, to inject into this House on every possible occasion the bitterness which he had, and which I believe does not in the main exist in the South, toward the old soldiers of the North. He wants to cast odium on the man who draws a pension; we want to cast glory on the man who draws the pension. [Applause.] He wants to make it an insignia of ignobleness; we count the pension roll a roll of nobility. I dare that side of the House to be led by the bitterness of the gentleman from Georgia, and I thank my Maker that a great majority even on the Democratic side of the House has shown in the past, as I believe it will show again to-day, that it honors the Union and the Union's defenders. [Applause.]

Mr. KENT. Mr. Chairman, it seems to me that the trouble with this pension business from start to finish is in the assumption that a pension is a reward of service and not a relief of need. [Applause.] As I see it, while I realize the debt that we all owe to those men who in time of strife and stress when the Union was in danger went out and risked their lives that the Union might be preserved, while I realize to the fullest extent that we owe to those men support in their declining years if they need that support. [Applause.] If from invalidism or injuries received in the war, they need our support, or if in the ordinary course of hard luck that is apt to come to any old men they need our support, we should grant it to them. We should relieve their needs, but we should not offer a bounty for their service. You can not pay for public services in terms of pensions. Who can say who is worthy of being paid for public services? As I said before on the floor of this House, the old woman who has brought up a family of children honorably, has educated them, has starved herself and suffered that she might produce for the Nation worthy offspring, that woman in terms of service is just as much entitled to a pension as these pensioners in the Civil War.

I am willing from my standpoint to say that these men are peculiarly entitled to reward by a grateful Nation for having preserved the Union but I do not believe that we are justified in spending the property of all the people in reward when that reward is not needed. I know of men of large fortunes who pride themselves on the fact that they are getting pensions when they do not need pensions, when there are many other people in this country who have been of equal service to the Nation who are in abject need, but who are not getting pensions. I believe this amendment is along the correct theory and I hope it will be adopted. [Applause.]

Mr. HOWARD. Mr. Chairman, the very unkind expressions of the gentleman from Illinois [Mr. MANN], in which he impugns the motives of my colleague from Georgia [Mr. RODDENBERY], furnish the reason for my participation in this debate. I very deeply regret that the gentleman from Illinois [Mr. MANN]

does not know my colleague [Mr. RODDENBERY] as intimately as I do. He is incapable of harboring animosity or possessing rancor of heart against any real soldier who wore the blue in that memorable struggle in the War between the States.

His fight and my fight is not directed against the payment of pensions to the maimed, the indigent, or enfeebled old soldier who did real service. It is against a system which has grown from Congress to Congress, stimulated by the political aggrandizement of candidates for office bidding for the influence of the "old-soldier vote," until the people are groaning under a load of $180,000,000 in annual appropriations to meet the payment of pensions, and this 50 years after the war.

President Garfield during his administration apologized to the people for the fearful amount appropriated for pensions when we were only appropriating $35,000,000 a year.

My observations are that this whole system of pensions as administered is wrong. The millionaire, the man in comfort, the man who did no real service, the wagon trailer, and the deserter have the same place on the pension roll. This great Government, in showing its gratitude to those who fought for the Union, can show it best by relieving those who are needy by appropriating an annual gratuity, and it is the duty of this Nation to see to it that none of the real old soldiers suffer in want.

Mr. Chairman, I feel assured that I express the sentiments of 90 per cent of the people whom I have the honor to represent in making the statement that they are not jealous, nor do they find fault with the payment of pensions to the deserving Union soldier. Even the old battle-scarred veterans of the Confederacy, who wore the gray, are magnanimous enough to want their adversaries upon the field of carnage dealt with liberally, and from them we hear no complaint.

It behooves someone from some section of this great Commonwealth to call attention to the reckless and extravagant way in which we are appropriating the people's money. From whence shall this criticism of the present pension system come? Do you think it would come from Democrat or Republican who has thousands of old soldiers and old soldiers' families in his district, who could elect or defeat any candidate who would not accede to their demands for a greater pension? If you wait for criticism to come from this source, we will wait till the crack of doom for a reduction of the enormous sum now being expended.

Mr. Chairman, I was born 10 years after the war on a farm located on the battle field of Atlanta. Gen. William T. Sherman and his staff had his headquarters in my father's home, and the body of the gallant Gen. McPherson, who was killed in this memorable battle, was prepared for burial and laid out in my father's home. The day after that everything my father possessed on earth was reduced to ashes, and from that day until the day of his death no one ever heard him utter a disparaging word against the brave men who participated in that struggle of the 22d of July, 1864. I have in my heart, and have always had, nothing but the kindliest feeling for the gallant old Union soldier. I would like to see him liberally dealt with. I would like to see the deserving and needy separated from that class of undeserving and well-to-do, but when I look at the figures before me and see that this Congress, in the control of my own party and pledged to an economical administration of the affairs of government, is spending $419,000,000 for past wars and in appropriations for future wars, and when I see the internal revenue and customs duties and corporation tax are only a little over $650,000,000, I can not but be amazed at the patience of the American people with past Congresses in tolerating such a condition in times of tranquillity and absolute peace.

Mr. Chairman, are we who happen to represent in part that great section of this glorious land called the South to be accused of hatred, malice, and violent prejudice simply because of the fact we enter a protest against willful, premeditated extravagance, against unjust, inequitable, and downright inequalities in the distribution of a pension fund? Shall a simple protest bring forth the "bloody shirt," a weapon most formidable at one time in our history, but the use of which at this day when, thank God, we are united by the everlasting ties of brotherly love, is an admission on the part of him who flaunts it that reason and justice can no longer be resorted to in defense of the present system, but that the advocate of this system must appeal to passion and prejudice and accuse those of us who feel that our pledges for an economical administration of the affairs of this Government are sacred of being possessed of the devil and incapable of casting out hatred and prejudice, and that our utterances emanate from such a source?

Mr. Chairman, the old soldiers, those who were real soldiers, agree with every word that I have uttered and that it is a system which allows the deserter to have his disabilities removed by an act of the American Congress and allows him to be placed side by side on what the gentleman from Illinois terms the "roll of honor" with the old soldier who bared his breast to the enemy's fire that he might save his country and his Union, while the coward and the laggard slunk away to a place of safety. They do not feel that this is fair treatment, and they do not feel that deep appreciation which all of these old soldiers would feel if the pension roll were in truth and in fact a "roll of honor." My own State of Georgia deals liberally with those old soldiers who wore the gray, and in truth and in fact the pension roll of my State is a roll of honor; but if that roll were left to contending politicians it would soon be a question of rivalry between candidates for office rather than a gratuity from the State acknowledging gratitude to those who were willing to lie down and die for the cause they thought to be right.

Mr. CULLOP. Mr. Chairman, the proposed amendment, as I understand it, is to prevent any employee of the Government, receiving a salary of $1,200 a year or more, from receiving a pension. I am opposed to that amendment. I shall vote against it.

Mr. BURLESON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BURLESON. What is the limit of debate?

The CHAIRMAN. Fifteen minutes on the pending amendment and the amendments thereto, of which two minutes remain.

Mr. CULLOP. And I want to say in the short time I have, to the gentleman from Missouri [Mr. BORLAND], that when he says all the people of this country are against pensions, he never was more mistaken in his life. The people of this country approve the Sherwood pension bill——

Mr. BORLAND. The gentleman is fundamentally mistaken about what I said.

Mr. CULLOP. I am glad that I am mistaken, for I hope the gentleman would make no such mistake as that.

The patriotic heart of this country beats in sympathy with that great band of heroes who saved this Nation when in peril and made it the greatest country on earth. [Applause.] And the people of this country stand ready to support liberal pensions. I want to say to the gentleman from Georgia [Mr. RODDENBERY] that his party came into power under the promise to vote liberal pensions to the old soldiers of the Civil War. And the Republican Party went out of power in 1910 because it had failed to keep its promise upon that question to the old soldiers of the Union. [Applause.]

I hope the time will never come when a majority of the people of this country will oppose the pensioning of the men who offered their lives as sacrifice in defense of the Union, in the preservation of our institutions, and for the perpetuity of human liberty. To these men, who by their dauntless bravery, their great patriotism, marched forth at the call of their country to protect this Government, we owe a debt of gratitude we shall never be able to pay. As long as one survives this country should, and I hope will, show its appreciation for his great and most valuable service. If one of them by industry has prospered and made a competency since that great war ended, it should not be charged against him in estimating the value of his services to his country and the appreciation in which the same is held. Many have prospered, and I am glad of it, because of that fact, though, our obligation to them is not decreased nor our esteem of their service diminished. Because of it our debt of gratitude is the greater, and we should acknowledge it. The survivors of this great war witness with pride the result of their heroic efforts. They see in their declining years a reunited Union, a prosperous people prosecuting every avocation known to civilized man, a country the richest and most powerful in all the world. They rejoice that it is so. The argument has been made that economy requires a reduction of the expenditures for pensions. In response to that argument it is sufficient to say that the people have approved the policy adopted and indorse its continuance. They appreciate the services of these men and desire to acknowledge in a substantial way their gratitude. Patriotism requires it. It may be said this country pursues the most liberal pension policy of any country in the world. I am glad of it. It ought to do so. It is the richest and greatest country on earth; it leads the other nations of the world in all other things, and hence it is proper to do so in the reward it pays to the men who have defended its flag and preserved its institutions, who have made possible its standing before the world and enabled its people to accomplish their wonderful achievements. We should encourage rather than disparage their great work and stimulate the admiration the country owes and accords them. Let us

continue to emphasize their heroism and venerate their patriotism in order that in their declining years they may understand their efforts are appreciated by a generous people. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. RODDENBERY].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. RODDENBERY. Division, Mr. Chairman.

The committee divided; and there were—ayes 38, noes 102.

Mr. RODDENBERY. Mr. Chairman, I ask for tellers.

The CHAIRMAN. Tellers are demanded. Those in favor of taking the vote by tellers will rise in their places and stand until they are counted. [After counting.] Only five gentlemen have arisen—not a sufficient number. Tellers are refused.

So the amendment was rejected.

Mr. RODDENBERY. Mr. Chairman, I offer an amendment which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Georgia.

The Clerk read as follows:

Add, at the end of line 7, page 2, the following amendment as a limitation:

"*Provided*, That no payment of pension shall be paid to any person out of this appropriation who owns property, real or personal, in excess of $3,000, except such person be on the pension roll for actual disability received in the service."

Mr. MADDEN. Mr. Chairman, I make a point of order against that.

The CHAIRMAN. What is the ground of the gentleman's point of order?

Mr. MADDEN. In that it is a change of existing law.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] makes the point of order against the amendment that it is a change of existing law. The Chair overrules the point of order.

Mr. BORLAND. Mr. Chairman, I move that all debate on this amendment and all amendments to the pending paragraph close in 10 minutes.

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] moves that all debate on this amendment and all amendments to the pending paragraph close in 10 minutes.

Mr. MANN. Mr. Chairman, a parliamentary inquiry. Was not that order made before?

The CHAIRMAN. It was not made.

Mr. MANN. Then the motion is not now in order, because there has been no debate.

The CHAIRMAN. The previous order was on the pending amendment and all amendments thereto.

Mr. MANN. The gentleman's amendment is not in order.

The CHAIRMAN. The point of order is well taken. The gentleman from Georgia [Mr. RODDENBERY] is recognized.

Mr. RODDENBERY. Mr. Chairman, I wish to observe, as we are nearing the close of this debate, that the proponents of these amendments are consuming only five minutes on each amendment and are not asking for more time. When you propose to pass this bill unchanged, although amendments are offered which are reasonable and germane, and when Members consume time, as is done on the other side, without permitting the proponents to have five minutes in which to present their views, you set a new rule of legislative procedure in the committee.

This amendment which I now offer, gentlemen, was wrong in the figures as read by the Clerk, who read the figures "$3,000." It should be "$5,000." It was intended to provide that no person who did not receive an injury or contract a disease in the war and who has $5,000 worth of real or personal property shall receive a pension from this appropriation.

If it is your judgment that a man without wounds, without disease, without ills, without infirmity, who has of this world's goods $5,000 worth, should draw a pension; if you believe that the struggling, the laboring, the toiling millions of this country should be taxed to give a well and sound man who has $5,000 worth of property a pension, then vote against the amendment. If, on the contrary, you believe, as I believe, that the faithful soldier only should have a pension, and that if he is wounded or ill or infirm or diseased it should not be denied, then you will vote for my amendment.

I shall not reply resentfully to the criticism of my friend the gentleman from Illinois [Mr. MANN]. If he can be content to make it, I can cheerfully let it pass. Only take a moment to observe that when, a moment ago, he saw that the temper of this side of the House and the temper of some Members on the other side of the House was such as to adopt an amendment offered by me which prohibited the payment of a pension to an officeholder of the Government who is drawing more than $1,200 a year, he knew that argument, he knew that reason, he knew that justice would not warrant him in opposing that amendment. His only hope was the lawyer's last retreat in a desperate case—of "cussing" the other lawyer. So he turned on the proponent of the amendment, he having come from the southern portion of the country. One of the first experiences as a young lawyer I ever had in court was when I was assigned to defend a feeless criminal charged with robbery. The evidence was put in, and it was strong against my client. The case was proven overwhelmingly. Despairing, I turned to a senior lawyer, an ex-Member of Congress, and said, "Colonel, it looks as if there is nothing for me to say. The proof is insurmountably against us, and I might as well give up the case." "Give up the case?" says he; "No." I said, "But all the facts are against us." "The facts?" said he. "You ignoramus! The jury does not give a damn about the facts. Give the other lawyer hell, and you will win your case." [Laughter.] That is all my friend the gentleman from Illinois [Mr. MANN] could do. [Laughter.]

Gentlemen, the day is past and gone in this country, if not in the House, when people fail to recognize that from along the borders of Canada to the Gulf on the shores of Mexico and from the Atlantic to the Pacific every section of the country feels it a duty, an honor, and a privilege to accord to the Union soldier a just pension for his sacrifice and for his service to the country. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Mr. Chairman, I want to remind my friend from Georgia that we are approaching the end of a very busy session and that we have no disposition to cut off his debate on these amendments so long as new points are involved; but when they involve practically the same question we believe there has already been ample debate.

Mr. RODDENBERY. I have but two more amendments.

Mr. BORLAND. I move that all debate on the pending paragraph and all amendments thereto close in 10 minutes. I think that is eminently fair.

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] moves that all debate on the pending paragraph and all amendments thereto close in 10 minutes.

The motion was agreed to.

Mr. TOWNER. Mr. Chairman, it may be worth while for us to examine whether or not there is merit in the objection that is made by the gentleman from Georgia [Mr. RODDENBERY]. He is not alone in making objections of this character. There are many who join with him in doing so. There are many who think no pension ought to be granted to any Union soldier unless he is actually in need of a pension. I admit that there is good ground for such support of pension legislation, but I deny that it is the only support that pension legislation has or should have.

It is certainly true that this Nation can not be entirely indifferent to those who have made sacrifices, when they are in want and in need. Any Nation that is indifferent to the condition of those who have made sacrifices in its behalf is on the verge of its own destruction, because it destroys the very springs of patriotism.

But I go further than that, and I think this House goes further than that. It is not only relief of need that is the basis of our legislation, but it is also the reward of service. It is not sufficient that we merely pay a man who goes out to fight the battles of the country. It is of vastly more importance that we should make him understand that the risking of his life and the performance of his service will be appreciated by the country for which that service is rendered. This appreciation has been shown in every country throughout all the ages. The legions that followed Cæsar received their reward when they returned. Talents of gold and silver were thrown at their feet and triumphs were given them. The soldiers of Great Britain have from time to time received pensions of various kinds, as well as other rewards. Throughout our entire history, from Revolutionary days down to the present time, we have seen not only that the pay promised to the soldier was given, but also that the soldier was led to believe that it was of value to him to serve the country if he cared for the good opinion of mankind and of those who were to come after him.

We could raise no stronger bulwark in defense of our Nation in the coming years when we shall certainly have to pass many crises that will call for all the patriotic devotion of our citizens; we can construct no stronger bulwark in support of the safety and perpetuity of the institutions of this country than by saying to those who have borne arms in our defense, "You will not be forgotten. Not only will we give you the meed we promised, but the generous heart of the Nation will in every

way it can mark its appreciation of your service and your sacrifice." [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. TAGGART. Mr. Chairman——

Mr. RODDENBERY. Mr. Chairman, I make the point of order that debate is exhausted.

Mr. TAGGART. Mr. Chairman, I move to strike out the last word. I would have greater sympathy with amendments of this nature if they really amounted to anything. We do not know now. No one is furnished with the statistics to show how many men are in the service of this Government, who are drawing salaries in excess of $1,200 and also drawing a pension. We have no facts before us at all. I venture to say that there are very few, and that the saving would be a comparative trifle. It would mean that a man was not entitled to a pension because he was employed by the Government at a stated salary. This is simply a penalty on serving the Government.

I would further have greater sympathy for the amendments at this time if I felt that they particularly burdened the people of that good State whose Representative is urging the amendments with such force and ability on this floor. If I have read and remember the statistics correctly, the good State of Georgia contributes to the internal revenue of the United States just a little more than half a million dollars. No statistics can be given as to what share of the import duties of the United States are paid by the citizens of that State, but assuming, as they have 2 per cent of the population, they pay 2 per cent of the $314,000,000 collected on imports it amounts to a little more than $6,000,000. The record shows that more than 3,000 pensioners are within that State receiving their quarterly installments of pensions and immediately spending that money among the citizens of the good State of Georgia. On top of that great disbursement of the Treasury the unparalleled generosity of this Congress, and this is evidenced by the bill that passed yesterday. In that bill $472,500 was voted to build public buildings in the State of Georgia, and the river and harbor appropriation bill shows that $856,000 and more was appropriated to improve the rivers and harbors of that State, making in all more than a million dollars directly received out of the Federal Treasury. In addition to this, $270,000 is appropriated by the sundry civil bill to carry on the work of constructing buildings already in progress in the State of Georgia.

If we should estimate the pensions of these pensioners that live in the State at the regular rate of people who are receiving pensions, I imagine that nearly another million dollars would be represented in that State.

Mr. BARTLETT. Oh, no; the gentleman is mistaken. I have the exact figures here of the pensions paid to the citizens of Georgia.

Mr. TAGGART. I would be glad to have the gentleman give them.

Mr. BARTLETT. They amount to $527,263.24.

Mr. TAGGART. Paid to the citizens of the State of Georgia?

Mr. BARTLETT. Paid to people who are residing in Georgia.

Mr. TAGGART. They do not lose their citizenship by drawing a pension, do they?

Those were the figures for the fiscal year ending June 30, 1912. Those pensions have been increased and the disbursement is now nearly a million dollars. Georgia is a singularly favored State. I believe that Georgia, this year, at least, is a net loss as a revenue producer. Should we add together the $472,500 authorized for public buildings, the $270,000 appropriated to complete public buildings, the $856,720 for rivers and harbors, and even the $527,263—the figures last year for pensions—we have $2,125,483. And should we add to this all the disbursements for salaries and other purposes by the Government in Georgia, which are not less than $8,000,000, making more than $10,000,000, it appears that Georgia is safely ahead of the game. Georgia is herself a pensioner.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. RODDENBERY].

The question was taken, and the amendment was lost.

Mr. RODDENBERY. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Add, at end of line 7, page 2, the following amendment as a limitation:

"*Provided*, That no pension shall be paid out of this appropriation to any person who is an inmate and cared for in a soldiers' home supported in whole or in part from revenues of the United States Treasury, except such person be on the pension roll for actual disabilities received in the service."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken, and the amendment was lost.

Mr. RODDENBERY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amend, in line 2, page 2, by striking out "$180,000,000" and inserting "$150,000,000" in lieu thereof.

Mr. RODDENBERY. Mr. Chairman, I desire to state——

Mr. FOSTER and Mr. BORLAND made the point of order that all debate was closed.

Mr. RODDENBERY. Mr. Chairman, is it not in order in offering the amendment to state the grounds upon which this amendment can be made?

The CHAIRMAN. The Chair thinks it is not in order to debate the amendment either briefly or at length. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. RODDENBERY) there were 10 ayes and 33 noes.

So the amendment was lost.

The CHAIRMAN. The Clerk will proceed with the reading of the bill.

The Clerk read as follows:

For fees and expenses of examining surgeons, pensions, for services rendered within the fiscal year 1914, $300,000.

Mr. BARTLETT. Mr. Chairman, I stated on Friday the reason for the increase in this item in the bill. Heretofore there has been carried the amount of $200,000 for this service of examining surgeons. It was found after the passage of the act of May 11, 1912, that owing to a decision rendered by the Secretary of the Interior, which I have here and which I shall place in the RECORD as a part of my remarks, the necessity for this service has been doubled, and therefore the increase in surgeon fees. In other words, we have to have twice as many examinations by surgeons as we had prior to the time of the decision. That creates the necessity for the increase of $100,000 for the next fiscal year and the deficiency of $100,000 in this fiscal year.

I ask unanimous consent to insert in the RECORD the decision in the case of Charles King, a case which demonstrated the necessity for the increase in examinations.

The CHAIRMAN. Is there objection?

There was no objection.

The paper referred to is as follows:

[No. 10.]

DEPARTMENT OF THE INTERIOR,
Washington, December 10, 1912.

CHARLES KING.

Decided December 10, 1912.

PRACTICE—ACT MAY 11, 1912—DISABILITY OF SERVICE ORIGIN—MEDICAL EXAMINATIONS.

All claims under section 1 of the act of May 11, 1912, by persons who claim title to the $30 rate provided in said act for any person "who served in the military or naval service of the United States during the Civil War and received an honorable discharge, and who was wounded in battle or in line of duty and is now unfit for manual labor by reason thereof, or who from disease or other cause incurred in line of duty resulting in his disability is now unable to perform manual labor," must be considered and adjudicated in accordance with the well-established and uniform practice of the bureau and the department in claims under the general law wherein the question of title to the second grade or $30 rate is involved—that is, through the medical division of the bureau.

The adjudication of this claim on a certificate of a medical examination made prior to filing the claim was error.

LAYLIN, *Assistant Secretary:*

The appellant, Charles King, formerly a soldier of Company C, Ninth Iowa Volunteer Cavalry, while in receipt of a pension under the general law at the rate of $17 a month on account of disability arising from disease of eyes and piles, filed May 15, 1912, a declaration for pension under the provisions of the act of May 11, 1912, alleging that the said causes totally incapacitate him for the performance of manual labor.

The bureau, July 8, 1912, rejected said claim on the ground the evidence failed to show that he is unable, by reason of disability of service origin, to perform manual labor, as contemplated by the act of May 11, 1912.

The claimant in the appeal which was filed July 15, 1912, contends said action was erroneous in fact and law; that the evidence of his family physician, Dr. A. O. Williams, and two other witnesses, Jesse B. Skinner and Elihu H. Criley, fully sustains his claim.

The papers in the case were transmitted to the department by the bureau July 25, 1912, accompanied with a report from the Commissioner of Pensions, who says:

"* * * The disabilities of service origin set forth as the basis of title are those for which he is now pensioned under the general law at the rate of $17 a month, namely, disease of eyes and piles.

"Not all the claimant's impairment of vision is due to disability contracted in service, there being an error of refraction, which is a serious factor. Making due allowance for this, it is believed that the evidence submitted is insufficient to show that by reason of pensioned causes, disease of eyes and piles, the claimant is now unable to perform manual labor, as contemplated by the act of May 11, 1912, and the action complained of is therefore adhered to."

The affidavit of Dr. A. O. Williams, referred to in the appeal, reads as follows:

"I have known Charles King for 30 years. He is at the present time suffering from loss of eyesight and piles to such a degree that he is unable to perform manual labor. I have had occasion at various times in the past few years to prescribe for him while suffering from these ailments."

Jesse B. Skinner testified as follows:

"That I have been personally acquainted with said Charles King for over 30 years, and have been his neighbor for at least 10 years past; that he is now a great sufferer from piles, and his eyesight is very poor, so he can hardly see. Said disabilities prevent him from performing manual labor alone."

The other affidavit, that of Elihu H. Criley, is as follows:

"I have been personally and intimately acquainted with the claimant, Charles King, for the last 30 years, and am well acquainted with his present physical condition. His eyesight is now very bad, so he can hardly see, and he is greatly suffering with piles, and he is now unable to perform manual labor on account of said disabilities alone. I am not related to him in any way."

It is noted the adverse action was taken by the bureau in the absence of a medical examination of the claimant by an examining surgeon or a board of examining surgeons, and that the claim was adjudicated without submission of the case to the medical referee for consideration and advice.

As far as the department can determine, there is nothing in the evidence submitted in support of the claim that shows the impaired vision testified to is not due to the disease of eyes of service origin, or that an error of refraction is a serious factor.

It is true that an examination made by an expert (oculist) November 10, 1910, under a claim for increase under the general law filed October 6, 1910, showed the existence then of a not very serious refractive error, but it also showed that pterygia existed which encroached upon the pupillary space. There is no evidence now offered to show that these pterygia have not further extended and caused loss of vision.

The question involved is technical, and can not be determined without the advice of one well informed in medicine.

The law authorizing the appointment of a medical referee in the Bureau of Pensions and defining his duties is found in section 4776, Revised Statutes, and is as follows:

"The Secretary of the Interior is authorized to appoint a duly qualified surgeon as medical referee, who, under the control and direction of the Commissioner of Pensions, shall have charge of the examination and revision of the reports of examining surgeons and such other duties touching medical and surgical questions in the Pension Office as the interest of the service may demand."

It seems quite evident that this statute was intended to provide the commissioner means for determining questions involving medical and surgical matters, and it is equally evident that the question involved in the case at bar could not be properly determined without the advice of the medical referee; in other words, the "interests of the service" demanded such consideration.

It is not only true that this case should have received medical consideration, but it must be true of all cases arising under the provisions of the act of May 11, 1912, wherein the question of title to $30 a month arises, which is predicated upon an inability for the performance of manual labor from disease or other causes incurred in service and line of duty.

It seems hardly reasonable that any person not educated in medicine can properly differentiate the results of injuries and diseases of service origin from those having no relation thereto or connection therewith, certainly not when the case involves disease of eyes.

The department is of opinion that all claims under this provision of the act of May 11, 1912, should be considered and adjudicated in accordance with the well-established and uniform practice of the bureau in all claims under the general law wherein the question of title to the second grade or $30 rate is involved—that is, through the medical division of the bureau—and such practice is hereby directed.

The lack of a medical examination or consideration operated unjustly in this case. So far as the record shows, the pterygia (thickened masses of conjunctiva) may have in the past two years progressed so far as to warrant the allowance of the $30 rate; certainly a certificate of examination made two years prior to filing this claim is not sufficient evidence of the present physical condition of the claimant. The probability or possibility is distinctly a medical question, and should have been considered by that branch of the adjudicating force of the Bureau of Pensions.

The appellant's claim, in the view of the department, as expressed, was incorrectly and improperly adjudicated to his prejudice, and for that reason the action is reversed.

Mr. MANN. Mr. Chairman, could the gentleman tell us very briefly what that decision is?

Mr. BARTLETT. I did that last Friday, but I will repeat it.

Mr. MANN. Oh, I do not ask the gentleman to do that. I simply did not hear him last Friday.

Mr. BARTLETT. It is in the RECORD. The Commissioner of Pensions decided that when a man applied for a pension or an increase of pension under the act of May 11, 1912, on account of disability, inability to do any work, it was a question of fact to be determined by the affidavit of the claimant and his witnesses, and in the case that I have put in the RECORD the affidavit of physicians who knew him. That case was appealed to the Secretary of the Interior, and he decided it was not a question of fact, but that the bureau did not have the right to turn down that applicant until he had been examined by a surgeon. That decision increased the number of examinations, and there were required just twice as many as had been formerly customary. The examining surgeons receive $3 every time they make the examination. That brought about the increase necessary. We have, therefore, provided for the $300,000 in this bill and expect to be compelled to provide for a deficiency of $100,000 in the deficiency appropriation bill.

Mr. FOSTER. Mr. Chairman, in connection with what the gentleman from Georgia [Mr. BARTLETT] has just stated, I think that possibly he does not thoroughly understand the situation. The King case came up, I think, in this way. In the department it had been decided that he was not entitled to $30 a month on account of wounds and disease contracted in the Army. This decision was made not through an examination by physicians but after having been passed on by others than a board of medical review, and so the soldier or his attorney contended that under the law as enacted on May 11, 1912, he was entitled to have his case adjudicated by a board of surgeons. Under this law they are being considered by the medical board instead of by a board composed of members other than doctors, who passed upon the age and the length of service. It is not the case, as might be inferred from what the gentleman from Georgia has said, that all cases going there shall be referred to a medical board out in the country near where the applicant may live; but if in the judgment of the medical board it is necessary, or if it has been two or three or four or five years or more since the applicant has been examined, then he may, in the judgment of the medical board, be sent before an examining board for the purpose of determining whether he is entitled to this increase. That, I think, is all there is to that decision in the King case.

Mr. BARTLETT. I just filed the case for reproduction in the RECORD.

Mr. FOSTER. I would state to the gentleman that I have the decision in the King case, and I have read it with some degree of care.

Mr. BARTLETT. I do not think I misunderstood the case.

Mr. FOSTER. I think the gentleman's idea, so far as the general routine of these cases going through the Pension Office is concerned, is not correct.

Mr. BARTLETT. I do not understand what the gentleman means.

Mr. FOSTER. As I gather from the gentleman's statement, this King case is the cause of all these cases having to be examined.

Mr. BARTLETT. No; I did not say that.

Mr. FOSTER. Then let the gentleman tell us what he did say.

Mr. BARTLETT. This will be the third time, and I will undertake to do it as clearly as possible.

Mr. FOSTER. I think the gentleman's statement on Friday was incorrect.

Mr. BARTLETT. If I am wrong about it, then the Commissioner of Pensions is wrong about it. I said that the Commissioner of Pensions said that the decision rendered in that King case and in another case was responsible for the increase in the amount of surgeon fees asked for, and by reason of that decision the necessity to pass on applications for pensions had doubled up.

Mr. FOSTER. But I will state——

Mr. BARTLETT. If I am wrong, then the Pension Commissioner is wrong, that is all.

Mr. FOSTER. I will state this to the gentleman from Georgia, that it is not necessary that in all these cases an examination shall be had——

Mr. BARTLETT. That is that decision?

Mr. FOSTER. That is not the decision; the gentleman, I think, does not understand the decision.

Mr. BARTLETT. Well, I think I do.

Mr. FOSTER. It simply says this—if the gentleman will be kind enough to wait until I get through—the decision provides that on medical subjects or cases requiring the rating for the degree of disability shall be decided by doctors instead of by lawyers. That is all there is to it. It may not be lawyers, but others outside of the medical profession.

Mr. WILLIS. The gentleman has given these matters great attention——

Mr. FOSTER. No; I have not so great, but have read these cases as they have come up in the Pension Office.

Mr. BARTLETT. Evidently he has not.

Mr. FOSTER. I think the gentleman from Georgia, if he has given it attention, has misunderstood what the decision meant.

Mr. BARTLETT. It is not the fault of the gentleman from Georgia, but the fault of the gentleman from Illinois——

Mr. FOSTER. No; the gentleman from Georgia does not know when he does read, if he thinks he has read that right. I doubt whether the gentleman from Georgia has ever read the decision.

Mr. BARTLETT. The gentleman is making a statement that he is not warranted in making. I will reply to the gentleman in my own time.

Mr. FOSTER. I hope the gentleman will, and state the facts as they are.

Mr. WILLIS. Is it the contention of the gentleman from Illinois that under this decision as it now stands it is entirely possible for a claimant to get his claim passed and adjudicated favorably without a new medical examination?

Mr. FOSTER. Certainly. And it is in the discretion of the Pension Office when an examination shall be made.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIS. I ask that the gentleman's time may be extended for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio? [After a pause.] The Chair hears none.

Mr. FOSTER. As suggested by the gentleman from Ohio, it is entirely possible for a claim to be adjudicated without medical examination, but it is left for a medical board to determine whether the examination is necessary, and not a board to pass on it who know practically nothing about the pathological condition as might be shown by an examination in the papers or certificates filed.

Mr. MANN. Will my colleague yield for a question?

Mr. FOSTER. Yes.

Mr. MANN. I understand my colleague to say that the ruling was—and he apparently coincided with that—that now they considered it was more proper for medical men to determine whether a man had physical disability than for lawyers.

Mr. FOSTER. Yes.

Mr. MANN. Is that the ruling?

Mr. FOSTER. The ruling is this: That these matters shall be passed upon by a medical board instead of by a board which is not educated in medicine.

Mr. MANN. Have they just discovered in the Interior Department that doctors think they know more about physical disabilities than lawyers do?

Mr. FOSTER. Well, I do not know; they may just have discovered that, and I could not say as to that matter; but I do say this: Here comes a new law which has a provision in it giving $30 per month, provided the diseases or wounds contracted in the Army were such as to prevent the soldier from performing manual labor. The department undertook to adjudicate those claims by passing on them in reference only as to age and service, and not to take up a case that had not been examined for two or more years to determine whether that man was entitled to an increase or not, and this decision in the King case stopped that.

Mr. COX. Will the gentleman permit a question? Do I understand the gentleman's version of what is known as the King case, that it deprived lawyers of the right to adjudicate and try these cases and put that burden on the doctors, and the last effect of it has been to increase the appropriation $100,000?

Mr. FOSTER. Well, I would say that may be true. If Congress passes a law providing certain things shall be done and giving a man certain rights under that law, they have a right to have their cases adjudicated in a proper way under the law.

Mr. MANN. Will my colleague yield? As I understand it, a lawyer can tell by looking at a man whether there is anything the matter with him, but a doctor has to examine him.

Mr. FOSTER. I expect that is about right.

Mr. SHERWOOD. Was not that case decided on an appeal to the Secretary of the Interior as the supreme court of the Pension Office, and he decided that the condition of the soldier should be determined on testimony now, and that should be medical testimony?

Mr. FOSTER. Certainly; that is right. I will state when the King case went to the Assistant Secretary of the Interior that this man had not been examined for a period of two years and claimed the maximum rate under the law, and the Secretary of the Interior determined he was entitled to have his case adjudicated by a medical examination to determine what his disability was and also to determine how much the disability had progressed since the last examination.

The decision in the Green case also shows that the question of disability is to be determined by medical examination in which the Secretary of the Interior says:

The claim under consideration is based on disability of service origin and results, requiring professional medical skill to determine the pathological relation of the alleged resulting disability to the accepted cause of disability of service origin, and the degree of the existing disability therefrom, if pathological sequence is susceptible of establishment. Both questions are for the medical division and it was error to adjudicate the case without reference to and action by that division. If appellant's theory as to the relation between disability of service origin and other disabling factors can not be sustained on medical authority, the case undoubtedly will end there. If in whole or in part the pathological contention can be conceded, then the question of degree of disability attaches. This may be determinable without a medical examination; on the other hand a medical examination may be required. So every question is a medical question, for the consideration of the medical division, in order that no injustice be done either to the claimant or to the United States. The judgment is reversed on the authority of the decision in the Charles King case (19 P. D., 28), and the case is remanded for adjudication in accordance with the directions in that decision.

These decisions evidently show that a question such as we have been discussing must be decided under the present law in the same way it was decided under the old law; that is, by decision of the medical division.

Mr. AKIN of New York. Do you not really think it better for a soldier to die any time than to have a doctor or a lawyer come into the house?

Mr. MANN. They are likely to die if a doctor comes into the house.

Mr. FOSTER. I will state that is not a question to be considered here. So, Mr. Chairman, I think this is a question involved in this particular case just referred to in this decision of the Secretary of the Interior.

Mr. BORLAND. Mr. Chairman, I move that all debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Missouri moves that all debate on this paragraph and amendments thereto close in five minutes.

The motion was agreed to.

Mr. BARTLETT. Mr. Chairman——

The CHAIRMAN. The Chair will state to the gentleman from Georgia [Mr. BARTLETT] that the time for debate on his pro forma amendment has been exhausted.

Mr. BARTLETT. Then, Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Georgia [Mr. BARTLETT] withdraws his pro forma amendment and moves to strike out the last two words.

Mr. BARTLETT. Mr. Chairman, I may not understand the intricacies of the medical profession or be able to give any information as to what the decision of a doctor in any case might mean, because they differ so much that it is hard to determine what they think even after they have stated a case. I did not intend to mislead the House or to give any information that I had not obtained. I had read this case, although the gentleman from Illinois [Mr. FOSTER] intimated that I had not. I had read it carefully, and I will state that when it is put in the RECORD it will show that the Secretary of the Interior reversed that case because they did not have an examination of the applicant by a surgeon, and the direction was made that he be examined by a surgeon, and direction was given that in that character of cases surgeons be required to examine the applicant. Here it is:

The department is of the opinion that all claims under this provision of the act of May 11, 1912, should be considered and adjudicated in accordance with the well-established and uniform practice of the bureau in all claims under the general law wherein the question of title to the second grade or $30 rate is involved—that is, through the medical division of the bureau—and such practice is hereby directed.

That is all I said about the King case or as to what the opinion of the Commissioner of Pensions was, namely, that under the decisions rendered in that case and some other cases all applicants of that character had to be examined through the medical division of the bureau.

Now, it is suggested that because I made that statement I was not acquainted with the decision. I almost stated in terms what the decision was. I have read it, and the gentlemen ought to inform themselves of these things before they make such positive statements, Mr. Chairman.

Mr. FOSTER. Mr. Chairman——

The CHAIRMAN (Mr. FLOYD). The time of the gentleman from Georgia [Mr. BARTLETT] has expired.

Mr. BARTLETT. Mr. Chairman, I withdraw the pro forma amendment.

The CHAIRMAN. Without objection, the pro forma amendment of the gentleman from Georgia [Mr. BARTLETT] will be withdrawn, and the Clerk will read.

The Clerk read as follows:

That $12,000, or so much thereof as may be necessary, out of the appropriation for clerk hire and other services contained in the act making appropriations for invalid and other pensions for the fiscal year ending June 30, 1913, is made available for postage on foreign mail, purchase and repair of furniture, filing cabinets, adding machines, addressing machines, typewriters, check-signing machines, and other labor-saving devices for the use of the disbursing office, Bureau of Pensions.

Mr. TRIBBLE. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIBBLE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Add, at the end of line 19, the following:

"*Provided*, That no part of the sum appropriated in this bill for the payment of pensions for the fiscal year ending June 30, 1914, shall be used to pay pensions to any person who resides in a foreign country or who is a citizen of a foreign country."

Mr. GARRETT. That is not germane.

Mr. BORLAND. I make a point of order against that amendment. It is not germane to the paragraph read.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

From and after July 1, 1913, no pension shall be paid to a nonresident who is not a citizen of the United States, except for actual disabilities incurred in the service.

Mr. TRIBBLE. Mr. Chairman——

Mr. GOOD. Mr. Chairman——

The CHAIRMAN. The Chair recognizes the gentleman from Iowa [Mr. GOOD].

Mr. GOOD. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 2, by striking out the last paragraph, including lines 20, 21, 22, and 23.

Mr. BORLAND. Mr. Chairman, on that amendment I ask unanimous consent that the gentleman from Iowa [Mr. GOOD] have 10 minutes and the gentleman from Georgia have 10 minutes and that all debate then close.

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] asks unanimous consent that debate on the pending amendment be limited to 20 minutes, 10 minutes to be controlled by the gentleman from Iowa and 10 minutes by the gentleman from Georgia.

Mr. TRIBBLE. Mr. Chairman, reserving the right to object, I would like to know who he means by the "gentleman from Georgia."

Mr. COOPER. Reserving the right to object——

Mr. RODDENBERY. I object.

Mr. TRIBBLE. Mr. Chairman, I rise to a point of order.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIBBLE] will state it.

Mr. TRIBBLE. I ask if any gentleman on the floor of this House has a right to offer a substitute for an amendment which has been offered. The gentleman offered a motion to strike out the section. I now ask the privilege of offering the amendment that has just been read as a substitute for the amendment he offered.

Mr. BORLAND. Mr. Chairman, I make the point of order against that amendment as not being in order.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Georgia [Mr. TRIBBLE].

The Clerk read as follows:

Provided, That no part of the sums appropriated in this bill for the payment of pensions for the fiscal year ending June 13, 1914, shall be used to pay pensions to any person who resides in a foreign country or who is a citizen of a foreign country.

Mr. GOOD. Mr. Chairman, I make the point of order against the amendment that it is not germane to the paragraph or to the motion.

The CHAIRMAN. The Chair is of opinion that it is not germane to the amendment offered by the gentleman from Iowa [Mr. GOOD].

Mr. TRIBBLE. I offer this, Mr. Chairman, as a substitute for the amendment of the gentleman from Iowa and as a substitute for this paragraph.

The CHAIRMAN. The Chair does not believe the motion is in order now. The gentleman from Iowa [Mr. GOOD] moves to strike out these lines, and the gentleman from Georgia offers, as a substitute, to add something not at present in the bill. The Chair does not think the substitute is in order or germane to the motion to which it is offered as an amendment. The gentleman from Iowa has the floor in his own right.

Mr. GOOD. Mr. Chairman, the amendment which I have offered eliminates that provision of the bill which provides that no pension shall be paid to any person who is a nonresident and who is not a citizen of the United States except for disabilities incurred in the service. Mr. Chairman, this same provision was contained in the last appropriation bill, and this House by a good majority excluded that language from the bill.

What is the reason, Mr. Chairman, for pension legislation? On what theory does Congress pension the soldiers of the United States? Is it on the theory that Members of Congress want their votes? Is it on the theory that no matter how great the service has been in behalf of one's country a soldier can not be pensioned unless he votes in the United States? I never understood that that was the theory of pensions. I never understood that we passed a pension bill last May entitled, "A service pension," that simply gave a pension to the soldier that votes in the United States. Oh, no. We placed that measure far above any such consideration as that. We said that a man who served his country in the Army or Navy of the United States for a certain length of time, no matter where he lived, was entitled to a pension, and Congress granted him that pension. [Applause.]

Did the Government of the United States make inquiry when this country needed defenders whether a man came from Ireland, whether he lived in Germany, in Canada, or in the United States? Oh, no. We accepted their services then, and since that time, with the exception of a single period of two years, we have been paying pensions to the widows and dependent mothers and the brave survivors of that war without regard to where they lived. It is true that for two years we had on the statute books of the United States the identical provision that is here sought to be engrafted into the law, and that was during President Cleveland's second term. I hold in my hand a copy of a letter written by Judge Lochren, when he was Commissioner of Pensions, during the second Cleveland administration, and I wish to read what he said about this same provision. But first, Mr. Chairman, may I have order? because I want my friends on the other side to get the full effect of Judge Lochren's letter.

The CHAIRMAN. The committee will be in order. The gentleman from Iowa will proceed.

Mr. GOOD. Judge Lochren's letter is as follows:

A clause of chapter 187 of the public acts of the second session of the Fifty-second Congress provides:

"That from and after July 1, 1893, no pension shall be paid to a nonresident, who is not a citizen of the United States, except for actual disabilities incurred in the service."

I respectfully ask your attention to this clause, in the hope that you may recommend its repeal. It causes great trouble and annoyance to the excepted classes, who constitute the great bulk of nonresident pensioners, in compelling them to make proof that they belong to these excepted classes. And the final result is that payments under it are withheld from but few, save widows and dependent mothers, who have little else for their maintenance. The saving is too little to offset the suffering inflicted in individual cases. If all nonresidents were refused payments of pension some plausible argument might be made in support of such policy; but none can be urged in favor of this law, which, while giving annoyance to all, strikes only the most helpless.

I should not feel warranted in asking attention to this law but for the fact that it entails much work on this bureau, in answering communications, and seems to yield little practical results except annoyance and apparent cruelty. I recognize to the fullest extent that my sole duty is to execute and administer the laws as they are enacted—fairly and honestly interpreted.

Very respectfully,

WM. LOCHREN,
Commissioner.

THE SECRETARY OF THE INTERIOR.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOOD. I would like to have five minutes more.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent that the gentleman from Iowa be permitted to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. GOOD. According to the report of the Commissioner of Pensions we paid last year to nonresidents something like $967,000, which was paid to 5,450 pensioners. This money went to every country in the world. Four hundred and fifty-three persons residing in Ireland received pensions last year. Most of them are widows or dependent mothers. None of them received disabilities in the service, because they were not in the service. They are the widows of men who gave their lives to the service of our country, and by this provision we would strike at the widow and the dependent mother. I say it is unfair. It ill becomes a great body such as this. We will not save a single penny by the enactment into law of the provision I have moved to strike out. During the time that statute was on the books we paid $28,000 a year more to foreign pensioners than we ever paid before.

Mr. MANN. Will the gentleman yield for a question?

Mr. GOOD. Certainly.

Mr. MANN. The gentleman gave the amount paid to pensioners residing abroad as $967,000. Am I correct in assuming that more than half of that is paid to pensioners just across the border line in Canada, that about 10 per cent of it is paid to pensioners in Ireland, and about 10 per cent to pensioners in Germany, so that the three countries get 70 per cent of the entire amount?

Mr. GOOD. I think that is correct. Now, Mr. Chairman, it is impossible to tell how many of these persons who are pensioned would be deprived of a pension if this provision should become a law, because every nonresident pensioner, whether he is a citizen of the United States or not, will receive a pension if he incurred disabilities in the service and receives a pension by reason thereof. A great many of those who are receiving these pensions belonged to the regular establishment. They enlisted in the Regular Army of the United States and are receiving pensions because of disease or disability incurred in the service. They would not be deprived of a pension under this provision of law. No such person who received disabilities in the service, whether in the regular establishment or not, would be deprived of a pension; but as the former Commissioner of Pensions explained in his letter to the Secretary of the Interior, this provision strikes only at the widow and the dependent

mother; and if that is the policy of a great party that came into power on a plank in its platform for liberal pensions, then I feel that the people of the United States misunderstood what you meant by "liberal pensions." [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. TRIBBLE. Mr. Chairman, I move to perfect this paragraph by offering the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Add at the end of the paragraph the following: "And no part of the sum appropriated in this bill for the payment of pensions for the fiscal year ending June 30, 1914, shall be used to pay pensions to any person who resides in a foreign country or who is a citizen of a foreign country."

Mr. GOOD. I make the point of order that that is not germane to the paragraph or to the motion to strike out.

The CHAIRMAN. The Chair will hear the gentleman from Iowa on his point of order.

Mr. BARTLETT. Is this a motion to insert?

Mr. TRIBBLE. It is a motion to perfect.

The CHAIRMAN. This is a motion to perfect the paragraph in the manner suggested. The Chair will hear the gentleman from Iowa on his point of order, if he desires to be heard.

Mr. MANN. The amendment offered by the gentleman, I take it, is a substitute for the paragraph in the bill. The paragraph in the bill is confined to the question of payments to nonresident pensioners.

Mr. TRIBBLE. I will say to the gentleman, if he will yield, that that is not the purpose of it. The purpose of it is to perfect the paragraph.

Mr. MANN. I am not arguing the purpose of it. I am arguing the point of order to the Chair.

The CHAIRMAN. The gentleman will proceed.

Mr. MANN. The provision in the paragraph relates only to the payment of nonresidents and persons who are not citizens of the United States. The amendment offered by the gentleman not only includes those who are nonresidents, but prohibits the payment of pensions to any person who is not a citizen of the United States, although he may be located within the United States. It does not seem to me that the amendment is germane to the provision, because the provision in the bill only relates to nonresidents, and the gentleman's amendment is to incorporate residence with that provision, an entirely different proposition.

Mr. BORLAND. Is the Chair prepared to rule?

The CHAIRMAN. The Chair will hear the gentleman from Missouri.

Mr. BORLAND. I do not care to be heard on the point of order.

Mr. TRIBBLE. Mr. Chairman, the purpose of the amendment offered is to be fair with the country. The gentleman from Iowa who preceded me made the statement that this is the only plausible resolution that can be offered, and he read from a decision by Judge Lochren, Commissioner of Pensions under Cleveland's administration, in which he stated that the only plausible resolution is the resolution I offer—almost in the indentical language as my amendment. Let us not deceive the people of the country. The Members of this House are not deceived. The amendment in this bill which provides that nonresidents shall not receive a pension except for actual disabilities does not mean anything. It is good as far as it goes, but it does not go far enough. The gentleman from Iowa has just read a decision from Judge Lochren, in which he states that when that law was on the pension statute books in the same language as this contained in this bill that it deprived only a few women and children of pensions. The word "disability" covers a multiplicity of diseases to ride in on the pension roll. The foreigners claim disabilities, and are therefore immune from this committee amendment, and the great mass of foreign pensioners are not deprived of pensions at all. The only plausible law that can be passed for the purpose of taking these foreigners off the pension roll is the amendment I am offering here now in good faith, expecting to pass it. The provision in this bill is deceptive. It offers to the country a proposition which says that these nonresidents shall not be entitled to pensions, and then winds up by saying "except for actual disabilities incurred in the service." You gentlemen know that most of these foreigners are on the pension roll on the specific claim of disability. The proper thing to do is to wipe them all off.

The Members of the House understand that. They know that the committee amendment will not decrease materially the foreign pension roll.

Mr. Chairman, the purpose of my amendment is to cut off all foreigners who are on the pension rolls of this country. They number 5,465, and they are drawing pensions annually to the amount of $967,863.89, $400,000 more than Georgia draws pensions to-day. Four hundred thousand dollars more goes into the foreign lands annually for pensions out of the Federal Treasury than goes to the soldiers in the State of Georgia—all kinds of pensions, including the Union soldiers who have settled in Georgia since the war.

Mr. TAGGART. Will the gentleman yield?

Mr. TRIBBLE. I can not yield. I now call attention to the statement I hold in my hand. This statement shows the number of foreigners on our pension roll and the amounts of money the taxpayers of this country pay them. It reads as follows:

Number of pensioners in each foreign country.

Foreign countries.	Number.	Amount paid.
Algeria	1	$108.00
Argentina	15	2,661.15
Australia	101	17,918.43
Austria-Hungary	37	6,564.17
Azores	6	852.90
Bahamas	3	642.00
Barbados	2	255.27
Belgium	24	4,257.84
Bermuda	5	1,044.00
Bolivia	1	180.00

Tonga Islands	1	180.00
Turkey	20	3,548.13
Uruguay	3	888.00
Venezuela	1	144.00
Wales	30	5,322.60
Total	5,465	967,863.89

There are 477 foreigners in England, 522 in Germany. There are on our pension roll Chinese, Japanese, and all kinds of nationalities drawing our money.

Mr. BORLAND. Mr. Chairman, I make the point of order that the gentleman is not discussing the point of order, but the merits of the amendment.

The CHAIRMAN. The gentleman from Georgia will confine himself to the point of order.

Mr. TRIBBLE. Very well, Mr. Chairman, I will do so. Now, the purpose of my amendment is to perfect a law they attempt to put on the statute books which I claim will do nothing but

deceive the people. The gentleman from Illinois says that this section does not say anything about foreigners. What is the difference between foreigners and nonresidents? I am undertaking to perfect the text of this amendment, for the purpose of uncovering deception and that we may take them off our pay roll and not pretend to do so.

Mr. COOPER. Will the gentleman permit a question?

Mr. TRIBBLE. No, sir; I can not.

Mr. Chairman, this amendment I offer perfects the language of the bill; it is germane to the bill and the paragraph, and I contend it is in order and should be so held by the Chair.

In June, 1893, there were 3,856 foreigners on the pension roll of the United States. They received $666,967.04. Twenty years later this number has increased to 5,460. These foreigners pay no taxes in this country. In case of war with Germany arrayed against us would be 522 German soldiers on the pension roll of our country. I appeal to the gentlemen of this House to take this burden from the shoulders of your constituents, the tax-burdened citizens of our common country.

The CHAIRMAN. The Chair is prepared to rule. The paragraph as contained in the bill provides that after the 1st of July, 1913, no pensions shall be payable to those having a double disability—nonresidence and lack of citizenship. The amendment offered by the gentleman from Georgia undertakes one year later to deny pensions to those who possess either of the disqualifications rather than both. While the Chair is not perfectly clear about it, it seems to the Chair that the amendment is germane. The point of order is therefore overruled.

The question is on the amendment offered by the gentleman from Georgia to perfect the text.

The question was taken, and the amendment was lost.

Mr. BARTLETT. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BARTLETT. The question now recurs on the motion of the gentleman from Illinois to strike out the paragraph?

The CHAIRMAN. Yes; and five minutes' debate remains on the question.

Mr. BORLAND. Can not the gentleman from Iowa and I agree as to a time for debate on this amendment?

Mr. GOOD. How much time does the gentleman want?

Mr. BORLAND. I would like about 10 minutes.

Mr. GOOD. Mr. Chairman, I suggest that the gentleman limit the time to 15 minutes.

Mr. BARTHOLDT. Mr. Chairman, I should like to have a few minutes myself.

Mr. MANN. Limit it to 20 minutes, and let the gentleman from Missouri take 15, and let 5 minutes of it be controlled on this side.

Mr. BORLAND. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in 20 minutes, 5 minutes to be controlled by the gentleman from Iowa [Mr. GOOD] and 15 minutes by myself.

The CHAIRMAN. Is there objection?

Mr. FOWLER. Mr. Chairman, reserving the right to object, I would like to know how it is that this paragraph got in the control of two gentlemen of this House whereby they can agree as to what shall be done respecting it?

Mr. BORLAND. Mr. Chairman, I will say to the gentleman from Illinois that the gentleman from Iowa [Mr. GOOD] is the ranking Republican on the Pension Subcommittee. I have already conceded him 10 minutes, and I should like to have 10 minutes to discuss the matter myself.

Mr. BARTLETT. Mr. Chairman, I object, and I call for the regular order.

The CHAIRMAN. Objection is heard.

Mr. BORLAND. Mr. Chairman, in view of the enormous size to which our pension bill has grown, the committee thought it fair and just to the taxpayers of this country to insert a provision forbidding the payment of pensions to persons who are not citizens of this country and who do not even reside here. The clause is in the following words:

> From and after July 1, 1913, no pension shall be paid to a nonresident who is not a citizen of the United States except for actual disabilities incurred in the service.

The report of the Commissioner of Pensions shows that in 1912 the number of foreign pensioners was 5,465 and the amount paid them $967,803.89.

The gentleman from Iowa [Mr. GOOD] states that this amendment in the same language was on the statute books for about two years from 1893. I want the committee to understand some of the facts which led the subcommittee to renew that law. In 1893 a pension bill was brought into this House containing this provision, and it was stated at that time that there were foreign pensioners to the number of about 3,000. The amount paid to those foreign pensioners was about $350,000. It was said by some Members in debate that it ran as high as $400,000. That was very soon after the passage of the first service-pension law by this Congress, which was in 1890. Up to that time we were paying pensions upon the same principle as other civilized nations for disabilities incurred in service. The law of 1890 gave a pension to every man who had served 90 days in the Army. At that time there were only 3,000 foreign pensioners, and, in all, $350,000 were sent abroad for that purpose. To-day there are 5,450 foreign pensioners, and $967,000 of American money is being sent abroad. But the gentleman says some of this money may go to widows and orphans. Does the widow and orphan plea account for that kind of increase? The widow and orphan plea is a very convenient plea to perpetuate an abuse or to prevent a reform. I have only this to say in disposal of that plea, that the door of this House has always been open to private pension bills in the case of extreme need or in case of special reason why the pension should be made.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. In a minute. There is no reason why we should continue to pay a million dollars annually to foreign pensioners in order to avoid a few cases of clamorous hardship, which may be reported to the Pension Bureau and which can be corrected by private pension bills.

Mr. GOOD. Mr. Chairman, the gentleman is mistaken with regard to the amount paid to foreign pensioners during that time. There was about $666,967.04 during that time, the last year.

Mr. BORLAND. Last year?

Mr. GOOD. The last year under the provisions of the law of July 1, 1893.

Mr. BORLAND. Mr. Chairman, I want to refer the gentleman to the debate of Mr. Mutchler, of Pennsylvania, on February 10, 1893, when he brought in that pension bill. He said:

> Why, Mr. Chairman, during the year 1864, when we were paying enormous bounties in the North, men flocked from other countries, came here and entered our service, took the bounty which was offered, took the money they got as subsidy, and now live in foreign countries. Over 3,000 of these people are pensioners; and we are paying pensions to-day to men who never were citizens or residents of the United States, but who stayed here only long enough to be discharged from the armies and then return, amounting to very nearly $500,000 a year. The amount I do not exactly remember.
>
> Mr. TUCKER. Three hundred and fifty thousand dollars.
>
> Mr. MUTCHLER. My friend from Virginia says $350,000. It is more than that. It is $490,000, I think, a year. We are supporting thousands of those who live at home and never were here except long enough to accept the bounties paid, to be mustered into the service, not going beyond the State lines where they enlisted, to be discharged and go home and say that they have got rheumatism, and to say that the American Government must support them abroad. We are paying thousands abroad to-day to widows of those soldiers in foreign countries who never put foot upon American soil, and many of them, I venture to say, were unborn when their husbands were in the war in the United States.
>
> Now, I ask, Are these things right? If they are not right, will you help us to reform them? I do not object to our granting a pension to a foreigner who suffered actual disability while in the war. Any foreigner or nonresident who went into our war and was wounded, or suffered any other disability, although he may never have been a resident of this country and is not now, is, in my judgment, entitled to receive the same pension as the American soldier.

It will be noticed that the present measure preserves the pension to the foreigner if he was actually wounded or disabled in the service. But our pension laws now provide for the payment of pensions merely for service, without regard to disabilities. The recent act of May 11, 1912, greatly increases the amount of the pension on account of advanced age. This will cause a greatly increased amount of the taxpayers' money to go abroad. This is practically an old-age pension applying to Federal soldiers. The plainest justice seems to require that the men who receive this old-age pension ought not to abandon the Government that pays them.

We have 100,000 less pensioners on the rolls than we had in 1893, and yet the number of foreign pensioners has nearly doubled in that time. The result shows that these pensioners must have gone to Canada or to other countries, renounced their allegiance, and taken up citizenship abroad, else how could there be 5,400 at this time when there were only 3,000 in 1893?

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BORLAND. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. Mr. Chairman, I shall be very glad to yield at the end of my speech, if I have the time. The amount of $1,000,000 sent abroad annually is not the only reason for urging this amendment. We have adopted a system by which we are paying the pensioners by checks from Washington. That involves a large saving both to the pensioner and to the Commissioner of Pensions, but the commissioner says we can not adopt

this principle in regard to foreign pensions, and I want to read what he says about that:

Mr. DAVENPORT. We are paying out nearly $1,000,000 annually (referring to foreign pensions).

Mr. BARTLETT. But that covers certain people who are actual citizens of the United States residing abroad either for business or on account of official duties.

Mr. DAVENPORT. That is so small a number that it would amount to very little. It would not cut any figure. I might say now, Mr. Chairman, that it is a difficult thing to keep track of foreign pensioners. How do we know whether one dies? How can we tell? Every little while we have to apply to the American consul abroad to have him look matters up.

Mr. BARTLETT. It would be a difficult matter to indict and prosecute anybody for signing the name of a dead pensioner.

Mr. DAVENPORT. Yes.

I want to call attention to this further fact, which is the only other fact that I desire to drive home at this time. Great Britain and her colonies have 3,900 of these foreign pensioners on American pension rolls. Twenty-seven hundred of these are in Canada alone. What is the law of Great Britain upon this subject? Does she pay any money to citizens residing in America? Not a dollar. The law of Great Britain is:

A pensioner who neglects to draw his pension for four successive quarters shall be struck off the pension pay list, and shall not be replaced unless he satisfactorily accounts for such neglect, and the secretary of state shall, at his discretion, grant or withhold the arrears of the pension or any portion thereof.

The pension of a pensioner under 50 years of age who quits the Dominion, either with or without leave, shall cease to be issued for the period of his absence, unless the secretary of state shall in any special case otherwise direct.

If the pensioner should be absent for over three years (without leave), it shall rest with the commissioners to recommend for the approval of the secretary of state that the pension be regranted from the date of the receipt of the report of the pensioner's return, either at the original rate or at a reduced rate, proportionate to the time that the pensioner has resided outside of the Dominion and has not been available for recall to service on an emergency.

If the pensioner is absent for three years without leave, it rests with the commissioner to recommend him for reinstatement. That is the law of Great Britain on the subject of pensions. Great Britain has had more men under her flag than any other country on the civilized globe. Great Britain has the biggest list of these foreign pensioners on the American pension rolls and yet she says when a man goes abroad and relinquishes his British citizenship his pension stops; if he goes abroad without leave his pension stops. Is this fair to the American taxpayer? Must he bear this burden for the benefit of a foreign population?

Mr. COOPER. Will the gentleman permit a question?

Mr. BORLAND. If I have time, and I do not think I have.

Mr. COOPER. The British law says under 50 years of age.

Mr. BORLAND. The gentleman can read the British law.

Mr. COOPER. The gentleman himself read it just now.

Mr. BORLAND. The British law forbids—and I will repeat that statement and the gentleman can refer to the law—the British law forbids the payment of pensions to aliens. It forbids the payment of pensions to nonresident British subjects unless they are nonresident by leave of the commissioner of state. That is the great military nation of Great Britain, and we are paying citizens of Great Britain, 3,900 of them, nearly a million dollars a year of American money and taking all the risk of fraud and failure to prosecute where there is a case of fraud or criminal conduct.

Mr. TOWNER. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. TOWNER. As I heard the figures, there are about 5,400 foreign pensioners, and 2,700 of them are in Canada?

Mr. BORLAND. Yes.

Mr. TOWNER. That is practically one-half of all the pensioners?

Mr. BORLAND. Practically one-half of them.

Mr. TOWNER. I would like to ask the gentleman if it is not true that a great majority of those who are in Canada now are there taking up homesteads and will probably return to the United States after they have acquired those homesteads.

Mr. BORLAND. No; they are there for the purpose of taking up homesteads, and I think they will probably stay there. They have left our country for good and ceased to be taxpayers or citizens here. They have to swear allegiance to the Canadian Dominion Government in order to take up the homestead, and thus they renounce their allegiance to the American flag. This amendment ought to pass.

It is but just to the old soldiers who stay in this country and continue to be supporters of our Government, who stand by the Old Flag.

Mr. Chairman, I move that debate on this paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Missouri moves that all debate on the paragraph and amendments thereto close in 10 minutes.

The question was taken, and the motion was agreed to.

Mr. CANNON. Mr. Chairman, I am surprised at this provision in the bill and in my judgment it ought not to be there. There is $487,000, that is over half of the total amount, paid to pensioners resident in Canada. There are $17,000 paid to people in Australia, $600 to people in Hungary, and so forth; in round numbers, $900,000. Over half of this amount is paid to nonresidents in Canada. I want you to march down here, if you choose, to Lafayette Square and see the monument erected to Lafayette, to Rochambeau, to Kosciusko, and another one to von Steuben. Never a one of them was a citizen of the United States. Three of those men had land grants. Now, Great Britain was not in sympathy with us during the struggle for the Union and she paid $15,000,000 at the close of that struggle on account of her violation of international law. The Government in Great Britain and Canada were against the United States, but the common people rose up and said, "No." In addition to that the seamen from the Canadian Atlantic seaboard enlisted in our Navy as they also enlisted in the Union Army and were valuable soldiers. Now there are large numbers of our citizens moving to Canada to make homes—farmers—they had service, many of them, in the war for the Union. They have got to swear allegiance before they can take up homesteads there. For one I will not vote for this proposition. [Applause.] In all the struggles that we have had in the United States men from Ireland, men from Scotland, men from England, men from Germany have come in without citizenship and some of them have gone abroad after that great struggle was over. I quite agree with the recommendation of the former Democratic Commissioner of Pensions, and while I do not quarrel with any Member on this floor for any opinion that he holds as to performing his duty to the Republic as he conceives his duty to be, for reasons assigned, so far as I can state them in five minutes, I do not believe that this provision has merit from any standpoint.

Why, this whole matter of pensions is twofold—one to compensate for the risk of the soldier and one to say to all the world and to all of our citizenship that, as we depend upon our citizen soldiery, they will be treated along the line of the policy that this Government has ever held. [Applause.]

Mr. BARTHOLDT. Mr. Chairman, I am somewhat conversant with the reasons which impel pensioners to leave this country and seek a residence in the surroundings of their old homes. It is not for lack of patriotism, because they showed evidences of patriotism when they took up arms for the defense of this country. The reasons are mostly economical ones, Mr. Chairman. Most of these people are poor and dependent, and while it would be impossible for them to live in this country on the amount of pension they receive from a generous Government, they can afford to live on such a small pittance in Ireland and in Germany, and knowing this to be a fact, they frequently return to their families in foreign lands. In other words, many of them are compelled to leave this country temporarily in order to make both ends meet financially and economically.

Mr. AUSTIN. I will say to the gentleman that when I was American consul at Glasgow there were some fifty of such pensioners, and I put the question directly to them as to why they were living abroad, and they gave the very reason that you are giving now for the pensioners who have gone to Germany and Ireland.

Mr. BARTHOLDT. I know that to be the reason. The effect of this paragraph, if enacted into law, would be, merely to cite one instance, that the only surviving major general of the Civil War, Gen. Osterhaus, would be deprived of his pension.

Mr. BORLAND. He receives a pension under a special bill.

Mr. BARTHOLDT. My colleague from Missouri compares the pension system of Great Britain with the pension system of the United States. Why, in Great Britain the soldiers are simply hirelings of a monarchical system. In this country they were volunteers and free men patriotically offering their lives for the defense of the country, and if we were to pension our soldiers according to the system which is now in vogue in Great Britain we would not pay more than ten or fifteen millions of dollars in pensions altogether. This is a generous Government, which recognizes properly the men who came to its aid in time of its greatest need.

Mr. Chairman, I sincerely trust that the amendment of the gentleman from Iowa [Mr. GOOD] will prevail, because if not it would work a great hardship in thousands of cases and would amount to downright cruelty, as former Pension Commissioner Lochren has so truly said.

Mr. DYER. It would have the same effect on the widows of soldiers who are living abroad, would it not, if this amendment should be adopted?

Mr. BARTHOLDT. Yes. This would, of course, in the majority of cases apply to dependent mothers and widows. My attention is called to a part of the hearings in which Mr. Thompson calls attention to a law which was passed in 1792. It is section 1639 of the Revised Statutes, and reads as follows:

If any person, whether officer or soldier, belonging to the militia of any State, and called out into the service of the United States, be wounded or disabled while in actual service, he shall be taken care of and provided for at the public expense.

Mr. BORLAND. And is not that done in this law? Does this amendment destroy any such provision?

Mr. BARTHOLDT. Yes; this amendment would destroy it in every case where a man is a nonresident.

Mr. BORLAND. The gentleman is mistaken about that.

Mr. BARTHOLDT. Under the Bancroft treaty a man must come to the United States every two years for the purpose of maintaining his citizenship. In other words, when I would go to Germany and reside there for two years, at the end of that period I would be asked by the Government, "Will you remain a citizen of the United States or become a subject of Germany?" If I want to remain a citizen of the United States I will have to return to this country for the purpose of having my citizenship extended. How can a poor pensioner, who lives with those who are dear to him, afford to pay the expenses of a biennial trip to the United States without depriving him of all the money, practically, that he has with which to sustain life?

The CHAIRMAN. The gentleman's time has expired, and all debate is exhausted. The question recurs on the amendment of the gentleman from Iowa [Mr. GOOD], which the Clerk will report.

The Clerk read as follows:

Page 2, strike out the last paragraph, being lines 20 to 23, inclusive.

The CHAIRMAN. The question is on agreeing to the motion.

The question was taken, and the Chairman announced that the "ayes" seemed to have it.

Mr. BORLAND. A division, Mr. Chairman.

The committee divided; and there were—ayes 83, noes 28.

Mr. BORLAND. Tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. GOOD and Mr. BORLAND.

The committee again divided; and the tellers reported—ayes 88, noes 37.

So the motion was agreed to.

Mr. BORLAND. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BARTLETT. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that it pass as amended.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. DAVIS of West Virginia, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, had directed him to report the same back with an amendment with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. BARTLETT. Mr. Speaker, I move the previous question on the bill and the amendment to final passage.

The SPEAKER. The gentleman from Georgia [Mr. BARTLETT] moves the previous question on the bill and the amendment to the final passage. The question is on agreeing to that motion.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the "ayes" seemed to have it.

Mr. BARTLETT. A division, Mr. Speaker.

Mr. MANN. Mr. Speaker, I ask to have the amendment reported.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, by striking out the following, lines 20 to 23, inclusive:

"From and after July 1, 1913, no pension shall be paid to a nonresident who is not a citizen of the United States except for actual disabilities incurred in the service."

The SPEAKER. The gentleman from Georgia [Mr. BARTLETT] demands a division.

The House divided; and there were—ayes 81, noes 41.

Mr. BORLAND. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The question is on agreeing to the amendment. Those in favor of the amendment will answer "yea" when their names are called; those opposed will answer "nay."

The question was taken; and there were—yeas 154, nays 112, answered "present" 9, not voting 105, as follows:

YEAS—154.

Dixon, Ind.	Johnson, Ky.	Rainey	

So the amendment was agreed to.

The Clerk announced the following pairs:
For the session:
Mr. TALBOTT of Maryland with Mr. PARRAN.
Mr. UNDERWOOD with Mr. MANN.
Mr. PALMER with Mr. HILL.
Mr. HOBSON with Mr. FAIRCHILD.
Until further notice:
Mr. PETERS with Mr. ROBERTS of Nevada.
Mr. PATTEN of New York with Mr. NORRIS.
Mr. KORBLY with Mr. MILLER.
Mr. JOHNSON of Kentucky with Mr. MATTHEWS.
Mr. JAMES with Mr. WEEKS.
Mr. HUGHES of Georgia with Mr. LOUD.
Mr. HOLLAND with Mr. LAFEAN.
Mr. LITTLETON with Mr. KINKAID of Nebraska.
Mr. HARRISON of New York with Mr. HENRY of Connecticut.
Mr. HAMILTON of West Virginia with Mr. HARTMAN.
Mr. GLASS with Mr. SLEMP.
Mr. FERRIS with Mr. GUERNSEY.
Mr. FINLEY with Mr. HARRIS.
Mr. DONOHOE with Mr. GARDNER of New Jersey.
Mr. DIXON of Indiana with Mr. FOSS.
Mr. DENVER with Mr. CRUMPACKER.
Mr. COVINGTON with Mr. CALDER.
Mr. CLAYTON with Mr. COPLEY.
Mr. CLARK of Florida with Mr. BUTLER.
Mr. CARTER with Mr. BURKE of Pennsylvania.
Mr. BURLESON with Mr. ANTHONY.
Mr. BROWN with Mr. AMES.
Mr. BATHRICK with Mr. AINEY.
Mr. ASHBROOK with Mr. BATES.
Mr. ANSBERRY with Mr. BARCHFELD.
Mr. PUJO with Mr. MCMORRAN.
Mr. HULL with Mr. NEEDHAM.
Mr. SPARKMAN with Mr. DAVIDSON.
Mr. KITCHIN with Mr. FORDNEY.
Mr. RICHARDSON with Mr. THISTLEWOOD (either to be released when the other would vote the same way).
Mr. HOUSTON with Mr. MOON of Pennsylvania.
Mr. CONRY with Mr. FARR.
Mr. WILSON of New York with Mr. YOUNG of Michigan.
Mr. WHITE with Mr. WILSON of Illinois.
Mr. TALCOTT of New York with Mr. STEENERSON.
Mr. STANLEY with Mr. SPEER
Mr. SHACKLEFORD with Mr. J. M. C. SMITH.
Mr. RUCKER of Colorado with Mr. SELLS.
Mr. RAINEY with Mr. VREELAND.
Mr. AYRES with Mr. REYBURN.
From February 15 until February 25:
Mr. MCDERMOTT with Mr. HAWLEY (each reserving the right to vote on questions of local interest).

Mr. MANN. Mr. Speaker, I voted "aye." I am paired with the gentleman from Alabama, Mr. UNDERWOOD, and I desire to withdraw my vote and to be recorded present.

Mr. BATHRICK. I should like to vote "aye," Mr. Speaker.

The SPEAKER. Was the gentleman in the Hall of the House and listening when his name should have been called?

Mr. BATHRICK. I got in here very close to the calling of my name. I could not answer whether I was in the Hall or not.

The SPEAKER. The gentleman does not qualify.

Mr. DAVIDSON. Mr. Speaker, I voted "aye." Is the gentleman from Florida, Mr. SPARKMAN, recorded?

The SPEAKER. He is not.

Mr. BATHRICK. I desire to withdraw my vote and to vote "present."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time.

Mr. RODDENBERY. Mr. Speaker, I desire to offer a motion to recommit.

The SPEAKER. The gentleman offers a motion to recommit, which the Clerk will report.

The Clerk read as follows:

I move to recommit H. R. 28730, a bill making appropriation for the payment of invalid pensions, etc., with instructions to report back forthwith with the following amendments at the end of the bill, as follows: *"Provided*, That no pension shall be paid to any person out of this appropriation who is receiving a salary or wage in excess of $2,000 per annum, whether paid annually, monthly, or at other periods, except such person be on the pension roll for actual disabilities received in the service: *Provided further*, That no pension shall be paid to any person out of this appropriation who is receiving or has an income other than in the last preceding proviso that amounts to more than $2,000 per annum, or who owns property, real or personal, in excess of $10,000, except such person be on the pension roll for actual disabilities received in the service: *Provided further*, That no pension shall be paid to any person out of this appropriation who is an inmate of and cared for in any soldiers' home supported in whole or in part from revenues of the United States Treasury, except such person be on the pension roll for actual disabilities received in the service."

Mr. BARTLETT. Mr. Speaker, I call the previous question on the motion.

Mr. DYER. I make a point of order on the motion.

The SPEAKER. What is the gentleman's point of order?

Mr. DYER. The amendments in the gentleman's motion to recommit, if adopted, would repeal existing law.

The SPEAKER. All these propositions are simply limitations, and the point of order is overruled. The gentleman from Georgia [Mr. BARTLETT] moves the previous question on the motion to recommit.

The question was taken, and the previous question was ordered.

The SPEAKER. The question now is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. RODDENBERY) there were—ayes 39, nays 139.

Mr. RODDENBERY. Mr. Speaker, I make the point that no quorum is present.

Mr. FOSTER. Mr. Speaker, a yea-and-nay vote was just had and it was developed that a quorum is present.

The SPEAKER. Evidently there is a quorum present, and the motion to recommit is lost. The question now is, Shall the bill pass?

Mr. RODDENBERY. And on that, Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 219, nays 40, answered "present" 9, not voting 113, as follows:

YEAS—219.

So the bill was passed.

The following additional pairs were announced:

Until further notice:

Mr. AYRES with Mr. ANTHONY.

Mr. BROUSSARD with Mr. DANFORTH.

Mr. ANSBERRY with Mr. AINEY.

Mr. UNDERWOOD with Mr. BUTLER.

Mr. LEE with Mr. TAYLOR of Ohio.

Mr. SIMS with Mr. WARBURTON.

Mr. PUJO with Mr. SPEER.

Mr. HUMPHREYS of Mississippi with Mr. J. M. C. SMITH.

Mr. HARRISON of New York with Mr. PROUTY.

Mr. HAY with Mr. NELSON.

Mr. GOODWIN of Arkansas with Mr. MOORE of Pennsylvania.

Mr. GARNER with Mr. LAFEAN.

Mr. CRAVENS with Mr. KOPP.

Mr. BYRNS of Tennessee with Mr. HEALD.

Mr. BRANTLEY with Mr. COPLEY.

Mr. McDERMOTT. Mr. Speaker, I voted "aye," but I find I am paired with the gentleman from Oregon, Mr. HAWLEY, and I desire to withdraw that vote and be marked "present."

Mr. HILL. Mr. Speaker, I voted "aye." I am paired with the gentleman from Pennsylvania, Mr. PALMER, and I wish to withdraw that vote and answer "present."

The result of the vote was then announced as above recorded.

On motion of Mr. BARTLETT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

EXTENSION OF REMARKS.

Mr. AYRES. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the American merchant marine.

The SPEAKER. Is there objection?

There was no objection, and it was so ordered.

DAILY HOUR OF MEETING.

Mr. CANNON. Mr. Speaker, I will be very glad if the Chair will announce while a rather full membership is present that the hour of meeting to-morrow is 10.30 o'clock. We expect to take up the sundry civil appropriation bill.

The SPEAKER. When the House adjourns to-day, or on any other day during this session, unless the order which was adopted this morning be changed, it will be to meet at 10.30 o'clock a. m. the next day, and Members will govern themselves accordingly.

Mr. MANN. Mr. Speaker, that order was entered this morning, but my recollection is that there is a special order for Sunday next for eulogies.

Mr. FITZGERALD. We will change that on Saturday.

Mr. MANN. Why not change that now?

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that when the House adjourn on Saturday next it adjourn to meet at 12 o'clock noon on Sunday, February 23, 1913.

The SPEAKER. The gentleman from New York asks unanimous consent that when the House adjourn on Saturday next it adjourn to meet at 12 o'clock noon on Sunday, February 23, 1913. Is there objection?

There was no objection.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 28775) making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes. Pending that, I ask unanimous consent that general debate be limited to two hours and a half, one-half to be controlled by the gentleman from Illinois, Mr. CANNON, and one-half by myself.

The SPEAKER. The gentleman from New York moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the sundry civil appropriation bill. Pending the motion, he asks unanimous consent that general debate be limited to two hours and a half, one half to be controlled by himself and the other half by the gentleman from Illinois, Mr. CANNON. Is there objection?

Mr. CANNON. Mr. Speaker, as far as I am concerned, I will state that I am willing to consent to that order and hope that this side of the House will do so.

Mr. MANN. Mr. Speaker, reserving the right to object, may I ask the gentleman how long he expects to keep the House in session this evening?

Mr. FITZGERALD. Mr. Speaker, I wish to have some of the general debate disposed of to-night.

Mr. MANN. There is no intention to have an evening session?

Mr. FITZGERALD. We will sit not later than 6.30 o'clock. To-morrow morning the gentleman from Kentucky, Mr. SHERLEY, a member of the committee which prepared this bill, desires to occupy an hour in the discussion of a proposed budget scheme he desires to present.

Mr. AUSTIN. Mr. Speaker, may I say to the gentleman that the chairman of the Committee on Immigration, Mr. BURNETT, desires to call up the immigration bill to-morrow?

Mr. FITZGERALD. Then, it will be over my protest, as the gentleman knows.

The SPEAKER. Is there objection?

Mr. RODDENBERY. Mr. Speaker, I would like to inquire of the gentleman from New York if, in the time at his disposal for general debate, he will be able to grant me about 15 minutes? I will say to the gentleman now, with that reservation, that I shall not be able to use it this afternoon, as the gentleman knows.

Mr. FITZGERALD. Mr. Speaker, I have arranged to give the gentleman from Kentucky [Mr. SHERLEY], who is a member of the subcommittee which prepared this bill, one hour, and the gentleman from Mississippi [Mr. SISSON], a member of the Committee on Appropriations, 15 minutes. I am hoping that I may be able to obtain about 10 minutes from the gentleman from Illinois [Mr. CANNON], in which to make a brief statement explaining the bill. Two weeks from to-day Congress adjourns, and I do not see how the House can well afford to give more than two hours and a half to general debate upon an appropriation bill. I would be very glad to accommodate the gentleman. This bill will take considerable time. It embraces 184 pages. We have pending estimates for $28,000,000 of deficiency, which must be considered. The naval bill has not yet been reported.

The SPEAKER. Is there objection?

Mr. RODDENBERY. Mr. Speaker, I object.

Mr. FITZGERALD. Mr. Speaker, I ask for a vote on my motion.

The SPEAKER. The question is on the motion of the gentleman from New York that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the sundry civil appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the sundry civil appropriation bill, with Mr. HAY in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 28775, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes.

Mr. FITZGERALD. Mr. Chairman, I ask unanimous consent to dispense with the first reading of the bill.

The CHAIRMAN. The gentleman from New York asks unanimous consent to dispense with the first reading of the bill. Is there objection?

Mr. RODDENBERY. I object.

Mr. FITZGERALD. Mr. Chairman, I move that the committee do now rise. I will ask the Committee on Rules for a rule.

The motion was agreed to; accordingly the committee rose, and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28775, the sundry civil appropriation bill, and had come to no resolution thereon.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 7278. An act providing that the pay of officers of the Navy commence from the date they take rank as stated in their commissions; to the Committee on Naval Affairs.

S. 8033. An act to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut; to the Committee on Interstate and Foreign Commerce.

ENROLLED BILLS SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 16127. An act for the relief of William Kaiser;

H. R. 22939. An act for the relief of John K. Wren; and

H. R. 19191. An act for the relief of Christian Hedges.

ADJOURNMENT.

Mr. FITZGERALD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 20 minutes p. m.) the House adjourned to meet at 10 o'clock and 30 minutes a. m. to-morrow, Wednesday, February 19, 1913.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting copy of a communication from the postmaster and custodian of the Government wharf at Sitka, Alaska, and recommending legislation authorizing the sale of said wharf (H. Doc. No. 1403), was taken from the Speaker's table, referred to the Committee on the Territories, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. EVANS, from the Committee on the Library, to which was referred the bill (H. R. 18720) to establish a legislative reference bureau in the Library of Congress, reported the same with amendment, accompanied by a report (No. 1533), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the resolution (H. Res. 833) authorizing the Speaker to appoint three counselors, reported the same with amendment, accompanied by a report (No. 1534), which said resolution and report were referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 18428) to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., to authorize a change in the permanent system of highway plans, to provide for the condemnation of certain streets, and for other purposes, reported the same with amendment, accompanied by a report (No. 1545), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GALLAGHER, from the Committee on Rivers and Harbors, to which was referred the resolution (H. Res. 733) directing the Secretary of War to submit to the House the latest survey of the Chicago River, reported the same with amendment, accompanied by a report (No. 1544), which said resolution and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 28788) establishing the rank of officers of the United States Army on the relative list; to the Committee on Military Affairs.

By Mr. WILSON of Illinois: A bill (H. R. 28789) for the erection of a public building at Steger, Ill.; to the Committee on Public Buildings and Grounds.

By Mr. LEVER: A bill (H. R. 28790) to investigate illiteracy and the causes thereof among the adult population of the United States; to the Committee on Education.

By Mr. DE FOREST: Resolution (H. Res. 846) granting to the Cabinet officers the privileges of the floor of the House of Representatives; to the Committee on Rules.

By Mr. RAKER: Resolution (H. Res. 847) for printing additional copies of Monograph No. 1, Children's Bureau; to the Committee on Printing.

By Mr. CARLIN: Resolution (H. Res. 848) to pay R. T. Cook for services as acting assistant foreman at branch folding room of the House of Representatives; to the Committee on Accounts.

By Mr. DYER: Joint resolution of the Legislature of Wyoming, ratifying the proposed income-tax amendment to the Constitution of the United States; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. REYBURN: Joint resolution of the Legislature of the State of Wyoming ratifying an amendment to the Constitution of the United States of America granting to Congress power to levy a tax on incomes; to the Committee on Ways and Means.

By Mr. KAHN: Memorial from the General Assembly of the State of California, indorsing the Newlands bill to create a board of river regulation; to the Committee on Rivers and Harbors.

By Mr. ALLEN: Resolution of the Legislature of the State of Ohio, requesting Senators and Representatives from Ohio in the National Congress to urge the enactment of a Federal law regulating the exportation of food products; to the Committee on Interstate and Foreign Commerce.

By Mr. RAKER: Memorial from the General Assembly of the State of California, ratifying an amendment to the Constitution of the United States authorizing Congress to levy an income tax; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BATES: A bill (H. R. 28791) granting a pension to Zora Haggerty; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28792) granting an increase of pension to Anna E. Lowman; to the Committee on Invalid Pensions.

By Mr. MORGAN of Oklahoma: A bill (H. R. 28793) granting an increase of pension to George F. Wattson; to the Committee on Invalid Pensions.

By Mr. PICKETT: A bill (H. R. 28794) granting a pension to Ephriam J. Hopkins; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 28795) granting a pension to George W. Burk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28796) granting a pension to Joseph Turnbough; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28797) granting a pension to Julia A. Dugan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28798) granting an increase of pension to Moses H. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28799) granting an increase of pension to Josephine D. Steffins; to the Committee on Invalid Pensions.

By Mr. SHERLEY: A bill (H. R. 28800) granting a pension to Martha E. Brabson; to the Committee on Pensions.

Also, a bill (H. R. 28801) granting an increase of pension to Sarah L. Gilliss; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28802) granting an increase of pension to Caroline Adams; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of citizens of the foreign colonies established in Porto Rico and commercial and industrial enterprises located in the city of San Juan, P. R., relative to the appointment to fill the vacancy of judge of the United States district court for Porto Rico; to the Committee on Insular Affairs.

Also (by request), petition of District Grand Lodge, No. 4, Independent Order of B'nai B'rith, San Francisco, Cal.; the Polish Alma Mater of America, Chicago, Ill.; and Scandinavian American citizens of New York, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also (by request), petition of the State Council of Missouri, Junior Order United American Mechanics, St. Louis, Mo., and 300,000 American members of patriotic fraternities of Pennsylvania, favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also (by request), petition of the Polish National Alliance, Chicago, Ill., protesting against the passage of Senate bill 3175,

for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. ANSBERRY: Petition of the International Brotherhood of Locomotive Engineers, Van Wert, Ohio, favoring the passage of Federal workmen's compensation bill; to the Committee on the Judiciary.

By Mr. ASHBROOK: Petition of Division No. 36 of Locomotive Engineers, favoring the passage of the workmen's compensation bill; to the Committee on the Judiciary.

By Mr. BARTHOLDT: Petition of the St. Louis Screw Co., favoring the passage of the Burton bill (S. 7782) for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

Also, petition of the Western Advertising Co., St. Louis, Mo., favoring the passage of the McLean bill, for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. BATES: Petition of W. C. Curtis, chief engineer, Division No. 43, Meadville, Pa., favoring the passage of the workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of the president of the board of trustees of the Edinboro (Pa.) State Normal School, favoring the passage of Senate bill 3, for Federal aid for vocational education; to the Committee on Agriculture.

By Mr. DICKINSON: Papers to accompany bill (H. R. 27458) granting an increase of pension to Robert A. White; to the Committee on Invalid Pensions.

Also, papers to accompany bill (H. R. 14531) granting an increase of pension to Oliver White; to the Committee on Invalid Pensions.

Also, papers to accompany bill (H. R. 28376) granting an increase of pension to Daniel Palmer; to the Committee on Invalid Pensions.

By Mr. DYER: Petition of the National Drainage Congress, Chicago, Ill., favoring the passage of legislation to create a national drainage commission; to the Committee on Irrigation of Arid Lands.

Also, petition of the Crop Improvement Committee, Chicago, Ill., favoring the passage of a compromise bill for the Page and Lever agricultural bills, and suggesting an amendment to same; to the Committee on Agriculture.

Also, petition of the Meyer Bros. Drug Co., St. Louis, Mo., protesting against the passage of legislation reducing the duties on medical chemicals; to the Committee on Ways and Means.

Also, petition of J. H. Woolsey, the Couradee Chair Co., and Hy Siroky, of St. Louis, Mo., favoring the passage of House bill 25685, for the labeling and tagging of all fabrics and articles of clothing intended for sale under interstate commerce; to the Committee on Interstate and Foreign Commerce.

Also, petition of the St. Louis Public Library, St. Louis, Mo., favoring the passage of legislation extending the parcel post to include books, etc.; to the Committee on the Post Office and Post Roads.

By Mr. FITZGERALD: Petition of the American Wood Preservers' Association, Baltimore, Md., protesting against the passage of legislation for removing creosote oil from the free list; to the Committee on Ways and Means.

Also, petition of the California Club, of San Francisco, Cal., favoring the passage of legislation making further appropriations for the suppression of the white slave traffic; to the Committee on Appropriations.

Also, petition of the New York State Conference on Taxation, Binghamton, N. Y., favoring the passage of legislation providing for the collection of statistics of wealth, debt, and taxation as authorized by the permanent census act; to the Committee on the Census.

By Mr. FRENCH: Petition of citizens of Stites, Idaho, favoring the passage of legislation for establishing rural cooperative credit and banking associations; to the Committee on Banking and Currency.

By Mr. GOLDFOGLE: Petition of the executive council of the National Civic Federation, New York, favoring the passage of the workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of the Board of Trade and Business Men's Association, favoring the adoption of the Norfolk Navy Yard for the establishing of a dry dock; to the Committee on Naval Affairs.

Also, petition of the Merchants' Association of New York, favoring the passage of legislation for the adoption of a national budget for changing the laws and practices now regulating Federal expenditures; to the Committee on Ways and Means.

By Mr. GOULD: Petition of the Past and Present Club, of Fairfield, Me., protesting against the passage of legislation tending to change the present national system of forest conservation; to the Committee on Agriculture.

By Mr. HINDS: Petition of Turner Grange, No. 23, Patrons of Husbandry, favoring the passage of Senate bill 3, for Federal aid for vocational education; to the Committee on Agriculture.

By Mr. LEE of Pennsylvania: Petition of foreign-born naturalized American citizens, representing foreign societies of the borough of Shenandoah, Pa., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. LINDSAY: Petition of John E. O'Brien and Ladislaus W. Schenk, New York, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. MOTT: Petition of the Brotherhood of Postal Workers, Denver, Colo., favoring the passage of legislation for increasing the salaries of the clerks in the Railway Mail Service; to the Committee on the Post Office and Post Roads.

Also, petition of James E. March, New York, N. Y., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of the Central Federated Union of Greater New York, protesting against the passage of House bill 8141, for placing the State militia on the national pay roll; to the Committee on Military Affairs.

By Mr. NEEDHAM: Petition of citizens of California and of the Eschscholtzia Camp Fire Circle, of Escalon, Cal., favoring the passage of the Weeks bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. RAKER: Petition of Redwood Lodge, No. 239, Brotherhood of Locomotive Firemen and Enginemen, Eureka, Cal., favoring the passage of House bill 27016, requiring all locomotives being used in interstate commerce to be equipped with headlights of not less than 1,500 candlepower; to the Committee on Interstate and Foreign Commerce.

Also, petition of citizens of California, favoring the passage of the Weeks bill for the Federal protection of migratory birds; to the Committee on Agriculture.

Also, petition of the National Drainage Congress, Chicago, Ill., favoring the passage of legislation for the creation of a national drainage commission; to the Committee on Irrigation of Arid Lands.

By Mr. REILLY: Petition of citizens of Connecticut; the Italo-American Alliance of the United States of America, Philadelphia, Pa.; Panotti & Netta Co.; Doanto Laraia; the Italians of Hartford, Conn.; Charles K. Johnson, publisher North Star, New York; Gabriel Dziadik and Alexander Horbal, Derby, Conn.; the Italian colony, Middletown, Conn.; and Leonardo Suzio, Meriden, Conn., protesting against the passage of Senate bill 3175, for restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. STEPHENS of California: Petition of the Lincoln Park Study Circle, of South Pasadena, Cal., protesting against the passage of legislation tending to change the present national system of forest conservation; to the Committee on Agriculture.

By Mr. TILSON: Petition of the Connecticut Public Library, of Hartford, Conn., favoring the extension of legislation to include library books and material at the lower rate of transportation provided for by the parcel post; to the Committee on the Post Office and Post Roads.

SENATE.

WEDNESDAY, *February 19, 1913.*

Prayer by the Chaplain, Rev. Ulysses G. B. Pierce, D. D.

Mr. GALLINGER took the chair as President pro tempore under the previous order of the Senate.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

EXPENSE OF DISTRIBUTION OF SEEDS.

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the Secretary of Agriculture, which will be read.

The Secretary read as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., February 18, 1913.

The honorable the PRESIDENT OF THE SENATE.

SIR: In accordance with Senate resolution No. 423, which was passed yesterday, I have the honor to transmit herewith a statement showing

the estimated cost of purchasing the different classes of seeds and plants for congressional distribution, the estimated cost of preparing same for distribution and delivery to the mails, and the total cost of packages of each class distributed for the last four years from 1909–10 to 1912–13, inclusive.

The cost of purchasing seeds and plants includes the purchase price, freight and drayage, inspection of growing crops, office salaries, equipment and supplies; the cost of preparing the seeds and plants for distribution and delivery to the mails includes rent of warehouse, cost of equipment and repairs, labor, bags, boxes, wrapping paper, twine, etc., and hauling to the post office or mail cars.

I am also inclosing two copies of a recent publication of the department which sets forth in detail the entire procedure in the handling and distribution of seeds and plants of this department.

I have the honor to be, sir,

Very respectfully, JAMES WILSON, *Secretary.*

The PRESIDENT pro tempore. The communication and accompanying papers will be referred to the Committee on Agriculture and Forestry and be printed.

IMMIGRATION OF ALIENS—VETO MESSAGE.

Mr. GRONNA. I ask unanimous consent that I may make a statement explaining my vote on yesterday.

The PRESIDENT pro tempore. The Chair hears no objection, and the Senator from North Dakota will proceed.

Mr. GRONNA. Mr. President, in view of what was stated upon the floor of the Senate on yesterday when the immigration bill and the veto of President Taft on this same bill were considered, I wish to say just a few words in order to make my position clear.

After reading Secretary Nagel's letter to the President, I became more firmly convinced than ever before that the President was justified in vetoing the bill.

But, Mr. President, I would not take up the time of the Senate to make even this short statement were it not for the fact that the senior Senator from Massachusetts [Mr. LODGE], in his able speech in favor of this measure, made what I consider at least an uncharitable remark and which, in my opinion, is a reflection upon those who disagreed with him. I wish to state, Mr. President, that, so far as I am personally concerned—and I state it most emphatically—I deny that the influence of any steamship company, or any other company, had any influence upon me in the views which I have had and which I still entertain.

Mr. President, I come from the great western empire, which nature seems to have especially blessed with broad areas of rich and fertile lands. I myself am numbered among those who first blazed the trail of civilization toward that great western empire. I am counted among those who suffered the hardships endured by the pioneer of the western plains, and I am glad to be recognized among that class of men of the great Northwest who fully realize that these vast areas, rich and productive as they are, can not and will not bring to mankind the happiness and such blessings as God in his wisdom intended they should have, unless we can secure more people who will help to develop the country and in return share in the latent values of that vast productive section of the United States.

In the State which I in part have the honor to represent we have more than 45,000,000 acres of productive soil, with only some 600,000 people to occupy them. I believe that I voice the sentiment of at least a majority of our people when I say that our strongest hopes and our most earnest desires are that men—strong, virile men—will come and enjoy the splendid opportunities which that great region affords. We welcome them no matter under what flag they may have been born. We are not afraid of their ignorance, because, after all, I believe all men have a higher instinct than the dumb animals and the tame brutes, and even they are very useful in our section of this country.

Mr. President, it is not my purpose to take up any more of the time of the Senate, but I want to say that I have received no communication whatever from my State requesting me to vote to override the veto of the President. On the contrary I have received letters and telegrams asking me to sustain the President in his veto. I hold in my hand a letter which is very brief, written by one of the best known, honorable, and distinguished citizens of my State, which I will read into my remarks:

GRAND FORKS, N. DAK., *February 16, 1913.*

DEAR SENATOR: I am glad to see President Taft vetoed the Dillingham-Burnett bill. I can not see the justification of it and I hope the Senate will not pass it over his veto.

Sincerely, H. BENDEKE.

Mr. President, if I had believed that this bill, so far as the provisions upon which the President based his veto, would in any way better the condition of the laboring men of this Nation, no one would more gladly have joined in its support and asked for its enactment into law than I.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

H. R. 16127. An act for the relief of William Kaiser;

H. R. 19191. An act for the relief of Christian Hedges; and

H. R. 22939. An act for the relief of John K. Wren.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore. The Chair lays before the Senate a telegram from the secretary of state of the State of California, which will be read.

The telegram was read and referred to the Committee on Immigration, as follows:

SACRAMENTO, CAL., *February 18, 1913.*

PRESIDENT PRO TEMPORE UNITED STATES SENATE,
Washington, D. C.:

I am forwarding you herewith, as per instructions embodied therein, the following resolution. Kindly acknowledge receipt.

Resolution by Senator Sanford.

"Whereas there is pending in the Congress of the United States House bill No. 13500, by Congressman JOHN E. RAKER, of California; and

"Whereas House bill No. 13500 has for its object the extension of the Chinese-exclusion act so as to include all Asiatic laborers; and

"Whereas there is a misapprehension in the East as to California's position regarding oriental immigration: Therefore be it

"Resolved by the Senate and Assembly (jointly) of the State of California, That we approve of the passage of House bill No. 13500 and request Congress to pass the same.

"Resolved, That the secretary of the senate be instructed to send a copy of this resolution to the Vice President of the United States, to the Speaker of the House of Representatives, and to each of our Senators and Representatives in Congress."

WALTER N. PARRISH,
Secretary of State.

The PRESIDENT pro tempore laid before the Senate a communication from the secretary of the Commonwealth of Massachusetts, transmitting resolutions adopted by the general court of that State favoring the establishment of an international commission on the cost of living, which was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

THE COMMONWEALTH OF MASSACHUSETTS, 1913.

Resolutions in favor of the establishment of an international commission on cost of living.

Resolved, That the general court of the Commonwealth of Massachusetts, believing that the world-wide increase in the cost of living and the possibility of a continuance of this increase for an indefinite period is a matter of great importance, and believing that an international commission on the cost of living should be appointed to meet the urgent need to find a scientific basis for any reforms in this respect which can be accomplished by legislation, hereby approves of the effort to bring about such an international commission.

Resolved, That certified copies of these resolutions be sent by the secretary of the Commonwealth to the President of the United States, to the presiding officers of both branches of Congress, and to each of the Senators and Representatives from Massachusetts.

In senate, adopted, January 31, 1913.

In house of representatives, adopted, in concurrence, February 6, 1913.

A true copy.

Attest:

FRANK J. DONAHUE,
Secretary of the Commonwealth.

Mr. NELSON presented resolutions adopted by the State Dairyman's Association of Minnesota, remonstrating against the enactment of legislation permitting the coloring of oleomargarine in imitation of butter, which were referred to the Committee on Agriculture and Forestry.

Mr. BRISTOW presented a petition of sundry citizens of Marion, Kans., praying that an investigation be made into the prosecution of the editors of the Appeal to Reason, published at Girard, Kans., which was referred to the Committee on the Judiciary.

Mr. PERKINS. I present a joint resolution passed by the Legislature of the State of California, remonstrating against the abolishment of the fourth internal-revenue district in that State. I ask that the resolution be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the resolution was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

SACRAMENTO, CAL., *February 18, 1913.*

Hon. GEORGE C. PERKINS,
United States Senate, Washington, D. C.:

I am forwarding herewith, as per instructions embodied therein, the following resolution. Kindly acknowledge receipt.

Resolution by Senator Boynton.

"Whereas the fourth internal-revenue district of California, with headquarters in Sacramento, and serving all the counties north of San Francisco to the Oregon line, and also the entire State of Nevada, was abolished on the 1st day of October last; and

"Whereas said district did an annual business of nearly $800,000; and
"Whereas said district was also consolidated with the first collection district of California, with headquarters in San Francisco, which district was so large that the Los Angeles district was separated from it two years ago; and
"Whereas the loss of the fourth district will work injury to this section of California and Nevada without any corresponding benefit to the first district; and
"Whereas an amendment known as Senate amendment No. 68 to the House of Representatives bill No. 26680, providing for the reestablishment of the aforesaid fourth revenue-collection district of the State of California, has been approved by the Senate of the United States Congress, and now goes to conference: Therefore be it

"*Resolved by the senate and assembly jointly*, That the Legislature of the State of California approves al of the provision of said amendment, and our Senators in Congress are hereby instructed and our Representatives requested to vote for and use every honorable means to secure the passage of said amendment to said bill; and be it

"*Resolved further*, That copies of this resolution be sent by telegraph to each of our Senators and Representatives in the Congress of the United States."

WALTER N. PARRISH,
Secretary of State.

Mr. PERKINS presented a joint resolution passed by the Legislature of California, favoring the extension of the Chinese exclusion law, so as to include all Asiatic laborers, which was referred to the Committee on Immigration.

Mr. CRANE presented resolutions adopted by the General Court of the Commonwealth of Massachusetts, favoring the establishment of an international commission on the cost of living, which were referred to the Committee on Foreign Relations.

Mr. TOWNSEND presented a memorial of sundry citizens of Coldwater, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. GALLINGER presented resolutions adopted by the Granite State Dairymen's Association of New Hampshire, remonstrating against the enactment of legislation permitting the coloring of oleomargarine in imitation of butter, which were referred to the Committee on Agriculture and Forestry.

He also presented a petition of members of the Farmers' Club of the Legislature of New Hampshire, praying for the passage of the so-called Page vocational education bill, which was ordered to lie on the table.

He also presented a resolution adopted by the Petworth Citizens' Association of the District of Columbia, favoring the proposed change of trackage of the Washington Railway and Electric Co. by continuing the Ninth Street railway service across the U Street railway to a proposed minor street and then east to Georgia Avenue, etc., which was referred to the Committee on the District of Columbia.

REPORTS OF COMMITTEES.

Mr. DIXON, from the Committee on Military Affairs, to which was referred the bill (H. R. 11627) to correct the military record of Barkley S. Denison, reported it without amendment and submitted a report (No. 1257) thereon.

Mr. DILLINGHAM, from the Committee on the Judiciary, to which was referred the bill (H. R. 21532) to incorporate the Rockefeller Foundation, reported it without amendment and submitted a report (No. 1258) thereon.

Mr. SMOOT, from the Committee on Claims, to which was referred the bill (H. R. 18294) for the relief of John C. Sullivan, reported it without amendment and submitted a report (No. 1259) thereon.

Mr. BRADLEY, from the Committee on Pensions, submitted a report (No. 1252) accompanied by a bill (S. 8540) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 433. Eleanor P. Bigler.
S. 2465. Arthur F. Shepherd.
S. 4811. Margaret B. Sherman.
S. 5175. La Salle Corbell Pickett.
S. 5742. Petrona B. Freeman.
S. 7454. Emma Z. Gilman.
S. 7774. Mary Bottino.
S. 7807. Ellen Barrett.
S. 7921. James Tiernan.
S. 7955. John Partello.
S. 8061. James W. Ellis.
S. 8064. John A. Lennon.
S. 8234. Estelle H. Wholley.
S. 8432. Frances P. O'Reilly.
S. 8437. Lewis L. Daniel.

Mr. BRADLEY, from the Committee on Pensions, submitted a report (No. 1253), accompanied by a bill (S. 8541) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 426. Margaret Liddle.
S. 1005. Laura Adam.
S. 1852. Mary E. Smith, now Faught.
S. 2262. Charles Hatfield.

Mr. BRADLEY, from the Committee on Pensions, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

H. R. 27874. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors (Rept. No. 1260);

H. R. 28379. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors (Rept. No. 1261); and

H. R. 28282. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war (Rept. No. 1262).

Mr. MARTIN of Virginia, from the Committee on Commerce, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 8377. A bill to authorize the Northern Pacific Railway Co., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River in Minneapolis, Hennepin County, Minn. (Rept. No. 1264);

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes (Rept. No. 1263);

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River in the State of West Virginia (Rept. No. 1266); and

H. R. 25762. An act for the construction of a bridge across the Mississippi River at or near Baton Rouge, La. (Rept. No. 1265).

Mr. CRAWFORD, from the Committee on Claims, to which was referred the bill (H. R. 2070) for the relief of the estate of Antonia Sousa, deceased, asked to be discharged from its further consideration and that it be referred to the Committee on Pensions, which was agreed to.

Mr. SMITH of Michigan, from the Committee on Foreign Relations, to which was referred the bill (S. 13) to regulate the practice of pharmacy and the sale of poison in the consular districts of the United States in China, reported it with an amendment and submitted a report (No. 1267) thereon.

MISSISSIPPI RIVER BRIDGE, BELTRAMI COUNTY, MINN.

Mr. NELSON. From the Committee on Commerce I report back favorably, without amendment, the bill (S. 8536) to authorize the construction of a bridge across the Mississippi River in Beltrami County, in the State of Minnesota, and I submit a report (No. 1256) thereon. I ask for the present consideration of the bill. It will take but a minute.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MISSOURI RIVER BRIDGES.

Mr. MARTIN of Virginia. From the Committee on Commerce I report back favorably without amendment the bill (S. 8538) to authorize the St. Louis & Western Traction Co. to construct a bridge across the Missouri River near Weldon Springs Landing, in the State of Missouri, and I submit a report (No. 1254) thereon. I invite the attention of the Senator from Missouri [Mr. STONE] to the bill.

Mr. STONE. I ask for the present consideration of the bill just reported by the Senator from Virginia.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MARTIN of Virginia. I report back from the Committee on Commerce favorably, without amendment, the bill (S. 8539) to authorize the St. Louis Belt, Eastern Illinois & Traction Co. to construct a bridge across the Missouri River near the mouth of the Missouri River, and I submit a report (No. 1255) thereon.

Mr. STONE. I ask unanimous consent for the present consideration of the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF CERTAIN CITIZENS IN EL PASO, TEX., AND DOUGLAS, ARIZ.

Mr. O'GORMAN. On behalf of the Committee on Foreign Relations, I report back favorably, without amendment, the bill (S. 8195) granting relief to certain American citizens in El Paso, Tex., and Douglas, Ariz. I ask the attention of the junior Senator from Arizona [Mr. SMITH] to this report.

Mr. SMITH of Arizona. I ask unanimous consent for the present consideration of the bill.

Mr. SMOOT. I shall not object to the consideration of this bill, but I wish to say that I shall object to the consideration of further bills this morning.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It appropriates $71,000, to be paid to the following-named persons in the amount specified to each, for injuries sustained by shots fired across the American boundary line by soldiers and revolutionists on the Mexican side of the line in the year 1911, to wit: Adolfo Varela, of El Paso, Tex., $3,000; Virginia Moorhead, of El Paso, Tex., $3,000; Abundio Soto, of El Paso, Tex., $4,000; Edwin G. Heaton, of El Paso, Tex., $2,000; Celia Griffiths, of El Paso, Tex., $15,000; A. R. Chandler, of El Paso, Tex., $12,000; Emma Larson, of Douglas, Ariz., $1,000; Elmer E. Crowe, of Douglas, Ariz., $5,000; Francis F. Williams, of Douglas, Ariz., $5,000; John W. Keate, of Douglas, Ariz., $4,000; Joseph W. Harrington, of Douglas, Ariz., $15,000; William R. White, of Douglas, Ariz., $2,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. OLIVER:

A bill (S. 8542) granting an increase of pension to Alexander Patterson (with accompanying papers); to the Committee on Pensions.

By Mr. OLIVER (for Mr. TOWNSEND):

A bill (S. 8543) to provide for the erection of a public building in the city of Boyne City, Mich.; to the Committee on Public Buildings and Grounds.

By Mr. JONES:

A bill (S. 8544) granting an increase of pension to Lucy M. Martin; to the Committee on Pensions.

By Mr. McLEAN:
A bill (S. 8545) granting an increase of pension to Albert L. Church (with accompanying papers);
A bill (S. 8546) granting an increase of pension to Bridget D. Farrell (with accompanying papers);
A bill (S. 8547) granting an increase of pension to Elizabeth J. Braman (with accompanying papers); and
A bill (S. 8548) granting an increase of pension to Carrie E. Hartwell (with accompanying papers); to the Committee on Pensions.

By Mr. BROWN:
A bill (S. 8549) authorizing the President of the United States to appoint certain persons in the Regular Army and place them upon the retired list; to the Committee on Military Affairs.

(By request): A bill (S. 8550) providing that the marriage of a homestead entryman to a homestead entrywoman shall not impair the right of either to a patent; to the Committee on Public Lands.

By Mr. SMOOT:
A bill (S. 8551) granting a pension to E. H. Maxfield, alias Hiram Maxfield (with accompanying papers); to the Committee on Pensions.

By Mr. CRAWFORD (by request):
A bill (S. 8552) to provide for making loans to individual Indians belonging to the Cheyenne River Indian Reservation in South Dakota from tribal Indian funds and upon approved securities under rules and regulations of the Department of the Interior; to the Committee on Indian Affairs.

By Mr. DU PONT:
A bill (S. 8553) granting a pension to Lurana M. Lowe (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of South Carolina:
A bill (S. 8554) for the purchase of a site and the erection thereon of a post-office building at Clinton, S. C.; to the Committee on Public Buildings and Grounds.

By Mr. BRYAN:
A bill (S. 8555) to amend section 8 of an act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes"; to the Committee on Post Offices and Post Roads.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. PENROSE submitted an amendment proposing to appropriate $100,000 for the purchase of a site and the erection thereon of a post-office building and other offices of the Government at Phoenixville, Pa., etc., intended to be proposed by him to the omnibus public-buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. McCUMBER submitted an amendment proposing to appropriate $75,000 for a United States post office at Valley City, N. Dak., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $75,000 for a United States post office at Jamestown, N. Dak., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. ROOT submitted an amendment proposing to appropriate $75,000 for the purchase of a site and the erection thereon of a United States post office and other Government offices at Walden, N. Y., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. NELSON submitted an amendment authorizing the Supreme Court of the District of Columbia, upon petition and motion duly made by the Secretary of the Interior, or by the contractor, after having first given notice of such motion to the parties in interest, to inquire into, hear, and forthwith determine the fulfillment of the contract of December 17, 1903, etc., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. CATRON submitted an amendment proposing to appropriate $10,000 for an investigation of the range caterpillar, etc., intended to be proposed by him to the agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. THOMAS submitted an amendment authorizing the Secretary of the Interior to enroll Tilla A. Provost and her son Harold Provost upon the rolls of the Nebraska Winnebago Indians, etc., intended to be proposed by him to the Indian appropriation bill, which was ordered to lie on the table and to be printed.

Mr. MYERS submitted an amendment proposing to increase the appropriation for administration and improvement of Glacier National Park, Mont., from $75,000 to $188,000, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BROWN (for Mr. HITCHCOCK) submitted an amendment proposing to appropriate $75,000 for a United States post office at Falls City, Nebr., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. LODGE submitted an amendment relative to the survey of Malden River, Mass., etc., intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

He also submitted an amendment providing for a preliminary survey of Lynn Harbor and the Saugus River, Mass., etc., intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

Mr. JONES submitted an amendment proposing to appropriate $20,000 for the purchase of a site for a public building at Pasco, Wash., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $150,000 for a public building at Vancouver, Wash., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment increasing the limit of cost of the public building at Everett, Wash., from $120,000 to $350,000, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $150,000 for a public building at Wenatchee, Wash., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. OLIVER submitted an amendment proposing to appropriate $1,500,000 for a United States post-office building at Pittsburgh, Pa., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. CHAMBERLAIN submitted an amendment proposing to appropriate $75,000 for a United States post-office building at Albany, Oreg., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. CRANE submitted an amendment providing that section 1243 of the Revised Statutes of the United States be made applicable to the commissioned officers of the Revenue-Cutter Service, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. NEWLANDS submitted an amendment proposing to appropriate $60,000 for the purchase of a site and the erection of a Federal building at Fallon, Nev., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $65,000 for the purchase of a site and the erection of a Federal building at Winnemucca, Nev., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. GALLINGER submitted an amendment proposing to appropriate $50,000 for the extension, alteration, and improvement of the public building at Concord, N. H., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment proposing to appropriate $300,000 to commence the construction of a modern fireproof hospital building for the treatment of diseases peculiar to women and a lying-in asylum, to replace the present building of the Columbia Hospital for Women and Lying-in Asylum, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

THE ROCKEFELLER FOUNDATION.

Mr. CULBERSON. From the Committee on the Judiciary I submit the views of a minority on the bill (H. R. 21532) to in-

rorporate the Rockefeller Foundation, which I ask may be printed.

The PRESIDENT pro tempore. The report (No. 1258, part 2) will be received and printed.

WITHDRAWAL OF PAPERS—RICHARD L. MILLER.

On motion of Mr. MARTIN of Virginia, it was

Ordered, That the papers accompanying the bill (S. 2043) granting a pension to Richard L. Miller, Sixty-second Congress, first session, may be withdrawn from the files of the Senate, no adverse report having been made thereon.

INDIAN APPROPRIATION BILL.

Mr. GAMBLE. Mr. President, I give notice that following the disposition of House bill 28180, known as the river and harbor bill, I will ask the Senate to consider House bill 26874, the Indian appropriation bill.

POST OFFICE AT BRISTOL, VA.

Mr. LEA submitted the following resolution (S. Res. 466), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Postmaster General be directed to transmit at once to the Senate all petitions, both for and against the establishment of a post office at Bristol, Va., and also reports of post-office inspectors detailed to make an investigation thereof.

INCITEMENT OF INSURRECTION IN MEXICO.

Mr. SMITH of Michigan submitted the following resolution (S. Res. 467), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Whereas the Committee on Foreign Relations was authorized and directed by resolution agreed to by the Senate on July 26, 1912, to inquire, investigate, and report whether any associations, corporations, or other interests in the United States are encouraging rebellions in Cuba or Mexico; and

Whereas said committee was directed to report the result of its investigation and inquiry to the Senate during the first month of the third session of the Sixty-second Congress; and

Whereas it has been impossible to complete the inquiry and investigation in the time specified: Therefore be it

Resolved, That the Committee on Foreign Relations be, and is hereby, authorized and directed to continue such investigation and submit its report to the Senate not later than at the beginning of the next regular session of Congress.

WATER SUPPLY OF COLORADO SPRINGS.

Mr. SMOOT submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23293) for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

In lieu of the matter proposed in amendments numbered 1 and 2, on line 19, page 6, after the word "Agriculture" strike out all down to and including the word "Manitou," in line 20, page 6, and insert in lieu thereof the following: "at the expense of and in cooperation with the city of Colorado Springs and the town of Manitou, said expense to be borne and paid by said city of Colorado Springs and town of Manitou in proportion to the number of acres reserved for the respective use of each of said municipalities."

In lieu of the matter proposed in amendments numbered 3, 4, 5, and 6, strike out all of section 5 of the act and insert in lieu thereof the following:

"SEC. 5. That this act shall be subject to the legal rights of any municipality, person, or persons in or to the above-described premises, or any part thereof, or the water thereof."

REED SMOOT,
S. GUGGENHEIM,
FRANCIS G. NEWLANDS,
Managers on the part of the Senate.

JAMES M. GRAHAM,
EDWARD T. TAYLOR,
ANDREW J. VOLSTEAD,
Managers on the part of the House.

The report was agreed to.

HOUSE BILL REFERRED.

H. R. 28730. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, was read twice by its title and referred to the Committee on Pensions.

CHARLES DUDLEY DALY.

Mr. LODGE. I ask unanimous consent for the present consideration of the bill (S. 7747) for the relief of Charles Dudley Daly.

The PRESIDENT pro tempore. The Senator from Massachusetts asks unanimous consent for the present consideration of the bill named by him; which will be read for the information of the Senate.

The Secretary read the bill, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert:

That the President of the United States, in his discretion, be, and he is hereby, authorized to appoint Charles Dudley Daly to the grade of first lieutenant of Field Artillery, United States Army, to take rank on the list of first lieutenants of Field Artillery next after the name of Charles P. Hollingsworth, and that no back pay or allowances shall accrue as a result of the passage of this act, and there shall be no increase in the total number of officers now authorized by law by reason of the passage of this act.

Mr. BRISTOW. I want time to consider that bill, Mr. President, and I object to its present consideration.

The PRESIDENT pro tempore. Objection is made.

Mr. LODGE. All right, if objection is made.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. CURTIS. I move that the Senate proceed to the consideration of the District appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28499) making appropriations to provide for the expenses of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes.

The PRESIDENT pro tempore. The pending question is upon the amendment offered by the Senator from Ohio [Mr. POMERENE].

Mr. CURTIS. Mr. President, I ask unanimous consent to go back to page 57 and to take up in their order the amendments which were passed over. I think that would be the better course.

The PRESIDENT pro tempore. Is there objection to the suggestion of the Senator from Kansas? The Chair hears none.

Mr. POMERENE. Mr. President, I take it that that is without prejudice to the amendment which I have offered?

Mr. CURTIS. Certainly.

The PRESIDENT pro tempore. The first committee amendment passed over will be stated.

The first committee amendment passed over was, on page 57, after line 13, to insert:

Toward the construction of a new Central High School on the site purchased for that purpose and toward the grading and other work necessary to prepare the site, the grading of an athletic field, the construction of retaining walls, and the construction of an athletic stadium, and the total cost of said work shall not exceed $1,200,000 under contracts which are hereby authorized therefor, $300,000.

The PRESIDENT pro tempore. The question is on the amendment.

Mr. NEWLANDS. Mr. President, the Senator from Georgia [Mr. SMITH] took special interest in that amendment, and I do not see him here.

Mr. CURTIS. Mr. President, in view of the objection that was made and the fact that the item was passed over at the suggestion of the Senator from Georgia [Mr. SMITH], who is occupied at the rear of the Chamber, I suggest that we wait until he is ready to have it taken up.

The PRESIDENT pro tempore. The amendment is before the Senate.

Mr. SMITH of Georgia. Mr. President, I hope the Senate will not adopt that amendment. I really think it is subject to a point of order. In connection with expressing my objection to the amendment, I wish to call attention also to the point of order.

This high school is to be built at a cost of a million and a half of dollars; it is to be built large enough to accommodate 2,500 pupils. I think a high school of such size unwise, both from an educational and an economical point of view. I think it is unwise from an educational standpoint, because in a location like the city of Washington, where there is so much space which is not dear all around the city, it would be far better to gather the children into smaller schools outside the city or near the suburbs than to undertake to concentrate so many of them in a central school in the center of the city.

One of the evils to be resisted in all public-school systems is the elimination of the individuality of the child. It is difficult, where you gather so many together under a single roof, to preserve the personality of the individual child in the training given to the individual child, and as you increase the number under the single roof you increase the difficulty. I believe it is far better for the boys and girls in the city to have a number of schools, none of them with more than 300 or 400—with 400 as the limit—scattered around the city, than to undertake to bring 2,500 into the city, putting them all in a single school. I am therefore opposed to it from an educational standpoint.

Mr. President, we already have three high schools in this District—the Central High School, accommodating about a

thousand pupils; the Eastern and the Western High Schools, carrying the number of high-school children up to about 1,900. The Central High School is not now crowded; it has room for more children. The Eastern and Western High Schools are crowded; the smaller schools are crowded. The Central School has unoccupied space. Now, we propose, with three schools that take care practically of the present boys and girls of the city, to begin building a new high school to accommodate 2,500—600 more than the entire present high-school population of the whites of the city.

It is unwise from an economical standpoint, because the bill proposes to spend a million and a half dollars and to finish the school by the end of three years. If we would take the $300,000 appropriated at present by this bill and add one high school to accommodate about 400 children we would accommodate all that the present demands of the city require for additional space for two or three years more. We could build it at once; we would not have to wait three years to finish it; we could build it next year, or even this year; we would certainly be ready for it by the fall of next year.

Mark you, this new school will not relieve the present pressure. It will not be finished for three years. If we build one to accommodate 400 children and finish it next year, we would then next year begin to relieve the pressure; we would accommodate all the wants of the city and have space for at least 200 children more than the pressure which is now upon the city.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Mississippi?

Mr. SMITH of Georgia. I do.

Mr. WILLIAMS. I want to ask the Senator from Georgia if he proposes to offer an amendment to the committee amendment substituting for that provision one or two high schools? It seems to me if the Senator from Georgia were to offer an amendment substituting for the proposition two high schools at such places as the Commissioners of the District or the board of education might designate, at $750,000 each, he would be occupying stronger ground than by merely opposing the amendment of the committee without offering anything in lieu of it.

Mr. SMITH of Georgia. I have an amendment which I shall present a little later on. We do not need two high schools at a cost of $750,000 each. Our existing three high schools accommodate the 1,900 high-school children of the city. The Central High School is not full, and the two others are a little overcrowded. One additional high school, to accommodate 400 children, would amply care for the wants of the city now and for several years to come. At the end of two or three years we should build another of about the same character. A school that will accommodate 400 can easily be built and the ground bought for $300,000.

I desire to repeat that we have now 1,900 pupils in the high schools; that the Central High School is not crowded; and that the two other schools are just accommodating all the children, but are a little crowded. I have here the report of the managers of those high schools, stating that they are still doing splendid work, although they want some additional school room, and that their only desire is to have them built right in connection with their present schools. My own view would be that we ought to build one more high school.

In addition to the three high schools, we have the manual-training school. We have recently enlarged its space, and the manager of that school says he is doing admirably. Work is now going on to increase the capacity and space of the manual-training school, and, with the completion of this additional work, his report shows that he will have ample facilities.

Mr. President, there is no provision of law for the erection of this high school. On the precedents that I find I believe a point of order could be made upon the amendment; but I am anxious to see the school facilities of Washington thoroughly cared for, and so I do not desire to press my objection in the shape of a point of order. I offer, however, the following substitute for the committee provision:

For the construction of a new high school, the site and plans for the same to be determined by the chairmen of the District Committees of the House and Senate, together with the Commissioners of the District, the total cost, including the site, not to exceed the amount of this appropriation, $300,000.

Mr. SMOOT. Mr. President, I should like to ask the Senator if a site has not already been purchased for the proposed new high school?

Mr. SMITH of Georgia. That would be a delightful place to put it on.

Mr. SMOOT. Perhaps I misunderstood the amendment suggested by the Senator, and I will ask him to read it again.

Mr. SMITH of Georgia. The amendment, as I have drawn it, authorizes the commissioners and the chairmen of the House and Senate District Committees to purchase a new site, if they so prefer, but it does not require them to do so. What I had in view was to leave it to their discretion, either to use the present site or to locate the new school elsewhere, if they thought best; in which event, if Congress saw fit, the present site could be disposed of.

Mr. SMOOT. I was wondering what the idea of the Senator was in relation to the site that we have already purchased. The Senator no doubt knows that we have purchased a site opposite the Garfield Hospital for the high school.

Mr. SMITH of Georgia. Yes.

Mr. SMOOT. Costing something less than $300,000.

Mr. SMITH of Georgia. Yes.

Mr. SMOOT. Does the Senator now by his amendment propose to give the District of Columbia Committees of the two Houses authority not to use the site purchased, but to purchase another one?

Mr. SMITH of Georgia. Yes. I think an entirely satisfactory site can be purchased for $30,000, but, of course, it would be farther out. I believe it is better to put a school of this kind farther out. I believe a location as far out as, or a little farther than, the National Cemetery, would be better for a boys' high school than inside the city. If the Senate prefers to have it placed on the lot which has already been purchased, I have no objection to that, and I will be entirely willing to modify my amendment to that effect.

The real point that I sought to press was my opposition to putting up a school for twenty-five hundred students, for two reasons: First, because such a school is objectionable from an educational standpoint; and, second, because it is objectionable from an economic standpoint. A school for 400 can be finished, and will care for the wants of the District for several years to come, and then, a few years later, that could be supplemented with another school to accommodate 400, and another accommodating 400 a few years after that, rather than to adopt the policy of housing 2,500 pupils in one school; and when that is full, what then? A general system of enlargement in reasonable size nearer the people will be better for the children and for the city.

Mr. CLARK of Wyoming, Mr. SMITH of Maryland, and Mr. NEWLANDS addressed the Chair.

The PRESIDENT pro tempore. To whom does the Senator from Georgia yield?

Mr. SMITH of Georgia. The Senator from Wyoming first rose; and I yield to him.

Mr. CLARK of Wyoming. I should like to ask the Senator, if he has the information, how many pupils per annum pass out from the lower grades into the high-school grades?

Mr. SMITH of Georgia. I have not that exact information. Of course, we understand that as they reach the higher grades of the grammar schools they fall off largely.

Mr. CLARK of Wyoming. Yes; but I was asking, with a view to settling it in my own mind, whether the addition of space for 400 pupils annually would accommodate all those who desire to enter the high schools?

Mr. SMITH of Georgia. I feel perfectly sure that that is true. Up to this time, in the entire history of the city, there have been only 1,900 pupils in the high schools in any one year.

Mr. CLARK of Wyoming. Can the Senator inform us as to the number of years in the high-school course?

Mr. SMITH of Georgia. I think it is a course of four years.

Mr. SMITH of Maryland. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Maryland?

Mr. SMITH of Georgia. Certainly.

Mr. SMITH of Maryland. I wish to ask the Senator from Georgia whether he does not think the site we now own, which has been purchased for this school, would be too expensive a site for the school he proposes?

Mr. SMITH of Georgia. That was the view I had.

Mr. SMITH of Maryland. Would not the plan suggested by the Senator altogether do away with the site that has been purchased by the city? What would the Senator do with that site?

Mr. SMITH of Georgia. Was it purchased by the city?

Mr. SMITH of Maryland. By the Government, I mean.

Mr. SMITH of Georgia. I think that site could be sold and several sites of proper size could be bought on which schools could be erected that would accommodate 400 pupils each. I am sure if the Senator from Wyoming will turn to the report of the school board he will see that the increase in the high schools is at the rate of about 100 a year.

Mr. CURTIS. Mr. President, will the Senator permit me to interrupt him?

Mr. SMITH of Georgia. Certainly; I wish the Senator would do so.

Mr. CURTIS. I have a statement from the superintendent showing that there are about 500 new pupils a year for the different high schools.

Mr. SMITH of Georgia. That is not the increase, I am sure.

Mr. CURTIS. At the present rate of growth there will be 1,600 in three years prepared for the new high school. That would be an average of a little over 500 a year. The Senator must bear in mind that in addition to the high school he has referred to—although I did not intend to interrupt him——

Mr. SMITH of Georgia. I am glad to be interrupted.

Mr. CURTIS. I had intended to make this statement later. In addition to the school referred to by the Senator there are four other schools that are well crowded that would feed these two new schools. I shall call attention to those later on.

Mr. SMITH of Georgia. I should be glad to have the Senator give me the exact number of pupils who went into the high schools last year.

Mr. CURTIS. I can not do that at this time. I have sent for that information.

Mr. SMITH of Georgia. Mr. President, the number who go up from the grammar schools does not constitute the test of the increased pressure upon the high schools each year. There are a number who enter the high schools and drop out of them every year. The proper mode of determining the increased pressure each year is to go back to last year and see how many were in the high schools then and how many the year before and how many the year before that. You can not add to your high-school estimate the number who could go up from the grammar schools each year.

Mr. CLARK of Wyoming. Mr. President, that is the exact knowledge I was seeking. Knowing that the Senator from Georgia had made a study of this matter, I supposed he could give it to the Senate without delay.

Mr. SMITH of Georgia. I have not the exact figures in my mind; but the increase during the past five years, as I recall it, is about 600 in these three high schools. I may be inaccurate, but my recollection is, not having directed it particularly to the subject, that the increase was about 600 in the past four or five years. If the claim that the high schools increase over 500 each year were true, the entire number now in the high schools would be accounted for in three years. I looked into the matter sufficiently to satisfy myself that an increased facility now of 400 would take care of the high-school children for three or four years, while the large high school that is proposed will do nothing to relieve the situation for three years.

The objection to the committee's plan is that it furnishes accommodations so far off, and then of such very large size, when the more economical plan is to build more frequently and to build smaller high schools. In 12 months you can build a suitable high school for 400 children, and every few years build again to meet promptly a growing demand and yet do so with a much smaller expense. You will have the further advantage, which, to my mind, is, or should be, conclusive, that you will not be undertaking to pack 2,500 boys and girls of high-school age in a single place, when in this city there is so much space all around near at hand, and it is so much better, instead of concentrating them in the center of the city, to move them out away from the center, where more space and fresher air and less central city surroundings bear upon them, and where the opportunity for individuality is just as much more as 400 is less than 2,500.

Mr. CURTIS. Mr. President, in the appropriation bill approved March 2, 1911, I find the following provision:

For purchase of site for a new central high school, approximately 400,000 square feet, to be located north of Q Street, north and west of Tenth Street west, $250,000.

In the appropriation act of 1912 I find the following, and this is what controlled the committee, in addition to the study that has been given this question by the members of the committee:

The Commissioners of the District of Columbia are hereby authorized to use so much as may be necessary of any unexpended balances remaining in the appropriations for the purchase of a site for a new Central High School, and for the purchase of a site for a new M Street High School, contained in the District appropriation act for the fiscal year 1912, * * * for the employment of architectural services in the preparation of plans and specifications for said high schools, and for such other personal services and expenses in connection therewith as may be necessary: *Provided*, That the plans for the new Central High School shall provide accommodations for not less than 2,500 pupils.

The number was fixed after a very thorough examination. There were hearings lasting for several days, and those who favored the small schools were heard. Many recommended what has been advocated here to-day by the distinguished Senator from Georgia [Mr. SMITH]—the 400 plan. But after a careful consideration, and hearing the leading educators, and giving the case most careful consideration, the committee of 1912 agreed upon the 2,500 plan, and so put it in the act of 1912; and that is the law to-day.

Mr. SMITH of Georgia. Will the Senator allow me to interrupt him?

Mr. CURTIS. Certainly.

Mr. SMITH of Georgia. The Senator does not mean that there is any general statute fixing that as the rule, does he?

Mr. CURTIS. Oh, no. I say that the law of 1912 authorized the plan of a school for 2,500 pupils, as I have stated.

Mr. SMITH of Georgia. Is not this all it does? Does it not simply authorize the preparation of plans for such a school——

Mr. CURTIS. That is true.

Mr. SMITH of Georgia. One moment. But does that become any more the law binding on us than if a private citizen allowed an architect to get up plans for him for a house of a certain kind, and afterwards determined not to build that kind of a house? Does the act of 1912 settle the size of the school or constitute the rule of law as to the school any more than the mere fact that a private citizen allows an architect to get up a plan for a house for him makes it necessary for him to build such a house?

Mr. CURTIS. Mr. President, that act is binding only to this extent: There is written into the appropriation act the expression of the opinion of the Congress which adopted the report of a committee, made after careful consideration, that the large-school plan is better than the small-school plan. Of course, the Congress has the right to reduce the size of the school if it sees fit. I have simply called attention to the act to show that, after careful consideration, the number was fixed at 2,500.

I find, upon looking over the statistics of larger cities, that there are in the United States over 18 high schools that provide for the accommodation of from 1,600 to 3,200 young men and young women in each. In this city we have in the Central High School 1,130 pupils, and it has a seating capacity of only 1,274; so it will be seen that there is not room for many more pupils there. In the Eastern High School we have 417 pupils, and there is a seating capacity of 464. In the Western High School we have 648 pupils, with a seating capacity of 698. In the Business School, which is sometimes called the Business High School, and is commonly known as the Business High School, we have 1,147 pupils, with a seating capacity of 1,183. In the McKinley School, a technical school which is sometimes designated as a combination school, we have 947 pupils, with a seating capacity of 1,112.

In the colored schools we have the following: The M Street High School has a seating capacity of 786, with an attendance of 788, so that school is now overcrowded. In the Phelps Building, the business division for colored children, we have 219 students, with seats for 224. In the Armstrong Technical School there are 515 pupils, with seating capacity for 532.

It has been estimated that this new building could be completed in three years. Of course the other school, in the item following, for the colored children can be completed in a shorter time. I am advised by the officers of the school board that with the natural growth there will be in three years 1,600 more pupils ready to enter these schools.

There is no question but that new schools will be needed, and of course it is a question of policy as to whether in the item providing for the high schools the Senate will follow the recommendation of the committee and provide for 2,500 pupils, or whether it will change the whole plan and waste the money that has been used in the purchase of an excellent site.

Mr. SMITH of Georgia. Mr. President, will the Senator permit me to ask him a question?

Mr. CURTIS. Certainly.

Mr. SMITH of Georgia. Did we pay more than that site was worth?

Mr. CURTIS. Not at all.

Mr. SMITH of Georgia. Then, can it not be sold for what was paid for it?

Mr. CURTIS. Oh, probably it can be sold: yes.

Mr. SMITH of Georgia. Then the money would not be wasted.

Mr. CURTIS. The Senator knows it is pretty hard to get authority to sell Government property—property lying vacant, as there is lot after lot in the city of Washington owned by the Government vacant to-day, and buildings owned by the Govern-

ment unoccupied by Government offices. The Government is not expeditious in selling the property it accumulates. Here we have presented this question: One of the best architects in the preparation of plans and specifications for school buildings has been employed; plans and specifications have been prepared by him, and, I understand, have been adopted.

I hope the Senate will adopt the recommendation of the Senate committee, and will vote down the amendment offered by the Senator from Georgia.

Mr. NEWLANDS. Mr. President, I am quite in sympathy with the Senator from Georgia [Mr. SMITH] in his view regarding large schools. I do not believe any single school should involve so large a membership as 2,500. I believe the limit should be 500, and I believe in every case there should be ample accommodations in the way of playgrounds. But the difficulty in this case is that we have already entered upon a scheme for the construction of a high-school intended to accommodate 2,500 pupils; we have already gone to an expense, I believe, of $300,000 in securing an appropriate site for that school; and we have further secured plans, based upon the authorization of Congress, for a school involving a membership of 2,500.

I saw some time ago the plan of that school, and I must say it is one of the most attractive plans I ever saw. It will be an ornament to the city of Washington, and I have no doubt it will meet every requirement of scientific modern education.

That plan, as I recall, contemplated a central building with two wings. I assume that each one of these three structures, if we may so term them, will accommodate about one-third of the total number of 2,500. Inasmuch as we have thus far been committed to this plan, and have secured the site, I should doubt the wisdom of abandoning it altogether and substituting a smaller school of only three or four hundred pupils, and purchasing a site for that school.

It seems to me it would be profitable, if it could be done, to provide in this bill not for the foundation, as the bill provides, of the entire structure for 2,500 pupils, but to provide for the completion of the central portion of the structure already designed. The legislation sought for in the bill evidently has in contemplation horizontal sections extending over the entire ground space to be covered by the school when finally completed. The bill carries an appropriation of only $300,000 out of a total contemplated appropriation of $1,200,000 for the entire building. If we could construct the building in vertical sections instead of horizontal sections we could finish the central portion of the building within a year or two and have its use. We could build right up to the roof the entire central structure and have it for use within a year or a year and a half, leaving the two wings to be built hereafter; whereas if we make a horizontal section it means that we will expend this entire appropriation of $300,000 practically in the foundations of the building without having any portion of it available within a year or so for immediate use.

I ask the Senator in charge of the bill whether it would not be possible to provide a change in the mode of construction in such a way as to devote $300,000, or perhaps even an enlarged sum—$400,000—to the construction of the middle section of the building, leaving the wings to be constructed hereafter.

Mr. CURTIS. Offhand I would dislike to answer that question, but I will state that that matter could be looked into, the officers could be called before the conference, and we might remodel the amendment not to exceed the appropriation of $300,000. We would have no right in the conference to go beyond that amount, but we could provide that a part of the structure should be built first and then go on with the balance. That could be done, if it is found to be advisable, but I can not say whether it is advisable because I do not know.

Mr. NEWLANDS. I can understand, of course, that the Senator would not be able to commit himself upon that subject without expert advice, but I suggest that without exceeding the limit of $300,000 it would meet the necessities of the case. Assuming that the cost of each one of the structures would be about equal, and the middle section would cost about $300,000, we could appropriate that amount, and I imagine that it would be completed within a year.

I wish to say further, Mr. President, on this subject that I have observed for some time the contentions that have been going on regarding the public-school system of the District of Columbia. I believe in the suggestion which has been made by the Commissioners of the District that we should substitute for an inexpert board of education, selected from among citizens of the District, and most reputable citizens I am sure they are, an expert in education as the director of education in the District, to be selected as the other employees of the District are, by the District Commissioners, and to possess certain qualifications, and that we should give to the director the aid of an expert board composed of the best educators in the country and experts in education, for we know that education is now becoming a science in all the things that relate to the structure of buildings, the opportunities for ventilation, and so forth, and those subjects are securing the undivided attention of experts just as much as the engineering profession or the architects' profession, or any other profession.

It seems to me that we ought to establish a model system in this particular in the District of Columbia. I would feel very much surer in following the advice of a trained and expert director of education with the advice of such a board rather than the advice of a school board selected at random amongst the citizens of a great city, however excellent the membership of that board might be in the character of its citizenship.

I trust that at some time the District Committee or the Committee on Appropriations will insert in the proper bill legislation upon this line. I think with reference to this matter, if we can, we ought to take decisive action in favor of the suggestion of the Senator from Georgia, and we should at present limit the membership of this school to at least one-third of the number contemplated and provide accommodations for them. I do not object to having a $300,000 base for a $1,200,000 structure provided the grounds are adequate for the recreation of the school children.

Mr. SMITH of Georgia. Will the Senator allow me to interrupt him there?

Mr. NEWLANDS. Certainly.

Mr. SMITH of Georgia. Listening to the Senator's suggestion, I have drawn this little resolution, which perhaps would meet the situation:

Resolved, That a commission composed of two Senators and two Representatives be appointed by the Committees on the District of Columbia to report at as early a date as practicable upon the problem of increased high-school facilities for the District. Said commission shall have authority to take advice from experts on the subject; and an appropriation of $5,000 is hereby made, to be immediately available, for the expenses of the commission.

Mr. NEWLANDS. I would not wish to delay the immediate commencement of the building that is required to meet the increasing demands of the District for high-school instruction. The amendment which the Senator suggests would create that delay. It seems to me we should take some action now that will probably enable the committee to take the whole matter up in such a way as to meet the present demands and at the same time meet what I regard as a very wise suggestion of the Senator from Georgia.

Mr. SMOOT. Mr. President, I have given considerable attention to the evidence that was taken before the subcommittee of the House Committee on Appropriations. I wish to say to the Senator from Georgia that, judging from the evidence, the whole trend of education is toward larger numbers in the high schools. I notice in the testimony that was given that Mr. Ittner, the recognized leader as an architect of school buildings in America, testified that the trend is toward larger high-school buildings, not only as a matter of economy but for efficiency as well. He calls attention to the fact that all the plans he has drawn for high schools of late—and mentions the ones in St. Louis, Minneapolis, and Cleveland, Ohio, and a number of them in the State of New York—are larger in size in order to accommodate a larger number of children in the high schools.

I notice a description of the building in the testimony, and it is as follows:

> The building is built in the shape of a large square with two central courts. These courts are 40 by 80 feet and serve to light the interior of the building. The auditorium lies between the courts and the class rooms, and laboratories are placed around the perimeter of the building, where the natural light will never be impaired. There are eight stairways arranged in double flights at the intersection of the main and secondary corridors. Thus each stairway falls into service for a definite group of rooms, providing for rapid circulation, which is an important thing in a large high school when the classes are changing from room to room every 45 or 50 minutes. The auditorium has a capacity of 2,000, and it is planned so that it can be brought into use for large choruses, symphony productions, class drills, and graduating exercises—in fact, to give the maximum of service for high-school uses as well as arranged for evening lectures and concerts, should the board elect to put it to such uses. The entrances are arranged for ease of exit and circulation, and the shops, you will notice, are arranged in wings along the rear of the building, so that they may be built or not, just as you see fit.

Then further the testimony shows that the plans are such that any part of the building can be built at a time and added to afterwards.

In all the cities of the country the larger high schools are the rule to-day, and that is the trend of our educational system from one end of the United States to the other, and not the small schools. In the large schools the student does not lose his individuality. I think if there were going to be any change

made in our high-school system in the District of Columbia, the young ladies and the young men should be taught separately, in separate buildings. I think if we were going to make any change at all in this bill it should be along this line.

Mr. SMITH of Georgia. I agree with the Senator fully on that point.

Mr. SMOOT. But, Mr. President, as provided for in this bill, the building is to be one of the most beautiful structures, the best-arranged schoolhouse that is to be found in any part of the United States. It will be a credit to the District of Columbia, and not only that, but I believe it will be for the best interests of every student who attends, because I think the efficiency in such a school will be greater than if it were divided up into smaller schools.

I sincerely trust that the Senate will support the Committee on Appropriations of the Senate in placing this provision in the bill.

Mr. WEBB. Mr. President, it is not what a teacher teaches but what he inspires his pupils to learn that makes an efficient teacher. Personal contact and personal intimacy are the indispensable elements of a great teacher. When great multitudes of children are massed under one superintendent personal contact, the chief element of success in a teacher's work, is eliminated. In a 10-month session, 5 days to the week, there are only 200 school days in a whole year. One-half hour a day with private interviews with pupils will give only one hour to each pupil for the year, two interviews each. A school should be a well-regulated family. This is impractical when great multitudes are mechanically, and not personally, disciplined. I can conceive of no greater question in this District than a proper provision for our greatest asset—our children. The greatest need of our people is a reform in the schools. No other profession but that of the teacher is under the exclusive control of those who have no experience in a school except as a pupil. The ripe experience of the profession for that reason is not available.

Life is but an opportunity; to the ignorant the avenues to its satisfactions are closed; to the scholar these avenues are open. The scholar is not the mechanically taught but the personally inspired.

The greatest value of my schooldays from the beginning to graduation was the inspiration that came from contact with great personalities that were made possible by small bodies of students. That inspiration often comes outside of the schools. Then we have great men without the aid of the schools. The inspiration is the essential and only essential. Great masses of students tend to become a machine with lesson hearers and no teachers. With my views, I think it unwise to concentrate more than 2,000 pupils under one management. I have no objection to the size of the appropriation, but its direction toward its ends. I will not take the time of the Senate to discuss accessibility and other points that might be urged against this proposed concentration.

Mr. CURTIS. There is certain information I should like to give before the vote is taken. We have enrolled in the high schools in the District now 4,214 white pupils and 1,415 colored.

Mr. SMITH of Georgia. Four thousand whites enrolled?

Mr. CURTIS. Yes; making a total of 5,629. More than 1,400 pupils enter the high schools each year. I will state to the Senator that is made on the basis, as I said in my remarks, that the Business, the McKinley, and the Armstrong are virtually treated as high schools.

Mr. SMITH of Georgia. Mr. President, I hold in my hand the report of the school board which shows the total whites in the Central School to be 1,168; in the Eastern 405; in the Western 614. Those are the high schools of the city.

Mr. CURTIS. And the colored schools.

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Those are the white high schools of the city.

Mr. CURTIS. Then there are the Business School, which, as I said, is treated now as a high school, the McKinley Technical, which is so treated, and the M Street, the colored high school, and the Armstrong Technical School, which is now termed a high school.

Mr. SMITH of Georgia. I am not talking about what is treated; I am talking about what is true, what are the facts. The Business School is not a high school; it is a different character of school; it extends the age away beyond the high-school age and it is for largely a different class of instruction. So there are not seeking to get to the high schools 4,000 whites. Those now admitted are 1,168, 405, and 614, and that is all. It is less than 2,000.

I have here the report of the principals of the three schools. The principal of the Central School admits that the school is not full. The other two complain that they are crowded, but say they are doing splendid work. You can not read these three reports without reaching the conclusion that the two smaller schools are called on more to take care of children than the large Central School, nor can you read the report without reaching the conclusion that they are doing better work than the larger schools.

The Senator from Utah [Mr. SMOOT] says that the trend in the cities is toward very large schools. Little has been learned in the great cities about high-school work. They are handicapped in their work; they have never accomplished for the children who attend them when crowded what the smaller schools in the rural sections have done. One of the reasons that the life-blood which furnishes the flower of the manhood of this country must come very largely from the country is the unfortunate crowding of children together in the cities and in the educational institutions of the cities.

There has never been any proof brought from any of these crowded schools that they have done or can do the proficient work that is done in the smaller high schools. We have just heard on the floor of the Senate from the man who, I believe, has done the greatest work in high-school training that has ever been done in the South, at any rate. He is now a Member of this Senate. I would not exchange his judgment for the judgment of an architect, who desires to put up a magnificent building. It is true that the architect thinks that the building ought to be one costing a million and a half dollars; it is true that there is a line of thought in the cities that longs for magnificent structures to adorn them. I care more, when it comes to a school, for what is going to be done for the mind and character of the boy and girl who goes to it, than I do for the outside walls of the building. I do not care anything for the great structures. I want room and air and individual attention, so far as possible, that men and women, not elegant brick walls and magnificent structures, may be the result of the school system.

I repeat, Mr. President, there has been no proof that good work can come from crowding children together. I think that the necessity of crowding them together has been due to the lack of space in the big cities, but that does not exist here.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. Yes.

Mr. SMOOT. I do not understand that the students are going to be crowded together. I understand that the building itself, and the grounds surrounding it, are such that the pupils will not be crowded as they are and have been crowded in the Central High School or in either one of the other high schools in the city. The plan is that the air, the light, and the general arrangement of the building shall be such that no class will be crowded and no student will be crowded either in the building or on the grounds. It is only a question of the number of teachers as to whether the student comes in direct touch with his teacher or not; and, of course, the required number will be provided for.

Mr. SMITH of Georgia. Mr. President, is this to be run as a separate system of schools all at one place? Are they to be divided into separate playgrounds? Are they to be separated all the way through in all their relations? If so, we had better have separate schools. If not, then they are to be crowded together. The report recommending a larger school admits that it will be just as expensive. In the examination an effort was made to show that there would be some economy about it, but it was conceded that there would be none. That is the testimony which I have read.

Mr. SMOOT. That is——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. Yes.

The PRESIDENT pro tempore. The Chair must insist upon the observance of the rule by Senators desiring to interrupt the Senator who is speaking.

Mr. SMITH of Georgia. I yield to the Senator from Utah.

The PRESIDENT pro tempore. Senators will address the Chair and get permission to interrupt. The Senator from Utah.

Mr. SMOOT. I was simply going to say, Mr. President, that the estimate upon the building itself is only 20½ cents a cubic foot, which is lower than it has been in any building erected in the District of Columbia. There may be no economy, so far as the number of teachers is concerned, but in the building itself and in the grounds there is economy, as shown by the testimony.

Mr. SMITH of Georgia. What are we going to do with the existing buildings? We now have three buildings that accommodate all the children in the high schools. The Senator from Kansas [Mr. CURTIS] undertakes to treat the students in the business school as high-school children, while many of them are grown. Do you propose to close those schools up? Do you propose to abandon all this investment in the three high schools at the business school and the two manual-training schools?

Mr. President, I am going to offer this amendment:

That a commission composed of two Senators and two Representatives be appointed by the Committees on the District of Columbia to report at as early a date as practicable upon the problem of increased high-school facilities for the District, and said commission shall have authority to take advice from experts on the subject; and an appropriation of $5,000 is hereby made, to be immediately available, for the expense of the commission.

Mr. CURTIS. Mr. President, I want to make a point of order, if the Senator from Georgia is through.

Mr. SMITH of Georgia. I am not through. I offer this as a substitute for the amendment reported by the committee. It has been suggested that this will cause delay. It will not. The plan of the committee involves three years' delay; the plan of the committee involves no building until the end of three years. If the commission which I propose investigates the question and determines to go on upon the present lot, they may determine to go on upon plans suggested by the Senator from Nevada [Mr. NEWLANDS] and simply build a structure for immediate use, eliminating a large part of this expensive structure, and not embarking us in the erection of a building that is to cost a million and a half dollars. It may determine to take the 400-pupil high-school plan. The commission can have the matter under consideration and report at an early day. Instead of delaying the problem, we ought to have whatever we do ready during the next year.

Mr. CURTIS. I make the point of order against the amendment that it is general legislation on an appropriation bill and that it carries an appropriation that has not been estimated for.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Georgia will be stated from the desk.

The SECRETARY. On page 57, in lieu of the committee amendment, in lines 14 to 20, inclusive, it is proposed to insert the following——

Mr. SMITH of Georgia. I propose the amendment as a substitute for both the high-school amendments.

The SECRETARY. And also for the next amendment, on page 58, from line 1 to line 5, inclusive, to insert the following:

That a commission composed of two Senators and two Representatives be appointed by the Committees on the District of Columbia to report at as early a date as practicable upon the problem of increased high-school facilities for the District. And said commission shall have authority to take advice from experts on the subject, and an appropriation of $5,000 is hereby made, to be immediately available for the expense of the commission.

The PRESIDENT pro tempore. The point of order is sustained. The question is upon the amendment proposed by the committee.

Mr. SMITH of Georgia. Then, Mr. President, I make the point of order against the amendment of the committee.

The PRESIDENT pro tempore. The point of order is overruled.

Mr. SMITH of Georgia. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Georgia suggests the absence of a quorum, and the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Lippitt	Sheppard
Brady	Dillingham	Lodge	Shively
Bristow	du Pont	McLean	Simmons
Bryan	Fall	Myers	Smith, Ariz.
Burnham	Gallinger	Nelson	Smith, Ga.
Burton	Gamble	Newlands	Smith, Md.
Catron	Gardner	O'Gorman	Smith, Mich.
Chamberlain	Gronna	Overman	Smith, S. C.
Chilton	Jackson	Page	Smoot
Clapp	Johnston, Ala.	Penrose	Stephenson
Clark, Wyo.	Jones	Percy	Tillman
Clarke, Ark.	Kavanaugh	Perkins	Townsend
Crane	Kenyon	Pittman	Wetmore
Culberson	Kern	Pomerene	Williams
Cullom	Lea	Richardson	Works

The PRESIDENT pro tempore. Sixty Senators have answered to their names. A quorum of the Senate is present. The question is on agreeing to the amendment of the committee.

Mr. BRISTOW. Mr. President, I desire to say, before the vote is taken, that I can not get the consent of my mind to vote for any high-school building than is proposed to house 2,500 pupils. I do not believe that is in harmony with the modern methods of education. The whole tendency of modern times, as I understand, is to have smaller buildings. The colleges are not constructing such large buildings as they formerly did, but are constructing smaller buildings on their grounds. Colleges in my own State, with which I am familiar, have abandoned the idea of constructing buildings as large as they can make them; and I do not believe that any school building ought to hold more than 500 pupils. I believe that according to the reports that have been made in regard to the Washington high schools, the Eastern High School and the Western High School are doing better work than the Central High School, because there is not so much congestion.

Then, I want to make another inquiry. As I understand, this building is to be located near Tenth and Q Streets NW.?

Mr. CURTIS. Near Garfield Hospital.

Mr. BRISTOW. Yes; that is in the vicinity of the Central High School.

Mr. CURTIS. It is not very near the present Central High School.

Mr. BRISTOW. Well, the present Central High School is at Seventh and O Streets, and the proposed new building is not very far from that. To build a school that will house 2,500 students, it seems to me, is not the proper thing to do.

So far as the grounds are concerned, if they have a large lot there I would very much prefer to put a school building there that will house not to exceed a thousand; and if they have additional ground about it, all the better. We can not in Washington, especially in the congested parts of the city, have too many recreation grounds for the school children. I wish that the plans could be changed and a building erected there that would house a reasonable number of students, then erect another one at some other place, and not have the students coming for miles to a school where there will be great congestion and which is situated in a locality where the population is naturally congested.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. NEWLANDS. I wish to offer a substitute for the amendment of the committee.

The PRESIDENT pro tempore. The amendment in the nature of a substitute proposed by the Senator from Nevada will be stated.

The SECRETARY. In lieu of the committee amendment, on page 57, lines 14 to 20, it is proposed to insert the following:

Toward the construction of the central structure of a new Central High School on the site purchased for that purpose, to cost not exceeding $1,200,000, under contracts which are hereby authorized therefor, $300,000.

Mr. NEWLANDS. Mr. President, I wish to explain that that amendment is in harmony with what I have already said upon this subject. It would provide for the entire expenditure of the present appropriation of $300,000 upon a central structure, under plans which provide for a structure costing in all $1,200,000, leaving the appropriation for the wings hereafter to the wisdom of Congress after deliberation upon the subject. It would, at all events, secure to us high-school accommodations for about 800 pupils, one-third of the total number covered by the entire structure. It would practically complete within the year the entire main structure which can be used for students, whereas the plan of horizontal construction, covering the entire foundation provided for by the committee amendment, means that the children will not be able to occupy any portion of this school building for at least three or four years if we appropriate at the rate of only $300,000 annually, as the building is to cost $1,200,000.

It seems to me that the amendment meets the convenience of the city in preparing accommodations for about 800 students within a year, and that it will enable us to consider in the future the question whether we will build in such large units or whether we will make the unit a smaller one than is provided for in the committee amendment, and limit it to five or six or seven hundred pupils.

Mr. SMOOT. Mr. President, there is one thing to which I should like to call the attention of the Senator, and that is this: If we confine ourselves to building the central part of the school, we shall have the great auditorium and the administrative offices and shall incur the expense of constructing that part of the building which could not be used at once for the accommodation of students. Therefore I think if the amendment offered by the Senator were adopted, it would not reach what he hopes to have it do.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Nevada?

Mr. SMOOT. I yield.

Mr. NEWLANDS. I will ask the Senator whether this auditorium is in the main central structure?

Mr. SMOOT. I so understand.

Mr. NEWLANDS. Then would it not meet the view of the Senator if we should provide that this appropriation should be limited to the construction of the main central structure or one of the wings, according to the wisdom of the board of commissioners?

Mr. SMOOT. I think the wording of the amendment that has been suggested by the commissioners will cover every possible point, and I believe the wording is very much better than any we could offer.

Mr. NEWLANDS. But the Senator will recognize the fact that the entire $300,000 would do no more than prepare the foundations, and at the end of the year we would have no accommodations for the students; whereas my plan of immediately constructing the main structure, or one of the wings, will provide accommodations for the pupils.

Mr. WORKS. Mr. President, I am not so much concerned about the size of this building. I suppose, like all other school buildings, it will be divided into separate rooms, and the school will be divided into separate and distinct grades so that each individual teacher will have a reasonable number of pupils. My chief concern is about the kind of education that is being taught in the schools, not only of the District of Columbia, but of the whole country, at the present time.

We talk a good deal about our high schools. They are not high schools in any proper sense of the term. They have grown and grown and grown in the extent of the education they impart until they have become colleges and universities. They have been warped out of all proportion as a means of giving to the children of this country the useful education that should be imparted through the public schools.

I think there is a very general protest in the public mind against the extension of the education that is imparted through the public schools at the present time. I know I have felt it very strongly, and I have heard it expressed by others. If a commission should be appointed to deal with this question at all, I should rather see a thorough investigation made of the manner of conducting the schools and the education that is imparted to the children, with a view of bringing it back to the giving out of that education that would make the children useful men and women.

It is perfectly evident to every observing man that a very large proportion of the education, for which we are paying millions and millions of dollars in this country, is absolutely worthless to a large proportion of the children who are taught in the public schools. I do hope that some time some restraint, some restriction will be placed upon the expansion of the public schools through the influence of the teachers, who are allowed to have their own way with respect to it, while we simply appropriate the money for that purpose.

Mr. SMITH of Georgia. Mr. President, I move that the committee amendment be laid on the table.

The PRESIDENT pro tempore. The Senator from Georgia moves that the committee amendment be laid on the table. [Putting the question.] The "noes" appear to have it.

Mr. SMITH of Georgia. I call for the yeas and nays.

The yeas and nays were not ordered.

Mr. SMITH of Georgia. I ask that the count be again made.

The PRESIDENT pro tempore. The Chair will again put the question on ordering the yeas and nays. [A pause.] Not a sufficient number have seconded the call, and the yeas and nays are not ordered. The question is upon the substitute offered by the Senator from Nevada [Mr. NEWLANDS].

The amendment was rejected.

The PRESIDENT pro tempore. The question now is upon the amendment of the committee. [Putting the question:] The ayes appear to have it.

Mr. SMITH of Georgia. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. SUTHERLAND (when his name was called). I have a pair with the senior Senator from Arkansas [Mr. CLARKE], and I understand he has not voted. In his absence I withhold my vote.

The roll call was concluded.

Mr. KERN (after having voted in the negative). Has the Senator from Kentucky [Mr. BRADLEY] voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. KERN. I withdraw my vote for the moment, and transfer my pair to the Senator from Oklahoma [Mr. GORE], and will vote. I vote "nay."

The result was announced—yeas 42, nays 26, as follows:

YEAS—42.

Brandegee	Dillingham	Nelson	Smith, Md.
Brown	du Pont	O'Gorman	Smoot
Burton	Gallinger	Oliver	Stephenson
Catron	Gamble	Page	Stone
Chamberlain	Jackson	Percy	Thornton
Clapp	Jones	Perkins	Townsend
Clark, Wyo.	La Follette	Poindexter	Warren
Crane	Lippitt	Pomerene	Wetmore
Crawford	Lodge	Richardson	Works
Cullom	McLean	Root	
Curtis	Martin, Va.	Smith, Ariz.	

NAYS—26.

Ashurst	Gardner	Martine, N. J.	Smith, Ga.
Borah	Gronna	Myers	Smith, S. C.
Bristow	Johnston, Ala.	Newlands	Thomas
Bryan	Kavanaugh	Overman	Tillman
Culberson	Kenyon	Pittman	Webb
Cummins	Kern	Sheppard	
Fletcher	Lea	Simmons	

NOT VOTING—27.

Bacon	Chilton	Hitchcock	Shively
Bankhead	Clarke, Ark.	Johnson, Me.	Smith, Mich.
Bourne	Dixon	McCumber	Sutherland
Bradley	Fall	Owen	Swanson
Brady	Foster	Paynter	Watson
Briggs	Gore	Penrose	Williams
Burnham	Guggenheim	Reed	

So the amendment of the Committee on Appropriations was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had failed to pass the bill (S. 3175) to regulate the immigration of aliens to and the residence of aliens in the United States over the veto of the President of the United States, two-thirds of the House of Representatives not agreeing to pass the bill.

EIGHT-HOUR LAW.

Mr. SHIVELY submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 18787) relating to the limitation of the hours of daily service of laborers and mechanics employed upon a public work of the United States and of the District of Columbia, and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 6, 7, 8, and 9, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: After the word "persons," in line 2, page 3, strike out all the words down to the end of section 1 and insert the following: "employed in connection with dredging or rock excavation in any river or harbor of the United States or of the District of Columbia while not directly operating dredging or rock excavating machinery or tools, nor to persons engaged in construction or repair of levees or revetments necessary for protection against floods or overflows on the navigable rivers of the United States," so that the proviso in section 1 will read: "*Provided*, That nothing in this act shall apply or be construed to apply to persons employed in connection with dredging or rock excavation in any river or harbor of the United States or of the District of Columbia while not directly operating dredging or rock excavating machinery or tools, nor to persons engaged in construction or repair of levees or revetments necessary for protection against floods or overflows on the navigable rivers of the United States"; and the Senate agree to the same.

WILLIAM E. BORAH,
BENJAMIN F. SHIVELY,
Managers on the part of the Senate.

W. B. WILSON,
FRANK BUCHANAN,
Managers on the part of the House.

Mr. BURTON. Mr. President, I made some remarks on that measure, on a motion to reconsider. I do not desire to be further heard. I had understood, however, that the Senator from North Dakota [Mr. MCCUMBER] desired to be heard on it.

Mr. BORAH. Mr. President, the Senator from North Dakota has been here for some time and has not signified to anyone

who is connected with the report a desire to speak on it. I should like to see the matter disposed of.

Mr. SHIVELY. I ask for the adoption of the conference report.

The PRESIDENT pro tempore. The question is upon agreeing to the conference report.

The conference report was agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28499) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes.

The PRESIDENT pro tempore. The next reserved amendment will be stated.

The SECRETARY. At the top of page 58 insert:

Toward the construction of a new M Street High School for colored pupils on the site purchased for that purpose, and toward the grading of said site, and the total cost of said building shall not exceed $550,000, under contracts which are hereby authorized therefor, $150,000.

Mr. SMITH of Georgia. Mr. President, the same objection which I have urged to the preceding amendment I urge to this; but since we have gone through the fight on the first and the Senate has voted, I do not intend to repeat my reasons for objecting.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The next reserved amendment will be stated.

The SECRETARY. On page 71, at the top of the page, insert the following:

The action of the commissioners in locating a pound and stable for the health department on reservation No. 290, located along James Creek Canal at the intersection of South Capitol and I Streets SE., under the authorization contained in the District appropriation act approved March 2, 1911, is ratified and confirmed, and the jurisdiction and control over said reservation is transferred to the Commissioners of the District of Columbia: *Provided*, That the District of Columbia shall pay to the United States as compensation for the land contained in said reservation one-half the estimated value thereof, namely, $4,100, and there is hereby appropriated, entirely from the revenues of the District of Columbia, said sum of $4,100, which shall be deposited in the Treasury of the United States to the credit of the United States, and thereafter the title to said reservation shall be in the name of the District of Columbia.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The next reserved amendment will be stated.

The SECRETARY. On page 74, after line 13, insert:

INTEREST AND SINKING FUND.

For interest and sinking fund on the funded debt, $975,408.

Mr. SMITH of Georgia. Mr. President, this item is offered by the Senate committee as a substitute for the last provision in the bill as it comes from the House. It involves a sum of something over $12,000,000 for which, in my opinion, the National Government is in no sense liable, but for which the District is liable. It is proposed to transfer that liability from the District to the National Government.

There are certain bonds known as the 3.65 bonds. It is with reference to those bonds that this provision applies. The House appropriated the money to meet the interest, but left the question of final liability between the District and the National Government to be determined by the law as it stands. The Senate committee undertake to determine that these bonds are to be paid for, half and half, by the National Government and the District. The bonds and the interest will amount to over $25,000,000.

Mark it, the House proposes to leave the question to be determined hereafter as to whether the law puts the liability on the National Government. The effect of the Senate committee amendment is not to leave it where the law leaves it, but to undertake to determine that half of the liability rests on the National Government.

Mr. President, these bonds were issued under an act passed in 1874. They were to take up indebtedness of the government of the District of Columbia, of the city of Washington, and of Georgetown, reaching back a number of years prior to that time. The indebtedness for which these bonds were issued was an indebtedness with which the National Government had nothing to do, for which it was in no sense liable; but the act of 1874 provided that the District might settle this indebtedness with bonds bearing interest at the rate of 3.65, and that the National Government guaranteed the payment of the bonds; but all money for the payment of the bonds was to be raised by taxes placed upon the property of the District. It was not a liability of the National Government. The act of 1874 did not make it a liability of the National Government. It simply guaranteed the bonds that the District wished to issue and provided that money should be raised by taxes upon the property of the District to pay the interest on the bonds and the principal.

Mr. SMITH of Arizona. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Arizona?

Mr. SMITH of Georgia. Certainly.

Mr. SMITH of Arizona. When do the bonds fall due?

Mr. SMITH of Georgia. I do not know.

Mr. CURTIS. Fifty years from 1874. They are being redeemed now.

The PRESIDENT pro tempore. Senators will address the Chair, and get permission.

Mr. CURTIS. I beg the Chair's pardon.

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Certainly.

Mr. CURTIS. I say the bonds run 50 years from 1874, except that they may be redeemed from time to time, and about eight or ten million dollars have already been redeemed.

Mr. SMITH of Georgia. Mr. President, the act of 1874, as I said, provided that the bonds were to be paid from taxes levied on the property of the District. The National Government, to help the District dispose of the bonds in settlement of its debts contracted prior to that time, guaranteed the bonds and directed that taxes should be levied on the property of the District to pay the interest on the bonds and the principal on the bonds. That is the substance of the act of 1874.

That was four years before we passed the act of 1878, called the organic law of the District, under which for the first time the National Government agreed to pay half-and-half of a certain class of the expenses of the District. The act of 1876 following the act of 1874 provides as follows:

And in case there shall not be a sufficient sum of said revenues—

Referring to the revenues collected by taxes on the property in the District—

in the Treasury of the United States, at such time as said interest may be due, then the Secretary of the Treasury is authorized and directed to advance from any money in the Treasury not otherwise appropriated a sum sufficient to pay said interest, and the same shall be reimbursed to the Treasury of the United States from time to time as said revenues may be paid into said Treasury until the full amount shall have been refunded.

After the passage of the act of 1874 the District failed to meet from its revenues the interest on these bonds, and the act of 1876 was passed providing that the National Government would meet the interest as it fell due. The National Government had guaranteed the bonds, but provided that it should be charged up against the District funds when the National Government met the interest and should be paid back from time to time if the District had funds on hand to meet the payments.

So, Mr. President, there can be no doubt that this indebtedness for which the 3.65 bonds were issued was one with which the National Government had no connection and for which it in no wise was responsible. The act of 1874 providing for settling these past liabilities recognized the fact that the National Government was simply going security for the District, that the District was primarily liable, and that the revenues of the District were to pay all the bonds and the interest. The District not having the money, the act of 1876 provided that the National Government would advance the money, but it was to be returned to the National Government.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from California?

Mr. SMITH of Georgia. Certainly.

Mr. WORKS. I do not know that I understood correctly the reading of the statute which has just been read by the Senator from Georgia. I should like to know, without requiring it to be read again, whether it provided merely for the payment of the amount then due or whether it is general in its terms, authorizing the National Government to advance the money to meet the obligations as the interest falls due.

Mr. SMITH of Georgia. I think it was general in its terms.

Mr. WORKS. Then, in that case, I should like to ask the Senator from Georgia whether, if this appropriation is made, it would not be made under the terms of that statute and the District still be liable to repay the amount advanced?

Mr. SMITH of Georgia. I think that would probably be true, but doubt about it is raised by the way in which the amendment of the Senate committee comes. The House committee

provided for the payment of the interest. The House provision is as follows:

INTEREST AND SINKING FUND.

For interest and sinking fund on the funded debt, $975,408, which sum shall be paid out of funds and accounted for in accordance with the acts of Congress in relation thereto.

Mr. WORKS. It seems to me that if there is doubt as to whether this money should be paid at all by the National Government, or upon what terms and under what obligations it is paid, that should be made certain. I think that the provision in the House bill is objectionable on that ground, leaving it still in a state of uncertainty, and the amendment now proposed is no better. If this is an advancement, why not say so, and have it distinctly understood that we are not paying this money as a debt of the National Government, but that we are simply advancing it for the purpose of assisting the District for the time being to meet its obligation, leaving the District still under the obligation to repay the amount to the Government?

Mr. SMITH of Georgia. If the Senate is ready to finally decide that question and to make the thorough examination which, perhaps, it would wish to make, the suggestion of the Senator from California undoubtedly is right.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield further to the Senator from California?

Mr. SMITH of Georgia. Certainly.

Mr. WORKS. It may be, Mr. President, that the committee having this bill in charge has made that necessary investigation. Certainly I should want to know before voting for an appropriation of this large sum of money that there is some obligation resting upon the Government to pay that amount of money. If it is a direct and primary obligation on the part of the Government, well and good; we should make the appropriation. If, on the other hand, it is simply an advancement of money to aid the District, then it may be proper to do it with that distinct understanding. But I shall certainly want to know that this is a just obligation on the part of the Government before voting for this appropriation.

Mr. SMITH of Georgia. Mr. President, I have called the attention of the Senate to the act of 1874, and I have called the attention of the Senate to the fact that the obligations for which these 3.65 bonds were issued were not obligations of the National Government, but obligations of the District, made independent of the National Government.

Mr. TOWNSEND. If it will not disturb the Senator——

Mr. SMITH of Georgia. Not at all.

Mr. TOWNSEND. I should like to ask him the reason for the original indebtedness, how it originated, and for what purpose?

Mr. SMITH of Georgia. The original indebtedness, I understand, ran through a period of quite a number of years. Obligations were made in the District that were not met, some of the obligations going back to the city of Georgetown and some to the county of Washington. It would be impossible for me to give the Senator all the facts with reference to the original indebtedness. I carried my own examination only to the extent of ascertaining that it was an indebtedness created by the local authorities, with which the National Government was in no sense connected.

Mr. CURTIS. For the District.

Mr. SMITH of Georgia. For the District, or for Georgetown, or for the city of Washington. They were separate organizations.

Mr. NELSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Minnesota?

Mr. SMITH of Georgia. Certainly.

Mr. NELSON. Did not these debts, I ask the Senator, arise under what was called the Shepherd government at a time when the District had a government of its own, independent of the Federal system?

Mr. SMITH of Georgia. Yes; probably in part.

Mr. NELSON. I am inquiring about that.

Mr. SMITH of Georgia. They all arose prior to 1874, and they did arise, I understand, principally during the period that the District had entire control of its own affairs. A part of them originated from the city of Georgetown, a part of them from the city of Washington, and a part of them from the county of Washington. So I have seen it stated.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from California?

Mr. SMITH of Georgia. Certainly.

Mr. WORKS. I hope the Senator from Georgia will pardon me for these frequent interruptions, but this is a subject with which I am not at all familiar, I am sorry to say, and I want to be informed. I understand from what the Senator from Georgia says that subsequent to the incurring of this debt the Government did obligate itself to pay one-half of the amount that might become due in the future.

Mr. SMITH of Georgia. Not at all. That is just what I do not think the Government has ever done.

Mr. WORKS. I understood the Senator's position to be that the arrangement, whatever it might have been, was made subsequent to that time, and therefore did not include the existing indebtedness.

Mr. SMITH of Georgia. Not at all. In 1878 what is called the organic act was passed, by which the Government undertook to furnish one-half of certain classes of current expenses incurred by the District of Columbia. Those expenses were to be current expenses of administration. That provision has no reference to the bonded indebtedness of the District of Columbia.

Mr. WORKS. That is precisely what I understood. Evidently the Senator from Georgia misunderstood me. I understood that, while there was by the organic act an obligation created on the part of the Government to pay one-half of certain expenses, the position of the Senator from Georgia is that it did not include the obligations that had already been incurred. Am I right about that?

Mr. SMITH of Georgia. Yes; or that it certainly did not include this obligation, but this obligation was a list of bonds issued to pay old debts that had been created from time to time during a number of years prior to 1874, and for the settlement of which the 3.65 bonds of the District of Columbia were authorized by the act of 1874. The District was authorized to issue the 3.65 bonds by the act of 1874 to settle an indebtedness with which the National Government had no connection. In the act of 1874 the National Government, to aid the District, guaranteed these bonds but expressly provided that the bonds were to be paid by money derived from taxes upon the property of the District, and that left the Government just like any other guarantor, the principal being primarily liable.

Then, the District not having had sufficient money raised from its proportional appropriation of its funds, because the act of 1874 provided for proportioning its revenue out and appropriating it to certain current expenses, only providing a part of it to go toward the interest on the 3.65 bonds, Congress by the act of 1876 provided that when the District failed to meet this interest, the National Government having guaranteed it, the Treasurer of the United States should pay it, and that it should be charged up against the District and the District should pay it back. I find nothing——

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Nevada?

Mr. SMITH of Georgia. I do.

Mr. NEWLANDS. I should like to ask the Senator from Georgia whether any committee of Congress, either of the Senate or the House, has passed upon the question as to whether these bonds were original obligations on the part of the United States Government undertaking to pay the existing debt of the District of Columbia, or whether they were simply the obligations of the United States, simply in the way of guaranteeing their payment, the amount to be refunded from the District funds. Has there been any finding of any committee?

Mr. SMITH of Georgia. I do not know.

Mr. NEWLANDS. Would it not be wise to submit that question to the Judiciary Committee of the Senate and get their opinion regarding it? There seems to be such a contrariety of views regarding the nature of the obligation, it seems to me it would be well to adopt that course.

Mr. SMITH of Georgia. I agree with the Senator. My objection to the Senate committee amendment was that it undertook to decide the question, and, so far as I could judge from the statutes, to decide it wrong. The committee undertake to decide it, and they decide that the National Government is liable, when, as I construe the indebtedness and as I grasp the situation, the National Government is not liable.

The subject came up, I found, in discussion on the floor of the House. It had never attracted my attention at all except as I read the debates on the floor of the House, which caused me to turn to the original act of 1874 and to the act of 1876 and to the act of 1878. The subject was discussed upon the floor of the House a few days ago when this bill was pending. Part of the Members of the House were sure that the National Government was in no sense liable; some of them thought that it was liable.

Therefore they, not feeling ready to decide the question, made the appropriation providing that subsequent decision should

be made as to whether the Government was or was not liable. They did not reach a conclusion upon which they were ready to settle that question, and therefore left it to be paid out of the funds and accounted for in accordance with the acts of Congress in relation thereto.

I am willing to leave it there, if we are not ready to decide it yet, and it seems to me we are not. I think it is a question which ought to be referred to the Judiciary Committee of the Senate or a joint body composed of members of the Judiciary Committees of both Houses, and receive more careful investigation than I have had time to give it. I was attracted to the question only by the debate on the floor of the House, and, turning to the act of 1874 and to the act of 1876, it seemed perfectly clear to me that the original plan did not contemplate donating payments made by the National Government to the District; and as the act of 1876 expressly declared that payments made by the Government were to be charged up to the District, I felt that we ought not to undertake to decide it without a more thorough investigation, and certainly not to decide it against the Government.

Mr. CURTIS. Mr. President, I think before passing upon this question the Senate is entitled to some of the facts; and I hope in a few moments to cover some of the questions that have been asked.

The Senate should recognize the fact that in the first place the Government received 5,129 acres of land in this District and the original owners retained 982 acres.

The District had a Government of its own until 1870. Up to 1835 the citizens of the District had expended in street improvements $629,971, while the Government had expended only $208,925. Because of that fact this question was referred to a committee of the Senate. Senator Southard made a report on the subject, and I quote from a part of the report of 1835, in which it says:

> If the streets are its property and to be regarded as altogether under its control, it is not easy to perceive why it should call upon or permit others to keep that property in order; and if the streets are to be regarded as for the joint convenience of the Government and the inhabitants, the expenses of maintaining them should be joint and in proportion to their respective interests.

That same report recommended that Congress refund to these people what they had paid out, and also recommended that in the future the Government should pay its part in keeping up and making the improvements in the city of Washington.

Up to 1871 the District of Columbia was under the control of a local government, and up to 1871 that local government had made as many improvements as possible. Congress not being liberal in its appropriations to assist, the District of Columbia found itself in debt $5,000,000. The streets were in bad condition and so Congress took hold of the situation, took the government away from the District, and made a Territorial form of government here. They gave the District of Columbia a governor, a secretary, a council of 15 members, a house of delegates of 22 members appointed by the President and confirmed by the Senate, a board of public works consisting of the governor and four citizens appointed by the President and confirmed by the Senate.

That board had control of the affairs of this District until 1874, and because of the plans it laid out, because of the improvements it made in the District of Columbia, the debt of the District increased $50,000,000.

Then it attracted the attention of Congress. First, the matter was so important that President Grant thought it deserved attention, and he in his message of 1873 referred to the subject. This is what he said about the obligations of our Government:

> The Government having large reservations in the city, and the Nation at large having an interest in their Capital, I recommend a liberal policy toward the District of Columbia, and that the Government should bear its just share of the expense of these improvements.

On the 1st of June, 1874, in compliance with the resolution of the House, passed January 26, on the legal relations of the District of Columbia and the United States, the Committee on the Judiciary rendered a report upon that question, and in it they found that the title of the streets was in the name of the General Government and were under its control. The committee was impressed with the belief that the Federal Government sustains such relations as would require it to contribute to municipal expenses, and it further found that the amount which should be so contributed was at least one-half. This was the report of the Judiciary Committee of the House of Representatives.

From the report of the committee:

> If the streets are its (the Federal Government's) property, and to be regarded as altogether under its control, it is not easy to perceive why it should call upon or permit others to keep that property in order; and if the streets are to be regarded as for the joint convenience of the Government and its inhabitants, the expense of maintaining them should be joint, and in proportion to their respective interests.
>
> Your committee are impressed with the belief that the Federal Government sustains at least such relation toward the citizens and the local government as would require it to contribute to municipal expenses an amount bearing the relation to the whole amount required, which the interest of the Federal Government here bears to the interest of the local government; and this they believe to be at least one-half.

The records show beyond any question that the debt was made, upon which $36,000,000 has been paid in interest, and a sinking fund, which was created by the officers of the General Government, in which the people of the District of Columbia had absolutely no say whatever.

The conditions were such in 1874 that Congress appointed a joint special committee of both Houses to thoroughly investigate and report upon the whole question, and the result of the report was that Congress abolished the so-called Territorial government and authorized the President to appoint three commissioners.

The act of 1874 referred to by the Senator from Georgia was the result of the work of that committee, and section 7 provides as follows:

> SEC. 7. That the sinking-fund commissioners of said District are hereby continued; and it shall be the duty of said sinking-fund commissioners to cause bonds of the District of Columbia to be prepared, in sums of $50 and $500, bearing date August 1, 1874, payable 50 years after date, bearing interest at the rate of 3.65 per cent per annum, payable semiannually, to be signed by the secretary, and the treasurer of said sinking-fund commissioners and countersigned by the comptroller of said District, and sealed as the board may direct, which bonds shall be exempt from taxation by Federal, State, or municipal authority, engraved and printed at the expense of the District of Columbia, and in form not inconsistent herewith. And the faith of the United States is hereby pledged that the United States will, by proper proportional appropriations as contemplated in this act, and by causing to be levied upon the property within said District such taxes as will do so, provide the revenues necessary to pay the interest on said bonds as the same may become due and payable, and create a sinking fund for the payment of the principal thereof at maturity. Said bonds shall be numbered consecutively and registered in the office of the comptroller of said District, and shall also be registered in the office of the Register of the Treasury of the United States, for which last-named registration the Secretary of the Treasury shall make such provision as may be necessary. And said commissioners shall use all necessary means for the prevention of any unauthorized or fraudulent issue of any such bonds. And the said sinking-fund commissioners are hereby authorized to exchange said bonds at par for like sums of any class of indebtedness in the preceding section of this act named, including sewer taxes or assessments paid, evidenced by certificates of the auditing board provided for in this act.

Now, the faith of the United States was pledged by that act to pay the interest on said bonds as the same became due, and to create a sinking fund for the payment of the principal thereof at maturity.

Mr. SMITH of Arizona. What is the date of the act?

Mr. CURTIS. 1874. Section 5 of the act provides:

> SEC. 5. That a joint select committee shall be appointed, consisting of two Senators, to be appointed by the Presiding Officer of the Senate, and two Members of the House, to be appointed by the Speaker of the House of Representatives, whose duty it shall be to prepare a suitable frame of government for the District of Columbia and appropriate drafts of statutes to be enacted by Congress for carrying the same into effect, and report the same to the two Houses, respectively, on the first day of the next session thereof; and they shall also prepare and submit to Congress a statement of the proper proportion of the expenses of said government, or any branch thereof, including interest on the funded debt, which should be borne by said District and the United States, respectively, together with the reasons upon which their conclusions may be based; and in the discharge of the duty hereby imposed, said committee is authorized to employ such assistance as it may deem advisable, at an expense not to exceed the sum of $5,000; and said sum, or so much thereof as may be necessary, be, and the same is hereby, appropriated for that purpose.

That is section 5 of the act of 1874, promising to have a committee prepare a suitable frame of government, and also to find the proper proportion of the expenses of the government, including interest on the sinking fund, which should be borne by the District and the United States, respectively.

As a result of the work of the committee of eight—three from the Senate and five from the House—the act of 1874, and various reports, the act of 1878, which was the organic act, became a law. But before I come to that, I desire to call the attention of the Senate to the fact that three days after the passage of the act of 1874 there was appropriated in the sundry civil appropriation act of June 23, 1874, for the District of Columbia, $1,300,000, including interest on the funded debt to July 1, 1874, with the following proviso:

> All of the above sums, except so much thereof as may be paid for interest as aforesaid, to be considered and adjusted hereafter as part of the proper proportional sum to be paid by the United States toward the expenses of the government of the District of Columbia.

That is the act of June 23, 1874, Eighteenth Statutes, page 210. Furthermore, in the first appropriation act of 1875, I find the following:

> *Provided*, That the said sum hereby appropriated ($482,500) shall be considered as a part of the proper proportional sum to be paid by the United States toward the expenses of the government of the District of Columbia and toward the payment of the interest on the funded debt of the District of Columbia.

That provision is taken from the act of February 1, 1875, Eighteenth Statutes, page 310.

Now, Senators, we come to the act of 1878, the act that is known as the organic act of the District, and that act fixes the amount which the General Government is to pay. I desire to read a few extracts from the organic act:

To the extent to which it shall approve of said estimates, Congress shall appropriate the amount of 50 per cent thereof.

* * * * * * *

And the remaining 50 per cent of such approved estimates shall be levied and assessed upon taxable property and privileges in said District, other than the property of the United States and of the District of Columbia; and all proceedings in the assessing, equalizing, and levying of said taxes, the collection thereof, the listing return and penalty for taxes in arrears, the advertising for sale, etc.

By that act the General Government pledged itself to pay 50 per cent of these debts.

Another thing. This is not new. When the question was presented to the House, Mr. Hendee, the chairman of the committee, used this language, so that there could be no mistake about it:

On the question as to whether the Government of the United States has pledged its faith for the payment of interest, Government officers and others interested have secured the written opinions of Mr. Pratt, of Indiana; Mr. Pierrepont, the former Attorney General of the United States; Mr. O'Connor; Mr. Birney; and other eminent and able lawyers, and they all agree in this one thing: That inasmuch as they agreed that the interest and principal should be taken care of when due, and inasmuch as the District had no voice in the transaction whatever, the United States is bound to see that there is no default; that, in fact, they are a Government bond. Mr. O'Connor and these gentlemen say that there is no question about the liability of the United States to see there is no default in the payment of the interest and of the bonds themselves.

Hence, if this one point is established—the liability of the Government, and we settle upon 50 per cent as the proportion the Government should pay, and the same for the District—as a matter of course the provision in the bill is a very wise one. These are the main features of the bill.

Mr. Hendee, in referring to this subject, said:

"There is another clause in the bill which I consider very wise and perhaps the most important provision in it. It provides that of the expenses or burdens of this District the United States Government shall bear 50 per cent. Up to the present time the relations of the General Government to the District have never been settled (the United States owns absolutely 55 per cent of the entire area of this District), and by the appraisal made a short time since the value of the property owned by the United States Government is about $95,000,000 and that owned by the District and by the people of the District $96,000,000. In other words, there is less than a million dollars difference between the actual appraised value of the property of the United States here and that of all other property here. I mean real property, of course. Yet, as I have said, up to this time nothing has ever been done to ascertain and establish the relative position of the United States Government and the District in relation to this matter. Whenever it has been deemed necessary to make improvements and pay expenses Congress has appropriated such sum as it saw fit, and the people of the District have been required to pay the balance by taxation and in such manner as Congress determined.

"Since the seat of government was permanently established in this District the entire expenditures of the United States for improvements in the District have been about $9,000,000, while the amount paid by citizens of the District for the same purpose exceeds the sum of $34,000,000. In other words, the amount taken from the pockets of citizens of the District and put into these improvements is about four times the amount which has been appropriated by the Federal Government. I make these statements upon data furnished from the Treasury Department and other departments of the Government, which give accurately the items, with dates of appropriations, etc.

"These appropriations on the part of the United States have been more frequent or perhaps more liberal within the last six or eight years than ever before. I think that within the first 70 or 71 years of the existence of this Government less than $2,000,000 were appropriated by the United States Government toward improvements in this city; the other six or seven millions have been appropriated since 1871. Twenty-three million dollars and over of the thirty-four or thirty-five millions expended in the District for improvements is in the form of a debt against the District. In regard to $13,000,000 of this debt there is a pledge or guaranty on the part of the United States that the interest as it accrues and finally the principal shall be paid. The remainder of that debt, about nine or ten millions, rests upon the District government alone, without any guaranty or pledge on the part of the United States. The interest upon this twenty-three or twenty-four millions of debt is a part of the annual expenditures of the District of Columbia and has to be regularly provided for."

This is the opinion, and this is the statement made in the House by the chairman of the committee when he reported the measure. Moreover, he said——

Mr. SMITH of Georgia. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Georgia?

Mr. CURTIS. Certainly.

Mr. SMITH of Georgia. Has the Senator ever seen one of those bonds?

Mr. CURTIS. I never have, I am sorry to say.

Mr. SMITH of Georgia. Does the Senator agree with the chairman of the House committee that they are Government bonds? If the House committee chairman made that statement about these 3.65 bonds, was he not just simply clear away from the facts?

Mr. CURTIS. With the act of 1874 guaranteeing those bonds they are the same as Government bonds. While I never read one of them, a friend of mine came to me the other day and wanted to know what was a good investment, and I said, "The Government is back of the 3.65 bonds of the District of Columbia, and I would advise you to buy them in preference to Government bonds, because they will yield you a greater interest." That is the way I feel about them.

Mr. SMITH of Arizona. What was the date of the report, if the Senator from Kansas please?

Mr. CURTIS. It is a report on the act of 1878, which fixes one-half as the part which the General Government was to pay. After fighting the matter out on the floor of the House, the House passed this act of 1878. On the floor of the House and in the Senate an effort was made to defeat that provision by offering substitutes for it. The question was fought out, and then, when it was finally settled, Members who opposed paying 50 per cent tried to reduce the amount to 25 per cent. That amendment was defeated. Then they tried to reduce it to 40 per cent, and that amendment was defeated, whereupon the original proposition, as I read it to the Senate a few moments ago, was agreed to, fixing the amount at 50 per cent.

It must be remembered that since 1878 Congress has assumed control of all the streets, the alleys, and the improvements in the District. A man can not erect a building here without complying with the laws of Congress. Congress has absolute control; Congress has made these debts without consulting the District. The debts have been made upon the assumption that the General Government would pay 50 per cent of that indebtedness. I say this without fear of successful contradiction.

Since 1878 down to this very day every appropriation providing for the expenses of the District has provided for the payment of the interest and the proportionate share of the sinking fund on a 50 per cent basis. That being true, what is the use of again submitting this question to the courts? What is the use of again raising a doubt when we have the law pledging us to 50 per cent and when Congress has recognized it from that day to this?

There was one item, as to which there was some question raised, as to whether it applied to the interest and also to a part of the sinking fund. If you will read the estimates of the Treasury Department, upon which the appropriation was based, you will find that it not only included interest but a proportionate share of the sinking fund.

One other thing. It is shown by official reports that from 1877 and 1878 the citizens up to 1878 had expended in this District $65,569,371, while the Government had only expended $27,311,000; in other words, the citizens had expended $38,357,421 more than the General Government had expended. Here we are, in the face of that, fighting over the interest on the sinking fund of $12,000,000.

Senators, Washington is the capital of the United States. It has been described as the Federal city. It is a wonderful city; and the Government has taken charge of it. More than that, in the decision of the Supreme Court, in which this question was involved, the act of 1878 was passed upon. That act of 1878 was construed by the Supreme Court—the opinion being delivered by one of the ablest judges that ever served in the capacity of Associate Justice—as being the organic act, and not only as the organic act, but as the very constitution of the District of Columbia.

So far as I am concerned, as one member of the committee, I believe that this question has been settled by every Congress from 1874 to the present time, as certainly it has been since 1878. It is the duty of Congress to help pay the expenses of improving the streets of this city, which belongs to the General Government. This is the capital of the United States, the capital of the whole country, the capital of the greatest Nation in the world, and I believe the people of the country would like to see Congress liberal enough in its appropriations to make this the most beautiful capital in the world.

Mr. SMITH of Georgia. Mr. President, the Senator from Kansas has passed from a discussion of the law of the case into a charming political speech, full of patriotism and devotion to the beautiful city of Washington. I appreciate all that he says about the city, but I really can not find from that part of his speech any aid to enable me to construe the statutes that are brought to the attention of the Senate.

There was a funded debt prior to 1874. It is referred to occasionally in the statutes. The 3.65 bonds are not referred to as "the funded debt"; the 3.65 bonds had not been disposed of in 1874, and "the funded debt" referred to in the act of 1874 applied to an entirely different matter. So much for the Senator's quotation from the act of 1874 with reference to the funded debt.

Immediately after the act of 1874 we find the 3.65 bonds referred to, and referred to not as a funded debt but always as the 3.65 bonds. Let us see how Congress treated them in 1876. I shall not read this provision from manuscript or undertake to repeat it from memory, but I quote it from page 106 of the United States Statutes at Large, volume 19:

That the Secretary of the Treasury shall reserve, of any of the revenues of the District of Columbia not required for the actual current expenses of schools, the police, and the fire department, a sum sufficient to meet the interest accruing on the 3.65 bonds of the District during the fiscal year beginning July 1, 1876, and apply the same to that purpose; and in case there shall not be a sufficient sum of said revenues in the Treasury of the United States at such time as said interest may be due, then the Secretary of the Treasury is authorized and directed to advance, from any money in the Treasury not otherwise appropriated, a sum sufficient to pay said interest, and the same shall be reimbursed to the Treasury of the United States from time to time as said revenues may be paid into said Treasury until the full amount shall have been refunded.

There is the language of the act of 1876 with reference to the 3.65 bonds, so clear and so simple that nobody can doubt it. The act of 1874 authorized the three-sixty-fives. They had not been issued, and they were not then part of the funded debt of the District referred to elsewhere in the act of 1874. They were bonds to be issued in the future, guaranteed by the Government, and referred to as "the three-sixty-fives"; and the act of 1874 expressly declared that the entire interest and principal of the three-sixty-fives should be paid by taxes levied on the property in the District of Columbia, and immediately thereafter the act of 1876 provided that when the National Government paid any of the interest or principal of these bonds it should be charged to the District.

Mr. CURTIS. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER (Mr. SMITH of Michigan in the chair). Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Yes.

Mr. CURTIS. May I call the Senator's attention to the act of 1879, which I misplaced and did not read? That act refers not only to the interest on the sinking fund, but defines the position of Congress on that question.

Mr. SMITH of Georgia. On what page?

Mr. CURTIS. I have not the reference to the page, but it is in the sundry civil appropriation act approved March 3, 1879, and is as follows:

SEC. 3. That the sum of $1,632,098.78 be, and is hereby, appropriated for the purpose of paying one-half of the estimated expenses of the government of the District of Columbia for the fiscal year ending June 30, 1880, namely:

* * * * * * *

For the interest and sinking fund on the funded debt, $1,155,583.55.

And there is hereby appropriated, out of the proportional sum which the United States may contribute toward the expenses of the District of Columbia, in pursuance of the act of Congress, approved June 11, 1878, for the fiscal year ending June 30, 1879, and annually thereafter, such sums as will, with the interest thereon at the rate of 3.65 per cent per annum, be sufficient to pay the principal of the 3.65 bonds of the District of Columbia issued under the act of Congress approved June 20, 1874, at maturity.

Mr. SMITH of Georgia. The distinction is right there drawn between the funded indebtedness and the three-sixty-fives. The half-and-half doctrine did apply to the funded debt, but the three-sixty-fives were to be paid out of the Treasury and charged against the District, and the act of 1878 again draws the distinction. The Senator from Kansas confused in his references to the statutes the funded indebtedness which existed prior to 1874 and the three-sixty-fives. They were referred to in the various acts in different language. The three-sixty-fives are always referred to as "the three-sixty-fives," and the funded indebtedness is referred to as "the funded indebtedness." The Government may have assumed one-half of the old funded indebtedness prior to 1874; but the three-sixty-fives which were to take up the indebtedness still outstanding and not funded at all in 1874, were to be guaranteed by the Government, and the act of 1874 expressly provided that they were to be paid for by taxes levied upon the property in the District.

Now, when we come to the act of 1878, that portion of the responsibilities of the District for which the National Government undertook to meet by an expenditure of one-half did not include the 3.65 bonds or the interest thereon. You will find the provision on page 104 of volume 20 of the United States Statutes at Large. As to the character and responsibilities of the District for which the National Government undertook to pay one-half, you will find that in no sense was the principal or the interest of the 3.65 bonds included. On the contrary, you will find that that act provides that as to all of those bonds the total shall be paid out of the Government's proportionate half, because it was to be a charge against the District exclusively, and when the Government paid them it was to constitute a part of its half of that contribution which the Government agreed to meet on a different class of liabilities of the District.

I do not claim to have read all of the statutes, but I do claim that the reasons presented by the Senator from Kansas do not sustain the proposition that the Government is to pay the three-sixty-fives; and when he says they were practically Government bonds the position is not justified by the facts. They were in no sense Government bonds.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. I yield.

Mr. CURTIS. Does the Senator contend that when the Government pledges its faith and arranges for the appropriation to meet those obligations they are not as good as Government obligations or bonds?

Mr. SMITH of Georgia. Oh, there is a vast difference between a thing being as good as something else and being the something else itself. What I am insisting is that while they were as good as Government bonds they were not Government bonds. If I owe a hundred thousand dollars and the Senator from Kansas guarantees my debt, it might make the hundred thousand dollar note perfectly good, but it would not make it the note of the Senator from Kansas; it would be my obligation; and if he paid it for me, he would come on me to pay it back to him. When the Senator calls the three-sixty-fives "Government bonds" he forgets the distinction between guaranteeing an obligation for which you are in no sense primarily liable, simply to help out the party for whom you make the guaranty, and making the obligation yourself; and that is the condition of these bonds. The whole argument the Senator built up was upon statutes referring to the funded indebtedness, which he himself shows by his quotation from the act of 1879 is entirely different from the three-sixty-fives. The act of 1879 still carries the distinction between the funded indebtedness of the District, of which the Government agreed to pay one-half by the act of 1874, and the three-sixty-fives, of which the Government did not undertake to pay half.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Michigan?

Mr. SMITH of Georgia. Certainly.

Mr. TOWNSEND. Can the Senator inform the Senate how the interest on these bonds has been met since the bonds were issued, or rather since 1878?

Mr. SMITH of Georgia. I can not.

Mr. TOWNSEND. The Senator does not know whether or not they have been treated as an obligation, one-half of which was to be paid by the United States?

Mr. SMITH of Georgia. I do not.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Certainly.

Mr. CURTIS. If I may be permitted to interrupt, I will say they have been appropriated for every year and treated as a joint obligation. A contest was made over the bill in the House which raised the question of the Government's responsibility for one-half of the interest. Mr. Blackburn contended that the Government was not responsible for the principal, but admitted that it was responsible for one-half the interest.

Mr. SMITH of Georgia. The Government was responsible for both the principal and the interest by the act of 1874, and all the confusion has grown out of that fact. If the Government has paid at any time this interest without charging it up to the District, it has been simply an improper payment, because the original transaction itself shows that the liabilities arose prior to 1874, and they were liabilities for which the Government was in no sense responsible. Besides, the act in which the Government guaranteed these notes expressly protected the Government from liability by providing that the money was to be raised by taxes on the property in the District. The act of 1876 following it, provided that the Secretary of the Treasury should pay the interest whenever it was necessary; but the Secretary of the Treasury, when he paid it, must charge it up against the District. The Government may have paid it since, but, if so, unless you show me some act of Congress changing the provision of the act of 1876, it ought to have been charged up against the District when the Government paid it. It would have been a gift at any time it was paid, for there was no liability. The act which guaranteed the bonds did not assume liability, except to the holders of the bonds, and, following the act, the Secretary of the Treasury was expressly directed when he made a payment to charge it up to the District.

Mr. President, all I ask is this: The subject came up for discussion in the other House and they concluded that they could

not decide it. Therefore, what did they do? They simply provided that the interest should be paid, without deciding it now, leaving it open for future consideration. I admit that it would be better to decide it; but are we in a position, judicially, to decide it? There may be something yet that can be found that will lead me to believe hereafter that, for some reason I do not now know, the Government ought to pay half; but, as I read the statutes, with my limited investigation suggested by the debate in the other House, I think the Government is liable.

This is the provision the House sent us:

For interest and sinking fund on the funded debt, $975,408, which sum shall be paid out of funds and accounted for in accordance with the acts of Congress in relation thereto.

It makes the appropriation, but it does not undertake to decide how the accounting shall take place in the future. If I am obliged to decide now I should say, with the light before me, that it should be charged to the District, and that the provision reported by the Senate committee is wrong.

The Senator from Kansas presented a line of argument to the contrary, which was based largely upon the proposition that the act of 1874 referred to the funded indebtedness and did not take into consideration the fact that the funded indebtedness referred to in all these acts was not the three-sixty-fives, but another class of indebtedness, and that all these acts refer to the funded indebtedness in one way and the three-sixty-fives in another. He based his entire argument upon the supposition that that reference to the funded debt in the act of 1874 applied to the three-sixty-fives, which were then being provided for but which had not been issued and which are not treated in any of the acts as a part of the funded indebtedness.

Mr. WORKS. Mr. President, I was anxious in the beginning to be informed as to the legal liability of the National Government with respect to this claim, and also to determine what the nature of that obligation was, whether as a principal debtor or guarantor. Without intending to reflect upon the argument made either by the Senator from Georgia or that made by the Senator from Kansas, I am not much better informed now than I was in the beginning; and that seems to have been the condition respecting this matter from the time this obligation was in some sense assumed by the National Government down to the present time. But I am perfectly satisfied, Mr. President, that, as a matter of justice, the Government should pay one-half of this indebtedness. About that I have no doubt whatever.

In addition to that, I am satisfied that, if an estoppel could run against the National Government, it should be estopped now from denying its obligation to pay one-half the indebtedness. Acting upon that theory, I shall support this amendment; but it does seem to me, Mr. President, that Congress should, once for all, in some way settle this question as to the liability of the Government, and the sooner that is done the better. If it is necessary that an act of Congress be passed acknowledging the obligation of the Government to pay any portion of this debt, that should be definitely fixed by Congress and the matter settled from this time on.

Mr. CURTIS. Mr. President, may I interrupt the Senator?

The PRESIDENT pro tempore. Does the Senator from California yield to the Senator from Kansas?

Mr. WORKS. I yield.

Mr. CURTIS. I thought section 7 answered the Senator's question. I should like to read this extract from the act of 1874:

SEC. 7. That the sinking-fund commissioners of said District are hereby continued; and it shall be the duty of said sinking-fund commissioners to cause bonds of the District of Columbia to be prepared, in sums of $50 and $500, bearing date August 1, 1874, payable 50 years after date, bearing interest at the rate of 3.65 per cent per annum, payable semiannually, to be signed by the secretary and the treasurer of said sinking-fund commissioners and countersigned by the comptroller of said District, and sealed as the board may direct.

Showing clearly that these bonds were issued by the sinking-fund commissioners.

Mr. WORKS. On the other hand, Mr. President, it is contended by the Senator from Georgia, and I think with some force, that the statute of 1874 only went so far as to make the Government a guarantor for the payment of this debt and obligating itself to pay, the amount to be repaid by the District. That uncertainty ought in my judgment in some way by direct act of Congress to be cleared up.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee. [Putting the question.] By the sound, the ayes appear to have it.

Mr. SMITH of Georgia. I ask for a division.

The question being put, there were, on a division—ayes 15, noes 10.

Mr. SMITH of Georgia. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. SHEPPARD (when Mr. CULBERSON'S name was called). I desire to announce that my colleague [Mr. CULBERSON] is absent on business of the Senate, and is paired with the Senator from Delaware [Mr. DU PONT].

Mr. SMITH of Michigan (when his name was called). I am paired with the junior Senator from Missouri [Mr. REED]. I transfer that pair to the senior Senator from Connecticut [Mr. BRANDEGEE] and vote. I vote "yea."

The roll call was concluded.

Mr. NELSON (after having voted in the affirmative). I have an informal pair with the senior Senator from Georgia [Mr. BACON], and I therefore desire to withdraw my vote.

Mr. CLARK of Wyoming (after having voted in the affirmative). In the absence of the senior Senator from Missouri [Mr. STONE], with whom I have a general pair, I withdraw my vote.

Mr. DILLINGHAM (after having voted in the affirmative). I wish to inquire whether the senior Senator from South Carolina [Mr. TILLMAN] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. DILLINGHAM. I have a general pair with that Senator. I transfer it to the senior Senator from Nebraska [Mr. BROWN] and vote. I vote "yea."

Mr. BOURNE (after having voted in the affirmative). In the absence of the Senator from Alabama [Mr. BANKHEAD], with whom I have a temporary pair, I withdraw my vote.

Mr. KERN. In the absence of the Senator from Kentucky [Mr. BRADLEY], I transfer my pair with him to the Senator from Oklahoma [Mr. OWEN] and will vote. I vote "nay."

The result was announced—yeas 40, nays 15, as follows:

YEAS—40.

Burnham	Fall	Martin, Va.	Smith, Md.
Burton	Fletcher	Martine, N. J.	Smith, Mich.
Catron	Foster	O'Gorman	Smoot
Chamberlain	Gallinger	Oliver	Stephenson
Clapp	Gamble	Page	Thomas
Crane	Jackson	Penrose	Thornton
Cullom	Jones	Perkins	Townsend
Curtis	Lippitt	Pomerene	Wetmore
Dillingham	Lodge	Richardson	Williams
du Pont	McLean	Root	Works

NAYS—15.

Bristow	Johnston, Ala.	Myers	Smith, Ga.
Chilton	Kenyon	Overman	Smith, S. C.
Gore	Kern	Sheppard	Webb.
Gronna	Lea	Smith, Ariz.	

NOT VOTING—40.

Ashurst	Bryan	Johnson, Me.	Poindexter
Bacon	Clark, Wyo.	Kavanaugh	Reed
Bankhead	Clarke, Ark.	La Follette	Shively
Borah	Crawford	McCumber	Simmons
Bourne	Culberson	Nelson	Stone
Bradley	Cummins	Newlands	Sutherland
Brady	Dixon	Owen	Swanson
Brandegee	Gardner	Paynter	Tillman
Briggs	Guggenheim	Percy	Warren
Brown	Hitchcock	Pittman	Watson

So the amendment of the committee was agreed to.

The next committee amendment passed over was, on page 88, after line 12, to insert:

The reimbursement required to be made to the United States by the District of Columbia under the provisions of the sundry civil appropriation act approved August 24, 1912, on account of deficiencies in payments for the care and maintenance of the insane of said District during the fiscal years 1881 to 1911, inclusive, is hereby fixed at $719,536.09.

The amendment was agreed to.

The next committee amendment passed over was, on page 93, after line 14, to insert:

In connection with said reclamation and development of the Anacostia River and flats from the Anacostia Bridge to the District line, the Secretary of War is authorized to acquire by purchase or by condemnation, for highway and park purposes, the fee simple and absolute title to the land along the Anacostia River on both sides thereof between the high-water lines of said river, as determined by the United States Coast and Geodetic Survey, and lines following approximately the contour of 10 feet elevation on each side of said river above mean low water at the United States Navy Yard, from the Anacostia Bridge to the northeast boundary line between the District of Columbia and Maryland; and also all land below the high-water lines on each side of said Anacostia River between the limits named that is not now owned by the United States; and the appropriation herein made for the reclamation and development of the Anacostia River and flats from the Anacostia Bridge northeast to the District line, and all appropriations heretofore made for said purpose are hereby made available for the purchase or condemnation of said land and for the payment of amounts awarded as damages for said land and the costs and expenses of the condemnation proceedings in the event that it is necessary to institute such condemnation proceedings: *Provided*, That if said land or any part thereof can not be acquired by purchase from the owners thereof at a price satisfactory to the Secretary of War, the Commissioners of the District of Columbia, upon the request of the Secretary of War, shall institute condemnation proceedings to acquire such land under the provisions of chapter 15 of the Code of Law for the District of Columbia.

Mr. BURTON. I should like to ask a few questions in regard to that. Has any estimate been made as to the probable cost of these lands?

Mr. CURTIS. Mr. President, this item was put in the bill at the request of the District Commissioners, to carry out the provisions of the bill on page 93, from line 4 to line 14, where an appropriation of $100,000 is made. I understand that in order to carry out that provision the commissioners must have authority to condemn this land. What it will cost, of course, I can not tell, but I judge it will come within the $100,000.

Mr. BURTON. There is a very large area to be acquired under this provision. Is it not known that its cost would very much exceed $100,000?

Mr. CURTIS. I could not say as to that. The item put in was stricken out in the House on a point of order, as I understand, and it was stated to the committee that unless the latter part was to put in it would be useless to leave in the former part.

Mr. BURTON. Does not this provision commit the Government, in conjunction with the District of Columbia, to acquire all that land?

Mr. CURTIS. I think so.

Mr. BURTON. It goes without saying that $100,000 would not by any means pay for the whole of it.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

The next committee amendment passed over was, on page 94, after line 22, to insert:

Under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, the Commissioners of the District of Columbia are authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land that may be necessary for highway and park purposes to preserve the Klingle Road Valley, comprising approximately 26½ acres, as shown on plans filed in the office of the Engineer Commissioner of the District of Columbia: *Provided*, That the tract of land hereinafter described, containing about 2 acres, shall be excepted from condemnation for such park, viz, a detached portion of said described park lying at the extreme eastern end thereof, east of the east line of a proposed street 90 feet wide, said described land being land now assessed in the name of Thomas Armat.

There is appropriated an amount sufficient to pay the necessary costs and expenses of said condemnation proceedings taken pursuant hereto and for the payment of amounts awarded as damages: *Provided*, That of the amount found to be due and awarded by the jury in said condemnation proceedings as damages for and in respect of the land to be taken in the condemnation proceedings herein authorized, plus the costs and expenses of the proceedings, not less than one-third shall be assessed by the jury as benefits against those lots, pieces, or parcels of land situated, lying, or being within an assessment area hereby created, which assessment area shall embrace all of the area lying within the distance of one-fourth of a mile from any point of said park: *Provided further*, That all land owned by the United States or the District of Columbia lying within said assessment area shall be exempt from assessment, which benefits, when collected, shall be covered into the Treasury of the United States to the credit of the revenues of the District of Columbia and the United States in equal parts.

Mr. BRISTOW. Mr. President, to save time I will make a point of order against that amendment.

The PRESIDENT pro tempore. Upon what ground does the Senator make the point of order?

Mr. BRISTOW. That it is general legislation.

Mr. CURTIS. Then, if that is done, there ought to be a further amendment, to strike out lines 20, 21, and 22.

Mr. BRISTOW. If the committee suggests that——

Mr. CURTIS. If the point of order is sustained, I move to strike out lines 20, 21, and 22.

The PRESIDENT pro tempore. The Chair sustains the point of order. The Senator from Kansas offers an amendment, which will be stated.

The SECRETARY. On page 94, it is proposed to strike out lines 20, 21, and 22 in the following words:

KLINGLE VALLEY PARK.

For grading and improving Klingle Road between Woodley Road and Rock Creek, $12,000.

The amendment was agreed to.

The next committee amendment passed over was, on page 96, after line 18, to insert:

Under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, the Commissioners of the District of Columbia are hereby authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land along and adjacent to the Piney Branch Valley and between Sixteenth Street and Fourteenth Street NW., and the land adjacent to the Municipal Hospital grounds between Fourteenth Street and Georgia Avenue NW., for park purposes, comprising in all approximately 42 acres of land, as shown on plans filed in the office of the Engineer Commissioner of the District of Columbia.

There is appropriated an amount sufficient to pay the necessary costs and expenses of said condemnation proceedings taken pursuant hereto and for the payment of the amounts awarded as damages: *Provided*, That of the amount found to be due and awarded by the jury in said proceedings as damages for and in respect of the land to be taken in the condemnation proceedings herein authorized, plus the costs and expenses of the proceedings, not less than one-third shall be assessed by the jury as benefits against those lots, pieces, or parcels of land situate, lying, or being within an assessment area hereby created, which assessment area shall embrace all of the area lying within the distance of one-fourth of a mile from any point of said park: *Provided further*, That all land owned by the United States or the District of Columbia lying within said assessment area shall be exempt from assessment, which benefits, when collected, shall be covered into the Treasury of the United States to the credit of the revenues of the District of Columbia and the United States in equal parts: *Provided further*, That the Commissioners of the District of Columbia are authorized to abandon for highway purposes any existing streets or parts of streets within the territory before described except Fourteenth Street: *Provided further*, That the Commissioners of the District of Columbia are authorized to prepare a new highway plan for that portion of the District of Columbia lying west of Fourteenth Street, south of Taylor Street, east of Rock Creek Park, and north of Newton Street NW., under the provisions contained in the act of Congress approved March 2, 1893, entitled "An act to provide a permanent system of highways in that part of the District of Columbia lying outside of cities," and an amendment to said act approved June 28, 1898: *Provided*, That section 4 of said amendment shall not apply to the territory above described: *Provided further*, That under this authority Mount Pleasant Street may be extended with a minimum width of 45 feet; that Perry Place may be extended with a minimum width of 50 feet; and that Fourteenth Street Road may be established with a minimum width of 50 feet; that upon the completion and recording of said new highway plan it shall take the place of and stand for any previous plan for said portion of said District of Columbia.

Mr. BRISTOW. Mr. President, to save time I will make the same point of order on this amendment that I did on the other. As I stated yesterday, I do not think it is at all desirable to enlarge parks that now contain from 1,700 to 1,800 acres of forest by taking in a few acres on the side where people do not live in any great numbers. It is purely general legislation.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. CURTIS. Mr. President, in view of the sustaining of the point of order, I move to strike out lines 8 to 18, inclusive.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 96 it is proposed to strike out lines 8 to 18, inclusive, in the following words:

PINEY BRANCH VALLEY PARK.

For grading and improving a low, level road from Beach Drive, in Rock Creek Park, running along the Piney Branch Valley to Sixteenth Street and beyond Sixteenth Street so far as it may be necessary to return to the elevation of Sixteenth Street south of the bridge over Piney Branch with a suitable grade, $24,000.

For grading and improving a road from a point near the bridge over Piney Branch at Sixteenth Street, in the road above described, running along the Piney Branch Valley to Fourteenth Street, $21,000.

The amendment was agreed to.

The next committee amendment passed over was, on page 106, to strike out lines 13, 14, 15, and 16 in the following words:

INTEREST AND SINKING FUND.

For interest and sinking fund on the funded debt, $975,408, which sum shall be paid out of funds and accounted for in accordance with the acts of Congress in relation thereto.

Mr. CURTIS. That language naturally goes out as the result of the vote on the amendment on page 74.

The amendment was agreed to.

The PRESIDENT pro tempore. The reading of amendments passed over has been concluded. The bill is still in Committee of the Whole and open to amendment.

Mr. KERN. I offer an amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 58, after line 16, it is proposed to insert:

For the purchase of ground north of Rhode Island Avenue on which to erect an additional school building for the Woodridge and Langdon neighborhood, $12,000.

Mr. KERN. That is recommended in the estimates, Mr. President.

The amendment was agreed to.

Mr. POMERENE. Mr. President, on yesterday I presented an amendment to the bill, to go in on page 106, which was, if I may explain to Senators who were not here at that time, to attach to this measure the public utilities bill just as it unanimously passed the Senate. The Senator from Utah [Mr. SMOOT] at that time made a point of order. I hope the Senator will withdraw it.

Mr. SMOOT. Mr. President, since I made the point of order upon the amendment offered by the Senator from Ohio I have had a good many Senators plead with me to withdraw the point of order. I stated last evening that I had voted for the same measure in the Senate. I am heartily in accord with it. There is no question that a point of order made against it would defeat the amendment. It is of such vital importance to the District, however, that I have come to the conclusion that I will withdraw my point of order and allow it to go on the bill, if no other Senator desires to make an objection.

I do this with a great deal of hesitancy, because I am led to believe that a great many amendments will be offered against which we shall be compelled to make points of order. As I stated, however, this matter is of vital importance, and as it seems to be almost the universal sentiment of the Senators present that it ought to go into the bill I have made up my mind to withdraw the point of order I made.

The PRESIDENT pro tempore. The point of order is withdrawn. The question is upon the amendment submitted by the Senator from Ohio.

Mr. CLARKE of Arkansas. Let us have it reported, in order that we may see what it is.

Mr. OLIVER. In order to save the time that will be required to read the amendment——

Mr. CLARKE of Arkansas. I withdraw the request. I have been informed as to the nature of the amendment.

Mr. OLIVER. Mr. President, I am compelled to renew the point of order. As a member of the District Committee, I voted to report this measure. I voted for it when it passed the Senate. It is a measure of extreme importance, and the Senate has done its full duty in passing it. I think it is up to the House, now, to adopt it as a piece of separate legislation. I do not think such far-reaching legislation as this should be attached to appropriation bills. I therefore feel compelled to raise the point of order against it.

Mr. SMOOT. Before the Senator does that, let me say just a word. I understand the bill as it passed the Senate, embodying the same ideas, has been in the House, as suggested by me the last time the matter was spoken of by the Senator, for a considerable length of time. I am also informed that the committee never has considered the bill and has scarcely held a meeting. The bill that we now have before us is one that was reported from the Appropriations Committee of the House and not from the District Committee of the House.

Mr. OLIVER. Mr. President, that is all the more reason why the bill is entitled to consideration by a committee of the House. It has been thoroughly considered by the Senate, it has been passed by the Senate, and the appropriate committee of the House ought to consider and pass it. I feel like insisting on the point of order.

Mr. POMERENE. Mr. President, I hope the Senator will reconsider his determination. If this were a matter of new legislation that had not been fully considered in committee and in the Senate, I should not insist upon it for one minute. But I think every Member of this body who has given any attention to District matters recently must appreciate the fact that there is no legislation that is so greatly needed as is this particular bill.

I realize that this amendment is not in compliance with the rules of the Senate, if the point of order is insisted upon. But are we to stick strictly to technical points of order, and thereby fail to enact vital legislation? Let the responsibility lie elsewhere, if it may; but let us not kill legislation of this kind by a technical objection.

With all due respect to the Senator, I ask that this point of order may be submitted to the Senate for its judgment.

Mr. WORKS. Mr. President, it may be that, technically speaking, this amendment is subject to a point of order; but to my mind it is one of the most important pieces of legislation that has come before the Senate for the last two sessions. The chairman of the District Committee gave weeks of time to an effort to perfect a bill that would meet the necessities of the occasion. The bill was reported to the Senate and was thoroughly discussed here. Various amendments were proposed at that time, and in order to perfect the bill the chairman of the committee moved that it be again referred to the District Committee. It was there considered with a great deal of care, and I think is about as nearly a perfect bill as could be made under the circumstances. It passed the Senate almost unanimously; and the manner in which its passage has been prevented ought to lead us, if it is possible to do so, to waive the point of order and see that it becomes a law. I think it is exceedingly important; and therefore I hope the matter may be submitted to the Senate in order that the sense of the Senate may be taken upon it.

Mr. OLIVER. Mr. President, it is very hard for me to withstand such appeals as have been made in behalf of this amendment. I have only to call the attention of Senators to the fact that the Constitution prescribes that there shall be three parties to legislation—the Senate, the House, and the President. To attach general legislation to appropriation bills, which must be approved as a whole or not at all, simply deprives two of the constituent parties of a voice in the making of such legislation. Therefore I am opposed to putting general legislation in any appropriation bill except in case of extreme necessity.

The extreme necessity does not exist in this case, for the simple reason that in ample time the Senate adopted this measure and sent it to the House, and placed upon that body the responsibility of considering and acting upon it. Of course the House has a perfect right to take its time; but since it has not passed the bill, the responsibility is upon it.

As I said, I voted for this legislation when it passed the Senate. I took part in its consideration in the District Committee, of which I was then a member. I am in favor of it. I object to its insertion here, however, as a matter of principle, simply because I think the legislation, if enacted, should be enacted by the joint action of both Houses of Congress and the President, and that each one of them should have a chance to consider and pass upon it. Therefore I am compelled to insist upon my point of order.

The PRESIDENT pro tempore. Under clause 2 of Rule XX—

The Presiding Officer may submit any question of order for the decision of the Senate.

In response to the appeals that have been made to the Chair to submit this question to the Senate, the Chair avails himself of the privilege of that rule and submits the question to the Senate, the question being, Is the amendment in order on the bill that is now under consideration?

Mr. OLIVER, Mr. BRISTOW, and Mr. LA FOLLETTE addressed the Chair.

Mr. LA FOLLETTE. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Pennsylvania rose first.

Mr. OLIVER. I wish to say, Mr. President, that if the Chair, instead of taking the responsibility himself, intends to submit the question to the Senate, I have no doubt in the world what the result will be when it is submitted. Therefore, in order to save the time of the Senate, which is very valuable now, I withdraw the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn.

Mr. BRISTOW. I desire to say what I rose to say, and that is that I intend to vote for this as an amendment. I am in favor of this legislation. It is not in order, however, if the point of order is made; and if it is submitted to the Senate I shall not vote that it is in order when I know it is not.

The PRESIDENT pro tempore. The point of order is withdrawn. The question is upon the amendment offered by the Senator from Ohio [Mr. POMERENE].

The amendment was agreed to, as follows:

PUBLIC UTILITIES COMMISSION.

SEC. 8. That for the purpose of this act the term "commission" when used herein shall mean the public utilities commission of the District of Columbia created by this act.

The term "commissioner" when used in this act shall mean one of the members of such commission.

The term "public utility" as used in this act shall mean and embrace every street railroad, street railroad corporation, common carrier, gas plant, gas corporation, electric plant, electrical corporation, water-power company, telephone corporation, telephone line, telegraph corporation, telegraph line, and pipe-line company.

The term "service" is used in this act in its broadest and most inclusive sense.

The term "corporation" when used in this act includes a corporation, company, association, and joint-stock company or association.

The word "person" when used in this act includes an individual and a firm or copartnership.

The term "joint rates" when used in this act with reference to street railways shall be taken to mean rates between unrelated lines now in effect under existing law or under contract, or which may hereafter be specifically authorized by law.

The term "extension or extensions" when used in this act shall include the reasonable extension of the service and facilities of every street railroad, street railroad corporation, gas plant, gas corporation, electric plant, electrical corporation, telephone corporation, telephone line, telegraph line, and telegraph corporation as the same are defined in this act.

The term "street railroad" when used in this act includes every such railroad, whether wholly or partly in the District of Columbia, by whatsoever power operated, or any extension or extensions, branch or branches thereof, for public use in the conveyance of persons or property for compensation, and includes all equipment, construction, maintenance, repairs, switches, spurs, tracks, terminals, terminal facilities of every kind, trackage, joint or reciprocal trackage, transfers of passengers between street railways having connecting lines and street railways having independent lines, subways, tunnels, and stations, used, operated, or owned by or in connection with any such street railroad, and all the property of the same used in the conduct of its business.

The term "street railroad corporation" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, and person doing business in the District of Columbia, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, controlling, or managing any street railroad or any cars or other equipment used thereon or in connection therewith.

The term "common carrier" when used in this act includes express companies and every corporation, street railroad corporation, company, association, joint-stock company or association, partnership, and person, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, controlling, or managing any agency or agencies for public use for the conveyance of persons or property within the District of Columbia for hire. Steam railroads, the Washington Terminal Co., and the Norfolk & Washington Steamboat Co., and all companies engaged in interstate traffic upon the Potomac River and Chesa-

peake Bay are excluded from the operation of this act, and are not included in the term "common carrier."

The term "gas plant" when used in this act includes all buildings, easements, real estate, mains, pipes, conduits, service pipes, services, pipe galleries, meters, boilers, water-gas sets, retorts, fixtures, condensers, scrubbers, purifiers, holders, materials, apparatus, personal property, and franchises, and property of every kind used in the conduct of the business operated, owned, controlled, used or to be used for or in connection with or to facilitate the manufacture, distribution, sale, or furnishing of gas (natural or manufactured) for light, heat, or power.

The term "gas corporation" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, or person manufacturing, making, distributing, or selling gas for light, heat, or power, or for any public use whatsoever in the District of Columbia, their lessees, trustees, or receivers, appointed by any court whatsoever, and in said District owning, operating, controlling, or managing any gas plant, except where the gas is made or produced and distributed by the maker on or through private property solely for its own use or the use of its tenants and not for sale to or for the use of others.

The term "electric plant" when used in this act includes all engines, boilers, dynamos, generators, storage batteries, converters, motors, transformers, cables, wires, poles, lamps, meters, easements, real estate, fixtures, and personal property, materials, apparatus, and devices of every kind operated, owned, used or to be used for or in connection with or to facilitate the generation, transmission, distribution, sale, or furnishing of electricity for light, heat, or power, and any conduits, ducts, or other devices, materials, apparatus, or property for containing, holding, or carrying electrical conductors used or to be used wholly or in part for the transmission of electricity for light, heat, or power, except where electricity is made, generated, produced, or transmitted by a private person or private corporation on or through private property solely for its own use or the use of tenants of its building and not for sale to or for the use of others.

The term "electrical corporation" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, or person doing business in the District of Columbia, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, controlling, or managing any electric plant, including any water plant, or water property, or waterfalls, or dam, or water-power stations, except where electricity is made, generated, produced, or transmitted by a private person or private corporation on or through private property solely for its own use or the use of tenants of its building and not for sale to or for the use of others.

The term "water-power company" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, and person, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, managing, or controlling any plant or property, dam or water supply, canal, or power station for the development of water power for the generation of electrical current or other power or for the distribution or sale of such electrical current or other power.

The term "telephone corporation" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, and persons, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, controlling, or managing any plant, wires, poles for the reception, transmission, or communication of messages by telephone, telephonic apparatus or instruments, or any telephone line or part of telephone line, used in the conduct of the business of affording telephonic communication for hire, or which licenses, lets, or permits telephonic communication for hire.

The term "telephone line" when used in this act includes conduits, ducts, poles, wires, cables, cross arms, receivers, transmitters, instruments, machines and appliances, and all devices, real estate, franchises, easements, apparatus, fixtures, property, appurtenances, and routes used, operated, controlled, or owned by any telephone corporation to facilitate the business of affording telephonic communication for hire, or which licenses, lets, or permits telephonic communication.

The term "telegraph corporation" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, and person, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, controlling, or managing any plant, wires, poles, or property for the purposes of communication, or of transmitting or receiving messages by telegraph, or by any telegraphic apparatus or instrument, or any telegraph line or part of telegraph line used in the conduct of the business of affording for hire communication by telegraph, or which licenses, lets, or permits telegraphic communication for hire.

The term "telegraph line" when used in this act includes conduits, ducts, poles, wires, cables, cross arms, instruments, machinery, appliances, and all devices, real estate, franchises, easements, apparatus, fixtures, property, and routes used, operated, controlled, or owned by any telegraph corporation to facilitate the business of affording communication by telegraph for hire.

The term "pipe-line company" when used in this act includes every corporation, company, association, joint-stock company or association, partnership, or person, their lessees, trustees, or receivers, appointed by any court whatsoever, owning, operating, managing, or controlling the supply of any liquid, steam, or air through pipes or tubing to consumers for use or for lighting, heating, or cooling purposes, or for power.

This act shall apply to the transportation of passengers, freight, or property from one point to another within the District of Columbia, and any common carrier performing such service; and this act shall be so applicable and be so construed as to be free from conflict with those provisions of the Constitution of the United States and the laws in pursuance thereof relating to interstate commerce.

Corporations formed to acquire property or to transact business which would be subject to the provisions of this act, and corporations possessing franchises for any of the purposes contemplated by this act shall be deemed to be subject to the provisions of this act, although no property may have been acquired, business transacted, or franchises exercised.

SEC. 2. That every public utility doing business within the District of Columbia is required to furnish service and facilities reasonably safe and adequate and in all respects just and reasonable. The charge made by any such public utility for any facility or services furnished or rendered, or to be furnished or rendered, shall be reasonable, just, and nondiscriminatory. Every unjust or unreasonable or discriminatory charge for such facility or service is prohibited and is hereby declared unlawful. Every public utility is hereby required to obey the lawful orders of the commission created by this act.

SEC. 3. That every public utility doing business in the District of Columbia having tracks, conduits, subways, poles, wires, switchboards, exchanges, works, or other equipment shall, for a reasonable compensation, permit the use of the same by any other public utility whenever public convenience and necessity require such use, and such use will not result in irreparable injury to the owners or other users of such equipment; nor in any substantial detriment to the service to be rendered by such owners or other users. In case of failure to agree upon such use, or the conditions or compensation for such use, any public utility or any person, firm, copartnership, association, or corporation interested may apply to the commission, and if after investigation the commission shall ascertain that public convenience and necessity require such use and that it would not result in irreparable injury to the owners or other users of such equipment nor in any substantial detriment to the service to be rendered by such owners or other users of such equipment, it shall by order direct that such use be permitted and prescribe conditions and compensation for such joint use. Such use so ordered shall be permitted and such conditions and compensation so prescribed shall be the lawful conditions and compensation to be observed, followed, and paid, subject to recourse to the courts upon the complaint of any interested party, as hereinafter provided, which provisions, so far as applicable, shall apply to any action arising on such complaint so made. Any such order of the commission may be from time to time revised by the commission upon application of any interested party or upon its own motion.

SEC. 4. That the commission shall have power, after hearing and notice by order in writing, to require and compel every public utility to comply with the provisions of this act, and with all other laws of the United States applicable, and any municipal ordinance or regulation relating to said public utility, and to conform to the duties upon it thereby imposed or by the provisions of its own charter, if any charter has or shall be granted it: *Provided*, That nothing herein contained shall be held to relieve any public utility, its officers, agents, or servants, from any punishment, fine, forfeiture, or penalty for violation of any such law, ordinance, regulation, or duty imposed by its charter, nor to limit, take away, or restrict the jurisdiction of any court or other authority which now has or which may hereafter have power to impose any such punishment, fine, forfeiture, or penalty.

SEC. 5. That whenever any public utility or person shall propose any change in any law relating directly or indirectly to the property or operations of any public utility the said proposed change shall also and at the same time be submitted to the commission, which may take testimony and give a public hearing thereon, and the commission shall recommend such bills as will in its judgment protect the interests of the public and such public utility and transmit the same to the proper committees of the Senate and House of Representatives.

SEC. 6. That the commission shall ascertain, as soon and as nearly as practicable, the amount of money expended in the construction and equipment of every public utility, including the amount of money expended to procure any right of way; also the amount of money it would require to secure the right of way, reconstruct any roadbed, track, depots, cars, conduits, subways, poles, wires, switchboards, exchanges, offices, works, storage plants, power plants, machinery, and any other property or instrument not included in the foregoing enumeration used in or useful to the business of such public utility, and to replace all the physical properties belonging to the public utility. It shall ascertain the outstanding stock, bonds, debentures, and indebtedness, and the amount, respectively, thereof, the date when issued, to whom issued, to whom sold, the price paid in cash, property, or labor therefor, what disposition was made of the proceeds, by whom the indebtedness is held, so far as ascertainable, the amount purporting to be due thereon, the floating indebtedness of the public utility, the credits due the public utility, other property on hand belonging to it, the judicial or other sales of said public utility, its property or franchises, and the amounts purporting to have been paid, and in what manner paid therefor, and the taxes paid thereon. The commission shall also ascertain the gross and net income of the public utility from all sources in detail, the amounts paid for salaries to officers and the wages paid to its employees, and the maximum hours of continuous service required of each class. Whenever the information required by this section is obtained it shall be printed in the annual report of the commission. In making such investigation the commission may avail itself of any information in possession of any department of the Government of the United States or of the Commissioners of the District of Columbia.

SEC. 7. That the commission shall value the property of every public utility within the District of Columbia actually used and useful for the convenience of the public at the fair value thereof at the time of said valuation.

SEC. 8. That before final determination of such value the commission shall, after notice of not less than 30 days to the public utility, hold a public hearing as to such valuation in the manner hereinafter provided for a hearing, which provisions, so far as applicable, shall apply to such hearing. The commission shall, within 10 days after such valuation is determined, serve a statement thereof upon the public utility interested, and shall file a like statement with the District Committees in Congress.

SEC. 9. That the commission may at any time, on its own initiative, make a revaluation of the property of any public utility.

SEC. 10. That every public utility shall keep and render to the commission, in the manner and form prescribed by the commission, uniform accounts of all business transacted. Every public utility engaged directly or indirectly in any other business than that of the conduct of a street railway, or the production, transmission, or furnishing of heat, light, water, or power, or the conveyance of telegraph or telephone messages, shall, if required by the commission, keep and render separately to the commission in like manner and form the accounts of all such other business, in which case all the provisions of this act shall apply with like force and effect to the books, accounts, papers, and records of such other business.

SEC. 11. That the commission shall prescribe the forms of all books, accounts, papers, and records required to be kept, and every public utility is required to keep and render its books, accounts, papers, and records accurately and faithfully in the manner and form prescribed by the commission, and to comply with all directions of the commission relating to such books, accounts, papers, and records. In so far as practicable for the purposes of this act, the form prescribed shall be the form accepted by the Interstate Commerce Commission.

SEC. 12. That the commission shall cause to be prepared suitable blanks for carrying out the purposes of this act, and shall when necessary furnish such blanks to each public utility.

SEC. 13. That each public utility shall have an office within the District of Columbia in which it shall keep all such books, accounts, papers, and records as shall be required by the commission to be kept within the District of Columbia. No books, accounts, papers, or records required by the commission to be kept within the District of Columbia shall be at any time removed from the District of Columbia, except upon such condition as may be prescribed by the commission: *Provided*, That public utilities operating in the District of Columbia and elsewhere who have their general or executive offices outside of the Dis-

trict, may continue to keep their books, accounts, records, etc., at their executive or general offices, such public utilities being required, however, to produce before the commission such books, accounts, records, and papers from time to time as the commission may order.

SEC. 14. That the accounts shall be closed annually on the 31st day of December, and a balance sheet of that date promptly taken therefrom. On or before the 1st day of February following such balance sheet, together with such other information as the commission shall prescribe, verified by an owner or officer of the public utility, shall be filed with the commission, and a copy thereof transmitted to Congress.

SEC. 15. That the commission shall provide for the examination and audit of all accounts, and all items shall be allocated to the accounts in the manner prescribed by the commission. The agents, accountants, or examiners employed by the commission shall have authority, under the direction of the commission, to inspect and examine any and all books, accounts, papers, records, and memoranda kept by such public utilities.

SEC. 16. That every public utility shall carry a proper and adequate depreciation account. The commission shall ascertain and determine what are the proper and adequate rates of depreciation of the several classes of property of each public utility. These rates shall be such as will provide the amounts required over and above the expense of maintenance to keep such property in a state of efficiency corresponding to the progress of the industry. Each public utility shall conform its depreciation accounts to such rates so ascertained and determined by the commission. The commission may make changes in such rates of depreciation from time to time as it may find to be necessary. The commission shall also prescribe rules, regulations, and forms of accounts regarding such depreciation which the public utility is required to carry into effect. The commission shall provide for such depreciation in fixing the rates, tolls, and charges to be paid by the public. All moneys in this fund may be expended in keeping the property of such public utility in repair and good and serviceable condition for the use to which it is devoted, or invested, and, if invested, the income from the investments shall also be carried in the depreciation fund. This fund and the proceeds thereof shall be used for no other purpose than as provided in this section, unless with the consent and by order of the commission.

SEC. 17. That the commission shall keep itself informed of all new construction, extensions, and additions to the property of all public utilities, and shall prescribe the necessary forms, regulations, and instructions to the officers and employees of all public utilities for the keeping of construction accounts, which shall clearly distinguish all operating expenses and new construction.

SEC. 18. That nothing in this act shall be taken to prohibit a public utility, with the consent of the commission, from providing a sliding scale of rates and dividends according to what is commonly known as the Boston sliding scale, or other financial device that may be practicable and advantageous to the parties interested. No such arrangement or device shall be lawful until it shall be found by the commission, after investigation, to be reasonable and just and not inconsistent with the purposes of this act. Such arrangement shall be under the supervision and regulation of the commission. The commission shall ascertain, determine, and order such rates, charges, and regulations, and the duration thereof, as may be necessary to give effect to such arrangement, but the right and power to make such other and further changes in rates, charges, and regulations as the commission may ascertain and determine to be necessary and reasonable, and the right to alter or amend all orders relative thereto, is reserved and vested in the commission notwithstanding any such arrangement and mutual agreement.

SEC. 19. That each public utility shall furnish to the commission in such form and at such times as the commission shall require such accounts, reports, and information as shall show in itemized detail: Depreciation; salaries and wages; legal expenses; taxes and rentals; quantity and value of material used; receipts from residuals, by-products, services, or other sales; total and net costs; net and gross profits; dividends and interest; surplus or reserve; prices paid by consumers; and in addition such other items, whether of a nature similar to those hereinbefore enumerated or otherwise, as the commission may prescribe, in order to show completely and in detail the entire operation of the public utility in furnishing its product or service to the public.

SEC. 20. That the commission shall publish annual reports showing its proceedings relating to all the public utilities of each kind in the District of Columbia and such other occasional reports as it may deem advisable. The commission shall also publish in its annual reports the value of all property actually used and useful for the convenience of the public of every public utility as to whose rates, charges, service, or regulations any hearing has been held by the commission or the value of whose property has been ascertained by it under the provisions of this act.

SEC. 21. That the commission shall ascertain and fix adequate and serviceable standards for the measurement of quality, pressure, initial voltage, or other condition pertaining to the supply of the product or service rendered by any public utility, and prescribe reasonable regulations for examining and testing such product or service and for the measurement thereof. It shall establish reasonable rules, regulations, specifications, and standards to secure the accuracy of all meters and appliances for measurements, and every public utility is required to carry into effect all orders issued by the commission relative thereto.

SEC. 22. That the commission shall provide for the examination and testing of any and all appliances used for the measuring of any product or service of a public utility. Any consumer or user may have any such appliance tested upon payment of the fees fixed by the commission. The commission shall declare and establish reasonable fees to be paid for testing such appliances on the request of the consumers or users, the fee to be paid by the consumer or user at the time of his request, but to be paid by the public utility and repaid to the consumer or user if the appliance be found defective or incorrect to the disadvantage of the consumer or user.

SEC. 23. That the commission may purchase such materials, apparatus, and standard measuring instruments for such examination and tests as it may deem necessary. The commission, it agents, experts, or examiners, shall have power to enter upon any premises occupied by any public utility for the purpose of making the examinations and tests provided for in this act, and to set up and use on such premises any apparatus and appliances and occupy reasonable space therefor.

SEC. 24. That every public utility shall file with the commission, within a time to be fixed by the commission, schedules, which shall be open to public inspection, showing all rates, tolls, and charges which it has established and which are in force at the time for any service performed by it within the District of Columbia, or for any service in connection therewith or performed by any public utility controlled or operated by it. The rates, tolls, and charges shown on such schedules shall not exceed the rates, tolls, and charges now allowed by law, and shall be the lawful rates, tolls, and charges within the District of Columbia, and shall remain and be in force until set aside by the commission.

SEC. 25. That every public utility shall file with and as a part of such schedule all rules and regulations that in any manner affect the rates charged or to be charged for any service.

SEC. 26. That a copy of so much of said schedules as the commission shall deem necessary for the use of the public shall be printed in plain type and kept on file in every station and office of such public utility where payments are made by the consumers or users, open to the public, in such form and place as to be readily accessible to the public and so as to be conveniently inspected.

SEC. 27. That where a schedule of joint rates or charges is, or may be, in force between two or more public utilities, such schedules shall in like maner be printed and filed with the commission, and so much thereof as the commission shall deem necessary for the use of the public shall be filed in every such station or office, as provided in the preceding section.

SEC. 28. That no change shall thereafter be made in any schedule, including schedules of joint rates, except upon 10 days' notice to the commission, and all such changes shall be plainly indicated upon existing schedules, or by filing new schedules in lieu thereof 10 days prior to the time the same are to take effect: *Provided*, That the commission, upon application of any public utility, may prescribe a less time within which a reduction may be made.

SEC. 29. That copies of all new schedules shall be filed, as hereinbefore provided, in every station and office of such public utility where payments are made by consumers or users 10 days prior to the time the same are to take effect, unless the commission shall prescribe a less time.

SEC. 30. That it shall be unlawful for any public utility to charge, demand, collect, or receive a greater or less compensation for any service performed by it within the District of Columbia, or for any service in connection therewith, than is specified in such printed schedules, including schedules of joint rates, as may at the time be in force, or to demand, collect, or receive any rate, toll, or charge not specified in such schedule. The rates, tolls, and charges named therein shall be the lawful rates, tolls, and charges until the same are changed as provided in this act.

SEC. 31. That the commission may prescribe such changes in the form in which the schedules are issued by any public utility as may be found to be expedient.

SEC. 32. That the commission shall have power to adopt reasonable and proper rules and regulations relative to all inspections, tests, audits, and investigations, and to adopt and publish reasonable and proper rules to govern its proceedings and to regulate the mode and manner of all investigations and hearings of public utilities and other parties before it.

SEC. 33. That the commission shall keep itself informed as to the manner and method in which the business of all public utilities is conducted, and shall have the right to obtain from any public utility all necessary information to enable the commission to perform its duties.

SEC. 34. That the commission or any commissioner or any person or persons employed by the commission for that purpose shall, upon demand, have the right to inspect the books, accounts, papers, records, and memoranda of any public utility and to examine, under oath, any officer, agent, or employee of such public utility in relation to its business and affairs. Any person other than one of said commissioners who shall make such demand shall produce his authority to make such inspection or examination.

SEC. 35. That the commission may require, by order or subpœna, to be served upon any public utility in the same manner that a summons is served in a civil action in the Supreme Court of the District of Columbia, the production within the District of Columbia at such time and place as it may designate of any books, accounts, papers, or records kept by such public utility in any office or place without the District of Columbia, or verified copies in lieu thereof, if the commission shall so order, in order that an examination thereof may be made by the commission under its direction. Any public utility failing or refusing to comply with any order or subpœna shall for each day it shall so fail or refuse forfeit and pay to the District of Columbia the sum of $100, to be recovered in an action to be brought in the name of said District.

Attendance of witnesses and the production of such documentary evidence may be required from any place in the United States. And in case of disobedience to a subpœna the commission, or any party to a proceeding before the commission, may invoke the aid of any court of the United States or the Supreme Court of the District of Columbia in requiring the attendance and testimony of witnesses and the production of books, papers, and documents under the provisions of this act. And the said commission is hereby given power to call on any district attorney of the United States, the corporation counsel of the District of Columbia, or any counsel of the commission to enforce the provisions of this act in the proper courts of the United States, and on such call it shall be the duty of the said district attorney, corporation counsel, or any counsel of the commission, upon request of said commission, to enforce the provisions of this section, the costs and expenses incurred to be paid out of the appropriations for the expenses of the courts of the United States.

SEC. 36. That for the purpose of making any investigation with regard to any public utility the commission shall have power to appoint, by an order in writing, an agent, whose duties shall be prescribed in such order. In the discharge of his duties such agent shall have every power whatsoever of an inquisitorial nature granted in this act to the commission and shall have power to administer oaths and take depositions. The commission may conduct any number of such investigations contemporaneously through different agents, and may delegate to such agent or agents the taking of all testimony bearing upon any investigation or hearing. The decision of the commission shall be based upon its examination of all testimony and records. The recommendations made by such agents shall be advisory only, and shall not preclude the taking of further testimony, if the commission so order, nor further investigation.

SEC. 37. That every public utility shall furnish to the commission all information required by it to carry into effect the provisions of this act, and shall make specific answers to all specific questions submitted by the commission. Any public utility receiving from the commission any blanks with directions to fill the same shall cause the same to be properly filled out so as to answer, fully and correctly, each question therein propounded, and in case it is unable to answer any question it shall give a good and sufficient reason for such failure; and said answer

shall be verified under oath by the president, secretary, superintendent, or general manager of such public utility, and returned to the commission at its office within the period fixed by the commission. Whenever required by the commission, every public utility shall deliver to the commission any or all maps, profiles, contracts, reports of engineers, and all documents, books, accounts, papers, and records, or copies of any or all of the same, with a complete inventory of all its property, in such form as the commission may direct.

SEC. 38. That upon its own initiative or upon reasonable complaint made against any public utility that any of the rates, tolls, charges, or schedules, or services, or time and conditions of payment, or any joint rate or rates, schedules, or services, are in any respect unreasonable or unjustly discriminatory, or that any time schedule, regulation, or act whatsoever affecting or relating to the conduct of any street railway or common carrier, or the production, transmission, delivery, or furnishing of heat, light, water, or power, or any service in connection therewith, or the conveyance of any telegraph or telephone message, or any service in connection therewith, is in any respect unreasonable, insufficient, or unjustly discriminatory, or that any service is inadequate or can not be obtained, the commission may, in its discretion, proceed, with or without notice, to make such investigation as it may deem necessary or convenient. But no order affecting said rates, tolls, charges, schedules, regulations, or act complained of shall be entered by the commission without a formal hearing.

SEC. 39. That the commission shall prior to such formal hearing notify the public utility complained of that a complaint has been made, and 10 days after such notice has been given the commission may proceed to set a time and place for a hearing and an investigation as hereinafter provided.

SEC. 40. That the commission shall give the public utility and the complainant, if any, 10 days' notice of the time and place when and where such hearing and investigation will be held and such matters considered and determined. Both the public utility and complainant shall be entitled to be heard and shall have process to enforce the attendance of witnesses.

SEC. 41. That if upon such investigation the rates, tolls, charges, schedules, or joint rates shall be found to be unjust, unreasonable, insufficient, or unjustly discriminatory or to be preferential or otherwise in violation of any of the provisions of this act, the commission shall have power to determine and by order fix and order substituted therefor such rate or rates, tolls, charges, or schedules as shall be just and reasonable. If upon such investigation it shall be found that any regulation, time schedule, act, or service complained of is unjust, unreasonable, insufficient, preferential, unjustly discriminatory, or otherwise in violation of any of the provisions of this act, or if it be found that reasonable service is not supplied, the commission shall have power to determine and substitute therefor such other regulations, time schedules, service, or acts and to make such order respecting and such changes in such regulations, time schedules, service, or acts as shall be just and reasonable. And upon any investigation for the purpose of determining upon and requiring any reasonable extension or extensions of lines or of service that shall promise to be compensatory within a reasonable time, the commission shall have power to fix, determine, and require every such extension or extensions to be made and the terms and conditions upon which the same shall be made: *Provided*, That no hearing shall be had and no order shall be made respecting such extension or extensions without notice to the public utility affected thereby, as provided in section 40 of this act.

SEC. 42. That if upon investigation it shall be found that any rate, toll, charge, schedule, or joint rate, or rates, is unjust, unreasonable, insufficient, or unjustly discriminatory or preferential, or otherwise in violation of any of the provisions of this act, or that any time schedule, regulation, act, or service complained of is unjust, unreasonable, insufficient, preferential, or otherwise in violation of any of the provisions of this act, or if it be found that reasonable service is not supplied, the public utility found to be at fault shall pay the expenses incurred by the commission upon such investigation.

SEC. 43. That the commission may, in its discretion, when complaint is made of more than one rate or charge, order separate hearings thereon, and may consider and determine the several matters complained of separately and at such times as it may prescribe. No complaint shall of necessity at any time be dismissed because of the absence of direct damage to the complainant.

SEC. 44. That whenever the commission shall believe that any rate or charge may be unreasonable or unjustly discriminatory, or that any reasonable service is not supplied, or that an investigation of any matter relating to any public utility should for any reason be made, it may, on its own motion, summarily investigate the same with or without notice.

SEC. 45. That if after making such investigation the commission becomes satisfied that sufficient grounds exist to warrant a formal hearing being ordered as to the matters so investigated, it shall furnish such public utility interested a statement notifying the public utility of the matters under investigation. Ten days after such notice has been given the commission may proceed to set a time and place for a hearing and an investigation as hereinbefore provided.

SEC. 46. That notice of the time and place for such hearing shall be given to the public utility and to such other interested persons as the commission shall deem necessary, as provided in section 40 of this act, and thereafter proceedings shall be had and conducted in reference to the matter investigated in like manner as though complaint had been filed with the commission relative to the matter investigated, and the same order or orders may be made in reference thereto as if such investigation had been made on complaint.

SEC. 47. That any public utility may make complaint as to any matter affecting its own product or service with like effect as though made by the commission or upon reasonable complaint as hereinbefore provided.

SEC. 48. That each of the commissioners and every agent provided for in section 36 of this act, for the purposes mentioned in this act, shall have power to administer oaths, certify to official acts, issue subpœnas, compel the attendance of witnesses and the production of books, accounts, papers, records, documents, and testimony. In case of disobedience on the part of any person or persons to comply with any order of the commission or any commissioner, or any subpœna, or on the refusal of any witness to testify to any matter regarding which he may be interrogated before the commission or its agent authorized, it shall be the duty of the Supreme Court of the District of Columbia, or a judge thereof, on application of a commissioner, to compel obedience by attachment proceedings for contempt, as in the case of disobedience of the requirements of a subpœna issued from such court or a refusal to testify therein.

SEC. 49. That each witness who shall appear before the commission or its agent by its order shall receive for his attendance the fees and mileage now provided for witnesses in the Supreme Court of the District of Columbia, which shall be audited and paid in the same manner as fees in criminal cases within the District of Columbia are audited and paid, upon the presentation of proper vouchers, sworn to by such witnesses and approved by the chairman of the commission. No witness subpœnaed at the instance of parties other than the commission shall be entitled to compensation for attendance or travel unless the commission shall certify that his testimony was material to the matter investigated, and that his attendance as a witness was reasonably necessary.

SEC. 50. That the commission or any party may, in any investigation, cause the depositions of witnesses residing within or without the District of Columbia to be taken in the manner prescribed by law for like depositions in civil actions in circuit courts.

SEC. 51. That a full and complete record shall be kept of all proceedings had before the commission or its agent on any formal investigation had, and all testimony shall be taken down by a stenographer appointed by the commission.

SEC. 52. That whenever any complaint is served upon the commission under the provisions of this act the commission shall, before said action is reached for trial, cause a certified transcript of all proceedings had and testimony taken upon such investigation to be filed with the clerk of the Supreme Court of the District of Columbia.

SEC. 53. That a transcribed copy of the evidence and proceedings or any specific part thereof, in any investigation taken by a stenographer appointed by the commission, being certified by such stenographer to be a true and correct transcript of all the testimony in the investigation or of a particular witness, or of other specific part thereof, carefully compared by him with his original notes, and to be a correct statement of the evidence and proceedings had in such investigation so purporting to be taken and transcribed, shall be received in evidence with the same effect as if such reporter were present and testified to the fact so certified. A copy of such transcript shall be furnished on demand, free of cost, to any party to such investigation.

SEC. 54. That no franchise nor any right to or under any franchise to own or operate any public utility as defined in this act or to use the tracks of any street railroad shall be assigned, transferred, or leased, nor shall any contract or agreement with reference to or affecting any such franchise or right be valid or of any force or effect whatsoever unless the assignment, transfer, lease, contract, or agreement shall have been approved by the commission in writing. The permission and approval of the commission to the assignment, transfer, or lease of a franchise under this section shall not be construed to revive or validate any lapsed or invalid franchise or to enlarge or add to the powers and privileges contained in the grant of any franchise or to waive any forfeiture. It shall be unlawful for any street railroad corporation, gas corporation, electric corporation, telephone corporation, telegraph corporation, or other public utility corporation, directly or indirectly, to acquire the stock or bonds of any other corporation incorporated for or engaged in the same or similar business as it is, unless authorized in writing to do so by the commission, and every contract, transfer, agreement for transfer, or assignment of any such stock or bonds without such written authority shall be void and of no effect.

SEC. 55. That the commission shall, within its jurisdiction—

Have general supervision of all gas corporations and electrical corporations having authority under any general or special law or under any charter or franchise to lay down, erect, or maintain wires, pipes, conduits, ducts, or other fixtures in, over, or under the streets, highways, and public places in the District of Columbia for the purpose of furnishing or distributing gas or of furnishing or transmitting electricity for light, heat, or power, or maintaining underground conduits or ducts for electrical conductors, and all gas plants and electric plants owned, leased, or operated by any corporation.

Investigate and ascertain from time to time the quality and quantity of gas supplied by persons or corporations; examine or investigate the methods employed by such persons and corporations in manufacturing, distributing, and supplying gas or electricity for light, heat, or power, and in transmitting the same, and have power to order such reasonable improvements as will reasonably promote the public interest, preserve the public health, and protect those using such gas or electricity and those employed in the manufacture and distribution thereof or in the manufacture and operation of the works, wires, poles, lines, conduits, ducts, and systems connected therewith, and have power to order reasonable improvements and extensions of the works, wires, poles, lines, conduits, ducts, and other reasonable devices, apparatus, and property of gas corporations and electrical corporations.

Have power by order to fix from time to time standards for determining the purity or the measurement of the illuminating power of gas to be manufactured, distributed, or sold by persons or corporations for lighting, heating, or power purposes, and to prescribe from time to time the efficiency of the electric supply system, of the current supplied, and of the lamps furnished by the persons or corporations generating and selling electric current, and by order to require the gas so manufactured, distributed, or sold to equal the standards so fixed by it, and to prescribe from time to time the reasonable minimum and maximum pressure at which gas shall be delivered by said persons or corporations. For the purpose of determining whether the gas manufactured, distributed, or sold by such persons or corporations for lighting, heating, or power purposes conforms to the standards of illuminating power, purity, and pressure, and for the purpose of determining whether the efficiency of the electric supply system, of the current supplied, and of the lamps furnished conforms to the orders issued by the commission, the commission shall have power, of its own motion, to examine and investigate the plants and methods employed in manufacturing, delivering, and supplying gas or electricity, and shall have access, through its members or persons employed and authorized by it to make such examinations and investigations, to all parts of the manufacturing plants owned, used, or operated for the manufacture, transmission, or distribution of gas or electricity by any such person or corporation. Any employee or agent of the commission who divulges any fact or information which may come to his knowledge during the course of any such inspection or examination, except in so far as he may be directed by the commission, or by a court or judge thereof, or authorized by law, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not less than $50 nor more than $500 for each offense.

SEC. 56. That no gas corporation or electrical corporation shall begin the construction of a gas plant or electric plant without first having obtained the permission and approval of the commission.

SEC. 57. That the commission shall appoint inspectors of gas meters, whose duty it shall be, when required by the commission, to inspect, examine, prove, and ascertain the accuracy of any and all gas meters used or intended to be used for measuring or ascertaining the quantity of gas for light, heat, or power furnished by any person or corporation

to or for the use of any person or corporation, and when found to be or made to be correct, the inspector shall seal all such meters and each of them with some suitable device, which device shall be recorded in the office of the commission.

No corporation or person shall furnish, set, or put in use any gas meter which shall not have been inspected, proved, and sealed by an inspector of the commission.

The commission shall appoint inspectors of electric meters, whose duty it shall be, when required by the commission, to inspect, examine, and ascertain the accuracy of any and all electric meters used or intended to be used for measuring and ascertaining the quantity of electric current furnished for light, heat, or power by any person or corporation to or for the use of any person or corporation, and to inspect, examine, and ascertain the accuracy of all apparatus for testing and proving the accuracy of electric meters; and when found to be or made to be correct the inspector shall stamp or mark all such meters and apparatus with some suitable device, which device shall be recorded in the office of the commission. No corporation or person shall furnish, set, or put in use any electric meter the type of which shall not have been approved by the commission or any meter not approved by an inspector of the commission.

Every gas corporation and electrical corporation shall provide, repair, and maintain such suitable premises and apparatus and facilities as may be required and approved by the commission for testing and proving the accuracy of gas and electric meters furnished for use by it, and by which apparatus every meter may be tested.

If any consumer to whom a meter has been furnished shall request the commission in writing to inspect such meter, the commission shall have the same inspected and tested; if the same, on being so tested, shall be found to be more than 4 per cent, if an electric meter, or more than 2 per cent, if a gas meter, defective or incorrect to the prejudice of the consumer, the inspector shall order the gas or electrical corporation forthwith to remove the same and to place instead a correct meter, and the expense of such inspection and test shall be borne by the corporation; if the same, on being so tested, shall be found to be correct, the expense of such inspection and test shall be borne by the consumer.

The commission shall prescribe such rules and regulations to carry into effect the provisions of this section as it may deem necessary and shall fix uniform reasonable charges for the inspection and testing of meters upon complaint.

SEC. 58. That if it be alleged and established in an action brought in any court for the collection of any charge for gas or electricity that a price has been demanded in excess of that fixed by the commission or by statute no recovery shall be had therein, but the fact that such excessive charges have been made shall be a complete defense to such action.

SEC. 59. That the appointment and power to remove the inspector of gas and meters and assistant inspectors of gas and meters from office is hereby vested in the commission. All the powers and duties of such inspectors conferred and imposed by statute shall be exercised and performed under the supervision and control of the commission: *Provided*, That the salaries of the inspector of gas and meters and every assistant inspector of gas and meters shall continue to be paid as heretofore and as now provided by act of Congress.

SEC. 60. That the inspector of gas and meters now provided for by law shall transfer and deliver to the commission all books, maps, papers, records, apparatus, and the property of whatsoever description in his possession, and said commission is authorized to take possession of all books, maps, papers, records, apparatus, and property of whatsoever description.

SEC. 61. That all public utilities to which an order of the commission applies shall make such changes in their schedules on file as may be necessary to make the same conform to said order, and no change shall thereafter be made by any public utility in any such rates, tolls, or charges, or in any joint rate or rates, without the approval of the commission. Certified copies of all other orders of the commission shall be delivered to the public utility affected thereby in like manner, and the same shall take effect within such reasonable time thereafter as the commission shall prescribe.

SEC. 62. That the commission may, at any time, upon notice to the public utility and after opportunity to be heard as provided in section 40 of this act, rescind, alter, or amend any order fixing any rate or rates, tolls, charges, or schedules, or any other order made by the commission, and certified copies of the same shall be served and take effect as herein provided for original orders.

SEC. 63. That all rates, tolls, charges, time and condition of payment thereof, schedules, and joint rates fixed by the commission shall be in force and shall be prima facie reasonable until finally found otherwise in an action brought for that purpose.

SEC. 64. That if at any time the commission shall be in doubt of the elements of value to be by them considered in arriving at the true valuation under the provisions of this act, they are authorized and empowered to institute a proceeding in equity in the Supreme Court of the District of Columbia petitioning said court to instruct them as to the element or elements of value to be by them considered as aforesaid, and the particular utility under valuation at the time shall be made party defendant in said action.

That any public utility and any person or corporation interest being dissatisfied with any order or decision of the commission fixing any valuation, rate or rates, tolls, charges, schedules, joint rate or rates, may commence a proceeding in equity in the Supreme Court of the District of Columbia against the commission, as defendants, to vacate, set aside, or modify any such decision or order on the ground that the valuation, rate or rates, tolls, charges, schedules, joint rate or rates fixed in such order is unlawful, inadequate, or unreasonable. The answer of the commission, on any such action being instituted against it, or the answer of any public utility on any such action being commenced by said commission against it, shall be filed within 10 days, whereupon said proceeding shall be at issue and stand ready for trial.

All such proceedings shall have precedence over any civil cause of a different nature pending in such court, and the Supreme Court of the District of Columbia shall always be deemed open for the trial thereof, and the same shall be tried and determined as are equity proceedings in said court. Any party, including said commission, may appeal from the order of decree of said court to the Court of Appeals of the District of Columbia, and therefrom to the Supreme Court of the United States, which shall thereupon have and take jurisdiction in every such appeal. That pending the decision of said appeal the commission may suspend the decision or order appealed from for such a period as it may deem fair and reasonable under the circumstances: *Provided*, That no appeal, unless the court or the commission shall so order, shall operate to stay any order of the commission: *And provided further*, That said commission shall not, nor shall any of its members, officers, agents, or employees, be taxed with any costs, nor shall they or any of them be required to give any supersedeas bond or security for costs or damages on any appeal whatsoever. Said commission, or any of its members, officers, agents, or employees, shall not be liable to suit or action or for any judgment or decree for any damages, loss, or injury claimed by any public utility or person, nor required in any case to make any deposit for costs or pay for any service to the clerks of any court or to the marshal of the United States.

SEC. 65. That every proceeding, action, or suit to set aside, vacate, or amend any determination or order of the commission, or to enjoin the enforcement thereof, or to prevent in any way such order or determination from becoming effective, shall be commenced, and every appeal to the courts or right of recourse to the courts shall be taken or exercised, within 120 days after the entry or rendition of such order or determination, and the right to commence any such action, proceeding, or suit, or to take or exercise any such appeal or right of recourse to the courts, shall terminate absolutely at the end of such 120 days.

SEC. 66. That no injunction shall issue suspending or staying any order of the commission, except upon application to the Supreme Court of the District of Columbia or a judge thereof, and only upon notice to the commission and after hearing had.

SEC. 67. That if upon trial of such proceeding or suit evidence shall be introduced by the plaintiff which is found by the court to be different from that offered upon the hearing before the commission or its authorized agent, or additional thereto, the court, before proceeding to render judgment, unless the parties to such action stipulate in writing to the contrary, shall transmit a copy of such evidence to the commission, and shall stay further proceedings in said proceeding for 15 days from the date of such transmission. Upon the receipt of such evidence the commission shall consider the same and may alter, modify, amend, or rescind its order relating to such valuation, rate or rates, tolls, charges, schedules, joint rate or rates, time schedules, regulations, act, or service complained of in said action, and shall report its action thereon to said court within 10 days from receipt of such evidence.

SEC. 68. That if the commission shall rescind its order complained of the proceeding or suit shall be dismissed; if it shall alter, modify, or amend the same, such altered, modified, or amended order shall take the place of the original order complained of and judgment shall be rendered thereon as though made by the commission in the first instance. If the original order shall not be rescinded or changed by the commission, judgment shall be rendered upon such original order.

SEC. 69. That in all trials, actions, and proceedings arising under the provisions of this act or growing out of the exercise of the authority and powers granted herein to the commission, the burden of proof shall be upon the party adverse to such commission or seeking to set aside any determination, requirement, direction, or order of said commission to show by clear and satisfactory evidence that the determination, requirement, direction, or order of the commission complained of is inadequate, unreasonable, or unlawful, as the case may be.

SEC. 70. That no person shall be excused from testifying or from producing books, accounts, and papers in any proceeding based upon or growing out of any violation of the provisions of this act, on the ground or for the reason that the testimony or evidence, documentary or otherwise, required of him may tend to incriminate him or subject him to penalty or forfeiture; but no person having so testified shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may have testified or produced any documentary evidence: *Provided*, That no person so testifying shall be exempted from prosecution or punishment for perjury: *Provided further*, That the immunity hereby conferred shall extend only to a natural person who, in obedience to a subpœna, gives testimony under oath or produces evidence, documentary or otherwise, under oath.

SEC. 71. That upon application of any person the commission shall furnish certified copies, under the seal of the commission, of any order made by it, which shall be prima facie evidence of the facts stated therein.

SEC. 72. That the power to create liens on corporate property by public utilities in the District of Columbia is hereby declared to be a special privilege, the right of supervision, regulation, restriction, and control of which is hereby vested in the public-utilities commission of the District of Columbia, and such power shall be exercised according to the provisions of this act.

SEC. 73. That no public utility shall hereafter issue any stocks, stock certificates, bonds, mortgages, or any other evidences of indebtedness payable in more than one year from date, until it shall have first obtained the certificate of the commission showing authority for such issue from the commission.

SEC. 74. That no public utility shall issue any stocks, certificates of stock, bonds, or other evidences of indebtedness for money, property, or services, either directly or indirectly, nor shall it receive any money, property, or services in payment of the same, either directly or indirectly, until there shall have been recorded upon the books of such public utility the certificate of the commission in this act provided for.

SEC. 75. That no public utility shall declare any stock, bond, or scrip dividend or divide the proceeds of the sale of any stock, bond, or scrip among its stockholders.

SEC. 76. That no public utility shall issue any stocks, certificates of stock, bonds, or other evidences of indebtedness secured on its property in the District of Columbia for the purpose of any reorganization or consolidation in excess of the total amount of the stocks, certificates of stock, bonds, or other evidences of indebtedness then outstanding against the public utilities so reorganizing or consolidating, and no such public utility shall purchase the property of any other public utility for the purpose of effecting a consolidation until the commission shall have determined and set forth in writing that said consolidation will be in the public interest, nor until the commission shall have approved in writing the terms upon which said consolidation shall be made.

SEC. 77. That no public utility shall apply the proceeds of any such stock, certificates of stock, bonds, or other evidences of indebtedness to any other purpose or issue the same on any less favorable terms than that specified in the certificate issued by the commission.

SEC. 78. That all stocks, certificates of stock, bonds, and other evidences of indebtedness issued contrary to the provisions of this act shall be void.

SEC. 79. That any public utility, or any agent, director, or officer thereof, who shall, directly or indirectly, issue or cause to be issued any stocks, certificates of stock, bonds, or other evidences of indebtedness contrary to the provisions of this act, or who shall apply the proceeds from the sale thereof to any purposes other than that specified in the certificate of the commission, shall forfeit and pay into the Treasury of the United States, one-half to the credit of the District of Columbia, not less than $1,000 nor more than $10,000 for each offense.

SEC. 80. That each and every director, president, secretary, or other official of any such public utility who shall make any false statement to secure the issue of any stock, certificate of stock, bond, mortgage, or other evidence of indebtedness, or who shall, by false statement knowingly made, procure of the commission the making of the certificate herein provided, or issue, with knowledge of such fraud, negotiate, or cause to be negotiated, any such stock, certificate of stock, bond, mortgage, or other evidence of indebtedness in violation of this act, shall be guilty of a felony, and, upon conviction thereof, shall be punished by a fine of not less than $1,000, or by imprisonment for a term of not less than one year, or by both such fine and imprisonment, in the discretion of the court.

SEC. 81. That if any public utility or any agent or officer thereof shall, directly or indirectly, by any device whatsoever, or otherwise, charge, demand, collect, or receive from any person, firm, or corporation a greater or less compensation for any service rendered or to be rendered by it in or affecting or relating to the conduct of a street railroad or street railroad corporation, common carrier, gas plant, gas corporation, electric plant, electric corporation, water power company, telephone line, telephone corporation, telegraph line, or telegraph corporation, or pipe line company, or to the production, transmission, delivery, or furnishing of heat, light, water, or power, or the conveyance of telephone or telegraph messages, or for any service in connection therewith than that prescribed in the public schedules or tariffs then in force or established as provided herein, or than it charges, demands, collects, or receives from any other person, firm, or corporation other than one conducting a like business for a like and contemporaneous service, such public utility shall be deemed guilty of unjust discrimination, which is hereby prohibited and declared to be a misdemeanor and unlawful, and upon conviction thereof shall forfeit and pay to the District of Columbia not less than $100 nor more than $1,000 for each offense; and such agent or officer so offending shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than $50 nor more than $100 for each offense.

SEC. 82. That it shall be unlawful for any public utility to demand, charge, collect, or receive from any person, firm, or corporation less compensation for any service rendered or to be rendered by said public utility in consideration of the furnishing by said person, firm, or corporation of any part of the facilities incident thereto: *Provided*, That nothing herein shall be construed as prohibiting any public utility from renting any facilities incident to the production, transmission, delivery, or furnishing of heat, light, water, or power, or the supply of any liquid, steam, or air, through pipes or tubing, or the conveyance of telegraph or telephone messages, and paying a reasonable rental therefor; or as requiring any public utility to furnish any part of such appliances which are situated in and upon the premises of any consumer or user, except telephone station equipment upon the subscriber's premises, and, unless otherwise ordered by the commission, meters, and appliances for measurements of any product or service.

SEC. 83. That it shall be unlawful for any person, firm, or corporation to solicit, accept, or receive any rebate, concession, or discrimination in respect to any service in or affecting or relating to any public utility or the production, transmission, delivery, or furnishing of heat, light, water, or power, or any liquid, steam, or air, or the conveying of telegraph or telephone messages within the District of Columbia, or for any service in connection therewith whereby any such service shall, by any device whatsoever or otherwise, be rendered free or at a less rate than that named in the schedules and tariffs in force as provided in this act, or whereby any service or advantage is received other than is in this act specified. Any person, firm, or corporation violating the provisions of this section shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not less than $200 nor more than $1,000 for each offense.

SEC. 84. That any officer, agent, or employee of any public utility who shall fail or refuse to fill out and return any blanks, as required by this act, or shall fail or refuse to answer any question therein propounded, or shall knowingly or willfully give a false answer to any such question, or shall evade the answer to any such question where the fact inquired of is within his knowledge, or who shall, upon proper demand, fail or refuse to exhibit to the commission or any commissioner, or any person authorized to examine the same, any book, paper, account, record, or memoranda of such public utility which is in his possession or under his control, or who shall fail to properly use and keep his system of accounting, or any part thereof, as prescribed by the commission under this act, or who shall refuse to do any act or thing in connection with such system of accounting when so directed by the commission or its authorized representative shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than $200 nor more than $1,000 for each offense, and a penalty of not less than $500 nor more than $2,000 shall, on conviction, be imposed on the public utility for each such offense when such officer, agent, or employee acted in obedience to the direction, instruction, or request of such public utility or any general officer thereof.

SEC. 85. That if any public utility shall violate any provision of this act, or shall do any act herein prohibited, or shall fail or refuse to perform any duty enjoined upon it for which a penalty has not been provided, or shall fail, neglect, or refuse to obey any lawful requirement or order made by the commission, or any judgment or decree made by any court upon its application, for every such violation, failure, or refusal such public utility shall forfeit and pay to the District of Columbia the sum of $200 for each such offense. In construing and enforcing the provisions of this section, the act, omission, or failure of any officer, agent, or other person acting for or employed by any public utility acting within the scope of his employment and instructions shall in every case be deemed to be the act, omission, or failure of such public utility.

SEC. 86. That any person who shall destroy, injure, or interfere with any apparatus or appliance owned or operated by or in charge of the commission or its agents shall be deemed guilty of a misdemeanor, and upon conviction shall be punished by fine not exceeding $100 or imprisonment for a period not exceeding 30 days, or both.

SEC. 87. That every day during which any public utility, or any officer, agent, or employee thereof, shall fail knowingly or willfully to observe and comply with any order or direction of the commission, or to perform any duty enjoined by this act, shall constitute a separate and distinct violation of such order, or direction, or of this act, as the case may be.

SEC. 88. That whenever, after hearing and investigation as provided in this act, the commission shall find that any rate, toll, charge, regulation, or practice of any public utility within the District of Columbia is unreasonable or discriminatory, it shall have the power to regulate, fix, and determine the same as provided in this act.

SEC. 89. That every public utility shall, whenever an accident attended with loss of human life or personal injury without loss of human life occurs within the District of Columbia, upon its premises, or directly or indirectly arising from or connected with its maintenance or operation, give immediate notice thereof to the commission. In the event of any such accident, the commission, if it deem the public interest requires it, shall cause an investigation to be made forthwith.

SEC. 90. That the commission shall inquire into any neglect or violation of the laws or regulations in force in the District of Columbia by any public utility doing business therein or by the officers, agents, or employees thereof, or by any person operating the plant of any public utility, and shall have the power, and it shall be its duty, to enforce the provisions of this act as well as all other laws relating to public utilities.

SEC. 91. That the corporation counsel of the District of Columbia shall be the general counsel of the commission and shall receive from and be paid out of the appropriations provided and to be provided for the expenses of the commission in addition to his compensation otherwise provided by law the sum of $1,000 per annum, payable in equal monthly installments. It shall be the duty of the general counsel to represent and appear for the commission in all actions and proceedings involving any question under this act, or under or in reference to any act, order, or proceeding of the commission, and if directed to do so by the commission, to intervene, if possible, in any action or proceeding in which any such question is involved; to commence and prosecute all actions and proceedings directed or authorized by the commission, and to expedite, in every way possible, final and just determination of all such actions and proceedings; to advise the commission and each commissioner, when so requested, in regard to all matters in connection with the powers and duties of the commission and of the members thereof, and generally to perform all duties and services as attorney and counsel to the commission which the commission may reasonably require of him. The assistants to the corporation counsel shall perform such duties relating to matters arising under this act and all other matters as the corporation counsel may prescribe. The commission may, if at any time it deems necessary, employ other attorneys at law as additional assistants to the said general counsel for the performance of such extraordinary legal services for or in behalf of the commission at such special compensation for such additional assistants as the commission may prescribe, which said compensation shall be paid out of the appropriations herein provided and hereafter to be provided for the expenses of the commission. The said corporation counsel and any of his assistants designated by him or by the commission shall have the right to appear and prosecute any civil, quasi criminal, or criminal case to recover any penalty, forfeiture, fine, or for the imposition of any punishment provided for in this act, whether instituted by or on behalf of the United States of America or by or on behalf of the District of Columbia, or otherwise, and on every appeal provided by law. The commission may enforce its orders in any case by mandamus or other legal or equitable remedy in any court of competent jurisdiction, and it shall be the duty of the corporation counsel or his assistants to represent the commission in every such proceeding.

SEC. 92. That the provisions of this act shall be interpreted and construed liberally in order to accomplish the purposes thereof, and where any specific power or authority is given the commission by the provisions of this act the enumeration thereof shall not be held to exclude or impair any power or authority otherwise in this act conferred on said commission. The commission hereby created shall have, in addition to the powers in this act specified, mentioned, and indicated all additional, implied, and incidental power which may be proper and necessary to effect and carry out, perform and execute all the said powers herein specified, mentioned, and indicated. A substantial compliance with the requirements of this act shall be sufficient to give effect to all the rules, orders, acts, and regulations of the commission, and they shall not be declared inoperative, illegal, or void for any omission of a technical nature in respect thereto. That each section of this act, and every part of each section, are hereby declared to be independent sections, and the holding of any section or sections or part or parts thereof to be void, ineffective, or unconstitutional for any cause shall not be deemed to affect any other section or part thereof.

SEC. 93. That this act shall not have the effect to release or waive any right of action by the United States, or by the District of Columbia, or by any person, for any right, penalty, or forfeiture which may have arisen or which may hereafter arise under any law of the United States or any regulation in force in the District of Columbia; and all penalties and forfeitures accruing under this act shall be cumulative, and a suit for any recovery of one shall not be a bar to the recovery of any other penalty.

SEC. 94. That, first, unless the commission shall otherwise order, it shall be unlawful for any public utility within the District of Columbia to demand, collect, or receive a greater compensation for any service than the charge fixed on the lowest schedules of rates for the same service under the law in force at the date of the passage of this act; second, every public utility in the District of Columbia shall, within 30 days after the passage and publication of this act, file in the office of the commission copies of all schedules of rates and charges, including joint rates, in force at the date of the passage of this act; third, any public utility desiring to advance or discontinue any such rate or rates may make application to the commission in writing, stating the advance in or discontinuance of the rate or rates desired, giving the reasons for such advance or discontinuance; fourth, upon receiving such application the commission shall fix a time and place for hearing, and give such notice to interested parties as shall be proper and reasonable; if, after such hearing and investigation, the commission shall find that the change or discontinuance applied for is reasonable, fair, and just, it shall grant the application, either in whole or in part; fifth, any public utility being dissatisfied with any order of the commission made under the provisions of this section may commence a proceeding against it in the Supreme Court of the District of Columbia in the manner as is in this act hereinbefore provided, which action shall be tried and determined in the same manner as is in this act hereinbefore provided.

SEC. 95. The commission shall have the power in each and every instance to employ and to prescribe the duties of such officers, clerks, stenographers, typewriters, inspectors, experts, and employees as it may deem necessary to carry out the provisions of this act, and to fix and pay their compensation within the appropriations provided by Congress. The commission is hereby authorized, within the appropriation made by Congress, to incur and pay incidental expenses for postage, printing, blanks, books, law books, books of reference, and periodicals, stationery, binding, rebinding, repairing and preservation of records, desks, office furniture and supplies, traveling expenses of the commission, the commissioners, and every officer, agent, and employee thereof, and all other general expenses reasonably necessary to be incurred in carrying

out the purposes of this act. All payments and disbursements, as provided in this act, shall be made by the disbursing officer of the District of Columbia upon proper vouchers, certified as required by the commission; and the commission is hereby also granted power and authority to designate and appoint during its pleasure such officers, clerks, inspectors, and employees of the District of Columbia and members of the Metropolitan police force of the District of Columbia to perform any of the duties which the commission may from time to time, respectively, assign to them, and to employ any assistance and fix compensation therefor within the limits of the appropriations for its use herein or hereafter made by act of Congress.

SEC. 96. That the said commission shall hereafter exercise all the powers and have all the authority now vested by law in the Interstate Commerce Commission by virtue and under the act of Congress approved May 23, 1908, entitled "An act authorizing certain extensions to be made of the lines of the Anacostia & Potomac River Railroad Co., the Washington Railway & Electric Co., the City & Suburban Railway of Washington, and the Capital Traction Co., in the District of Columbia, and for other purposes," and said power and authority shall no longer be exercised by said Interstate Commerce Commission: *Provided*, That the orders, rules, and regulations made by the Interstate Commerce Commission shall continue to be in force until changed, repealed, altered, or amended by the commission created by this act, which said commission is hereby given power and jurisdiction to issue and, at its pleasure, to revoke all permits, or licenses, to carry this act into effect, and its rules and regulations shall be valid and binding on all public-service corporations and on all persons.

Whenever the commission shall be of opinion, after hearing had upon its own motion or upon complaint, that repairs, improvements, or changes in any street railroad, gas plant, electric plant, telephone line, telegraph line, pipe line, water-power plant, or the facilities of any common carrier ought reasonably to be made, or that any addition of service or equipment ought reasonably to be made thereto, or that the vehicles or cars of any street railroad or common carrier are unclean, insanitary, uncomfortable, inconvenient, or improperly equipped, operated, or maintained, or are in need of paint, or unsightly in appearance, or that any addition ought reasonably to be made thereto, in order to promote the comfort or convenience of the public or employees, or in order to secure adequate service or facilities, the commission shall have power to make and serve an order directing that such repairs, improvements, changes, or additions to service or equipment be made within a reasonable time and in a manner to be specified therein, and every such public utility is hereby required and directed to obey every such order of the commission.

SEC. 97. That all the powers created by this act and the duty of carrying this act into effect and enforcing the provisions thereof are hereby vested in and imposed on the Commissioners of the District of Columbia as a governmental and administrative agency, and said powers shall be exercised and said duties performed as additional and superadded powers to their powers and duties as Commissioners of the District of Columbia. The powers, authority, and duties hereby imposed on and granted said commissioners shall be permanent and are hereby imposed on and granted to the present Commissioners of the District of Columbit and their successors in office. The commission created by this act shall, so soon as convenient after its passage, organize by electing one of its number chairman, who shall serve until the first Monday in January, 1913. On the first Monday in January in each even-numbered year the commissioners shall meet and elect a chairman, who shall serve for two years and until his successor is elected. A majority of said commissioners shall constitute a quorum to do business, and any vacancy shall not impair the right of the remaining commissioners to exercise all the powers of the commission. Any investigation, inquiry, or hearing within the powers of the commission may be made or held by any commissioner, whose acts and orders, when approved by the commission, shall be deemed to be the order of the commission. The commission shall have power to adopt and publish rules to govern its proceedings and to regulate the mode and manner of all investigations and hearings pertaining to public utilities.

No commissioner shall be directly or indirectly interested in any public utility or in any stock, bond, mortgage, security, or contract of any such public utility; and if any such commissioner shall voluntarily become so interested his office shall ipso facto become vacant; and if any such commissioner shall become so interested otherwise than voluntarily he shall, within a reasonable time, divest himself of such interest, and if he fails so to do his office shall become vacant. Before entering upon the duties of his office each commissioner, the secretary of the commission, the counsel of the commission, and every employee of said commission shall take and subscribe the constitutional oath of office, and shall in addition thereto make oath or affirmation before and file with the clerk of the Supreme Court of the District of Columbia that he is not pecuniarily interested, voluntarily or involuntarily, in any public utility in the District of Columbia or elsewhere.

SEC. 98. That the sum of $40,000, or so much thereof as may be necessary, is hereby appropriated to carry out the provisions of this act, one-half out of the revenues of the District of Columbia and one-half out of any moneys in the Treasury not otherwise appropriated, and all moneys received from fines, forfeitures, and penalties shall be paid into the Treasury of the United States, one-half to the credit of the District of Columbia.

SEC. 99. That all the duties, powers, and authority of the Commissioners of the District of Columbia shall continue and remain in full force and effect notwithstanding this act; and all powers, authority, and duties of the municipality known as the District of Columbia and all rights vested in said municipality shall continue and remain in full force and effect notwithstanding this act. All the lawful ordinances and regulations made by the Commissioners of the District of Columbia as such, and all other lawful municipal ordinances and regulations, shall continue and remain in full force and effect, and may be altered, changed, or amended, and new ordinances and regulations may be made by the Commissioners of the District of Columbia, acting as such, hereafter, notwithstanding this act: *Provided*, That when any order of the commission created by this act shall be made which shall be inconsistent and repugnant to any municipal ordinance or regulation, or any ordinance or regulation made or to be made by the Commissioners of the District of Columbia, acting as such, then and in such event the order of the commission created by this act shall be given full force and effect, notwithstanding such municipal ordinance or regulation.

SEC. 100. That the board of directors of every public utility shall consist of not more than 15 nor less than 7 members, within which limitation the membership may be in any case increased or diminished, as the stockholders may from time to time determine.

SEC. 101. That, except as modified or changed by this act and until modified or changed under its provisions, all charters, statutes, laws, ordinances, and regulations now in force shall remain and continue to be in full force and effect until altered, amended, or repealed according to law: *Provided*, That all charters, statutes, acts, and parts of acts, laws, ordinances, and regulations inconsistent and repugnant to the provisions of this act, and only so far as inconsistent and repugnant thereto, are hereby repealed.

SEC. 102. That this act shall not affect pending actions or proceedings, civil or criminal, or quasi criminal, but the same may be prosecuted or defended as heretofore provided by law or regulation.

SEC. 103. That Congress reserves the right to alter, amend, or repeal this act.

Mr. SMITH of Arizona. I send to the Secretary's desk and offer the amendment that is indicated by the pencil mark on the paper.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 69, after line 9, insert:

For the equipment and maintenance of the bacteriological laboratory and for reference books and scientific journals, $2,100.

Mr. SMITH of Arizona. I ask the Secretary to read the paper which accompanies the amendment.

The PRESIDENT pro tempore. The Chair will call the attention of the Senator from Arizona to the fact that the language is already in the bill, the only difference being in the amount appropriated. So the amendment would apply only to the amount.

Mr. SMOOT. I wish to make a point of order against the amendment. The committee has had this matter under consideration——

Mr. SMITH of Arizona. That does not raise a point of order.

Mr. SMOOT. I am perfectly aware of that, if the Senator will permit me, but it is legislation upon an appropriation bill, and I make the point of order against the amendment.

The PRESIDENT pro tempore. The Chair will inquire as to whether the amount named in the amendment has been estimated for.

Mr. SMITH of Arizona. Yes, sir; it is in the estimates.

Mr. CURTIS. Will the Chair please have the Secretary read the amendment again?

The PRESIDENT pro tempore. The amendment will be again read.

The SECRETARY. On page 69, line 9, strike out "$1,000" and insert "2,100."

Mr. SMITH of Arizona. Very well; let it go that way.

Mr. SMOOT. It is not estimated for. The amount estimated is $1,200.

Mr. SMITH of Arizona. How much has been allowed by the House?

Mr. SMOOT. One thousand dollars.

Mr. SMITH of Arizona. How does the point of order lie against the House here to increase it?

Mr. SMOOT. It has not been estimated for up to $2,000.

Mr. SMITH of Arizona. Does a point of order lie because the estimate does not reach this amount, and is the Senate foreclosed from exercising its judgment on it?

Mr. SMOOT. Mr. President, in looking over the Book of Estimates again I find that I was mistaken. The estimate of $1,200 is for the purchase and installation of new apparatus for the laboratory, but for maintaining and keeping in order the laboratory the estimate is $400. The House increased it from $400 to $1,000.

Mr. SMITH of Arizona. How can the Senator raise a point of order under that?

Mr. SMOOT. The point of order is that it has not been estimated for.

The PRESIDENT pro tempore. The point of order is sustained, inasmuch as the amount named in the amendment is not estimated for.

Mr. SMITH of Arizona. I asked to have the paper read, and I was taken off my feet by the point of order. I ask unanimous consent, if necessary, that the Secretary will read the paper accompanying the amendment. I wish to say to the Senate that I am acting for a Senator in this matter who is absent, and not for myself, or I would not trouble the Senate with it.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

The Secretary read as follows:

In the estimates submitted by the health officer (see p. 749, Book of Estimates for 1913–14) there is given a list in detail of the articles, etc., for the proper equipment and the maintenance of the bacteriological laboratory for the next fiscal year; the amount required for new apparatus, for replacement of apparatus now worn out; and for the ordinary supplies; in all, $2,100.

The House bill allows only $1,000 of the amount asked for, which is entirely too small to meet the requirements of such a laboratory. This amount will be barely sufficient to keep the laboratory on its present basis, and will not allow for doing the work it is called upon to do and should do. Its function is to aid in the suppression of epidemic and contagious diseases and for the bacteriological examination of water, milk, and other food products; and without a sufficient sum being provided for its proper equipment and maintenance this can not be done.

Mr. SMITH of Arizona. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. Insert, after line 10 on page 50, the following:

For equipment and maintenance of the chemical laboratory, $1,855.

Mr. SMOOT. I make the point of order that the amount asked for is not estimated for. The amount estimated for in the Book of Estimates is $1,200.

Mr. SMITH of Arizona. Let me understand the point of order, Mr. President.

The PRESIDENT pro tempore. The Chair will read that portion of the rule relating to amendments to appropriation bills:

And no amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill, or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law, or treaty stipulation, or act, or resolution previously passed by the Senate during that session; or unless the same be moved by direction of a standing or select committee of the Senate, or proposed in pursuance of an estimate of the head of some one of the departments.

Mr. SMITH of Arizona. I will take the ruling of the Chair on it.

The PRESIDENT pro tempore. The Chair must rule that the amendment is not in order unless it is estimated for or has been recommended by some standing committee.

Mr. SMITH of Arizona. Then I offer the next amendment on the same page. I will take this occasion, however, before it is read to say that these items were left for me by the Senator from Oklahoma [Mr. OWEN], who was compelled to leave the Senate; and I must insist as far as I can on having the amendments voted on if a point of order does not lie against them.

The PRESIDENT pro tempore. The Senator from Arizona offers an amendment, which will be read.

The SECRETARY. On page 69, line 17, strike out "$240" and insert "$360."

The PRESIDENT pro tempore. This does not seem to be the right point in the bill.

Mr. SMITH of Arizona. Probably the page and line refer to the House print.

Mr. SMOOT. I suppose that is for the use of motor vehicles. The House appropriated $240. There is no particular estimate for that amount. The House thought it would require $240 per annum, and so did the Senate committee think the same amount necessary.

I will say to the Senator from Arizona that the same item was adopted in a good many other places in the bill, and they all carry $240. Therefore, I make the point of order against the amendment.

The PRESIDENT pro tempore. If the item has not been estimated for or recommended by a standing or select committee, the Chair will sustain the point of order.

Mr. JONES. Mr. President, I was heartily in favor of the amendment offered by the Senator from Ohio [Mr. POMERENE] being placed on this bill. Last April there was another measure prepared; after very great consideration and investigation it passed the Senate practically unanimously; and I think it is really of greater importance to the District of Columbia than that bill. I refer to the excise bill. It is a bill in which the people of the District have manifested more interest than in almost any other bill that has been proposed for them.

I recognize that the measure is subject to a point of order, but I do think that the considerations in favor of putting this amendment upon the bill are even greater than those that influenced us in putting the public-utilities amendment upon the bill.

Therefore I offer as an additional section the excise bill. It has been read in the Senate, and I do not think it is necessary to reread it.

Mr. JONES's amendment was to insert as a new section the following:

SEC. 3, PARAGRAPH 1. That no person, company, copartnership, association, club, or corporation shall manufacture, sell, offer for sale, keep for sale, traffic in, barter, exchange for goods, give away, or otherwise furnish, in the District of Columbia, any intoxicating liquors, except as hereinafter provided. Wherever the term "intoxicating liquors" is used in this section it shall be deemed to include whisky, brandy, gin, wine, cordials, rum, ale, porter, beer, hard or fermented cider, and all other fermented, distilled, spirituous, vinous, and malt liquors, and every mixture of liquors which shall contain more than 2 per cent, by weight, of alcohol, and any mixture of liquor which shall contain less than 2 per cent of alcohol, if the same shall be intoxicating.

PAR. 2. That there shall be, and is hereby, constituted an excise board for the District of Columbia, which shall be composed of three members, to be appointed by the President of the United States, by and with the advice and consent of the Senate, and who shall serve for a term of three years, and until their successors are appointed and qualified, except that the members first appointed shall serve for one, two, and three years, respectively, as may be designated by the President, or until their successors are appointed and qualified. The salary of said commissioners shall be at the rate of $2,400 per annum.

Hereafter no license shall be issued to a hotel having less than 50 bedrooms for guests, nor to any hotel the character of which, or the character of the proprietor or manager of which, is deemed objectionable by said board.

No saloon or barroom, other than in hotels and clubs, shall be licensed, allowed, or maintained within 150 feet of any other saloon or barroom.

No saloon, barroom, or other place where intoxicating liquor is sold at retail shall be licensed, allowed, or maintained within 300 feet of any alleyway occupied for residences or of places commonly called slums.

No saloon, barroom, or other place wherein intoxicating liquor is sold at retail or wholesale, other than hotels and clubs, shall be licensed, allowed, or maintained within 600 feet of any public schoolhouse, private school, college, or university, or within 500 feet of any place of religious worship, measured between the nearest entrances to each by the shortest course of travel between such places of business and public schoolhouse, private school, college, or university, or place of religious worship.

No license shall be granted to sell intoxicating liquors in the waiting room of any station or depot of any steam or electric railroad or other carrier for the transportation of passengers within the District of Columbia, nor shall any license be granted for the sale of intoxicating liquors within 150 feet of the railroad and terminal station building at the corner of M and Thirty-sixth Streets NW.

No license shall be granted for the establishment or maintenance of a barroom or other place for the sale of intoxicating liquors, otherwise than in sealed packages and not to be drunk on the premises, in any residence portion of the District of Columbia; and it shall be the duty of the excise board to determine in the case of each application for license whether the location where the barroom is to be located is or is not within the business portion of the District, and if not the license shall be denied; and the excise board is hereby authorized and required to determine in each case what is so far devoted to business as to constitute it a business street or section: *Provided*, That no license shall be granted for any saloon or barroom or any side of any square, block, or tract of land where less than 50 per cent of the houses and buildings, not including saloons or hotels and clubs having barroom licenses under this section, thereon are used for business purposes; and no place where intoxicating liquors are sold at wholesale shall be maintained or allowed, nor shall intoxicating liquors be sold at wholesale outside of the business districts as above provided.

No saloon, barroom, or wholesale liquor business shall be licensed, maintained, or allowed in the territory west of the following lines: The westerly line of the fire limits as now established from its southerly limits to where the same intersects with the mile limit of the Soldiers' Home; thence westerly and northerly along the said mile limit until the same intersects with Kansas Avenue; thence along Kansas Avenue to its intersection with the northern boundary of the District of Columbia.

Said board shall consider and act upon all applications for license to sell intoxicating liquors, after a report thereon by the chief of police, and the action of said board shall be final and conclusive. In no event, except by the unanimous action of the excise board, shall any license permitted under this section be granted until a report approving the granting thereof is made to the excise board by the chief of police. In the issuing of licenses for barrooms it shall be the duty of the excise board to adopt such a policy as will reduce the number of barrooms, including those in hotels and clubs, to not exceeding 300 by November 1, 1914. On the granting by said board of a license to sell intoxicating liquors the assessor shall issue a license to the applicant. Said board shall make such rules and regulations for carrying into effect this section as it may deem requisite and proper. It shall make an annual report to Congress setting forth the number of applications for license, whether favorably or unfavorably acted upon, the number of persons convicted for violation of this statute, and the number and amount of fines collected and uncollected; and said excise board is hereby authorized and empowered to summon any person before it to give testimony, under oath or affirmation, as to any matter affecting the operation of the laws regulating the sale of intoxicating liquors in the District of Columbia; and any member of the board shall have the power to administer oaths or affirmations for all purposes of administering said laws. Such summons may be served by any member of the Metropolitan police force, and the refusal or neglect of a witness to appear before the said board or to testify when required, may be punished in the same manner as a refusal to appear before the Commissioners of the District of Columbia, as provided for in the acts of February 20, 1896, entitled "An act to amend an act entitled 'An act to punish false swearing before trial boards of the Metropolitan police force and fire department of the District of Columbia, and for other purposes,' approved May 11, 1892," and July 1, 1902, entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes." Witnesses so summoned shall be entitled to a fee of $1.25 for each day's attendance before the said board, payable out of the contingent fund of the Commissioners of the District of Columbia; and any witness giving statements to the said board on any material matter which he believes to be false shall be guilty of perjury and punishable accordingly.

PAR. 3. That the said board shall appoint a clerk at a salary of $1,500 per annum and an inspector at a salary of $1,500 per annum. Said inspector shall make inspections as may be required by this section, under the orders of the board, and make full report of such inspections to the board. He shall wear a badge indicating that he is such inspector of the excise board. The board shall keep a full record of all applications for license, of all recommendations for and remonstrances against the granting of licenses, and the actions taken thereon.

PAR. 4. That every person applying for a license to sell intoxicating liquors in said District shall file with the said board a petition for such license, and such petition shall be considered and acted upon by the board in the order in which such petition is filed and numbered. Said petition shall contain—

First. A statement giving the name and residence of the applicant and the time he has resided in the District of Columbia.

Second. A statement describing the particular place for which a license is desired, designating the same by street and number, if practicable, and if not, by such other apt description as will definitely locate it, and how long said applicant has been engaged in business at said place.

Third. The full name and residence of the owner of the premises upon which the business is to be carried on.

Fourth. A statement that the applicant is a citizen of the United States and a bona fide resident of the District of Columbia, and not less than 21 years of age, and whether such applicant has since March 3, 1893, been adjudged guilty of violating the laws governing the sale of intoxicating liquors or for the prevention of gambling in the District of Columbia.

Fifth. A statement that he intends to, and if licensed will, carry on such business for himself and not as the agent of any other person, company, copartnership, or corporation.

Sixth. A statement that he intends to superintend in person the management of the business for which he asks a license, and that if licensed he will so superintend the management of the business so licensed.

Said petition must be sworn to by the petitioner before a notary public or other person duly authorized to administer oaths and affirmations. If any false material statement is made in any part of said petition, the petitioner making said affidavit shall be deemed guilty of perjury, and on conviction thereof shall be subject to the penalty now provided by law for that offense; and in case a license has been issued to said petitioner the same shall be immediately revoked by said board. Notice of the filing of said petition shall be given by the applicant in such manner as may be prescribed by general rules and regulations adopted by the excise board; and if protests against the granting of such license are filed no final action shall be taken by the excise board until the protestants shall have had an opportunity to be heard, under rules and regulations prescribed by said board.

PAR. 5. That the licenses authorized and provided for by this section shall be of two classes, wholesale liquor licenses and barroom licenses. The fee for a wholesale liquor license until November 1, 1914, shall be $500 per annum, and for a barroom license $1,000 per annum until November 1, 1914; and thereafter the fee for a wholesale liquor license shall be $800, and the fee for a barroom license shall be $1,500 per annum. Every applicant for a liquor license shall deposit the amount of the license fee with the collector of taxes of the District of Columbia at the time of filing the application with the excise board. If, upon consideration of the application for license by the board as provided for in this section, the board shall decide to grant the license prayed for it shall notify the assessor, and the applicant shall thereupon receive his license; and only on the granting by said board of a license to any applicant to sell intoxicating liquor shall the assessor issue a license to such applicant. A barroom license shall be required for every hotel, tavern, barroom, club, or other place in which intoxicating liquors are sold or dispensed at retail. A wholesale liquor license shall authorize the licensee to sell intoxicating liquors in sealed packages only and in quantities not less than 1 quart in the aggregate, and not to be drunk on the premises where sold; and no wholesale license shall be granted until it is satisfactorily shown that the place where it is intended to carry on such business is properly arranged for selling such liquors as merchandise. Every place where intoxicating liquors are sold to be drunk on the premises or in quantities less than 1 quart, whether drunk on the premises or not, shall be regarded as a barroom; and the possession of intoxicating liquors, with the means and appliances for carrying on the business of dispensing the same to be drunk where sold, shall be prima facie evidence of a barroom within the meaning of this section, and the license therefor shall be known as a barroom license. All makers, brewers, and distillers of intoxicating liquors in the District of Columbia, and all agents of makers, brewers, and distillers established outside of the District of Columbia and selling their product in said District, shall be required to take out the wholesale license provided for in this section: *Provided*, That when such business is carried on at more than one place a license shall be required for each place. Before the excise board may grant a license to a club it must be satisfactorily shown that such club is duly incorporated; that its membership is bona fide, all being on an equal status with equal privileges and responsibilities; that its purposes are legitimate; and that the sale of liquor intended is no more than an incident, and is not a prime source of revenue. A license to a club shall be issued in the name of its president, and in case of violation of the provisions of this section in such club, he and the secretary, the treasurer, and the manager of the club shall be proceeded against collectively or severally in their individual capacities and, if convicted, be subject to the penalties prescribed in paragraph 14 of this section, and the license of said club shall be immediately revoked by the excise board.

PAR. 6. That under the license issued in accordance with this section no intoxicating liquors shall be sold, given away, or in any way disposed of to any minor, intoxicated person, or to any person who is in the habit of becoming intoxicated, if such last-named person's wife, daughter, mother, father, or guardian shall, in writing, request that the licensee shall not sell or furnish intoxicating liquors to such person, and ignorance of the age of any such minor shall not be a defense to any action instituted under this section; and no licensee under this section shall sell, give away, or dispense any intoxicating liquors to any person between the hours of 11 o'clock in the evening and 8 o'clock in the morning, nor on Sundays or legal holidays, and Inauguration Day, and between said hours, and on Sundays, legal holidays, and Inauguration Day every barroom and other place where intoxicating liquors are sold shall be kept closed; that no minor under the age of 18 years shall be allowed to enter or be permitted to remain in any place where intoxicating liquors are sold, other than a hotel or club; that the interior of every barroom shall at all times be exposed to full view from the street, without obstruction by screens, blinds, curtains, stained glass, bottles, boxes, signs, or other material, except in the case of clubs licensed under this section and hotels having only an interior barroom, which shall be exposed to full view from the corridors or passageways leading to the entrance or entrances to such barroom.

PAR. 7. That every wife, daughter, mother, father, or guardian, having made the request mentioned in the preceding section, who shall be injured in person or property or means of support by any intoxicated person concerning whom such request has been made or in consequence of the intoxication of any such person, shall have a right of action for all damages actually sustained, in his or her own name, against any person, individual, or corporation who shall after such request has been made, by selling, bartering, giving away, or otherwise furnishing intoxicating liquors contrary to such request, have caused the intoxication of such person. On the trial of any such suit proof that the defendant or defendants sold, bartered, gave away, or furnished such liquors to such intoxicated person on the day or about the time (and prior thereto) of such injury shall be prima facie evidence that the liquor so sold, bartered, given away, or otherwise furnished caused such intoxication. In any action by a married woman or other person legally entitled to recover damages for loss of support caused by such intoxication it shall only be necessary to prove that the defendant or defendants, after the making of such request, has or have given, bartered, sold, or otherwise furnished intoxicating liquor of any kind to such person during the period when such cause of action shall have accrued.

PAR. 8. That any minor, for the purpose of evading the provisions of paragraph 7 of this section, who falsely represents his age shall be deemed guilty of a misdemeanor, and be fined for each offense not more than $50, and in default in the payment of such fine shall be imprisoned in the reformatory or workhouse of said District not exceeding 30 days.

PAR. 9. That no license under this section shall be issued for a longer period than one year, and the year shall begin on the first day of November and end on the last day of October following; and no license shall be transferred by the licensee to any other person or to any other place, except with the written consent of the excise board upon a regular application therefor in writing and after notice and hearing as in this section provided upon an original application for a license; and the fee to be paid by the party applying for such transfer shall be $2, which shall be paid to the collector of taxes of the District before such transfer is made: *Provided*, That the excise board shall not allow the transfer of the license of any person against whom there are pending in the courts or before the excise board charges of keeping a disorderly house or violating the excise laws or the laws against gambling in the District of Columbia.

PAR. 10. That every person receiving a license to sell liquor under this section shall frame the same under glass and place it in a conspicuous place in his place of business, so that anyone entering such place may easily read such license.

PAR. 11. That all applicants for license and persons holding licenses under this section shall allow any member of the excise board or the duly authorized inspector of the said board full opportunity and every facility to examine, at any time during business hours, the premises where intoxicating liquor is manufactured, sold, or for which a license is asked or has been granted; and the same opportunity and facility shall be afforded by the licensee or some person acting in his stead, any member of the Metropolitan police force who has reasonable belief that the law is being violated to enter and examine at all times such licensed places, and no person or perons shall obstruct, hinder, or in any manner molest such inspector or officer, provided such inspector or officer exhibits a badge showing he is such inspector or officer.

PAR. 12. That regularly licensed druggists or pharmacists shall not be required to obtain license under the provisions of this section, but they shall not sell intoxicating liquors, nor compound nor mix any composition thereof, nor sell any malt extract or other proprietary medicines containing more than 2 per cent of alcohol, except such compounds, compositions, malt extracts, or proprietary medicines be so medicated as to be medicinal preparations or compounds unfit for use as beverages, except upon a written and bona fide prescription of a duly licensed and regularly practicing physician in the District of Columbia, whose name shall be signed thereto. Such prescription shall contain a statement that the disease of the patient required such a prescription, shall be numbered in the order of receiving, and shall be canceled by writing on it the word "canceled" and the date on which it was presented and filled, and kept on file in consecutive order, subject to public inspection at all times during business hours. No such prescription shall be filled more than once. Every druggist or pharmacist selling intoxicating liquors as herein provided shall keep a book provided for the purpose, and shall enter therein at the time of every sale a true record of the date of the sale, the name of the purchaser, who shall sign his name in said book as a part of the entry, his residence (giving the street and house number, if there be such), the kind and quantity and price of such liquor, the purpose for which it was sold, and the name of the physician giving the prescription therefor. Such book shall be open to public inspection during business hours, and shall be in form substantially as follows:

Date.	Name of purchaser.	Residence.	Kind and quantity.	Purpose of use.	Price.	Name of physician.	Signature of purchaser.

Said book shall be produced before the excise board or the courts when required: *Provided*, That pure grain alcohol may be sold without a physician's prescription for mechanical, medicinal, and scientific purposes by registered druggists or pharmacists, who shall keep a book for the purpose of registering such sales in a similar manner or form as required for the sale of intoxicating liquors as provided in this section: *Provided further*, That any person who shall make any false statement as to the purpose or use of alcohol purchased under the provisions of this section shall be deemed guilty of a misdemeanor and be fined for each offense not more than $50, and in default of the payment of such fine shall be imprisoned in the workhouse of said District not exceeding 30 days.

Any druggist or pharmacist who shall sell or dispense any intoxicating liquors, except in such manner as provided in this section, or who shall fail or refuse to keep the record herein required, or who shall refill any prescription, or who shall violate any other provisions of this paragraph, shall be guilty of illegal selling, and upon conviction thereof shall be subject to the penalties prescribed in paragraph 13 of this section. Upon a second conviction for said offense, in addition to the penalties prescribed in said paragraph 13, it shall be a part of the judgment of conviction that the license of such druggist or pharmacist to practice pharmacy shall be revoked, and the court before which such person is tried and convicted shall cause a certified copy of such judgment of conviction to be certified to the board having authority to issue licenses to practice pharmacy in the District of Columbia.

Any physician who shall prescribe any intoxicating liquor except for treatment of disease which, after his own personal diagnosis, he shall deem to require such treatment, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not less than $50 nor more than $200, and in default of payment of said fine shall be imprisoned in the District jail or workhouse for not less than 30 nor more than 90 days, and upon a second conviction for said offense, in addition to the penalty above provided, it shall be a part of the judgment of conviction that the license of such physician to practice medicine be revoked, and the court before which such physician is tried and convicted shall cause a certified copy of such judgment of conviction to be certified to the board having authority to issue licenses to practice medicine in the District of Columbia.

PAR. 13. That any person, company, copartnership, corporation, club, or association manufacturing, selling, offering for sale, keeping for sale, trafficking in, bartering, exchanging for goods, or otherwise furnishing any intoxicating liquors in the District of Columbia, without first having obtained a license as herein provided, or shall manufacture, sell, offer for sale, keep for sale, traffic in, barter, exchange for goods, give away, or otherwise furnish, solicit, or receive orders for intoxicating

liquors in any part, section, or district of the District of Columbia wherein the same is prohibited by law, upon conviction thereof shall be fined not less than $250 nor more than $800, and in default in the payment of such fine be imprisoned in the District jail or workhouse for not less than two months nor more than six months; and upon every subsequent conviction for such offense shall, in addition to the penalty named, to wit, a fine of not less than $250 nor more than $800, be imprisoned in the workhouse of the District of Columbia not less than three months nor more than one year.

PAR. 14. That any person, company, copartnership, corporation, or club having obtained a license under this section, who shall violate any of its provisions shall, upon conviction of such violation, be fined not less than $100 nor more than $500, and the excise board may, in its discretion, revoke the license; and upon a second conviction of such violation such licensee shall be fined not less than $200 nor more than $500, and in addition to such fine the excise board shall immediately revoke the license. That upon the conviction of any licensee of keeping a disorderly or disreputable place, it shall be the duty of the excise board to immediately revoke the license of such convicted licensee, and after such revocation no license shall again be granted to him for said place or elsewhere, nor shall a license be granted to anyone else for said place for a period of three years from the date of said revocation of license.

PAR. 15. That no licensee under this section shall employ or permit to be employed any female, or allow any female or any minor or any person convicted of crime, to sell, give, furnish, or distribute any intoxicating liquors, or any admixture thereof, to any person or persons, nor permit the playing of pool or billiards, or any other games whatever, in the room where such liquors are sold or drunk, or in any adjoining or intercommunicating room; nor shall he, except in the case of hotels and clubs, permit the playing of music or theatricals of any kind, or provide other amusements in his place of business or in connection therewith. Nor shall any barroom licensee establish more than one bar under his license, and the sale or dispensing of liquors, except in case of hotels and clubs, shall be confined to the room in which said bar is located; nor provide or permit to be used more than one entrance to said barroom from the street, which entrance shall be the one mentioned in his application for license, unless the excise board shall especially permit an extra entrance. Nor shall any licensee sell, give, furnish, or distribute any intoxicating liquors to be carried away in buckets, pitchers, or other vessels, except sealed bottles or in original packages; nor shall any barroom licensee sell, give, furnish, or distribute any intoxicating liquors to any female, nor permit any female to enter or remain in his barroom: *Provided*, That bona fide guests of hotels and clubs having a license to sell intoxicating liquors may be served with liquors at meals in such hotels and clubs during the time liquor may be sold.

PAR. 16. That all applicants who have had a license during the preceding year who so desire shall apply for a renewal of such license on or before the 1st day of September of each license year: *Provided*, That in the event of the death of a person having a license under this section during a license year there shall be refunded to the personal representative of the deceased such amount of the license fee in proportion to the unexpired part of the license year: *Provided further*, That the minimum portion of said license fee to be retained for any portion of the license year, irrespective of its proportion to the entire year, shall be $200 in the case of barroom licenses and $100 in the case of wholesale licenses.

PAR. 17. That no license, either wholesale or barroom, shall be issued to any person or for any place located within 1,000 feet of the grounds of the marine barracks, the War College and engineer barracks, or of the navy yard, in the District of Columbia.

PAR. 18. That any person assisting in or aiding and abetting the violation of any of the provisions of this section shall be guilty of a misdemeanor, and on conviction thereof shall be fined not less than $50 nor more than $100 or be imprisoned in the District jail or workhouse for not more than three months for each and every offense: *Provided*, That no witness shall be excused from testifying in any case brought under this section on the ground that his answers may tend to incriminate him in connection with any violation of this section, and such witness so testifying shall not thereafter be prosecuted for violation of any provision of this section concerning which such witness may have testified.

PAR. 19. That prosecutions for violations of the provisions of this section shall be on information filed in the police court by the corporation counsel of the District of Columbia or any of his assistants duly authorized to act for him, and said corporation counsel or his assistants shall file such information upon the presentation to him or his assistants of sworn information that the law has been violated; and such corporation counsel and his assistants shall have power to administer oaths to such informant or informants, and such others as present themselves, and anyone making a false oath to any material fact shall be deemed guilty of perjury and subject to the same penalties as now provided by law for such offense.

PAR. 20. That if one or more persons who are competent witnesses shall charge on oath or affirmation before the corporation counsel of the District of Columbia or any of his assistants duly authorized to act for him, representing that any person, company, copartnership, association, club, or corporation has or have violated or is violating the provisions of this section, by manufacturing, selling, offering for sale, keeping for sale, trafficking in, bartering, exchanging for goods, giving away, or otherwise furnishing intoxicating liquor without license, or in a prohibited district or section, and shall request said corporation counsel or any of his assistants duly authorized to act for him, to issue a warrant, said attorney or any of his assistants shall issue such warrant, in which warrant the room, house, building, or other place in which the violation is alleged to have occurred or is occurring shall be specifically described, and said warrant shall be placed in the hands of the captain or acting captain of the police precinct in which the room, house, building, or other place above referred to is located, commanding him at once to thoroughly search said described room, house, building, or other place and the appurtenances thereof, and if any such shall be found, to take into his possession and safely keep, to be produced as evidence when required, all intoxicating liquors (if the same shall be found in quantities and in condition to suggest that it is kept for sale), and all the means of dispensing same, also all the paraphernalia or part of the paraphernalia of a barroom or other intoxicating-liquor establishment, and any United States internal-revenue tax receipt or certificate for the manufacture or sale of intoxicating liquor effective for the period of time covering the alleged offense, and forthwith report all the facts to the corporation counsel of the District of Columbia, and such intoxicating liquor or the means for dispensing same, or the paraphernalia of a barroom or other intoxicating-liquor establishment, or any United States internal-revenue tax receipt or certificate for the sale of intoxicating liquor effective as aforesaid, shall be prima facie evidence of the violation of the provisions of paragraph 1 of this section as charged or presented. If the accused shall be found guilty, the intoxicating liquor so seized shall, after the trial and time for writ of error, if no writ of error is taken, be destroyed by the police department; if the accused be found not guilty, the whole shall be held as his, its, or their property, or the property of the real owner.

PAR. 21. That it shall not be necessary in order to convict any person, company, association, club, or corporation, his, its, or their agents, officers, clerks, or servants, of manufacturing or selling intoxicating liquors without license, or in any section of the District of Columbia where the manufacture and sale is prohibited, to prove the actual sale, delivery of, or payment for any intoxicating liquors, but the evidence of having or keeping them in hand and offering to sell or barter, exchanging for goods or merchandise, shall be sufficient to convict; nor shall it be necessary in a warrant or in information to specify the particular kind of liquor manufactured, sold, offered for sale, kept for sale, trafficked in, bartered or exchanged for goods or merchandise, or mentioned in orders solicited or taken for the purchase of intoxicating liquor, but it shall be sufficient to allege in the warrant or information that the accused manufactured, sold, offered for sale, kept for sale, trafficked in, bartered or exchanged for goods or merchandise, solicited for or received orders for intoxicating liquors, or kept it deposited to sell or barter.

PAR. 22. That every person who shall, within the District of Columbia, directly or indirectly keep or maintain, by himself or by associating or combining with others, or who shall in any manner aid, abet, or assist in keeping or maintaining any clubroom or other place in which any intoxicating liquors, the sale of which without a license is prohibited by this section, is received or kept for the purpose of use, sale, barter, giving away, or otherwise furnishing, or for distribution or division among the members of any club or association by any means whatever, without first having a license so to do, or in sections of the District wherein the sale of intoxicating liquor is prohibited, and every person who shall use, sell, barter, give away, or otherwise furnish, distribute, or divide any such liquors so received or kept shall be guilty of a misdemeanor and subject to the penalties prescribed in paragraph 13 of this section.

PAR. 23. That any person who shall, in the District of Columbia, in any street or alley, in any public place, or in or upon any street car, or in or upon any other vehicle commonly used for the transportation of passengers, or in or about any depot, platform, or waiting station, drink any intoxicating liquor of any kind, or if any person shall be drunk or intoxicated in any street, alley, or public or private road or in any passenger coach, street car, or any public place or building, or at any public gathering, or if any person shall be drunk or intoxicated and shall disturb the peace of any person, he shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than $10 nor more than $100, or by imprisonment for not less than 5 days nor more than 30 days in the workhouse or jail of the District of Columbia, or by both such fine and imprisonment.

PAR. 24. That it shall be unlawful for any licensee under the provisions of this section to furnish or offer to furnish any free food or other gift of any kind or description to those buying or to prospective buyers of any of the liquors which said licensee offers or keeps for sale; and anyone violating the provisions of this paragraph shall be guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine of not less than $10 nor more than $50, and, upon a second conviction for this offense, in addition to the foregoing penalty, the excise board shall forfeit the license held by such person.

PAR. 25. That the issuance of an internal-revenue special tax receipt or certificate by the United States to any person as a wholesale or retail dealer in distilled liquors or in malt liquors at any place within the District of Columbia shall be prima facie evidence of the sale of intoxicating liquors by such person at such place, or at any other place of business of such person in the District where such special tax receipt is posted and at the time charged in any prosecution under this section, but such time must be within the life of such receipt or certificate.

PAR. 26. That in the interpretation of this section words of singular number shall be deemed to include their plurals, and words of masculine gender shall be deemed to include the feminine, as the case may be.

The words "give away" where they occur in this section shall not apply to the giving away of intoxicating liquors to bona fide guests by any person in his hotel or private dwelling.

PAR. 27. That this section shall be in full force and effect from and after its passage, and shall be in lieu of and as a substitute for all existing laws and regulations in the District of Columbia in relation to the sale of intoxicating liquors in said District, except such laws as prohibit the sale of intoxicating liquors in certain defined sections or parts of the District and laws of Congress pertaining to persons, premises, and territory over which the Federal Government exercises jurisdiction; and all laws and parts of laws inconsistent with this section, except such prohibitive laws above referred to, be, and they are hereby, repealed.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment submitted by the Senator from Washington. The ayes appear to have it. The ayes have it, and the amendment is agreed to.

Mr. OLIVER. I make the point of order against the amendment.

Mr. JONES. I make the point of order that it comes too late, after the question has been passed upon and the Chair announced the result.

Mr. OLIVER. Mr. President, I had not time to get up, really, before the President announced his decision.

The PRESIDENT pro tempore. Without objection, the Senator from Pennsylvania will be recognized to make the point of order, and under clause 2 of Rule XX the Chair will submit the question to the Senate. Is the amendment in order on the pending bill? The Secretary will call the roll.

Mr. LA FOLLETTE. If there is to be a roll call on it, I should like to have the bill read. I do not know what I am voting upon.

The PRESIDENT pro tempore. The Senator from Wisconsin is entitled to have the bill read.

Mr. JONES. I desire to suggest that there has been no demand for a roll call.

The PRESIDENT pro tempore. The Chair was laboring under a misapprehension. The bill will be read.

Mr. LA FOLLETTE. I will not ask to have the bill read if there is simply to be an informal vote taken upon it. I do not want to delay the progress of the bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Washington [Mr. JONES].

The amendment was agreed to.

Mr. LODGE. Mr. President, I offer the following amendment, to be inserted at the end of the bill.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. At the end of the amendment just agreed to add as a new section the following:

SEC. —. That paragraph 10 of section 6 of the act approved July 1, 1902, making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes, is hereby amended by adding at the end of said paragraph the following:

"Fourth. Household and other belongings not held for sale and owned by any person in the public service temporarily residing in the District of Columbia who is a citizen of any State or Territory and who is taxed on such personal property in such State or Territory."

Mr. CURTIS. I think that is the existing law, and I shall not make the point of order against it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Massachusetts.

The amendment was agreed to.

Mr. SMITH of Michigan. I desire to modify my amendment which was adopted yesterday by striking out all after the word "thereto." The part to be stricken out reads "and upon the payment of a license fee of $5 per year to the collector of taxes of the District of Columbia."

Mr. CLARK of Wyoming. On what page of the RECORD?

Mr. SMITH of Michigan. Page 3338.

The PRESIDENT pro tempore. Without objection, the vote by which the amendment was agreed to will be reconsidered. It is reconsidered, and the amendment to the amendment will be stated.

The SECRETARY. In the amendment, on page 106, after line 8, after the word "thereto," strike out the words "and upon the payment of a license fee of $5 per year to the collector of taxes of the District of Columbia."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. BRISTOW. I offer an amendment, which I ask to have read.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 34, after line 23, insert:

That the Commissioners of the District of Columbia are hereby authorized to open, extend, or widen any street, avenue——

Mr. CURTIS. To save time, as this is clearly legislation, I make the point of order against it.

The PRESIDENT pro tempore. The Chair thinks the amendment ought to be stated.

Mr. CURTIS. We can save time. I think the Senator from Kansas will admit that it is subject to a point of order.

The PRESIDENT pro tempore. It is not good legislation to interrupt the reading of an amendment. The amendment will be read.

The Secretary read the amendment, as follows:

That the Commissioners of the District of Columbia are hereby authorized to open, extend, or widen any street, avenue, road, or highway to conform with the plan of the permanent system of highways in that portion of the District of Columbia outside of the cities of Washington and Georgetown, adopted under the act of Congress approved March 2, 1893, as amended by the act of Congress approved June 28, 1898, by condemnation under the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia: *Provided*, That the entire amount found to be due and awarded by the jury under such proceeding as damages for and in respect of the land condemned, plus the cost and expenses of said proceeding, shall be assessed by the jury as benefits: *And provided further*, That the costs and expenses of the condemnation proceedings taken under the provisions hereof, and the amounts awarded as damages for and in respect of the land condemned, shall be paid entirely from the revenues of the District of Columbia, and shall be repaid to said District of Columbia from the assessments for benefits and covered into the Treasury of the United States to the credit of the revenues of the District of Columbia; and such sum as is necessary for said purpose during the fiscal year to end June 30, 1914, is hereby appropriated, payable entirely from the revenues of the District of Columbia.

Mr. BRISTOW. Mr. President, before the point of order is made, I desire to say that I understand we have a system of highways that have been laid out and provided in the District of Columbia and accepted. Any street that is opened anywhere is opened in harmony with the plan which was adopted several years ago.

The amendment simply provides that when the commissioners believe that the public necessity requires the opening up of any of the highways which have already been adopted they shall proceed to open them up and assess the property that is benefited for the expense of opening up the highway.

Mr. CURTIS. The amendment applies only to existing highways?

Mr. BRISTOW. Only to existing highways.

Mr. CURTIS. I withdraw the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMITH of Michigan. I offer an amendment to come in as a new section.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. It is proposed to add as a new section the following:

That the act entitled "An act regulating the speed of automobiles in the District of Columbia, and for other purposes," approved June 29, 1906, be and the same is hereby amended as follows: "That the Commissioners of the District of Columbia be, and are hereby, authorized and empowered to make needful regulations, from time to time, defining the rate of speed and method of conduct of horseless or motor vehicles, bicycles, or horse-drawn vehicles within the District of Columbia, so as to provide for the preservation of order and the protection of life, limb, and property upon the different roads, highways, streets, avenues, alleys, and public reservations, and in all public parks and places."

Mr. SMITH of Michigan. Mr. President, I simply desire to say that this has frequently been suggested and is quite necessary. The regulations have not been overhauled for 10 years, and they are wholly inadequate. I think it is very appropriate, indeed, that we should take this action.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. JONES. I desire to offer an amendment to come in on page 22, after "twelve thousand," in line 5.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 22, after line 5, insert:

For paving with sheet asphalt K Street north, between Washington Circle and the bridge at Twenty-eighth Street west, $30,000.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MYERS. I offer an amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 26, after line 11, insert:

Northeast: New York Avenue, Florida Avenue to Bladensburg Road, grade and improve, $50,000.

Mr. MYERS. Mr. President, I offer this amendment at the request of residents of the District with whom I am acquainted and who have convinced me of the justice of their cause.

Mr. CURTIS. Let us have a vote upon it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NEWLANDS. I offer the following amendment, on page 34, after line 23.

The PRESIDENT pro tempore. The Senator from Nevada offers an amendment, which will be read.

The SECRETARY. On page 34, after line 23, insert:

That the Commissioners of the District of Columbia are hereby authorized, whenever in their judgment the public interests require it, to prepare a new highway plan for any portion of the District of Columbia, and submit the same for approval, after public hearing, to the highway commission, created by act of Congress approved March 2, 1893, entitled "An act to provide a permanent system of highways in that part of the District of Columbia lying outside of cities"; that such highway plans shall be prepared under the provisions of said act of Congress and an amendment thereto approved June 28, 1898, and that upon approval and recording of any such new highway plan it shall take the place of and stand for any previous plan for the portion of the District of Columbia affected.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Nevada.

The amendment was agreed to.

Mr. MYERS. I offer the following amendment.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 26, after the amendment just agreed to, insert:

Northeast: M Street, Bladensburg Road to Twenty-eighth Street, grade and improve, $6,000.

The amendment was agreed to.

Mr. MYERS. I offer the following amendment.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 26, after the amendment just agreed to, insert:

Northeast: Bladensburg Road, H Street to District line, grade and improve, $12,000.

The amendment was agreed to.

Mr. LA FOLLETTE. Mr. President, preliminary to an amendment which I wish to offer I take a moment to remind the Senate that a movement has been on foot for some time to merge the public utilities of the District of Columbia into a holding company outside of the District of Columbia, a foreign company.

That simply means, Mr. President, that there is to be an increase in the capitalization of the already grossly overcapitalized public utilities of the District of Columbia, and that means that the public of to-day and the public for all time, is to be unjustly burdened, unless this merger be prevented.

I introduced a bill last December making this proposed merger unlawful. January 7 I reintroduced it modified as to one minor provision. The bill is still pending before the Committee on the District of Columbia. The bill which I now offer as an amendment is modeled upon the statute of Massachusetts upon the same subject.

I do not believe that either the purpose of the amendment or the form in which I am offering it can be objected to by any Senator, unless it be, which I can not well believe, that some Senator is in favor of this unwarranted and unjust proceeding which is attempted to be carried through by the public utilities of the District of Columbia.

I send to the desk the bill which I propose as an amendment, to come in at the end of the pending bill.

The PRESIDENT pro tempore. The Senator from Wisconsin submits an amendment, which will be read.

The SECRETARY. It is proposed to add at the end of the bill the following section:

SEC. —. That it shall be unlawful for any foreign public utility corporation, or for any foreign or local holding corporation, or for any local street railroad corporation, gas corporation, electric corporation, telephone corporation, telegraph corporation, or any other local public utility corporation, directly or indirectly, to own, control, or hold or vote stock or bonds of any public utility corporation organized under any general incorporation law or special act of the United States or authorized under any law of the United States to do business in the District of Columbia, except as heretofore or hereafter expressly authorized by Congress; and it shall be unlawful for any public utility corporation organized or authorized as aforesaid to sell or transfer any portion of its stock or bonds to any other public utility corporation or holding corporation whatsoever, unless heretofore or hereafter expressly authorized by Congress so to do; and every contract, transfer, agreement to transfer, or assignment by any said public utility corporation organized or authorized as aforesaid of any portion of its stock or bonds without such authority shall be utterly void and of no effect. That the Supreme Court of the District of Columbia, on application of the District of Columbia by its commissioners or attorney, or on application of the United States by its proper officer, or on application of any shareholder interested in any such corporations, shall have jurisdiction in equity to dissolve any public utility corporation organized under any general incorporation law or special act of the United States, or authorized under any law of the United States to do business in the District of Columbia, for violation of any of the provisions of this section or of their charters; and, further, to require any foreign public utility corporation, or foreign or local holding corporation which owns, holds, or controls, or which shall hereafter own, hold, or control any such stock or bonds contrary to any of the provisions of this act, to sell or dispose of the same and to refrain from voting such stock or bonds: *Provided*, That in case the allegations in any bill filed in said court relate to the ownership of stock or bonds of a local corporation by any foreign corporation, then it must be shown to the satisfaction of the court that such ownership includes at least 20 per cent of the capital stock of the local corporation.

That the word "foreign" when used in this section shall be construed to mean foreign to the District of Columbia, and the word "local" when used in this section shall be construed to mean local in the District of Columbia.

That each provision of this section and every part of each provision is hereby declared to be an independent provision, and the holding of any provision or provisions, or part or parts thereof, to be void ineffective, or unconstitutional for any cause shall not be deemed to affect any other provision or part thereof.

Mr. LA FOLLETTE. Mr. President, I neglected to say one word that I want to add. The Commissioners of the District of Columbia have approved of this bill. It was prepared with the assistance of the corporation counsel of the District. In order to prevent the consummation of the merger for the time being the commissioners began an action against the officers of the several public utility corporations. This action I understand is still pending. But the commissioners are advised that without legislation such as is proposed in the bill which I have offered as an amendment there is small chance of affording any substantial protection to the public interest.

I trust, Mr. President, that no point of order will be made against my amendment, and if it is adopted, as it certainly ought to be, that the conferees will insist upon its being retained in the appropriation bill.

Mr. OLIVER. Mr. President, I do not intend to make a point of order against this amendment, but I wish to get some information about it. For that reason I should like to hear from some member of the Committee on the District of Columbia as to how far that committee has gone with the consideration of such legislation.

Mr. CURTIS. The first bill was introduced as suggested by the Senator from Wisconsin in December. I had no knowledge of that measure at all except such as a member of the committee would naturally have and from reading in the RECORD that the bill had been introduced. I had not read it. Some time in January the Senator from Wisconsin called my attention to the fact that a bill of this kind had been introduced and that I had been named as chairman of the subcommittee. I at once took hold of the bill and found who were the members of the subcommittee and consulted them in regard to a meeting. I was then busy with other measures and unable to call a meeting until I returned, as I recollect, from my trip to Kansas. I then called a meeting of the subcommittee, and only one other member of the subcommittee attended. We called up the other members by phone, and two of them, I remember, were sick and the other was out of the city, and the subcommittee adjourned. I was then appointed unexpectedly as chairman of the subcommittee on the District of Columbia appropriation bill.

I was also on the Committee on Indian Affairs that had charge of the Indian appropriation bill; I also had charge of the diplomatic and consular appropriation bill; and every day and every night from that time to this I have been engaged. I will say to Senators that some nights I have worked on these bills until 3 o'clock in the morning. I have not had time to take up these other measures. If I had had time, the subcommittee would have met and passed upon this measure, I assure the Senator. I want to say this—and I want to say it to Senators in connection with the formation of new committees—that I hope no Senator will try to get on any great number of committees in the next Congress, for, if he had my experience and wished to work, he would have to work harder than he really ought to work or than he will want to work.

Mr. LA FOLLETTE. Mr. President, I trust the Senator from Kansas did not construe anything which I said in referring to the time of the introduction of the bill as a criticism upon him. I have conferred with him a number of times about the bill, and I am certain that he has exercised diligence in endeavoring to have the bill considered by the subcommittee; but the terms of the bill are so simple, Mr. President, and the purpose of the bill is so unquestionably in the public interest, that I felt that it could, with entire propriety, be offered to the Senate without the intervention and consideration of a committee. For that reason I have asked to have it incorporated as an amendment to this bill.

Mr. BURTON. I should like to make an inquiry about this bill. It seems to me it is merely a prohibition on any holding company in possession of public utilities, against one public utility company holding stock in another; and a provision to the end that, where such holdings now exist, the companies having them shall dispose of them. That is practically this bill, is it not?

Mr. LA FOLLETTE. Substantially.

Mr. BURTON. And that is all of it?

Mr. LA FOLLETTE. Substantially.

Mr. OLIVER. Mr. President, I wish to repeat what I said before, that I do not propose either to make any point of order against this proposed legislation or to vote against it; but I think, without any regard whatever to the character of the legislation, that this is what might be termed a most flagrant instance of the evil to which I referred when alluding to other amendments that were offered, of tacking general legislation onto appropriation bills. Here is a measure that has never received the consideration of any committee either of the Senate or of the other House, and with regard to which the Members of the Senate have had no opportunity of obtaining information except from the explanation that has been made by the Senator from Wisconsin. I do not believe that that is the right way to legislate; and if it were not that I do not want to stand here as the defender of these public utility corporations, with which I have neither interest nor sympathy, I would make a point of order against the amendment. I refrain from doing so with extreme reluctance—I want to say that—not that I have anything against this particular legislation, but that I do not believe in legislating in this way.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Wisconsin [Mr. LA FOLLETTE].

The amendment was agreed to.

Mr. NEWLANDS. I offer an amendment, which I send to the desk, to come in on page 99, after line 20.

The PRESIDENT pro tempore. The Senator from Nevada offers an amendment, which will be stated.

The SECRETARY. On page 99, after line 20, it is proposed to insert:

That the Superintendent of Public Buildings and Grounds and the Engineer Commissioner of the District of Columbia, with the advice and cooperation of the Commission of Fine Arts, are hereby authorized to prepare and submit to Congress a plan for the gradual acquisition and development of parks and playgrounds in the District of Columbia with a view to meeting present and future requirements for health and recreation, designating in such plan the areas which they deem it desirable to acquire, the probable cost of purchase, and the probable cost of improvement, and designating such parks in the order of their importance as to the time of acquisition.

Where disagreement shall exist between such officials and the commission, the grounds of disagreement shall be stated. The landscape architect in the office of the Superintendent of Public Buildings and Grounds shall cooperate with such officials and such commission in such work; and the sum of $5,000, or so much thereof as may be necessary, is hereby appropriated, from any funds in the Treasury not otherwise appropriated, for the expenses of such inquiry and investigation.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

RIVER AND HARBOR BILL.

Mr. NELSON. I move that the Senate proceed to the consideration of House bill 28180, being the river and harbor bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, which had been reported from the Committee on Commerce with amendments.

Mr. NELSON. I ask unanimous consent that the formal reading of the bill may be dispensed with, that the bill be read for amendment, and that the committee amendments be first disposed of.

The PRESIDENT pro tempore. The Senator from Minnesota requests that the formal reading of the bill be dispensed with, that the bill be read for amendment, and the committee amendments be first considered. Is there objection? The Chair hears none, and it will be so ordered.

WASHINGTON RAILWAY & ELECTRIC CO. EXTENSION.

Mr. DILLINGHAM. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Vermont?

Mr. NELSON. I will yield to the Senator from Vermont if the matter for which he desires consideration does not lead to debate and will not displace the river and harbor bill.

The PRESIDENT pro tempore. It will not displace that bill.

Mr. DILLINGHAM. I ask unanimous consent for the present consideration of Senate bill 4681. I will say, in connection with my request, that this bill, if amended as recommended by the committee, will simply provide for extending the street railroad from Wisconsin Avenue down Macomb Street to the District line, by way of Massachusetts Avenue, past the American University buildings. In this connection I will also say that the American University have a large plant there and are about to open their doors, but there are no public means of conveyance in that section. This bill is approved by the railroad company, it is approved by the people in that neighborhood, and by the Commissioners of the District of Columbia. I know of nobody who opposes it.

The PRESIDENT pro tempore. The Senator from Vermont asks unanimous consent for the present consideration of a bill the title of which will be read for the information of the Senate.

The SECRETARY. A bill (S. 4681) to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co.; to authorize a change in the permanent system of highway plans; to provide for the condemnation of certain streets; and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the District of Columbia with amendments.

The first amendment was, in section 1, page 1, beginning in line 3, to strike out:

That the Washington Railway & Electric Co. of the District of Columbia be, and it is hereby, authorized and required to construct a double-track electric street railway beginning where its present tracks on Columbia Road intersect the tracks of the Capital Traction Co. at Eighteenth Street NW., thence over the existing tracks of the Capital Traction Co. along Calvert Street and across the Calvert Street Bridge, to Connecticut Avenue; and thence along Calvert street, as laid down on the amended highway plan hereinafter authorized, to Cleveland Avenue; thence along Cleveland Avenue to Thirty-fourth Street; thence along Thirty-fourth Street to Macomb Street; thence along Macomb Street to Massachusetts Avenue; and thence along Massachusetts Avenue in a northwesterly direction to the District line: *Provided*, That said railway shall be constructed and operated by overhead electric system from the eastern end of the Calvert Street Bridge to Massachusetts Avenue and the District line, and by underground electric system from Columbia Road and Eighteenth Street to the Calvert Street Bridge. That where the route provided for in this act coincides with the route of the Capital Traction Co. the existing double tracks of the said Capital Traction Co. shall be used in common upon terms mutually agreed upon, or, in case of disagreement, upon terms determined by the Supreme Court of the District of Columbia, which is authorized and directed to give notice and hearing to the interested parties and to fix and finally determine the terms of the joint trackage.

SEC. 2. That in order to provide for such street railway extension along Calvert Street, the Commissioners of the District of Columbia be, and they are hereby, authorized to prepare a new highway plan for Calvert Street, Rock Creek Drive, Twenty-eighth and Twenty-ninth Streets, between Connecticut Avenue and Cleveland Avenue, under the provisions contained in an act of Congress approved March 2, 1893, entitled "An act to provide a permanent system of highways in that part of the District of Columbia lying outside of cities," as said act is amended by an act of Congress approved June 28, 1898, and upon the completion and recording of said new highway plan it shall take the place and stand for any previous plan for said portion of the District of Columbia.

SEC. 3. That upon the recording of said new highway plan the Commissioners of the District of Columbia be, and they are hereby, authorized to institute, in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, in the Supreme Court of the District of Columbia, a proceeding in rem to condemn the land that may be necessary for the opening of Calvert Street, as laid down on said amended highway plan referred to in section 2 hereof, and of Cleveland Avenue between Calvert Street and Thirty-fourth Street, and of Thirty-fourth Street between Cleveland Avenue and Woodley Road, as laid down on said highway plan, and of Macomb Street between Wisconsin Avenue and Massachusetts Avenue: *Provided*, That the entire amount found to be due and awarded by the jury in said proceedings as damages for and in respect of the land to be condemned for said extension and widening, plus the cost and expenses of said proceedings, shall be assessed by the jury as benefits, and there is hereby appropriated out of the revenues of the District of Columbia an amount sufficient to pay the necessary costs and expenses of the said condemnation proceedings taken pursuant hereto, and for the payment of the amount awarded as damages, to be repaid to the District of Columbia from the assessments for benefits and covered into the Treasury to the credit of the revenues of the District of Columbia.

And in lieu thereof to insert:

That the Washington Railway & Electric Co. of the District of Columbia be, and it is hereby, authorized and required to construct an electric street railway beginning where its present tracks on Wisconsin Avenue intersect Macomb Street NW.; thence along Macomb Street to Massachusetts Avenue; and thence along Massachusetts Avenue in a northwesterly direction to the District line: *Provided*, That said railway shall be constructed and operated by overhead electric system.

The amendment was agreed to.

The next amendment was, in section 4 (2), line 3, after the words "after the," to strike out "date of confirmation of the verdict and award in the condemnation proceedings provided for in section 3 hereof" and insert "approval of this act," so as to make the section read:

SEC. 2. That the street railway extension provided for in section 1 hereof shall be begun within six months after the approval of this act, and shall be completed, with cars running thereon, within a period of two years from said date, and the said Washington Railway & Electric Co. shall, within 60 days from the date of the approval of this act, deposit with the collector of taxes of the District of Columbia the sum of $1,000 to guarantee the construction of said extension within the prescribed time, and if said extension is not so completed, with cars running thereon, within the prescribed time, said $1,000 shall be forfeited to the District of Columbia.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes."

THE FRANCIS GIRARD GRANT, ALABAMA.

Mr. JOHNSTON of Alabama. Will the Senator from Minnesota yield to me for a moment?

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Alabama?

Mr. NELSON. Yes; I will yield to the Senator from Alabama, but I trust no other Senator will ask me to yield.

Mr. JOHNSTON of Alabama. I ask unanimous consent for the present consideration of House bill 11478. It is purely a local bill, which has passed the other House.

The PRESIDENT pro tempore. The Senator from Alabama asks unanimous consent for the present consideration of a bill the title of which will be read for the information of the Senate.

The SECRETARY. A bill (H. R. 11478) to quiet title and possession with respect to a certain unconfirmed and located private land claim in Baldwin County, Ala., in so far as the records of the General Land Office show said claim to be free from conflict.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It provides that all the right, title, and interest of the United States in and to the lands

situate in section 44, township 1 north, range 2 east, and section 49, township 1 north, range 1 east, containing 639.97 acres, in Baldwin County, Ala., known as the Francis Girard grant, shall be, in so far as the records of the General Land Office show the land to be free from conflict, granted, released, and relinquished by the United States, in fee simple, to the respective persons, estates, firms, or corporations, who would be the true and lawful owners under the laws of Alabama, including the laws of prescription had the private-land claim of Francis Girard been confirmed by the third section of the act of March 3, 1819 (3 Stat., p. 528), and to their heirs and assigns forever, as freely and completely, in every respect whatever, as could be done by patents issued therefor according to law; but nothing in this act shall in any manner abridge, divest, impair, injure, or prejudice any valid right, title, or interest of any person or persons in or to any portion or part of the lands mentioned, the true intent of the bill being to relinquish and abandon, grant, give, and concede any and all right, interest, and estate, in law or equity, which the United States is or is supposed to be entitled to in such lands, in favor of all persons, estates, firms, or corporations who would be the true and lawful owners under the laws of the State of Alabama, including the laws of prescription, in the absence of the interest and estate of the United States. The Department of the Interior shall cause patents to issue for such lands, and such patents shall issue in the name of the original claimant, and when issued shall be held for the use and benefit of the true and lawful owner or owners.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RIVER AND HARBOR BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28180) making appropriation for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The PRESIDENT pro tempore. The reading of the bill will be proceeded with.

Mr. BURTON. Mr. President, I desire to submit some general remarks on this bill, and I think there are one or two other Senators who also desire to speak, but perhaps the best way is to proceed with the bill for awhile and we will postpone the discussion of it until to-morrow.

Mr. NELSON. I wish that we might proceed to act on the amendments and the debate can follow afterwards. I do not want, of course, to cut off any Senator from debate.

The PRESIDENT pro tempore. The reading will be proceeded with.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Commerce was, on page 1, after line 9, to insert:

Improving Bass Harbor Bar, Me.: Completing improvement in accordance with the report submitted in House Document No. 1128, Sixty-second Congress, third session, $10,000.

The amendment was agreed to.

The next amendment was, on page 2, after line 2, to insert:

Improving Deer Island Thoroughfare, Me.: Completing improvement in accordance with the report submitted in House Document No. 1128, Sixty-second Congress, third session, $40,000.

The amendment was agreed to.

The next amendment was, on page 2, after line 6, to insert:

Improving Carvers Harbor, Vinalhaven, Me.: Completing improvement in accordance with the report submitted in House Document No. 624, Sixty-second Congress, second session, $16,000.

The amendment was agreed to.

The next amendment was, on page 2, after line 10, to insert:

Improving Pepperells Cove, Me.: Completing improvement, $63,400.

The amendment was agreed to.

The next amendment was, on page 2, after line 19, to strike out:

Improving Medomak River, Me., in accordance with the report submitted in House Document No. 674, Sixty-second Congress, second session, $8,500.

The amendment was agreed to.

Mr. NELSON. I move the amendment which I send to the desk be inserted in lieu of the words stricken out by the committee amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 12, in lieu of the matter stricken out in lines 20 to 23, inclusive, it is proposed to insert:

Improving Medomak River, Me., in accordance with the report submitted in House Document No. 674, Sixty-second Congress, second session: Completing improvement, $17,000.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 3, after line 14, to insert:

Improving harbor at Plymouth, Mass.: Completing improvement in accordance with report submitted in House Document No. 1194, Sixty-second Congress, third session, and subject to the conditions therein contained, $83,500.

The amendemnt was agreed to.

The next amendment was, at the top of page 4, to insert:

Improving harbor of refuge, Block Island, R. I.: Continuing improvement, $50,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 2, to insert:

Harbor of refuge at Point Judith, R. I.: For improvement in accordance with the report submitted in House document No. 911, Sixtieth Congress, first session, $100,000.

The amendment was agreed to.

The next amendment was, on page 4, line 11, after "$164,800," to insert: "Improving same in accordance with the report submitted in House Document No. 1369, Sixty-second Congress, third session, $100,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to complete the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $827,800, exclusive of the amount herein and heretofore appropriated: *Provided further*, That no work in the harbor proper north of Fields Point shall be done until the Secretary of War is satisfied that the State or city shall have completed their proposed expenditures in the combined Providence and Pawtucket Harbors, up to at least $2,000,000, for public terminals or other permanent public harbor improvements: *Provided further*, That the dredged material may be deposited on shallow areas near the city of Providence if plans therefor can be arranged with local interests whereby the cost of the work to the United States will not be increased over that of towing to the present dumping ground;" so as to make the clause read:

Improving Providence River and Harbor, R. I.: Completing improvement in accordance with the report submitted in House Document No. 919, Sixtieth Congress, first session, $164,800; improving same in accordance with the report submitted in House Document No. 1369, Sixty-second Congress, third session, $100,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to complete the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $827,800, exclusive of the amounts herein and heretofore appropriated: *Provided further*, That no work in the harbor proper north of Fields Point shall be done until the Secretary of War is satisfied that the State or city shall have completed their proposed expenditures in the combined Providence and Pawtucket Harbors, up to at least $2,000,000, for public terminals or other permanent public harbor improvements: *Provided further*, That the dredged material may be deposited on shallow areas near the city of Providence if plans therefor can be arranged with local interests whereby the cost of the work to the United States will not be increased over that of towing to the present dumping ground.

The amendment was agreed to.

The next amendment was, on page 5, line 15, after "$10,000," to insert: "For improvement in accordance with the report submitted in House Document No. 1258, Sixty-second Congress, third session, $80,000; in all, $90,000;" so as to make the clause read:

Improving harbor at New Haven, Conn.: For maintenance, $10,000; for improvement in accordance with the report submitted in House Document No. 1258, Sixty-second Congress, third session, $80,000; in all, $90,000.

The amendment was agreed to.

The next amendment was, on page 6, line 12, after "$20,000" to insert "for improving the channel up to the Main Street Bridge in accordance with the report submitted in House Document No. 1333, Sixty-first Congress, third session; completing improvement, $235,700; in all, $255,700," so as to make the clause read:

Improving harbor at Flushing Bay, N. Y.: For maintenance, $20,000; for improving the channel up to the Main Street Bridge in accordance with the report submitted in House Document No. 1333, Sixty-first Congress, third session; completing improvement, $235,700; in all, $255,700.

The amendment was agreed to.

The next amendment was, on page 8, line 24, after "$250,000," to insert: "*Provided*, That so much of the foregoing amount as may be recommended by the Chief of Engineers and approved by the Secretary of War may be expended within the limits of the project heretofore adopted by Congress in securing a depth of not to exceed 35 feet in the through channel of East River and not to exceed 30 feet elsewhere," so as to make the clause read:

Removing obstructions in East River and Hell Gate, New York: Continuing improvement, including work at the Middle Ground and in the channel between North Brother and South Brother Islands, $250,000. *Provided*, That so much of the foregoing amount as may be recommended by the Chief of Engineers and approved by the Secretary of

War may be expended within the limits of the project heretofore adopted by Congress in securing a depth of not to exceed 35 feet in the through channel of East River and not to exceed 30 feet elsewhere.

The amendment was agreed to.

The next amendment was, on page 9, line 8, after "$100,000," to insert: "For improvement in accordance with the project numbered 3 in the report submitted in House Document No. 557, Sixty-second Congress, second session, $5,000: *Provided*, That no construction work shall be executed by the Federal Government beyond the channel limits of the existing projects until local or other interests shall furnish, free of cost to the United States, the necessary land for the right of way required for said project; in all, $105,000," so as to make the clause read:

Improving Harlem River, N. Y.: Continuing improvement, $100,000; for improvement in accordance with the project numbered 3 in the report submitted in House Document No. 557, Sixty-second Congress, second session, $5,000: *Provided*, That no construction work shall be executed by the Federal Government beyond the channel limits of the existing projects until local or other interests shall furnish, free of cost to the United States, the necessary land for the right of way required for said project; in all, $105,000.

The amendment was agreed to.

The next amendment was, on page 10, after line 9, to insert:

Improving Hudson River Channel of New York Harbor, N. Y., in accordance with the report submitted in House Document No. 719, Sixty-second Congress, second session, $200,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to prosecute the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $250,000, exclusive of the amount herein appropriated.

The amendment was agreed to.

The next amendment was, on page 11, after line 14, to insert:

Improving Absecon Inlet, N. J., by dredging, to keep an open channel until the completion of the dredge heretofore authorized, $45,000: *Provided*, That no part of the appropriation herein made shall be available for expenditure until the Secretary of War shall be satisfied that local interests have made provision for furnishing the sum of $50,000 for said improvement and have placed the same to his credit and subject to his order in a bank to be designated by him.

The amendment was agreed to.

The next amendment was, on page 13, after line 4, to strike out:

Improving Woodbury Creek, N. J., in accordance with the report submitted in House Document No. 635, Sixty-second Congress, second session, and subject to the conditions set forth in said document, $8,000.

Mr. NELSON. I move that that amendment be disagreed to.

Mr. BURTON. Mr. President, just a word about that amendment. I trust the chairman of the committee will agree that a sufficient sum shall be provided to complete that project. The estimate is $38,000. In the case of two or three amendments on the second page of the bill, for instance, the item for improving Deer Island Thoroughfare, Me., provision is made for completing the whole improvement, $40,000. The engineer in reporting upon the Woodbury Creek, N. J., project says:

A plan of improvement at an estimated cost of $38,000 for first construction, with $2,000 annually for maintenance, is presented.

And he adds this:

The estimated first cost—

That is the $38,000—

should be made available in one appropriation.

It seems very unbusinesslike to appropriate these small amounts, and if the Senator from Minnesota will allow me, I should like to suggest that there be added at the end, in place of "$8,000," the words "completing improvement, $38,000."

Mr. NELSON. I have no objection to that amendment. The committee amendment may be disagreed to, and the amendment suggested by the Senator from Ohio may be inserted.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was rejected.

Mr. BURTON. Now, I move to strike out "$8,000" and insert "completing improvement, $38,000."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 13, line 14, before the word "Street," to strike out "Laylor" and insert "Lalor," and in line 15, before the word "Street," to strike out "Laylor" and insert "Lalor," so as to make the clause read:

Improving Delaware River, Pa., N. J., and Del.: Continuing improvement and for maintenance from Allegheny Avenue, Philadelphia, to the sea, $1,750,000; for maintenance of improvement from Allegheny Avenue, Philadelphia, to Lalor Street, Trenton, $20,000; and completing improvement above Lalor Street, Trenton, in accordance with the report submitted in House Document No. 830, Sixty-first Congress second session, and subject to the conditions recommended by the Chief of Engineers on page 2 of said document, $114,000; in all, $1,884,000.

The amendment was agreed to.

The next amendment was, on page 14, line 13, before the word "bridges," to insert "channel spans of the," so as to make the clause read:

Improving Allegheny River, Pa., in accordance with the report submitted in House Document No. 540, Sixty-second Congress, second session: The proviso attached to the item for this improvement carried in the river and harbor act approved July 25, 1912, that the appropriation of $300,000 therein contained be made subject to the condition that local interests should contribute an equal amount, is hereby revoked, and in lieu thereof the expenditure of said $300,000 is made subject to the following condition: *Provided*, That no part of said amount shall be expended until the Secretary of War shall have received satisfactory assurances that the channel spans of the bridges forming unreasonable obstructions to the navigation of the Allegheny River at Pittsburgh will be modified as recommended by a board of engineer officers in a report dated November 23, 1910.

The amendment was agreed to.

Mr. NELSON. Mr. President, in line 15, page 14, I move to strike out the word "modified" and insert the word "widened."

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 14, line 15, it is proposed to strike out the word "modified" and insert the word "widened."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 16, line 5, after the word "session," to strike out "$100,000" and insert "completing improvement, $305,250," so as to make the clause read:

Improving harbor at Baltimore, Md., with a view to widening the channel of approach at York Spit, Chesapeake Bay, in accordance with the report submitted in House Document No. 1190, Sixty-second Congress, third session, completing improvement, $305,250.

The amendment was agreed to.

The next amendment was, on page 17, after line 6, to insert:

Improving Western Branch of Elizabeth River, Va.: Completing improvement in accordance with the report submitted in House Document No. 566, Sixty-second Congress, second session, $82,000.

The amendment was agreed to.

The next amendment was, on page 18, after line 13, to insert:

Improving harbor of refuge at Cape Lookout, N. C.: Continuing improvement, $500,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to prosecute the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $600,000, exclusive of the amounts herein and heretofore appropriated.

The amendment was agreed to.

The next amendment was, on page 20, line 13, after "$20,000," to insert "*Provided*, That any part of said appropriation and local contribution unexpended in completing the improvement of said channel may be used in improving and enlarging the turning basin in front of the town of Beaufort," so as to make the clause read:

Improving waterways connecting Core Sound and Beaufort Harbor, N. C.: Completing improvement of channel by way of Taylors Creek, in accordance with the report submitted in House Document No. 546, Sixty-second Congress, second session, and subject to the conditions set forth in said document, $20,000: *Provided*, That any part of said appropriation and local contribution unexpended in completing the improvement of said channel may be used in improving and enlarging the turning basin in front of the town of Beaufort.

The amendment was agreed to.

The next amendment was, on page 20, line 24, to strike out "$120,000" and insert "$65,000," so as to make the clause read:

Improving Winyah Bay, S. C.: Continuing improvement and for maintenance, $65,000.

The amendment was agreed to.

The next amendment was, on page 21, after line 2, to insert:

Improving Archers Creek, S. C.: The paragraph providing for the improvement of Archers Creek, S. C., in the river and harbor act approved July 25, 1912, is hereby amended to read as follows: Improving Archers Creek, S. C: Completing improvement in accordance with the report submitted in House Document No. 513, Sixty-second Congress, second session, $25,000: *Provided*, That the land required for the widening be donated to the United States free of cost, and that permission be given for the deposit of the dredged materials on adjacent lands free of cost to the United States.

The amendment was agreed to.

The next amendment was, on page 22, after line 8, to insert:

Improving Fancy Bluff Creek, connecting Turtle River and Brunswick Harbor with Little Satilla River, Ga.: Completing improvement, in accordance with the report submitted in House Document No. 1342, Sixty-second Congress, third session, $8,000.

The amendment was agreed to.

The next amendment was, at the top of page 23, to insert:

Improving Savannah River at Augusta, Ga., in extension of the project authorized in the act of June 25, 1910, in accordance with the report submitted in House Document No. 1319, Sixty-second Congress, third session, $60,000, provided a like sum of $60,000 be contributed for said improvement by the city of Augusta under the same terms and conditions, as to such contribution, as are contained and provided in said act of June 25, 1910.

The amendment was agreed to.

The next amendment was, on page 24, after line 4, to insert:

Improving channel between St. Johns River, Fla., and Cumberland Sound, Ga. and Fla., by way of Sisters Creek, in accordance with the report submitted in House Document No. 898, Sixty-second Congress, second session, $50,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to complete the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $51,000, exclusive of the amount herein appropriated.

The amendment was agreed to.

The next amendment was, on page 24, after line 14, to insert:

Protecting shore of Anastasia Island, Fla., by groins, $15,000.

The amendment was agreed to.

The next amendment was, on page 25, line 9, after the word "document," to strike out "$200,000" and insert "$100,000," so as to make the clause read:

Improving Hillsboro Bay, Fla.: Continuing improvement in accordance with the report submitted in House Document No. 634, Sixty-first Congress, second session, and subject to the conditions recommended by the Chief of Engineers, United States Army, on page 2 of said document, $100,000.

The amendment was agreed to.

The next amendment was, on page 25, after line 12, to insert:

Improving harbor at Miami (Biscayne Bay), Fla., in accordance with the report submitted in House Document No. 554, Sixty-second Congress, second session: The proviso in the river and harbor act approved July 25, 1912, that the appropriation of $100,000 therein contained, namely, "that no work shall be done by the United States on said project until the Secretary of War is satisfied that the portion of the work contemplated in this project to be done by the Florida East Coast Railway Co. will be promptly completed," is hereby amended so as to read as follows: "*Provided*, That no work shall be done by the United States on said project until the Secretary of War is satisfied that suitable terminal facilities will be provided as contemplated by paragraph 8 of the report of the Board of Engineers for Rivers and Harbors as set forth on page 15 of said Document No. 554."

The amendment was agreed to.

The next amendment was, on page 27, after line 7, to insert:

Improving Lake Crescent and Dunns Creek, Fla., from the St. Johns River to Crescent City, Fla.: Completing improvement in accordance with the report submitted in House Document No. 1320, Sixty-second Congress, third session, $25,000: *Provided*, That no part of the money herein appropriated shall be expended for the purchase of the right of way.

The amendment was agreed to.

The next amendment was, on page 29, line 17, after the word "increased," to insert "except to the extent of $20,000, which amount is hereby appropriated: *Provided further*, That not more than $20,000 shall be paid in any case for all rights claimed in and to said Grants Pass," so as to make the clause read:

Improving channel connecting Mobile Bay and Mississippi Sound, Ala.: The project adopted by the river and harbor act approved July 25, 1912, may, upon recommendation of the Chief of Engineers and approval of the Secretary of War, be modified to include the whole or any part of Grants Pass: *Provided*, That all rights claimed in and to Grants Pass shall be released and surrendered to the United States and that any saving or difference in the cost of actual construction that may result from the use of any or all of Grants Pass may, as compensation for said rights, be paid to the present owners of the pass or their assigns: *Provided further*, That the total cost of the completion of the project shall not be thereby increased except to the extent of $20,000, which amount is hereby appropriated: *Provided further*, That not more than $20,000 shall be paid in any case for all rights claimed in and to said Grants Pass.

The amendment was agreed to.

The next amendment was, on page 31, line 4, after the word "Vicksburg," to strike out "$10,000" and insert "$60,000," so as to make the clause read:

Improving Yazoo River, Miss.: For maintenance of improvement of mouth of Yazoo River and harbor of Vicksburg, $60,000.

The amendment was agreed to.

The next amendment was, on page 33, after line 19, to strike out:

Improving channel from Galveston Harbor to Texas City, Tex.: Continuing improvement and for maintenance by dredging within the limits recommended in the report submitted in House Document No. 328, Sixty-first Congress, second session, $200,000.

The amendment was agreed to.

The next amendment was, at the top of page 34, to insert:

Improving channel from Galveston Harbor to Texas City, Tex.: Continuing improvement and for maintenance in accordance with report submitted in House Document No. 1390, Sixty-second Congress, third session, $500,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to complete said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $1,100,000, exclusive of the amounts herein and hereby appropriated.

Mr. NELSON. I offer an amendment to that paragraph, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 34, line 7, it is proposed to strike out from the committee amendment the word "complete" and insert "prosecute"; also, in line 10, to strike out "hereby" and insert "heretofore."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 34, after line 11, to insert:

Improving Houston ship channel, Tex.: Continuing improvement and for maintenance. The Secretary of War may enter into a contract for or construct two suitable dredging plants to be used for the maintenance of the channel, when completed under the existing contract authorized by the act approved June 25, 1910, to be paid for as appropriations may from time to time be made by law not to exceed in the aggregate $400,000: *Provided*, That one-half of the cost of said dredging plants be contributed and furnished by the Harris County ship channel navigation district: *And provided further*, That before letting the contract for the construction of each dredging plant or beginning the work of its construction, said navigation district shall place to the credit and subject to the order of the Secretary of War, in a United States depository to be designated by him, the sum of $50,000, and shall satisfy him that the remainder of one-half of the cost of said dredging plant will be deposited in like manner from time to time as called for by him.

The amendment was agreed to.

The next amendment was, on page 36, line 18, after the word "authorized," to strike out "and commencing the construction of two additional locks and dams, $250,000," and insert "and for an accurate instrumental survey of the river, $350,000"; and in line 22, after the words "in all," to strike out "$275,000" and insert "$375,000," so as to make the clause read:

Improving Brazos River, Tex.: Continuing improvement from Old Washington to Waco by the construction of locks and dams heretofore authorized and for an accurate instrumental survey of the river, $350,000; continuing improvement and for maintenance by open-channel work from Velasco to Old Washington, $25,000; in all, $375,000.

The amendment was agreed to.

The next amendment was, on page 37, line 4, after the words "authorized and," to strike out "commencing the construction of" and insert "locating," so as to make the clause read:

Improving Trinity River, Tex.: Continuing improvement with a view to obtaining a depth of 6 feet between the mouth and Dallas by the construction of locks and dams heretofore authorized and locating two additional locks and dams, $255,000; continuing improvement and for maintenance by open-channel work, $15,000; in all, $270,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 5, to insert:

Improving Arkansas River, Ark.: Completing improvement by protecting the north bank thereof in front of the Crawford County Levee, south of Van Buren, in sections 8, 9, and 10 in township 8 north, range 30 west, which shall be considered extraordinary emergency work, $30,000. This appropriation shall be expended as soon as practicable in continuation of the work now in progress at said point, and under a plan to be prepared by the Chief of Engineers.

The amendment was agreed to.

Mr. NELSON. I offer an amendment to come in at the end of line 23, page 38.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 38, after line 23, it is proposed to insert the following paragraph:

Improving White River at Devall Bluff, Ark., in accordance with the report submitted in House Document No. 1259, Sixty-second Congress, third session: Completing improvement, $14,000: *Provided*, That the necessary stumpage and brush for such improvement shall be furnished free of cost to the United States.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 39, line 20, before the word "maintenance," to insert "improvement and," and in the same line, after the word "maintenance," to strike out "$25,000" and insert "$76,000," so as to make the clause read:

Improving harbor at Cleveland, Ohio: For improvement and maintenance, $76,000.

The amendment was agreed to.

The next amendment was, on page 40, after line 22, to insert:

Improving harbor at Arcadia, Mich.: Continuing improvement and for maintenance, including repair and reconstruction of the north pier, $20,000.

The amendment was agreed to.

The next amendment was, on page 41, line 10, before the word "improvement," to strike out "Continuing" and insert "Completing," and in the same line, after the word "maintenance," to strike out "$246,000" and insert "$312,000," so as to make the clause read:

Improving harbor at Manistee, Mich.: Completing improvement and for maintenance, $312,000.

The amendment was agreed to.

Mr. NELSON. I offer an amendment to come in on line 19, page 41.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 41, in line 19, it is proposed to strike out "$3,000" and insert:

Eight thousand dollars, of which amount $5,000, or so much thereof as may be necessary, may be expended for the extension eastwardly of the revetment along the north side of the cut connecting the Kalamazoo River with Lake Michigan.

Mr. BURTON. I should like to ask the Senator from Minnesota a question. Is that all for maintenance? Is it not for continuing the improvement?

Mr. NELSON. It is for maintenance in one sense. It is to restore old revetment work that has been destroyed.

Mr. BURTON. But is it properly included under that term?

Mr. NELSON. I am told by the Army engineers that it would come under that head.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 42, after line 4, to insert:

Improving Saginaw River, Mich., up to the mouth of the Tittabawassee River, in accordance with the report submitted in House Document No. 740, Sixty-first Congress, second session, additional to the sums appropriated and authorized to be appropriated therefor in the river and harbor appropriation act approved June 25, 1910, $100,000.

The amendment was agreed to.

The next amendment was, on page 42, line 18, after the word "maintenance," to strike out "$10,000" and insert "$24,000, of which amount not exceeding one-half may be expended for the improvement of that portion of said river above and to the westward of Ogden Street Bridge," so as to make the clause read:

Improving Menominee Harbor and River, Mich. and Wis.: For maintenance, $24,000, of which amount not exceeding one-half may be expended for the improvement of that portion of said river above and to the westward of Ogden Street Bridge.

Mr. NELSON. I offer an amendment to that amendment.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. On page 42, line 19, in the committee amendment, it is proposed to strike out "one-half" and insert "two-thirds."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. NEWLANDS. I offer an amendment which I send to the desk, and ask that it be printed and lie on the table and be printed in the RECORD.

The PRESIDENT pro tempore. The Senator from Nevada offers an amendment to the pending bill, which will lie on the table and be printed in the RECORD.

The amendment referred to is as follows:

Insert the following after line 10, page 65:

"SEC. 2½. That for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end for the storage of flood waters in the watershed of such navigable rivers, including the beneficial use and control of such flood waters, in the maintenance so far as practicable of a standard flow for navigation, the reclamation of arid and swamp lands, and the development of water power; and for the protection of watersheds from denudation, erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies in plans and works, having in view such river regulation and control, the sum of $5,000,000 annually for each of the years following the 1st day of July, 1912, and up to the date of the completion and opening to commerce of the Panama Canal, and thereafter the sum of $50,000,000 annually for each of the 10 years following the completion of the Panama Canal, is hereby reserved, set aside, and appropriated and made available until expended, out of any moneys not otherwise appropriated, as a special fund in the Treasury to be known as the river regulation fund.

"That of the said river regulation fund, until otherwise directed by law, one-tenth thereof shall be apportioned to the rivers on the Atlantic coast, one-tenth thereof to the rivers on the Gulf coast outside of the Mississippi River, one-fifth thereof to the Mississippi River from St. Louis to the Gulf, one-tenth thereof to the Missouri River and its tributaries, one-tenth thereof to the Ohio River and its tributaries, one-tenth thereof to the upper Mississippi River above St. Louis and its tributaries, one-tenth thereof to the Sacramento and San Joaquin Rivers and their tributaries in California, one-tenth thereof to the Columbia and Snake Rivers and their tributaries in Oregon, Washington, and Idaho, and one-tenth thereof in the connection of the Great Lakes with the Ohio and Mississippi Rivers.

"That a board is hereby created, to be known as the board of river regulation, consisting of the Chief of Engineers of the United States Army, the chairman of the Panama Commission, the chairman of the Board of Review of the Engineer Corps of the Army, the chairman of the Mississippi River Commission, the Director of the United States Geological Survey, the Chief of the Weather Bureau, the Forester of the Department of Agriculture, the Director of the Reclamation Service, the Chief of the Drainage Division of the Department of Agriculture, the Secretary of the Smithsonian Institution, one hydraulic engineer, one sanitary engineer, and one electrical engineer; the last three to be appointed by the President and to hold office at his pleasure, and each to receive an annual compensation of $7,500, payable out of the river regulation fund.

"The Chief of Engineers shall be the chairman of such board, and the secretary shall be annually elected by the board from its members.

"That the functions of said board shall be to investigate and obtain full information concerning all matters involved in or specifically related to the objects set forth in this section and for such purpose is authorized to expend a suitable and necessary proportion of the moneys therein appropriated; but said board shall not expend or incur liability for the expenditure of any money for the construction or execution of plans or projects without the specific approval of Congress, as hereinafter set forth; that said board is hereby authorized and directed to enlist through the President the services of any Federal department or bureau the statutory authority of which may involve investigations or constructive work that is necessary or desirable in the comprehensive performance of the objects set forth in such paragraph, and to bring into cooperation and to harmonize and unify the work of said departments or bureaus as may be necessary to provide against duplication or unwarranted or incomplete work with respect to the objects herein provided; and that said board is authorized to defray the expenses of such investigations or assistance to the extent of the ultimate cost thereof to said departments or bureaus through a transfer of equivalent proportions of the appropriation herein provided.

"That the board shall develop, formulate, and prepare plans for the accomplishment of the purposes herein provided, and shall report the same to Congress annually and at such other times as may be required; and whenever the recommendations or any parts thereof in said report shall receive the approval of Congress, the said board shall proceed to construct and execute the same in accordance with the plans so approved: *Provided*, That the provisions of this section shall be so administered as in no way to supersede or conflict with any specific provisions which Congress shall from time to time make by way of appropriations other than such as are made by this act for work and improvements to be performed or maintained by the Corps of Engineers, United States Army, but that all work prescribed under this section shall be supplemental to and coordinated with the work as specifically prescribed by Congress in other acts.

"That the board shall in all cases where possible and practicable encourage, promote, and endeavor to secure the cooperation of State and local government bodies, public and quasi public corporations, private associations, and persons in carrying out the purposes and objects of this act, including the securing of the financial cooperation of said parties; that it shall negotiate and arrange plans for the apportionment of work, costs, and benefits, and to secure the agreement and consent of said parties, contingent upon the final approval of same by Congress as herein provided, which approval and consent may include the acceptance and use of any funds or property donated or subscribed or in any way provided for cooperative work; but no moneys shall be expended under any arrangement for cooperation approved by Congress until the funds to be provided by the parties to such arrangement shall have been made available for disbursement.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 44, after line 9, to insert:

Grand Calumet River, Ind.: A change in the location of the channel of the Grand Calumet River through the lands of the Gary Land Co. and the Indiana Steel Co., corporations organized under the laws of the State of Indiana, in sections 34, 35, and 36, township 37 north, range 8 west, and in sections 2 and 3, township 36 north, range 8 west, Lake County, Ind., from the original location of such channel to a new location within the strip of land hereinafter described and the construction of a new channel within said strip of land, as the same has been done by said companies, is hereby authorized and approved: *Provided*, That the said Gary Land Co. and the said Indiana Steel Co. shall convey to the United States, free of cost, the right and easement to use said new channel and said strip of land as and for a free public waterway of the United States, and upon the acceptance of such conveyance by the Secretary of War the old channel of the river through the said lands shall be abandoned as a navigable waterway, and in its stead the aforesaid new channel, and any enlargement thereof which Congress may hereafter authorize shall become and forever remain a free public waterway of the United States and shall be subject to the laws heretofore and hereafter enacted by Congress for the improvement, preservation, and protection of navigable waters: *Provided further*, That the said companies or corporations shall have the right to occupy and use so much of the said strip of land as lies outside the high-water limits of the said new channel until such time as Congress shall authorize and make provision for the enlargement, widening, or other improvement of said channel, it being understood that such occupation and use shall be for temporary purposes only, and that the said companies or corporations shall place no structures or works of any kind on said strip or do anything that will tend to obstruct said channel or interfere with its free navigation by the public: *And provided further*, That nothing herein contained shall be construed as conferring any right, power, or privilege in conflict with any law or statute of the State of Indiana, in which said river is located. The said strip of land above referred to is described as follows: Beginning at a point on the west line of section 3, township 36 north, range 8 west, Lake County, Ind., which is 323.3 feet south of the northwest corner of said section; thence running easterly 3,430 feet, more or less, along a straight line, which, if continued, would intersect the east line of said section 3 at a point which is 319.6 feet south of the northeast corner of said section 3; thence along a curve convex to the south 1,017.45 feet, said curve having a radius of 5,829.6 feet; thence northeasterly 1,580 feet, more or less, along a straight line, said straight line making an angle of 10° with the first-described straight line; thence along a curve convex to the north 900 feet, more or less, said curve having a radius of 5,629.6 feet, to a point which is 100 feet, more or less, north of the south line of section 35 and also 1,170 feet, more or less, west of the middle line of said section 35; thence along a curve convex to the north 1,171.5 feet, more or less, to a point on the middle line of section 35, which is 154 feet north of the south line of said section 35; thence easterly 1,612.5 feet, more or less, along a straight line, which, if continued, would intersect the east line of said section 35 at a point which is 176 feet north of the southeast corner of said section 35; thence along a curve convex to the southeast 413.06 feet, said curve having a radius of 623.7 feet; thence northeasterly along a straight line 1,150 feet, more or less, to the south shore of the old river bed of the Grand Calumet River, said straight line making an angle of 38° with the last-described straight line; thence westerly 450 feet, more or less, along the south shore of the said old river bed of the Grand Calumet River; thence southwesterly 700 feet, more or less, along a straight line which is parallel to the aforementioned 1,150-foot line and 150 feet distant from same (measured at right angles); thence along a curve convex to the southeast 313.88 feet, said curve having a radius of 473.7 feet, and being parallel to the aforementioned 413.06-foot curve and 150 feet distant from same (measured at right angles); thence westerly 2,700 feet, more or less, along a straight line which is parallel to the aforementioned 1,012.5-foot line and 150 feet distant from same (measured at right angles); thence along a curve convex to the north 1,017.45 feet, said

curve having a radius of 5,829.6 feet, and being parallel to the aforementioned 900-foot curve and 200 feet distant from same (measured at right angles); thence southwesterly along a straight line 1,580 feet, more or less, said line being parallel to the aforementioned 1,580-foot line and 200 feet distant from same (measured at right angles); thence along a curve convex to the south 982.54 feet, said curve having a radius of 5,629.6 feet, and being parallel to the aforementioned 1,017.45-foot curve and 200 feet distant from same (measured at right angles); thence westerly 3,430 feet, more or less, along a straight line which is parallel to the aforementioned 3,430-foot line and 200 feet distant from same (measured at right angles) to a point on the west line of section 3; thence southerly along said line of said section 3 200 feet, more or less, to the point of beginning, containing approximately 46.209 acres.

The amendment was agreed to.

The reading of the bill was continued to line 9, on page 50.

Mr. NELSON. I offer an amendment, which I send to the desk, to come in at the end of line 9, page 50.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 50, line 9, after the word "available," it is proposed to strike out the period and insert a semicolon and the following:

And the Secretary of War is hereby directed to report to the House, as early as practicable, all encroachments and obstructions in the Chicago River and all its branches, together with such encroachments as have been made in and along the Lake Front between Lincoln Park and the Indiana State line.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, in the item of appropriation for improving Mississippi River from Head of Passes to the mouth of the Ohio River, on page 51, line 1, after the word "levees," to insert "which shall be considered extraordinary emergency work, and which may be done in the discretion of the Secretary of War, by hired labor, and without regard to hours, or otherwise," so as to read:

Improving Mississippi River from Head of Passes to the mouth of the Ohio River, including salaries, clerical, office, traveling, and miscellaneous expenses of the Mississippi River Commission: Continuing improvement with a view to securing a permanent channel depth of 9 feet, $6,000,000, which sum shall be expended under the direction of the Secretary of War in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for the general improvement of the river, for the building of levees, which shall be considered extraordinary emergency work, and which may be done in the discretion of the Secretary of War, by hired labor, and without regard to hours, or otherwise, between the Head of Passes and Cape Girardeau, Mo., and for surveys, including the survey from the Head of Passes to the headwaters of the river in such manner as in their opinion shall best improve navigation and promote the interests of commerce at all stages of the river.

The amendment was agreed to.

Mr. STONE. Mr. President, I thought that amendment was on page 50.

Mr. NELSON. Mr. President, I was intending to go on with the bill down to the paragraph to which the Senator from Missouri objects and pass that over until to-morrow. I refer to the paragraph stricken out on page 52. We can dispose of the rest of the bill and have that passed over until to-morrow.

Mr. STONE. Then I will ask the Senator to pass the provisions relating to the Mississippi and the Missouri Rivers until to-morrow.

Mr. CLARKE of Arkansas. Not all of them.

Mr. NELSON. Very well. I desire to offer one little amendment in regard to the Mississippi River, to which I do not think the Senator has any objection.

Mr. CLARKE of Arkansas. There are certain items there that are in no wise in dispute, and that might be disposed of this afternoon.

Mr. NELSON. I have an amendment to go in at the end of line 4, on page 52. I do not think the Senator objects to it.

Mr. STONE. What is it?

Mr. NELSON. I will read the amendment:

Provided further, That of the amount herein appropriated, $250,000, or so much thereof as may be necessary, shall be expended for revetting, leveeing, and otherwise improving the left bank of said river at and near Memphis, Tenn., for the purpose of preventing damage by floods and promoting the interest of navigation.

Mr. STONE. Where does that come in?

Mr. NELSON. It comes in at the end of line 4, prior to the amendment to which the Senator objects. It does not in the least interfere with that.

Mr. STONE. I have no objection to that, I think.

Mr. NELSON. I offer that amendment, then, Mr. President.

The PRESIDENT pro tempore. The Chair will call the attention of the Senator from Minnesota to the fact that there are certain other amendments on page 51 that have not yet been considered. Does the Senator desire that they shall be passed over?

Mr. NELSON. I do not think the Senator from Missouri has any objection to the amendments on page 51.

Mr. STONE. I think I have none.

Mr. NELSON. I know the amendment to which the Senator objects, and I do not want to take it up to-night. I want to give him full opportunity to discuss it to-morrow.

Mr. KENYON. Mr. President, I think I am interested in the same proposition as the Senator from Missouri. Our objection is to the amendment beginning on page 52, line 5.

Mr. NELSON. I think there is no objection to anything that precedes that, but I am anxious to go through the bill and leave that until to-morrow.

Mr. BURTON. If that section goes over, I must ask also that the amendment on page 53 go over.

The PRESIDENT pro tempore. The amendment in line 16, page 51, will be stated.

The next amendment of the Committee on Commerce was in the item of appropriation for improving Mississippi River from Head of Passes to the mouth of the Ohio River, on page 51, line 15, after the word "improvement" to insert: "Together with the mouth of the Yazoo River and harbor at Vicksburg, Miss., which, with any unexpended balance, are hereby transferred to, and placed under the control and jurisdiction of, such commission, may," so as to read:

Provided further, That the watercourses connected with said river and the harbors upon it, now under the control of the Mississippi River Commission and under improvement, together with the mouth of the Yazoo River and harbor at Vicksburg, Miss., which, with any unexpended balance, are hereby transferred to, and placed under the control and jurisdiction of such commission, may, in the discretion of said commission, upon approval by the Chief of Engineers, receive allotments for improvements now under way or hereafter to be undertaken, to be paid for from the amount herein appropriated.

Mr. NELSON. On page 51, line 19, the word "may" is printed in italics. It should be in roman.

The PRESIDENT pro tempore. Without objection, the amendment to the amendment will be made.

The amendment as amended was agreed to.

Mr. STONE. I do not exactly understand that.

Mr. NELSON. The word "may" is printed in italics. It should be in roman, because it is not a part of the amendment; that is all. The word is still left in.

Mr. STONE. I do not care about that.

The next amendment was, on page 51, line 23, after the word "appropriated," to insert the following additional proviso:

Provided further, That of the amount herein appropriated, $100,000, or such sum as may be necessary, shall be expended for revetting and otherwise improving the right bank of said river at and near Helena, Ark., for the purpose of preventing a breach in the levee by the caving of the bank at that point and for promoting the interest of navigation.

The amendment was agreed to.

Mr. NELSON. I offer the following amendment, to come in at the end of the amendment just agreed to.

The SECRETARY. On page 52, line 4, after the word "navigation" and before the period, insert a colon and the following:

Provided further, That of the amount herein appropriated, $250,000, or such sum as may be necessary, shall be expended for revetting, leveeing, and otherwise improving the left bank of said river at and near Memphis, Tenn., for the purpose of preventing damage by floods and promoting the interest of navigation.

Mr. PERCY. I ask that this amendment be allowed to go over with the others.

Mr. NELSON. Certainly. I shall ask that that part of the bill go over from the end of the amendment just adopted to the bottom of the page.

The PRESIDENT pro tempore. The Chair will call the attention of the Senator from Minnesota to the fact that the amendment he submitted has not been adopted and the Chair understood the Senator from Mississippi to ask that it should go over.

Mr. PERCY. That is correct.

Mr. NELSON. Which amendment?

Mr. PERCY. The appropriation of $250,000 for the river at Memphis.

Mr. NELSON. Does the Senator object to that amendment?

Mr. PERCY. I object to that amendment.

Mr. NELSON. The amendment in reference to the river at Memphis?

Mr. PERCY. It is the amendment taking $250,000 out of the $6,000,000 appropriation. It was not before the committee and I do not know whether it is subject to a point of order or not. If it is I make the point of order.

Mr. BURTON. I ask the Senator from Minnesota to allow that amendment to go over. I should like to examine it somewhat.

Mr. NELSON. Very well.

Mr. BURTON. As I understand the proposition made to the committee was that the locality should contribute half the amount while the amendment as read contains no such provision.

Mr. NELSON. Very well, let it go over.

The next amendment of the Committee on Commerce was, on page 52, after line 4, to strike out:

Any funds which have been, or may hereafter be, appropriated by Congress for improving the Mississippi River between the Head of Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended, under the direction of the Secretary of War, in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for levees upon any part of said river between the Head of Passes and Rock Island, Ill.

Mr. NELSON. This amendment will be passed over.

The PRESIDENT pro tempore. It will be passed over.

Mr. NELSON. And all the balance on page 52.

Mr. KENYON. I ask to have the amendment on pages 53 and 54 passed over, down to line 5 on page 55.

The PRESIDENT pro tempore. Is there objection? The Chair hears none. The reading will be continued on page 55, line 5.

The Secretary resumed the reading of the bill at line 5, page 55.

The next amendment was, on page 55, line 10, after "$150,000," to strike out "of which amount at least $75,000 may be expended for such bank revetment as, in the judgment of the Chief of Engineers, may be in the interests of navigation"; in line 16, after the word "session," to strike out "$150,000; in all, $300,000" and insert "$175,000, of which amount, because of present emergency, an amount not exceeding $75,000 may be expended for such bank revetment above Elk Point as in the judgment of the Chief of Engineers may be necessary to extend and protect existing revetments and regulate channel flow in the interest of navigation; in all, $325,000," so as to make the clause read:

Improving Missouri River: For improvement and maintenance from Kansas City to Sioux City, $150,000; continuing improvement and for maintenance from Sioux City to Fort Benton, in accordance with the report submitted in House Document No. 91, Sixty-second Congress, first session, $175,000, of which amount, because of present emergency, an amount not exceeding $75,000 may be expended for such bank revetment above Elk Point as in the judgment of the Chief of Engineers may be necessary to extend and protect existing revetments and regulate channel flow in the interest of navigation; in all, $325,000.

Mr. STONE. I ask that the paragraph from line 9 to line 23, on page 55, may go over.

Mr. NELSON. I ask to go back to line 24 on page 54. The objection of the Senator from Iowa did not extend to that provision.

Mr. KENYON. I withdraw the objection.

Mr. NEWLANDS. Mr. President, if I am not interrupting Senators, I wish to ask the Senator from Minnesota as to whether we are now considering simply committee amendments?

Mr. NELSON. We are still considering committee amendments.

Mr. NEWLANDS. And there will be an opportunity to-morrow to offer other amendments?

Mr. NELSON. Certainly.

Mr. NEWLANDS. I wish to say that to-morrow I shall address myself to the amendment which I offered regarding a general provision for river regulation by the aid of a river-regulation board.

Mr. STONE. Does the Senator from Minnesota consent to let the provision from line 9 to line 23, on page 55, relating to the Missouri River, go over until to-morrow?

Mr. NELSON. Yes; all the provisions about the Missouri River are to go over. The whole paragraph can go over for improving the Missouri River, beginning with line 9 on page 55.

The PRESIDENT pro tempore. The amendment will be passed over.

Mr. NELSON. I ask that the amendment commencing on line 24, page 54, be taken up.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 54, after line 23, insert:

Improving the Mississippi River between Winnibigoshish and Pokegama Reservoirs, and the Leech River from its mouth to Leech Lake Dam, Minn., in accordance with the report submitted in House Document No. 1223, Sixty-second Congress, third session, $116,000.

The amendment was agreed to.

The PRESIDENT pro tempore. The reading will be continued at line 24, on page 55.

The Secretary resumed the reading of the bill.

The next amendment of the Committee on Commerce was, on page 56, line 18, after "$35,000," to insert "completing improvement in accordance with plan No. 3 in report submitted in House Document No. 1309, Sixty-second Congress, third session, $388,637; in all, $423,637," so as to make the clause read:

Improving harbor at San Diego, Cal.: For maintenance, $35,000; completing improvement in accordance with plan No. 3 in report submitted in House Document No. 1309, Sixty-second Congress, third session, $388,637; in all, $423,637.

The amendment was agreed to.

The next amendment was, on page 58, line 13, after the word "Congress," to insert "and the Secretary of War is authorized and directed to use any moneys that may be placed at his disposal by the authorities at Coos Bay for the improvement of the harbor at Coos Bay in widening and deepening the channels in accordance with the project heretofore adopted by Congress, and he is also authorized to use any Government plant available in connection therewith," so as to make the clause read:

Improving harbor at Coos Bay, Oreg.: For maintenance of the completed channels in Coos Bay and equipping and operating the bar dredge heretofore authorized, $80,000. And the Secretary of War is authorized and directed to use any additional moneys that may be placed at his disposal by the Port of Coos Bay, or by any other organization or by individuals for the improvement of the inner harbor of Coos Bay, and the said Secretary is also authorized, in his discretion, to use any Government plant available in connection therewith at such times as it may not be needed and employed on other work authorized by Congress; and the Secretary of War is authorized and directed to use any moneys that may be placed at his disposal by the authorities at Coos Bay for the improvement of the harbor at Coos Bay in widening and deepening the channels in accordance with the project heretofore adopted by Congress, and he is also authorized to use any Government plant available in connection therewith.

The amendment was agreed to.

The next amendment was, at the top of page 59, to insert:

Improving Tillamook Bay and Bar, Oreg., in accordance with the report submitted in House Document No. 349, Sixty-second Congress, second session, and subject to the conditions set forth in said document, $100,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to complete the said project, not exceeding in the aggregate $614,000, exclusive of the amount herein and heretofore appropriated, to be paid for, to an amount not exceeding $207,000, from appropriations which may from time to time be made by law, and to a further amount not exceeding $407,000 from funds to be furnished by local interests; the total expenditure from funds of the United States and from those of local interests to be equal in amount: *Provided further*, That no part of the appropriations herein and heretofore made shall be available for expenditure and no contract shall be entered into under the foregoing authorization until the Secretary of War shall be satisfied that said local interests have made provisions for furnishing the whole of said sum of $407,000 and have placed the same to his credit and subject to his order in a bank to be designated by him.

The amendment was agreed to.

The next amendment was, on page 60, line 5, after the words "Oregon City," to strike out "$30,000" and insert "$40,000, of which amount an amount not exceeding $10,000 may be expended in construction of a revetment near Independence, Oreg., if in the judgment of the Chief of Engineers the same is necessary in the interest of navigation," and, in line 13, after the words "in all," to strike out "$42,000" and insert "$52,000," so as to make the clause read:

Improving Willamette and Yamhill Rivers, Oreg.: For maintenance of improvement of Yamhill River and of Willamette River above Oregon City, $40,000, of which amount an amount not exceeding $10,000 may be expended in construction of a revetment near Independence, Oreg., if in the judgment of the Chief of Engineers the same is necessary in the interest of navigation; completing improvement of Willamette River from Portland to Oregon City in accordance with the report submitted in House Document No. 438, Sixty-second Congress, second session, $12,000; in all, $52,000.

The amendment was agreed to.

The next amendment was, on page 61, line 5, after the word "improvement," to strike out "$600,000" and insert "$1,200,000," so as to make the clause read:

Improving Columbia River between the foot of The Dalles Rapids and the head of Celilo Falls, Oreg. and Wash.: Continuing improvement, $1,200,000.

The amendment was agreed to.

The next amendment was, on page 61, line 8, after the word "improvement," to strike out "$40,000" and insert "$60,000," so as to make the clause read:

Improving Columbia River and tributaries above Celilo Falls to the mouth of Snake River, Oreg. and Wash.: Continuing improvement, $60,000.

The amendment was agreed to.

The next amendment was, on page 61, line 10, after the word "improvement," to strike out "$25,000" and insert "$40,000," so as to make the clause read:

Improving Columbia River between Bridgeport and Kettle Falls, Wash.: Completing improvement, $40,000.

The amendment was agreed to.

The next amendment was, on page 62, after line 21, to insert:

Valdez, Alaska: For the protection of the buildings and property of the United States at Valdez, Alaska, from glacial floods, $55,000.

Mr. NELSON. I ask that this amendment be disagreed to. There is a similar provision in another bill. It is provided for in the Army appropriation bill.

The amendment was rejected.

The next amendment was, on page 63, after line 13, to insert:

For emergencies: To provide for the restoration of channels for river and harbor improvements, heretofore or hereafter established or improved by the Government, where, by reason of emergency, the usual depth of such channel or customary use of such improvement can not be maintained, and there is no sufficient fund available for such restoration, the existing balances of similar emergency appropriations under the acts of March 3, 1905, March 2, 1907, March 3, 1909, and June 25,

1910, shall be available for allotment and use by the Secretary of War: *Provided*, That in no case shall such allotment be made unless recommended by the local engineer having such channel or improvement in charge and by the Chief of Engineers, respectively: *Provided further*, That for no single channel or improvement shall a sum be allotted greater than $10,000 per year per locality, nor shall any portion of such appropriation be allotted unless the same is necessary in the interest of navigation to protect and preserve the existing Government work.

The amendment was agreed to.

The next amendment was, on page 64, line 13, to insert as a new section the following:

SEC. 2. That the Secretary of War shall cause the Chief of Engineers of the Army and the Board of Engineers for Rivers and Harbors to report to Congress, in which shall be included a preliminary report not later than December 1, 1913, upon the saving, as well as other advantages, which can be accomplished by the adoption of the continuing contract system, the rapidity with which projects should be completed, upon methods of standardization by which the waterways of the country may be improved uniformly in proportion to their capacities and to the existing or probable demands of general commerce, and also report upon one or more systematized schemes of such improvement, involving all waterways heretofore examined, together with any natural or artificial channels, essential for the utilization thereof, whether heretofore examined or not; also upon all projects heretofore adopted, the further improvement of which is not desirable or the expenditure upon which is out of proportion to the benefit derived therefrom. Such report may include other related information pertaining to the uses or control of the waters of the country, and the sum of $100,000 or so much thereof as may be necessary, is hereby appropriated for such examination and report.

The amendment was agreed to.

The next amendment was, on page 65, line 11, to change the number of the section from "2" to "3."

The amendment was agreed to.

The next amendment was, on page 66, after line 7, to insert:

Thomaston Harbor, Me., with a view to securing greater depth and width of basin.

The amendment was agreed to.

The next amendment was, on page 66, after line 19, to insert:

Harbor of Marion, Mass.

The amendment was agreed to.

The next amendment was, on page 66, after line 20, to insert:

Salem Harbor, Mass., with a view to providing a channel 12 feet deep at mean low water from the outer harbor to the mouth of the South River.

The amendment was agreed to.

Mr. NELSON. I offer an amendment to come in at the end of the amendment just agreed to.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 66, after line 23, insert:

Lynn Harbor and the Saugus River, Mass., with a view to providing a channel 15 feet deep at mean low water from the mouth of the said Saugus River along the course of that river to the bridge at East Saugus.

The amendment was agreed to.

Mr. NELSON. I offer the following amendment to come in after the amendment just agreed to.

The SECRETARY. After the amendment just agreed to insert:

Malden River, Mass., with a view to a modification of the project.

The amendment was agreed to.

The reading was continued to line 8 on page 67.

Mr. NELSON. I offer an amendment, to come in at the end of line 8 on page 67.

The SECRETARY. On page 67, after line 8, insert:

Johnsons Creek, Bridgeport, Conn.

The amendment was agreed to.

The next amendment was, on page 67, line 10, after the word "depth," to strike out "in the East Branch" and insert "and removal of obstructions to navigation," so as to make the clause read:

Stamford Harbor, Conn., with a view to securing increased depth and removal of obstructions to navigation.

The amendment was agreed to.

The next amendment was, on page 67, after line 19, to insert:

New York Harbor, N. Y., upper bay, with a view to improving channel opposite anchorage grounds.

The amendment was agreed to.

The next amendment was, on page 68, after line 5, to insert:

Raccoon Creek, N. J., including the construction of a dike or jetty at the mouth if necessary.

The amendment was agreed to.

The next amendment was, on page 68, after line 12, to insert:

Leipsic River, Del.

The amendment was agreed to.

The next amendment was, at the top of page 69, to insert:

Blackwater River, Va., with a view to the removal of a shoal at the mouth.

The amendment was agreed to.

The next amendment was, on page 69, after line 2, to insert:

Hampton Creek, Va., with a view to widening and deepening the channel.

The amendment was agreed to.

The next amendment was, on page 69, after line 10, to insert:

Scotts Creek, Va.

The amendment was agreed to.

The next amendment was, on page 69, after line 11, to insert:

Harbor at Saxis, Va.

The amendment was agreed to.

The next amendment was, on page 70, after line 11, to insert:

Trent River, N. C., with a view to providing a depth of 12 feet from Newbern to Pollockville.

The amendment was agreed to.

The next amendment was, on page 70, after line 13, to insert:

Thoroughfare Bay, N. C., from Core Sound to Cedar Bay near the mouth of Neuse River, Pamlico Sound.

The amendment was agreed to.

The reading of the bill was continued to line 21, on page 70.

Mr. NELSON. At the end of line 21 I move to insert:

Jeremy Creek, S. C., from Morrisons Wharf to Morrisons Bridge, with a view to providing a depth of 4 feet and a width of 60 feet.

The amendment was agreed to.

The next amendment was, on page 71, after line 14, to insert:

Channel to East Pass from Apalachicola River by way of Crooked Channel with a view to providing suitable ship channel.

Mr. NELSON. I move to amend the amendment by inserting the word "Florida" after the word "River," in line 15.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 71, after line 17, to insert:

Canal from St. Johns River to Lake Beresford with a view to making a cut-off from the river to Lake Beresford near De Land River landing.

Mr. NELSON. I move to amend the amendment by inserting the word "Florida" after the word "River," in line 18.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 72, after line 4, to insert:

Key West, Fla.: For a harbor of refuge and for a safe anchorage for vessels of the Departments of the Navy, War, Treasury, Commerce and Labor, and Agriculture.

The amendment was agreed to.

The next amendment was, on page 72, after line 9, to insert:

Mosquito Inlet, Fla., with a view to securing a channel with suitable depth and width from the Atlantic Ocean to a point at or near the town of New Smyrna.

The amendment was agreed to.

The next amendment was, on page 72, after line 12, to insert:

Inland waterway from Wolf Bay to Mobile Bay, Ala.

Mr. NELSON. I move to amend the amendment of the committee by striking out the word "Wolf" and inserting the word "Pensacola," so as to read "Pensacola Bay to Mobile Bay."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 72, after line 19, to insert:

Paint Rock River, Ala., for a distance of 12 miles above its mouth.

The amendment was agreed to.

The next amendment was, on page 73, after line 11, to insert:

Licking River, Ky., with a view to the prevention of a cut-off at the town of Farmers, consideration being given to any tender of cooperation on the part of local interests.

The amendment was agreed to.

The next amendment was, on page 73, after line 14, to insert:

Ohio River above the dam at Louisville, Ky., with a view to such protection against overflow as may be necessary.

The amendment was agreed to.

The next amendment was, on page 73, after line 21, to insert:

Grand River, Mich., from its mouth to Fulton Street Bridge, Grand Rapids, with a view to changing the existing project so as to insure a depth of 15 feet.

The amendment was agreed to.

The next amendment was, at the top of page 74, to insert:

Black Lake Harbor, Mich., with a view to obtaining a uniform depth of 25 feet from Lake Michigan to the turning basin opposite the city of Holland.

The amendment was agreed to.

The reading of the bill was continued to line 5, on page 74.

Mr. NELSON. I offer an amendment, to come in at the end of line 5, on page 74.

The PRESIDENT pro tempore. The Senator from Minnesota offers an amendment, which will be stated.

The SECRETARY. On page 74, after line 5, it is proposed to insert:

Keweenaw waterway, Portage Lake Ship Canal, Mich., with a view to making a cut-off at Princess Point.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 74, after line 9, to insert:

Pere Marquette River, Mich., from deep water in the harbor of Ludington, following the south branch of said river, to the State road and iron bridge, and thence to the city of Scottville, with a view to the deepening of the channel by dredging and other improvements.

The amendment was agreed to.

The next amendment was, on page 74, after line 14, to insert:

Port Huron Harbor, Mich., with a view to constructing some compensatory structure in the St. Clair River fronting the city of Port Huron, between the foot of Lake Huron and a point below the Grand Trunk tunnel, that the city of Port Huron may have a depth of water not less than 20 feet from the present dock line out to the thread of the stream.

The amendment was agreed to.

The next amendment was, on page 75, after line 11, to insert:

Harbor of Minneapolis, Minn.

Mr. NELSON. I offer an amendment to the amendment.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. On page 75, line 12, at the end of the committee amendment, it is proposed to strike out the period and to insert a comma and the words "with a view to increased harbor facilities, including a turning basin."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, at the top of page 76, to insert:

Berkeley Harbor, Cal., with a view to the development and completion of the Berkeley inner harbor.

The amendment was agreed to.

The next amendment was, on page 76, after line 15, to insert:

San Leandro Bay, Cal., with a view to establishing at West San Leandro a deep-water channel to San Francisco Bay.

The amendment was agreed to.

Mr. NELSON. To follow that amendment, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Senator from Minnesota offers an amendment, which will be stated.

The SECRETARY. On page 76, after line 18, it is proposed to insert:

Mokelumne River at and between the junctions of the North and South Forks thereof, and the junction of the North Fork thereof with Snodgrass Slough, and the junctions of said North Fork of said river and said slough with the Sacramento River.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 76, after line 20, to insert:

Nehalem Bay and River, Oreg., including any plan for cooperation on the part of local interests.

The amendment was agreed to.

The next amendment was, on page 76, after line 22, to insert:

Willapa Harbor and the bar entrance thereto.

The amendment was agreed to.

The next amendment was, on page 77, after line 1, to insert:

The Apoon Mouth of the Yukon River, Alaska, from the improvement now under way to deep water.

The amendment was agreed to.

Mr. SMITH of Michigan. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Chair will suggest that the committee amendments are not yet completed.

Mr. SMITH of Michigan. This is a committee amendment and meets an emergency to which my attention has been called by the following telegram.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. After line 4, on page 42, it is proposed to insert:

Improving Clinton River, Mich., $20,000.

The amendment was agreed to.

Mr. SMITH of Michigan. Mr. President, in connection with the amendment I ask to have printed in the RECORD the telegram which I send to the desk.

The PRESIDENT pro tempore. In the absence of objection permission is granted.

The telegram referred to is as follows:

MOUNT CLEMENS, MICH., *February 18, 1913.*

Hon. WILLIAM ALDEN SMITH,
Washington, D. C.:

Business men's association at special meeting to-night urges you to present need of Clinton River. Dredging must be done immediately. Condition serious; must have liberal appropriation. Association represents 500 business men; all are concerned about the matter.

CHARLES S. FERRIN, *President.*
CHARLES W. WARD, *Secretary.*

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 82, after line 7, to insert as a new section the following:

SEC. 9. That the Secretary of War is hereby authorized to receive from private parties such funds as may be contributed by them to be expended in connection with funds appropriated by the United States upon joint work of public improvement of rivers and harbors and private land reclamation, whenever such joint work and expenditure may be considered by the Chief of Engineers as advantageous to the joint interests concerned and not disadvantageous to the United States interests of navigation.

The amendment was agreed to.

The next amendment was, on page 82, after line 16, to insert as a new section the following:

SEC. 10. That the Secretary of War is hereby authorized, in his discretion, to rent Government dredges to private parties for use in the dredging of waterways under improvement by the General Government, or to agree with private parties for the deposit upon their land of the material dredged from waterways under improvement by the General Government, for a consideration mutually agreed upon, whenever in the opinion of the Chief of Engineers a combination of Government work and private work along the banks of such waterways appears desirable and will be to the advantage of the joint work and not disadvantageous to the United States interests of navigation; and the proceeds of such rentals or agreements may be deposited to the credit of the appropriation or appropriations for the improvement of the waterways affected and may be used in payment for additional work of improvement on such waterways.

The amendment was agreed to.

The next amendment was, on page 83, line 8, to change the number of the section from "8" to "11"; in line 11, before the word "low," to insert "lower"; in line 14, before the word "specified," to strike out "widths" and insert "dimensions"; and in line 15, after the word "increase," to strike out "in width," so as to make the section read:

SEC. 11. That unless otherwise expressed, the channel depths referred to in this and subsequent river and harbor acts shall be understood to signify the depth at mean lower low water in tidal waters, and the mean depth during the month of lowest water in the navigation season in rivers and nontidal channels; and the channel dimensions specified shall be understood to admit of such increase at the entrances, bends, sidings, and turning places as may be necessary to allow of the free movement of boats.

The amendment was agreed to.

The next amendment was, on page 84, after line 12, to insert as a new section the following:

SEC. 14. That the Secretary of Commerce and Labor is hereby authorized, empowered, and directed to define and establish anchorage grounds for vessels in improved harbors and bays of the United States, except as otherwise provided by law, wherever maritime and commercial interests shall request action by, and show to the satisfaction of said Secretary that such anchorage grounds are required for safe navigation, and to adopt suitable rules and regulations in relation thereto, and to take all necessary measures for the proper enforcement of such rules and regulations. In the event of the violation of any such rules and regulations by the owner, master, or person in charge of any vessel, such owner, master, or person in charge of such vessel shall be liable to a penalty of $100; and the said vessel may be holden for the payment of such penalty and may be seized and proceeded against summarily by libel for the recovery of the same in any United States district court for the district within which such vessel may be and in the name of the officer designated by the Secretary of Commerce and Labor.

The reading of the bill was concluded.

Mr. JONES. I offer an amendment, to come in on page 76, after line 25.

The PRESIDENT pro tempore. The Senator from Washington offers an amendment, which will be stated.

The SECRETARY. On page 76, after line 25, it is proposed to insert:

Lake River, including Bachelors Slough, Wash.

The amendment was agreed to.

Mr. NELSON. Mr. President, I ask now to have the bill laid aside until to-morrow, as I understand the Senator from Massachusetts [Mr. LODGE] desires a short executive session. I give notice that I shall call up the bill to-morrow immediately after the routine morning business.

The PRESIDENT pro tempore. The bill will be laid aside.

EXECUTIVE SESSION.

Mr. LODGE. Solely for the purpose of disposing of two treaties reported by the Committee on Foreign Relations, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 40 minutes p. m.) the Senate adjourned until to-morrow, Thursday, February 20, 1913, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate February 19, 1913.

CONSULS GENERAL.

Charles Jonathan Arnell, of Washington, now Japanese secretary and interpreter to the embassy to Japan, to be consul

general of the United States of America at Mukden, China, vice Fred D. Fisher, nominated to be consul at Santiago de Cuba.

Leo Allen Bergholz, of New York, now consul at Kingston, Jamaica, to be consul general of the United States of America at Winnipeg, Manitoba, Canada, vice John Edward Jones, nominated to be consul general at Genoa.

William Coffin, of Kentucky, now consul at Jerusalem, to be consul general of the United States of America at Budapest, Hungary, vice Paul Nash, deceased.

Alphonse Gaulin, of Rhode Island, now consul general at Marseille, to be consul general of the United States of America at Calcutta, India, vice William H. Michael, resigned.

Frederic W. Goding, of Illinois, now consul at Montevideo, to be consul general of the United States of America at Guayaquil, Ecuador, vice Herman R. Dietrich, resigned.

Ross E. Holaday, of Ohio, now consul at Santiago de Cuba, to be consul general of the United States of America at Cape Town, Cape of Good Hope, vice Richard Guenther, resigned.

John Edward Jones, of the District of Columbia, now consul general at Winnipeg, to be consul general of the United States of America at Genoa, Italy, vice James A. Smith, nominated to be consul general at Marseille.

James A. Smith, of Vermont, now consul general at Genoa, to be consul general of the United States of America at Marseille, France, vice Alphonse Gaulin, nominated to be consul general at Calcutta.

CONSULS.

Joseph I. Brittain, of Ohio, now consul at Prague, to be consul of the United States of American at Kingston, Jamaica, vice Leo Allen Bergholz, nominated to be consul general at Winnipeg.

Ralph C. Busser, of Pennsylvania, now consul at Erfurt, to be consul of the United States of America at Trieste, Austria, vice Ralph J. Totten, nominated to be consul at Montevideo.

Homer M. Byington, of Connecticut, now consul at Bristol, to be consul of the United States of America at Leeds, England, vice Benjamin F. Chase, nominated to be consul at Leghorn.

Benjamin F. Chase, of Pennsylvania, now consul at Leeds, to be consul of the United States of America at Leghorn, Italy, vice Frank Deedmeyer, nominated to be consul at Prague.

Frank Deedmeyer, of Alabama, now consul at Leghorn, to be consul of the United States of America at Prague, Austria, vice Joseph I. Brittain, nominated to be consul at Kingston, Jamaica.

Fred D. Fisher, of Oregon, now consul general at Mukden, to be consul of the United States of America at Santiago de Cuba, Cuba, vice Ross E. Holaday, nominated to be consul general at Cape Town.

James H. Goodier, of New York, to be consul of the United States of America at Tahiti, Society Islands, vice North Winship, nominated to be consul at Jerusalem.

Wilbur T. Gracey, of California, now consul at Progreso, to be consul of the United States of America at Guadalajara, Mexico, vice Samuel E. Magill, deceased.

Ralph J. Totten, of Tennessee, now consul at Trieste, to be consul of the United States of America at Montevideo, Uruguay, vice Frederic W. Goding, nominated to be consul general at Guayaquil.

Roger Culver Tredwell, of Indiana, now a consular assistant, to be consul of the United States of America at Erfurt, Germany, vice Ralph C. Busser, nominated to be consul at Trieste.

North Winship, of Georgia, now consul at Tahiti, to be consul of the United States of America at Jerusalem, Turkey, vice William Coffin, nominated to be consul general at Budapest.

PROMOTIONS IN THE REVENUE-CUTTER SERVICE.

Cadet Engineer Gustavus Richard O'Connor to be third lieutenant of engineers in the Revenue-Cutter Service of the United States, to fill an original vacancy.

Cadet Engineer Walter Melchior Troll, to be third lieutenant of engineers in the Revenue-Cutter Service of the United States, to fill an original vacancy.

REGISTER OF THE LAND OFFICE.

Harold T. Hopkins, of Oregon, to be register of the land office at The Dalles, Oreg., vice Charles W. Moore, term expired.

APPOINTMENTS IN THE ARMY.

GENERAL OFFICERS.

Col. James Parker, Eleventh Cavalry, to be brigadier general, with rank from February 12, 1913, vice Brig. Gen. George S. Anderson, retired October 16, 1912.

Col. Hunter Liggett, Infantry, unassigned, to be brigadier general, with rank from February 12, 1913, vice Brig. Gen. Edward J. McClernand, retired December 29, 1912.

MEDICAL RESERVE CORPS.

To be first lieutenants with rank from February 11, 1913.

George Henry Buck, of Oregon; and
Robert Henry Wilds, of South Carolina.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

Lieut. Col. Edwin P. Pendleton, Twenty-third Infantry, to be colonel from February 13, 1913. Under the provisions of an act of Congress approved March 3, 1911, the officer is herein named for advancement in grade in accordance with the rank he would have been entitled to hold had promotion been lineal throughout his arm since the date of his entry into the arm to which he permanently belongs.

Second Lieut. Benjamin F. Castle, Twenty-ninth Infantry, to be first lieutenant from February 10, 1913, vice First Lieut. Louis B. Chandler, Twenty-fifth Infantry, resigned February 9, 1913.

PROMOTIONS IN THE NAVY.

Capt. William B. Caperton to be a rear admiral in the Navy from the 13th day of February, 1913, to fill a vacancy.

Acting Asst. Surg. William G. Townsend to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 7th day of February, 1913, in accordance with a provision contained in an act of Congress approved August 22, 1912.

Machinist August Schulze to be a chief machinist in the Navy from the 27th day of December, 1912, upon the completion of six years' service as a machinist.

Capt. Philip S. Brown to be a major in the Marine Corps from the 22d day of August, 1912, to fill a vacancy.

Thomas M. Luby, a citizen of New Jersey, to be a second lieutenant in the Marine Corps from the 15th day of February, 1913, to fill a vacancy.

Lieut. Commander John S. Doddridge to be a commander in the Navy from the 1st day of July, 1912, to fill a vacancy.

Lieut. John W. Schoenfeld to be a lieutenant commander in the Navy from the 1st day of February, 1913, to fill a vacancy.

Lieut. Clarence L. Arnold to be a lieutenant commander in the Navy from the 5th day of February, 1913, to fill a vacancy.

Lieut. (Junior Grade) Harold Jones to be a lieutenant in the Navy from the 10th day of December, 1912, to fill a vacancy.

Lieut. (Junior Grade) Albert S. Rees to be a lieutenant in the Navy from the 20th day of December, 1912, to fill a vacancy.

Lieut. (Junior Grade) Alexander Sharp, jr., to be a lieutenant in the Navy from the 16th day of January, 1913, to fill a vacancy.

John Buckley, a citizen of Oregon, to be an assistant surgeon in the Navy from the 4th day of February, 1913, to fill a vacancy.

The following-named citizens to be assistant surgeons in the Medical Reserve Corps of the Navy from the 5th day of February, 1913, in accordance with a provision contained in an act of Congress approved August 22, 1912:

George T. Vaughn, a citizen of Virginia, and
Lloyd P. Shippen, a citizen of Maryland.

Ensign Charles L. Brand to be an assistant naval constructor in the Navy from the 5th day of February, 1913, to fill a vacancy.

WITHDRAWAL.

Executive nomination withdrawn from the Senate February 19, 1913.

POSTMASTER.

Anna Callahan to be postmaster at Casselton, in the State of North Dakota.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *February 19, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Almighty God, Father of all souls, whose blessings are beyond compare and outnumber the sands of the sea, the stars that reflect Thy glory in the heavens, help us to express our appreciation and gratitude for Thy loving kindness by living to the high watermark of Christian manhood day by day; that we may be, indeed, faithful citizens of the kingdom of heaven on earth, assured if we live well now we shall be prepared to live well then, when we shall have joined the innumerable throng beyond the confines of earth.

E'en though it be a cross
That raiseth me,
Still all my song shall be,
Nearer, my God, to Thee,
Nearer to Thee.

Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate having proceeded, in pursuance of the Constitution, to reconsider the bill (S. 3175) entitled "An act to regulate the immigration of aliens to and the residence of aliens in the United States," returned to the Senate by the President of the United States, with his objections, and sent by the Senate to the House of Representatives with the message of the President:

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 27941) making appropriations for the support of the Army for the fiscal year ending June 30, 1914, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. DU PONT, Mr. WARREN, and Mr. JOHNSTON as the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 8357. An act for the relief of Maurice Edgar Rose, late assistant surgeon, United States Navy; and

S. 8384. An act to appoint Frederick H. Lemly a passed assistant paymaster on the active list of the United States Navy.

The message also announced that the Senate had passed the following resolution, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 42.

Resolved by the Senate (the House of Representatives concurring), That the inaugural committee in charge of the reviewing stands upon Lafayette Square is hereby directed to set aside for the use of the press, the distribution to be under the direction of the standing committee of correspondents, 250 seats directly opposite the stand in which the President will review the inaugural parade, the seats to be sold at the prices prevailing in other portions of the same stand.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 8090) permitting the building of a railroad bridge across the Missouri River from a point on the east bank, in section 14, Mountrail County, N. Dak., to a point on the west bank of said river, in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west of the fifth principal meridian.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 8089) permitting the building of a railroad bridge across the Yellowstone River from a point on the east bank, in section 15, to a point on the west bank, in section 16, township 151 north, range 104 west of the fifth principal meridian, in McKenzie County, N. Dak.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the concurrent resolution of the Senate (S. Con. Res. 34) to print 30,000 copies of the Judicial Code of the United States.

The message also announced that the Senate had disagreed to the amendment of the House of Representatives to joint resolution (S. J. Res. 143) authorizing the Secretary of War to loan certain tents for use at the meeting of the Imperial Council of the Ancient Arabic Order of the Nobles of the Mystic Shrine to be held at Dallas, Tex., in May, 1913, asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. DU PONT, Mr. WARREN, and Mr. JOHNSTON of Alabama as the conferees on the part of the Senate.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 8357. An act for the relief of Maurice Edgar Rose, late assistant surgeon, United States Navy; to the Committee on Naval Affairs.

S. 8384. An act to appoint Frederick H. Lemly a passed assistant paymaster on the active list of the United States Navy; to the Committee on Naval Affairs.

AMERICAN ACADEMY OF ARTS AND LETTERS.

Mr. TOWNSEND. Mr. Speaker, I ask to have——

Mr. BURNETT. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The Chair wishes the gentleman from Alabama would withhold that request for a few minutes.

Mr. BURNETT. I withdraw the point, Mr. Speaker.

Mr. TOWNSEND. Mr. Speaker, I ask to have taken from the Speaker's table the bill (S. 4356) incorporating the American Academy of Arts and Letters, a similar bill being reported by the House committee and now on the calendar.

The SPEAKER. The gentleman from New Jersey [Mr. TOWNSEND] asks the Chair to lay before the House the bill S. 4356, a similar House bill being on the calendar. The Clerk will read.

The Clerk proceeded to read, as follows:

An act (S. 4356) incorporating the American Academy of Arts and Letters.

Mr. TOWNSEND. Mr. Speaker, I ask unanimous consent that the reading of the Senate bill be dispensed with.

The SPEAKER. Is there objection? It has not been read, but the Clerk had started to read it.

Mr. MANN. Is the bill to be put upon its passage?

The SPEAKER. Yes.

Mr. MANN. Then I shall object.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

An act (S. 4356) incorporating the American Academy of Arts and Letters.

Be it enacted, etc., That William Dean Howells, of New York; Henry James, of Massachusetts; Henry Adams, of the District of Columbia; Thomas Raynesford Lounsbury, of Connecticut; Theodore Roosevelt, of New York; John Singer Sargent, of Massachusetts; Horace Howard Furness, of Pennsylvania; Alfred Thayer Mahan, of New York; Daniel Chester French, of New York; John Burroughs, of New York; James Ford Rhodes, of Massachusetts; Horatio William Parker, of Connecticut; William Milligan Sloane, of New York; Robert Underwood Johnson, of New York; George Washington Cable, of Massachusetts; Andrew Dickson White, of New York; Henry van Dyke, of New Jersey; William Crary Brownell, of New York; Basil Lanneau Gildersleeve, of Maryland; Woodrow Wilson, of New Jersey; Arthur Twining Hadley, of Connecticut; Henry Cabot Lodge, of Massachusetts; Francis Hopkinson Smith, of New York; Edwin Howland Blashfield, of New York; William Merritt Chase, of New York; Thomas Hastings, of New York; Hamilton Wright Mabie, of New Jersey; Brander Matthews, of New York; Thomas Nelson Page, of the District of Columbia; Elihu Vedder, of Massachusetts; George Edward Woodberry, of Massachusetts; Kenyon Cox, of New York; George Whitefield Chadwick, of Massachusetts; Abbott Handerson Thayer, of New Hampshire; John Muir, of California; Charles Francis Adams, of Massachusetts; Henry Mills Alden, of New Jersey; George de Forest Brush, of New Hampshire; William Rutherford Mead, of New York; John White Alexander, of New York; Bliss Perry, of Massachusetts; Francis Davis Millet, of New York; Abbott Lawrence Lowell, of Massachusetts; James Whitcomb Riley, of Indiana; Nicholas Murray Butler, of New York; Paul Wayland Bartlett, of New York; George Browne Post, of New York, and their successors, duly chosen, are hereby incorporated, constituted, and declared to be a body corporate of the District of Columbia, by the name of the American Academy of Arts and Letters.

SEC. 2. That the purposes of this corporation are and shall be the furtherance of the interests of literature and the fine arts.

SEC. 3. That the American Academy of Arts and Letters shall consist of not more than 50 regular members, and the said corporation hereby constituted shall have power to make by-laws and rules and regulations; to fill all vacancies created by death, resignation, or otherwise; to provide for the election of foreign, domestic, or honorary associate members, and the division of such members into classes, and to do all other matters needful or usual in such institutions.

SEC. 4. That the American Academy of Arts and Letters shall hold an annual meeting at such place in the United States as may be designated and shall make an annual report to the Congress, to be filed with the Librarian of Congress.

SEC. 5. That the American Academy of Arts and Letters be, and the same is hereby, authorized and empowered to receive devises, bequests, and donations of real or personal property and to hold the same in trust, and to invest and reinvest the same for the purpose of furthering the interests of literature and the fine arts.

Mr. TOWNSEND. Mr. Speaker, this bill was considered by the House on February 15 and discussed at some length. In the course of the discussion it was developed that only two proposed amendments were desired by Members, and the chairman of the Committee on the Library, who reported the bill, informally agreed to both of these proposed amendments. One was by the gentleman from Missouri [Mr. SHACKLEFORD] and one was by the gentleman from Ohio [Mr. WILLIS]. I shall at the proper time offer these amendments and ask that they be adopted and that the bill be returned to the Senate with the request that the amendments be agreed to there. The committee has authorized me, in charge of the bill, to offer these amendments.

The SPEAKER. Now is the time to offer them.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. TOWNSEND. Certainly.

Mr. MOORE of Pennsylvania. I notice the name of Horace Howard Furness amongst those who are proposed as incorporators. My impression is that Mr. Furness is no longer living.

Mr. TOWNSEND. The bill provides that the men mentioned or their successors shall form this organization.

Mr. MOORE of Pennsylvania. It is all right if the gentleman understands.

Mr. CANNON and Mr. MILLER rose.

The SPEAKER. To whom does the gentleman yield?

Mr. TOWNSEND. I will yield first to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Did the bill pass the House? Is this an amendment to the House bill?

Mr. TOWNSEND. I offer it as an amendment to the Senate bill.

Mr. CANNON. This is a Senate bill?

Mr. TOWNSEND. This is a Senate bill.

Mr. CANNON. Did not a somewhat similar bill to this, for some scientific or artistic purpose, pass the House early in December, or some other time this winter?

Mr. TOWNSEND. A somewhat similar bill.

Mr. CANNON. What ever became of that bill?

Mr. TOWNSEND. It is the law.

Mr. MILLER and Mr. COVINGTON rose.

The SPEAKER. To whom does the gentleman from New Jersey [Mr. TOWNSEND] yield?

Mr. TOWNSEND. To the gentleman from Minnesota [Mr. MILLER].

Mr. MILLER. Mr. Speaker, while I am heartily in favor of the bill, it has struck me forcibly why this very distinguished galaxy of men whose names are mentioned here as the original incorporators does not include any gentleman west of the Allegheny Mountains except one, Mr. James Whitcomb Riley, a very eminent man, living in Indiana; and the purpose of my inquiry is to ascertain, if the gentleman can inform me, just how the names were secured, how these individuals were selected, if they were selected, and what opportunity there was given for men eminent in letters and arts, at least as far west as Chicago, to become members of this organization, and why they were not in some way incorporated or placed in this bill?

Mr. TOWNSEND. I am glad to answer the gentleman's question. There is in existence already an association of men with similar interests to those mentioned in this proposed measure.

They comprise about 250 men, who write and make pictures and do those other things which naturally associate them together. These 250 men selected this list of 50 men. The gentleman will find in the original society, which has been in existence now for some 15 or 20 years, men distinguished in art and letters from the Pacific coast to the Atlantic coast.

The question was asked here—further to answer the gentleman's question—why so few southerners were included in this organization. Mr. Robert Underwood Johnson, the president of this association, sent me a list—I am sorry I do not have it here—showing that 18 of these 50 were born in the South and probably a proportionate number in the West. I did not select these men. I had nothing to do with their selection. They were selected by the 250 men I refer to, who naturally drew together in the interest of this proposed association.

Mr. MILLER. Mr. Speaker, may I ask the gentleman another question?

Mr. COVINGTON. Mr. Speaker, will the gentleman yield?

Mr. TOWNSEND. Yes.

The SPEAKER. To whom does the gentleman yield?

Mr. TOWNSEND. To the gentleman from Maryland.

Mr. COVINGTON. Is not the bill which passed the Senate, and which is now sought to be taken from the Speaker's table here and passed, practically the same measure which was considered in this House on a recent Calendar Wednesday upon a report from the Committee on the Library, and which was withdrawn after consuming a considerable part of that day, considerable opposition having developed to the bill?

Mr. TOWNSEND. No; that is not the history of the bill. The Committee on the Library substituted another bill for it, the Lincoln memorial bill, and that is the reason why there was no conclusion reached as to this bill. This is not practically the same; it is identical.

I would say to the gentleman that the reason why there was no conclusion reached on the day of consideration was that there was a good deal of discussion about proposed amendments, which resolved themselves substantially into two amendments, one by the gentleman from Missouri [Mr. SHACKLEFORD] and one by the gentleman from Ohio [Mr. WILLIS], which the chairman of the committee agreed informally to accept and which I am now authorized by the committee to submit to the House.

Mr. SHERLEY. Was there not also a great deal of opposition to the bill itself? I know my opposition was.

Mr. COVINGTON. That is what I wanted to find out from the gentleman from New Jersey, whether a good deal of the opposition was not directed to the bill itself, and whether, in order to reach the Lincoln memorial bill the committee found that they must withdraw it in order to leave the way clear for the Lincoln memorial bill.

Mr. GARRETT rose.

The SPEAKER. For what purpose does the gentleman from Tennessee rise?

Mr. GARRETT. Mr. Speaker, the House has important business, that can not wait. This bill can wait. I desire to make a privileged motion to lay it on the table.

Mr. GARDNER of Massachusetts. Mr. Speaker, I raise the point of order that the gentleman can not make that motion

while the gentleman from New Jersey is holding the floor in debate.

Mr. GARRETT. Mr. Speaker, the rule provides that—

When a question is under debate no motion shall be received but to adjourn, to lay on the table, for the previous question (which motions shall be decided without debate), to postpone to a day certain, to refer, or to amend, or postpone indefinitely.

I submit that it is in order to make that motion at this time. Of course the gentleman from New Jersey [Mr. TOWNSEND] will not make the motion to lay it on the table.

Mr. GARDNER of Massachusetts. Mr. Speaker, if the gentleman's interpretation of that rule is correct, it would be in order at any time to break into the middle of a debate, another man holding the floor, and move to refer to a committee or move the previous question. The same line of reasoning that would enable a Member to intervene on motions put would also enable him to move the previous question.

Mr. Speaker, will the Chair hear me one moment more?

The SPEAKER. Yes.

Mr. GARDNER of Massachusetts. I maintain that the gentleman from Tennessee [Mr. GARRETT] is not yet recognized. The Chair asked him, "For what purpose does the gentleman rise?" That is not a recognition. That has never been recognized in this House as a recognition.

The SPEAKER. Nobody claims that it is.

Mr. GARDNER of Massachusetts. I claim that until he is recognized he can not make a motion to lay on the table.

Mr. MANN. Mr. Speaker, the gentleman from New Jersey [Mr. TOWNSEND] had the floor for debate.

The SPEAKER. Undoubtedly—for an hour.

Mr. MANN. He had it for not to exceed an hour. Now, it is manifest that the gentleman from New Jersey having the floor in debate, I could not rise and take him off the floor by demanding the previous question. And yet, if the Chair should hold the motion of the gentleman from Tennessee [Mr. GARRETT] in order, he would also have to hold that the demand for the previous question could take the man off the floor in debate.

Mr. GARRETT. All that I desire to do is to save time.

Mr. TOWNSEND. I will take very little time, if you will allow me.

Mr. GARRETT. For the present I withdraw the motion, but I give notice that I shall make it at the proper time.

The SPEAKER. The gentleman having withdrawn his motion to lay on the table, it is not necessary for the Chair to cross that bridge until we come to it.

Mr. COVINGTON. Mr. Speaker——

The SPEAKER. Does the gentleman from New Jersey yield?

Mr. TOWNSEND. In a moment. I have no desire whatever to take the time of the House uselessly or without an object of importance. I have occupied very little of the time of the House. It appeared to me from the debate on the 15th of January that, of course, there was some opposition to this bill. What I am trying to do now is to determine according to the rules of procedure of the House how much opposition there is. The chief opposition centers upon the point covered by the amendment suggested by the gentleman from Missouri [Mr. SHACKLEFORD]. The committee are prepared to accept that amendment, and if the amendments are permitted to be read and the House can have the chance to decide what should be done with the bill, I have no doubt that the bill will pass and those who desire to vote against it can have the opportunity to do so.

Mr. SISSON. It may be that we can facilitate the business of the House by the gentleman from New Jersey answering a few questions.

Mr. TOWNSEND. I shall be glad to do so.

Mr. SISSON. If this amendment proposed by the gentleman from Ohio [Mr. WILLIS] and the amendment proposed by the gentleman from Missouri [Mr. SHACKLEFORD] shall go on the bill, and the conferees of the House are willing to insist upon the adoption of these amendments, I at this time will interpose no objection to the passage of the bill.

Mr. SLAYDEN. Will the gentleman from Mississippi permit me to interrupt him?

Mr. SISSON. I will if I have the permission of the gentleman from New Jersey.

Mr. TOWNSEND. I yield to the gentleman.

Mr. SLAYDEN. I can speak only for myself, but I shall be a member of the conference committee, and I will say for myself that insistence upon those amendments will be had.

Mr. GARDNER of Massachusetts. Mr. Speaker, as the ranking Republican member of the conference committee I assure the gentleman that I shall maintain the same position, and will come back to the House for further instructions unless the Senate agree to these amendments.

Mr. SISSON. Now, Mr. Speaker, at this particular stage of the game, notwithstanding the fact that, as gentlemen know, I have been opposed to all Federal corporations of every kind, I shall not delay, so far as I am concerned, the business of the House one moment after the statement of the chairman of the committee, the gentleman from Texas [Mr. SLAYDEN], and the statement of the gentleman from Massachusetts [Mr. GARDNER], ranking Republican member. I shall not delay the House one moment if they will accept these amendments, because I think they will put the bill where it can do no possible harm. I say this irrespective of my objections to Federal corporations.

Mr. TOWNSEND. That being the case, I ask that the amendments be read.

The SPEAKER. The Clerk will read the first amendment.

The Clerk read as follows:

Add to section 5, page 3, after line 23, the following:

"*Provided*, That said corporation shall not have power to buy or hold real state other than so much as may be required for the home of the National Academy of Arts and Letters."

Mr. GARRETT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARRETT. The amendment having been offered by the gentleman from New Jersey, if a motion be now made to lay that amendment on the table and that motion should prevail, would it carry the bill to the table with it?

The SPEAKER. It would.

Mr. GARRETT. Then, Mr. Speaker, I move to lay the amendment on the table.

The question was taken; and on a division (demanded by Mr. TOWNSEND) there were 84 ayes and 55 noes.

Mr. MANN. Mr. Speaker, I make the point of order that no quorum is present.

The SPEAKER. The gentleman from Illinois makes the point that no quorum is present. Evidently there is no quorum present. The Doorkeeper will close the doors; the Sergeant at Arms will notify absentees. All those in favor of laying the amendment on the table, which will carry the bill with it, will vote "aye" and those opposed will answer "no." The Clerk will call the roll.

The question was taken; and there were—yeas 174, nays 129, answered "present" 7, not voting 71, as follows:

YEAS—174.

So the motion was agreed to.

The following pairs were announced:

For the session:

Mr. TALBOTT of Maryland with Mr. PARRAN.

Mr. PALMER with Mr. HILL, commencing January 8.

Until further notice:

Mr. MAYS with Mr. SPEER.

Mr. SMITH of New York with Mr. J. M. C. SMITH.

Mr. O'SHAUNESSY with Mr. ROBERTS of Nevada.

Mr. MORGAN of Louisiana with Mr. TAYLOR of Ohio.

Mr. MAHER with Mr. REYBURN.

Mr. LITTLETON with Mr. RODENBERG.

Mr. LAMB with Mr. PROUTY.

Mr. KORBLY with Mr. PORTER.

Mr. KONIG with Mr. MOON of Pennsylvania.

Mr. JAMES with Mr. WEEKS.

Mr. HUGHES of Georgia with Mr. HEALD.

Mr. HART with Mr. LAFFERTY.

Mr. HARRISON of New York with Mr. MATTHEWS.

Mr. HAMILTON of West Virginia with Mr. HARRIS.

Mr. GEORGE with Mr. GARDNER of New Jersey.

Mr. FERRIS with Mr. MCKINNEY.

Mr. EVANS with Mr. DE FOREST.

Mr. DONOHOE with Mr. FARR.

Mr. DAVENPORT with Mr. CURRY.

Mr. CONRY with Mr. DANFORTH.

Mr. CLARK of Florida with Mr. COPLEY.

Mr. CARTER with Mr. CRUMPACKER.

Mr. CANTRILL with Mr. BARCHFELD.

Mr. BUCHANAN with Mr. ANTHONY.

Mr. BROWN with Mr. AMES.

Mr. AYRES with Mr. AINEY.

Mr. ANSBERRY with Mr. BURKE of Pennsylvania.

Mr. PUJO with Mr. MCMORRAN.

Mr. LEE of Georgia with Mr. FAIRCHILD.

Mr. SPARKMAN with Mr. DAVIDSON.

Mr. KITCHIN with Mr. FORDNEY.

Mr. HULL with Mr. NEEDHAM.

Mr. WEBB with Mr. VREELAND.

Mr. RICHARDSON with Mr. THISTLEWOOD, commencing January 22, either to be released when the other would vote the same way.

Mr. MCDERMOTT with Mr. HAWLEY, commencing February 15, 1913, ending February 25, 1913, each reserving the right to vote on questions of local interest.

The result of the vote was announced as above recorded.

A quorum being present, the doors were opened.

IMMIGRATION OF ALIENS—VETO MESSAGE.

Mr. BURNETT. Mr. Speaker, I call up the immigration bill (S. 3175) to regulate the immigration of aliens to and the residence of aliens in the United States, and the veto message thereon.

Mr. COVINGTON. Mr. Speaker, I desire to call up a privileged resolution from the Committee on Elections No. 1, being the report of said committee upon the contested-election case of Eugene C. Bonniwell against Thomas S. Butler, seventh Pennsylvania district.

Mr. BURNETT. Mr. Speaker, I will ask the gentleman from Maryland how long this will take?

Mr. COVINGTON. One minute.

The SPEAKER. The Chair has already recognized the gentleman from Alabama [Mr. BURNETT].

Mr. COVINGTON. But, Mr. Speaker, mine is a resolution of the highest privilege.

The SPEAKER. The gentleman's resolution is not of higher privilege than a constitutional privilege. It is of no higher privilege than the matter called up by the gentleman from Alabama.

Mr. COVINGTON. Mr. Speaker, I will ask the gentleman from Alabama to withhold his motion for a short time.

Mr. BURNETT. How long will the gentleman from Maryland take?

Mr. COVINGTON. Not three minutes.

Mr. BURNETT. I will yield for that purpose.

The SPEAKER. Does the Chair understand the gentleman from Alabama to yield?

Mr. BURNETT. I do, for three minutes.

The SPEAKER. If the gentleman yields at all, he will yield the floor.

Mr. BURNETT. Then, Mr. Speaker, I will not yield. Mr. Speaker, I call up the bill S. 3175—the immigration bill—and the veto of the President thereon, and move to reconsider the bill, that that bill be passed, notwithstanding the veto of the President, and upon that I move the previous question.

The SPEAKER. The gentleman from Alabama moves to reconsider the immigration bill, and to pass it, the objections of the President of the United States to the contrary notwithstanding, and upon that he moves the previous question.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Under the Constitution the provision is that the question shall be, as I understand it, the passage on reconsideration, the objections of the President notwithstanding.

The SPEAKER. Yes.

Mr. MANN. The gentleman moves to reconsider. That is not to be put as a separate motion?

The SPEAKER. Oh, no.

Mr. MANN. I ask because I notice in another distinguished body they seemed to assume they might be able to vote down the question of consideration.

The SPEAKER. But this is another body.

Mr. MANN. And it follows the Constitution.

Mr. MOORE of Pennsylvania. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MOORE of Pennsylvania. Mr. Speaker, the gentleman from Alabama having made a motion which contemplates the previous question, I desire to know whether, there having been no debate, 40 minutes on a side will be allowed for discussion?

The SPEAKER. There will, undoubtedly, if no one undertakes to debate it before the question is put.

Mr. MADDEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MADDEN. Mr. Speaker, I understand the Speaker to say a motion to reconsider and a motion to pass is all one question?

The SPEAKER. It is all one question.

Mr. MADDEN. And it will be taken on one vote?

The SPEAKER. All on one vote. As a matter of fact, it did not require a motion. The Clerk will read the bill, and then read the message of the President, and then the message from the Senate.

The Clerk proceeded to read the bill.

Mr. BURNETT (interrupting the reading). Mr. Speaker, I ask unanimous consent that the reading of the bill may be omitted.

Mr. GOLDFOGLE. Mr. Speaker, I object.

Mr. CURLEY. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. LENROOT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LENROOT. Under what rule is the bill to be read?

The SPEAKER. That is the universal rule. Members have a right to know upon what they are voting.

Mr. LENROOT. Mr. Speaker, I desire to suggest for the consideration of the Speaker in that connection that this is a reconsideration of the bill; that the House has already acted upon the bill, and the matter stands in the same relation so far as its consideration is concerned as if a motion to reconsider had been made after the passage of the bill and that motion had prevailed.

The SPEAKER. The Clerk will read.

Mr. LENROOT. Therefore it is not any more in order to read the bill or require its reading than it would be in the case I have stated.

Mr. DALZELL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DALZELL. Is it in order to move to dispense with the reading of the bill?

The SPEAKER. The Chair does not think it is.

Mr. MANN. Except through the Committee on Rules.

The SPEAKER. The Clerk will read the bill.

The Clerk resumed and concluded the reading of the bill, as follows:

An act (S. 3175) to regulate the immigration of aliens to and the residence of aliens in the United States.

Be it enacted, etc., That the word "alien" wherever used in this act shall include any person not a native-born or naturalized citizen of the United States; but this definition shall not be held to include Indians not taxed or citizens of the islands under the jurisdiction of the United States. That the term "United States" as used in the title as well as in the various sections of this act shall be construed to mean the United States and any waters, territory, or other place subject to the jurisdiction thereof, except the Isthmian Canal Zone; but if any alien shall leave the Canal Zone and attempt to enter any other place under the jurisdiction of the United States, nothing contained in this act shall be construed as permitting him to enter under any other conditions than those applicable to all aliens. That the term "seaman" as used in this act shall include every person signed on the ship's articles and employed in any capacity on board any vessel arriving in the United States from any foreign port or place.

That this act shall be enforced in the Philippine Islands by officers of the General Government thereof designated by appropriate legislation of said Government.

SEC. 2. That there shall be levied, collected, and paid a tax of $5 for every alien, including alien seamen regularly admitted as provided in this act, entering the United States. The said tax shall be paid to the collector of customs of the port or customs district to which said alien shall come, or, if there be no collector at such port or district, then to the collector nearest thereto by the master, agent, owner, or consignee of the vessel, transportation line, or other conveyance or vehicle bringing such alien to the United States, or by the alien himself if he does not come by a vessel, transportation line, or other conveyance or vehicle. The tax imposed by this section shall be a lien upon the vessel or other vehicle or carriage or transportation bringing such aliens to the United States, and shall be a debt in favor of the United States against the owner or owners of such vessel or other vehicle, and the payment of such tax may be enforced by any legal or equitable remedy. That the said tax shall not be levied on account of aliens who have in accordance with law declared their intention of becoming citizens of the United States or on account of aliens who shall enter the United States after an uninterrupted residence of at least one year, immediately preceding such entrance, in the Dominion of Canada, Newfoundland, the Republic of Cuba, or the Republic of Mexico, nor on account of otherwise admissible residents of any possession of the United States, nor on account of aliens in transit through the United States, nor upon aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory: *Provided*, That the Commissioner General of Immigration, under the direction or with the approval of the Secretary of Commerce and Labor, by agreement with transportation lines, as provided in section 23 of this act, may arrange in some other manner for the payment of the tax imposed by this section upon any or all aliens seeking admission from foreign contiguous territory: *Provided further*, That said tax, when levied upon aliens entering the Philippine Islands, shall be paid into the treasury of said islands, to be expended for the benefit of such islands: *Provided further*, That in the cases of aliens applying for admission from foreign contiguous territory and rejected, the head tax collected shall upon application be refunded to the alien: *Provided further*, That the provisions of this section shall not apply to aliens arriving in Guam or Hawaii; but if any such alien, not having become a citizen of the United States, shall later arrive at any port or place of the United States on the North American Continent the provisions of this section shall apply.

SEC. 3. That the following classes of aliens shall be excluded from admission into the United States: All idiots, imbeciles, feeble-minded persons, epileptics, insane persons, and persons who have been insane within five years previous; persons who have had one or more attacks of insanity at any time previously; paupers; persons likely to become a public charge; professional beggars; vagrants; persons afflicted with tuberculosis in any form or with a loathsome or dangerous contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such mental or physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who admit their belief in the practice of polygamy; anarchists, or persons who believe in or advocate the overthrow by force or violence of the Government of the United States, or of all forms of law, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the Government of the United States or of any other organized government, because of his or their official character; prostitutes, or women or girls coming into the United States for the purpose of prostitution or for any other immoral purpose; persons who procure or attempt to bring in prostitutes or women or girls for the purpose of prostitution or for any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution; persons hereinafter called contract laborers, who have been induced, assisted, encouraged, or solicited to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published, or distributed in a foreign country; persons who have been deported under any of the provisions of this act, and who may again seek admission within one year from the date of such deportation, unless prior to their reembarkation at a foreign port the Secretary of Commerce and Labor shall have consented to their reapplying for admission; persons whose ticket or passage is paid for with the money of another, or who is assisted by others to come, unless it is affirmatively and satisfactorily shown that such person does not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality, or foreign Government, either directly or indirectly; stowaways, except that any such stowaway may be admitted in the discretion of the Secretary of Commerce and Labor; all children under 16 years of age, unaccompanied by one or both of their parents, at the discretion of the Secretary of Commerce and Labor or under such regulations as he may from time to time prescribe; persons who can not become eligible, under existing law, to become citizens of the United States by naturalization, unless otherwise provided for by existing agreements as to passports, or by treaties, conventions, or agreements that may hereafter be entered into. The provision next foregoing, however, shall not apply to persons of the following status or occupations: Government officers, ministers or religious teachers, missionaries, lawyers, physicians, chemists, engineers, teachers, students, authors, editors, journalists, merchants, bankers, and travelers for curiosity or pleasure, nor to their legal wives or their children under 16 years of age who shall accompany them or who subsequently may apply for admission to the United States, but such persons or their legal wives or foreign-born children who fail to maintain in the United States a status or occupation placing them within the excepted classes shall be deemed to be in the United States contrary to law, and shall be subject to deportation as provided in section 19 of this act.

That after four months from the approval of this act, in addition to the aliens who are by law now excluded from admission into the United States, the following persons shall also be excluded from admission thereto, to wit:

All aliens over 16 years of age, physically capable of reading, who can not read the English language, or some other language or dialect, including Hebrew or Yiddish: *Provided*, That any admissible alien or any alien heretofore or hereafter legally admitted, or any citizen of the United States, may bring in or send for his father or grandfather over 55 years of age, his wife, his mother, his grandmother, or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not; and such relatives shall be permitted to enter. That for the purpose of ascertaining whether aliens can read the immigrant inspectors shall be furnished with slips, of uniform size, prepared under the direction of the Secretary of Commerce and Labor, each containing not less than 30 nor more than 40 words in ordinary use, printed in plainly legible type in the various languages and dialects of immigrants. Each alien may designate the particular language or dialect in which he desires the examination to be made, and shall be required to read the words printed on the slip in such language or dialect. No two aliens coming in the same vessel or other vehicle of carriage or transportation shall be tested with the same slip. That the following classes of persons shall be exempt from the operation of the illiteracy test, to wit: All aliens who shall prove to the satisfaction of the proper immigration officer or to the Secretary of Commerce and Labor that they are seeking admission to the United States solely for the purpose of escaping from religious persecution; all aliens in transit through the United States; all aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory: *Provided*, That nothing in this act shall exclude, if otherwise admissible, persons convicted of an offense purely political, not involving moral turpitude: *Provided further*, That the provisions of this act relating to the payments for tickets or passage by any corporation, association, society, municipality, or foreign government, shall not apply to the tickets or passage of aliens in immediate and continuous transit through the United States to foreign contiguous territory: *Provided further*, That skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed can not be found in this country, and the question of the necessity of importing such skilled labor in any particular instance may be determined by the Secretary of Commerce and Labor upon the application of any person interested, such application to be made before such importation, and such determination by the Secretary of Commerce and Labor to be reached after a full hearing and an investigation into the facts of the case; but such determination shall not become final until a period of 30 days has elapsed. Within three days after such determination the Secretary of Commerce and Labor shall cause to be published a brief statement reciting the substance of the application, the facts presented at the hearing, and his determination thereon in three daily newspapers of general circulation in three of the principal cities of the United States. At any time during said period of 30 days any person dissatisfied with the ruling may appeal to the district court of the United States of the district into which the labor is sought to be brought, which court or the judge thereof in vacation shall have jurisdiction to try de novo such qestion of necessity, and the decision in such court shall be final. Such appeal shall operate as a supersedeas: *Provided further*, That the provisions of this law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed strictly as personal or domestic servants: *Provided further*, That whenever the President shall be satisfied that passports issued by any foreign Government to its citizens or subjects to go to any country other than the United States or to any insular possession of the United States or to the Canal Zone are being used for the purpose of enabling the holder to come to the continental territory of the United States to the detriment of labor conditions therein, the President shall refuse to permit such citizens or subjects of the country issuing such passports to enter the continental territory of the United States from such other country or from such insular possessions or from the Canal Zone: *Provided further*, That nothing in this act shall be construed to prevent, hinder, or restrict any alien exhibitor, or holder of a concession or privilege for any fair or exposition authorized by act of Congress, from bringing into the United States, under contract, such alien mechanics, artisans, agents, or other employees, natives of his country, as may be necessary for installing or conducting his exhibit or for preparing for installing or conducting any business authorized

or permitted under any concession or privilege which may have been or may be granted by any such fair or exposition in connection therewith, under such rules and regulations as the Commissioner General of Immigration, with the approval of the Secretary of Commerce and Labor, may prescribe both as to the admission and return of such persons: *Provided further*, That nothing in this act shall be construed to apply to accredited officials of foreign Governments nor to their suites, families, or guests: *Provided further*, That nothing in this act shall exclude the wife or minor children of a citizen of the United States.

SEC. 4. That the importation into the United States of any alien for the purpose of prostitution, or for any other immoral purpose, is hereby forbidden; and whoever shall, directly or indirectly, import, or attempt to import, into the United States any alien for the purpose of prostitution or for any other immoral purpose, or shall hold or attempt to hold any alien for any such purpose in pursuance of such illegal importation, or shall keep, maintain, control, support, employ, or harbor in any house or other place, for the purpose of prostitution or for any other immoral purpose, any alien, in pursuance of such illegal importation, shall in every such case be deemed guilty of a felony, and on conviction thereof shall be punished by imprisonment for a term of not more than 10 years and by a fine of not more than $5,000. Jurisdiction for the trial and punishment of the felonies hereinbefore set forth shall be in any district to or into which said alien is brought in pursuance of said importation by the person or persons accused, or in any district in which a violation of any of the foregoing provisions of this section occurs. That any alien who shall, after he has been excluded and deported or arrested and deported in pursuance of the provisions of this act which relate to prostitutes, procurers, or other like immoral persons, attempt thereafter to return to or to enter the United States shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by imprisonment for a term of not more than two years. In all prosecutions under this section the testimony of a husband or wife shall be admissible and competent evidence against a wife or husband.

SEC. 5. That it shall be unlawful for any person, company, partnership, or corporation, in any manner whatsoever, to prepay the transportation or in any way to induce, assist, encourage, or solicit the importation or migration of any contract laborer or contract laborers into the United States, unless such contract laborer or contract laborers are exempted under the provisions of section 3 of this act, and for every violation of any of the provisions of this section the person, partnership, company, or corporation violating the same shall forfeit and pay for every such offense the sum of $1,000, which may be sued for and recovered by the United States, or by any person who shall first bring his action therefor in his own name and for his own benefit, including any such aliens thus offered or promised employment as aforesaid, as debts of like amount are now recovered in the courts of the United States; or for every violation of the provisions hereof the person violating the same may be prosecuted in a criminal action for a misdemeanor, and on conviction thereof shall be punished by a fine of $1,000 or by imprisonment for a term of not less than six months nor more than two years; and under either the civil or the criminal procedure mentioned separate suits or prosecutions may be brought for each alien thus offered or promised employment as aforesaid.

SEC. 6. That it shall be unlawful and be deemed a violation of section 5 of this act to induce, assist, encourage, or solicit any alien to come into the United States by promise of employment through advertisements printed, published, or distributed in any foreign country, whether such promise is true or false, and either the civil or the criminal penalty imposed by said section shall be applicable to such a case: *Provided*, That States or Territories, the District of Columbia, or places subject to the jurisdiction of the United States may advertise and by written or oral communication with prospective alien settlers make known the inducements they offer for immigration thereto, respectively.

SEC. 7. That it shall be unlawful for any person, association, society, company, partnership, corporation, or others engaged in the business of transporting aliens to the United States, including owners, masters, officers, and agents of vessels, directly or indirectly, by writing, printing, or oral representation, to solicit, invite, or encourage any alien to come into the United States, and anyone violating any provision hereof shall be subject to either the civil or the criminal prosecution prescribed by section 5 of this act; or if it shall appear to the satisfaction of the Secretary of Commerce and Labor that any owner, master, officer, or agent of a vessel has brought or caused to be brought to a port of the United States any alien so solicited, invited, or encouraged to come by such owner, master, officer, or agent, such owner, master, officer, or agent shall pay to the collector of customs of the customs district in which the port of arrival is located or in which any vessel of the line may be found the sum of $400 for each and every such violation; and no vessel shall be granted clearance pending the determination of the question of the liability to the payment of such fine, or while the fine imposed remains unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of such questions upon the deposit with the collector of customs of a sum sufficient to cover such fine: *Provided further*, That whenever it shall be shown to the satisfaction of the Secretary of Commerce and Labor that the provisions of this section are persistently violated by or on behalf of any transportation company, it shall be the duty of said Secretary to deny to such company the privilege of landing alien immigrant passengers of any or all classes at United States ports for such a period as in his judgment may be necessary to insure an observance of such provisions: *Provided further*, That this section shall not be held to prevent transportation companies from issuing letters, circulars, or advertisements, confined strictly to stating the sailings of their vessels and terms and facilities of transportation therein.

SEC. 8. That any person, including the master, agent, owner, or consignee of any vessel, who shall bring into or land in the United States, by vessel or otherwise, or shall attempt, by himself or through another, to bring into or land in the United States, by vessel or otherwise, or shall conceal or harbor, or attempt to conceal or harbor, or assist or abet another to conceal or harbor in any place, including any building, vessel, railway car, conveyance, or vehicle, any alien not duly admitted by an immigrant inspector or not lawfully entitled to enter or to reside within the United States under the terms of this act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding $1,000, or by imprisonment for a term not exceeding two years, or by both such fine and imprisonment for each and every alien so landed or brought in or attempted to be landed or brought in.

SEC. 9. That it shall be unlawful for any person, including any transportation company other than railway lines entering the United States from foreign contiguous territory, or the owner, master, agent, or consignee of any vessel, to bring to the United States any alien afflicted with idiocy, insanity, imbecility, epilepsy, tuberculosis in any form, or a loathsome or dangerous contagious disease, and if it shall appear to the satisfaction of the Secretary of Commerce and Labor that any alien so brought to the United States was afflicted with any of the said diseases or disabilities at the time of foreign embarkation, and that the existence of such disease or disability might have been detected by means of a competent medical examination at such time, such person or transportation company, or the master, agent, owner, or consignee of any such vessel, shall pay to the collector of customs of the customs district in which the port of arrival is located the sum of $200 for each and every violation of the provisions of this section. It shall also be unlawful for any such person to bring to any port of the United States any alien afflicted with any mental or physical defect of a nature which may affect his ability to earn a living, as contemplated in section 3 of this act, and if it shall appear to the satisfaction of the Secretary of Commerce and Labor that any alien so brought to the United States was so afflicted at the time of foreign embarkation, and that the existence of such mental or physical defect might have been detected by means of a competent medical examination at such time, such person shall pay to the collector of customs of the customs district in which the port of arrival is located the sum of $25 for each and every violation of this provision. It shall also be unlawful for any such person to bring to any port of the United States any alien who is excluded by the provisions of section 3 of this act because unable to read or who can not become eligible, under existing law, to become a citizen of the United States by naturalization, as provided in section 3 of this act, and if it shall appear to the satisfaction of the Secretary of Commerce and Labor that these disabilities might have been detected by the exercise of reasonable precaution prior to the departure of such aliens from a foreign port such person shall pay to the collector of customs of the customs district in which the port of arrival is located the sum of $100 for each and every violation of this provision. And no vessel shall be granted clearance papers pending the determination of the question of the liability to the payment of such fine, or while the fine remains unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of such questions upon the deposit of a sum sufficient to cover such fine and costs, such sum to be named by the Secretary of Commerce and Labor.

SEC. 10. That it shall be the mandatory and unqualified duty of every person, including owners, officers, and agents of vessels or transportation lines, other than those lines which may enter into a contract as provided in section 23 of this act, bringing an alien to any seaport or land border port of the United States to prevent the landing of such alien in the United States at any time or place other than as designated by the immigration officers, and the failure of any such owner, officer, or agent to comply with the foregoing requirements shall be deemed a misdemeanor and on conviction thereof shall be punished by a fine in each case of not less than one hundred nor more than one thousand dollars or by imprisonment for a term not exceeding one year, or by both such fine and imprisonment; or, if in the opinion of the Secretary of Commerce and Labor it is impracticable or inconvenient to prosecute the owner, master, officer, or agent of any such vessel, a pecuniary penalty of $1,000 shall be a lien upon the vessel whose owner, master, officer, or agent violates the provisions of this section, and such vessel shall be libeled therefor in the appropriate United States court.

SEC. 11. That whenever he may deem such action necessary the Secretary of Commerce and Labor may, at the expense of the appropriation for the enforcement of this act, detail immigrant inspectors and matrons of the United States Immigration Service for duty on vessels carrying immigrant or emigrant passengers, or passengers other than first and second cabin passengers, between ports of the United States and foreign ports. On such voyages said inspectors and matrons shall remain in that part of the vessel where immigrant passengers are carried. It shall be the duty of such inspectors and matrons to observe such passengers during the voyage, and report to the immigration authorities in charge at the port of landing any information of value in determining the admissibility of such passengers under the laws regulating immigration of aliens into the United States. It shall further be the duty of such inspectors and matrons to observe violations of the provisions of such laws and the violation of such provisions of the "passenger act" of August 2, 1882, as amended, as relate to the care and treatment of immigrant passengers at sea, and report the same to the proper United States officials at ports of landing. Whenever the Secretary of Commerce and Labor so directs, a surgeon of the United States Public Health Service, detailed to the Immigration Service, not lower in rank than a passed assistant surgeon, shall be received and carried on any vessel transporting immigrant or emigrant passengers, or passengers other than first and second cabin passengers, between ports of the United States and foreign ports. Such surgeon shall be permitted to investigate and examine the condition of all immigrant and emigrant passengers in relation to any provisions of the laws regulating the immigration of aliens into the United States and such provisions of the "passenger act" of August 2, 1882, as amended, as relate to the care and treatment of immigrant passengers at sea, and shall immediately report any violation of said laws to the master or commanding officer of the vessel, and shall also report said violations to the Secretary of Commerce and Labor within 24 hours after the arrival of the vessel at the port of entry in the United States. Such surgeon shall accompany the master or captain of the vessel in his visits to the sanitary officers of the ports of call during the voyage, and, should contagious or infectious diseases prevail at any port where passengers are received, he shall request all reasonable precautionary measures for the health of persons on board. Such surgeon on arrival at ports of the United States shall also, if requested by the examining board, furnish any information he may possess in regard to immigrants arriving on the vessel to which he has been detailed. While on duty such surgeon shall wear the prescribed uniform of their service and shall be provided with first-class accommodations on such vessel at the expense of the appropriation for the enforcement of this act. For every violation of this section any person, including any transportation company, owning or operating the vessel in which such violation occurs shall pay to the collector of customs of the customs district in which the next United States port of arrival is located the sum of $1,000 for each and every day during which such violation continues, the term "violation" to include the refusal of any person having authority so to do to permit any such immigrant inspector, matron, or surgeon to be received on board such vessel, as provided in this section, and also the refusal of the master or commanding officer of any such vessel to permit the inspections and visits of any such surgeon, as provided in this section, and no vessel shall be granted clearance papers pending the determination of the question of the lia-

bility of such fine, or while it remains unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of all such questions upon the deposit of a sum sufficient to cover such fine and costs, such sum to be named by the Secretary of Commerce and Labor.

SEC. 12. That upon the arrival of any alien by water at any point within the United States on the North American Continent from a foreign port or a port of the Philippine Islands, Guam, Porto Rico, or Hawaii, or at any port of the said insular possessions from any foreign port, from a port in the United States on the North American Continent, or from a port of another insular possession of the United States, it shall be the duty of the master or commanding officer, owners, or consignees of the steamer, sailing, or other vessel having said alien on board to deliver to the immigration officers at the port of arrival lists or manifests made at the time and place of embarkation of such alien on board such steamer or vessel, which shall, in answer to questions at the top of said list, contain full and accurate information as to each alien as follows: Full name, age, and sex; whether married or single; calling or occupation; personal description (including height, complexion, color of hair and eyes, and marks of identification); whether able to read; nationality; country of birth; race; country of last permanent residence; name and address of the nearest relative in the country from which the alien came; seaport for landing in the United States; final destination, if any, beyond the port of landing; whether having a ticket through to such final destination; by whom passage was paid; whether going to join a relative or friend, and if so, what relative or friend, and his or her name and complete address; whether ever before in the United States, and if so, when and where; whether ever in prison or almshouse or an institution or hospital for the care and treatment of the insane or supported by charity; whether a polygamist; whether an anarchist; whether a person who believes in or advocates the overthrow by force or violence of the Government of the United States or of all forms of law, or who disbelieves in or is opposed to organized government, or who advocates the assassination of public officials, or is a member of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the Government of the United States or of any other organized government, because of his or their official character; whether coming by reason of any offer, solicitation, promise, or agreement, express or implied, to perform labor in the United States; the alien's condition of health, mental and physical; whether deformed or crippled, and if so, for how long and from what cause; and such master or commanding officer, owners, or consignees shall also furnish information in relation to the sex, age, class of travel, and the foreign port of embarkation of arriving passengers who are United States citizens. That it shall further be the duty of the master or commanding officer of every vessel taking passengers from any port of the United States on the North American Continent to a foreign port or a port of the Philippine Islands, Guam, Porto Rico, or Hawaii, or from any port of the said insular possessions to any foreign port, to a port of the United States on the North American Continent, or to a port of another insular possession of the United States, to file with the immigration officials before departure a list which shall contain full and accurate information in relation to the following matters regarding all alien passengers, and all citizens of the United States or insular possessions of the United States departing with the stated intent to reside permanently in a foreign country, taken on board: Name, age, and sex; whether married or single; calling or occupation; whether able to read; nationality; country of birth; country of which citizen or subject; race; last permanent residence in the United States or insular possessions thereof; if a citizen of the United States or of the insular possessions thereof, whether native born or naturalized; intended future permanent residence; and time and port of last arrival in the United States, or insular possessions thereof; and such master or commanding officer shall also furnish information in relation to the sex, age, class of travel, and port of debarkation of the United States citizens departing who do not intend to reside permanently in a foreign country, and no master of any such vessel shall be granted clearance papers for his vessel until he has deposited such list or lists with the immigration officials at the port of departure and made oath that they are full and complete as to the name and other information herein required concerning each person of the classes specified taken on board his vessel; and any neglect or omission to comply with the requirements of this section shall be punishable as provided in section 14 of this act: *Provided*, That in the case of vessels making regular trips to ports of the United States the Commissioner General of Immigration, with the approval of the Secretary of Commerce and Labor, may, when expedient, arrange for the delivery of such lists of outgoing aliens at a later date: *Provided further*, That it shall be the duty of immigration officials to record the following information regarding every resident alien and citizen leaving the United States by way of the Canadian or Mexican borders for permanent residence in a foreign country: Name, age, and sex; whether married or single; calling or occupation; whether able to read; nationality; country of birth; country of which citizen or subject; race; last permanent residence in the United States; intended future permanent residence; and time and port of last arrival in the United States; and if a United States citizen, whether native born or naturalized.

SEC. 13. That all aliens arriving by water at the ports of the United States shall be listed in convenient groups, the names of those coming from the same locality to be assembled so far as practicable, and no one list or manifest shall contain more than 30 names. To each alien or head of a family shall be given a ticket on which shall be written his name, a number or letter designating the list in which his name, etc., are contained, and his number on said list, for convenience of identification on arrival. Each list or manifest shall be verified by the signature and the oath or affirmation of the master or commanding officer, or the first or second below him in command, taken before an immigration officer at the port of arrival, to the effect that he has caused the surgeon of said vessel sailing therewith to make a physical and oral examination of each of said aliens, and that from the report of said surgeon and from his own investigation he believes that no one of said aliens is of any of the classes excluded from admission into the United States by section 3 of this act, and that also according to the best of his knowledge and belief, the information in said lists or manifests concerning each of said aliens named therein is correct and true in every respect. That the surgeon of said vessel sailing therewith shall also sign each of said lists or manifests and make oath or affirmation in like manner before an immigration officer at the port of arrival, stating his professional experience and qualifications as a physician and surgeon, and that he has made a personal examination of each of the said aliens named therein, and that the said list or manifest, according to the best of his knowledge and belief, is full, correct, and true in all particulars relative to the mental and physical condition of said aliens. If no surgeon sails with any vessel bringing aliens, the mental and physical examinations and the verifications of the lists or manifests shall be made by some competent surgeon employed by the owners of the said vessels, and the manifests shall be verified by such surgeon before a United States consular officer.

SEC. 14. That it shall be unlawful for the master or commanding officer of any vessel bringing aliens into or carrying aliens out of the United States to refuse or fail to deliver to the immigration officials the accurate and full manifests or statements or information regarding all aliens on board or taken on board such vessel required by this act, and if it shall appear to the satisfaction of the Secretary of Commerce and Labor that there has been such a refusal or failure, or that the lists delivered are not accurate and full, such master or commanding officer shall pay to the collector of customs at the port of arrival or departure the sum of $10 for each alien concerning whom such accurate and full manifest or statement or information is not furnished, or concerning whom the manifest or statement or information is not prepared and sworn to as prescribed by this act. No vessel shall be granted clearance pending the determination of the question of the liability to the payment of such fine, or while it remains unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of such question upon the deposit with the collector of customs of a sum sufficient to cover such fine.

SEC. 15. That upon the arrival at a port of the United States of any vessel bringing aliens it shall be the duty of the proper immigration officials to go or to send competent assistants to the vessel and there inspect all such aliens, or said immigration officials may order a temporary removal of such aliens for examination at a designated time and place, but such temporary removal shall not be considered a landing, nor shall it relieve the transportation lines, masters, agents, owners, or consignees of the vessel upon which said aliens are brought to any port of the United States from any of the obligations which, in case such aliens remain on board, would, under the provisions of this act, bind the said transportation lines, masters, agents, owners, or consignees: *Provided*, That where removal is made to premises owned or controlled by the United States, said transportation lines, masters, agents, owners, or consignees, and each of them shall, so long as detention there lasts, be relieved of responsibility for the safekeeping of such aliens. Whenever a temporary removal of aliens is made the transportation lines which brought them and the masters, owners, agents, and consignees of the vessel upon which they arrive shall pay all expenses of such removal and all expenses arising during subsequent detention, pending decision on the aliens' eligibility to enter the United States and until they are either allowed to land or returned to the care of the line or to the vessel which brought them, such expenses to include those of maintenance, medical treatment in hospital or elsewhere, burial in the event of death, and transfer to the vessel in the event of deportation, excepting only where they arise under the terms of any of the provisos of section 18 hereof. Any refusal or failure to comply with the provisions hereof to be punished in the manner specified in section 18 of this act.

SEC. 16. That the physical and mental examination of all arriving aliens shall be made by medical officers of the United States Public Health Service who shall have had at least two years' experience in the practice of their profession since receiving the degree of doctor of medicine, and who shall certify, for the information of the immigration officers and the boards of special inquiry hereinafter provided for, any and all physical and mental defects or diseases observed by said medical officers in any such alien; or, should medical officers of the United States Public Health Service be not available, civil surgeons of not less than four years professional experience may be employed in such emergency for such service, upon such terms as may be prescribed by the Commissioner General of Immigration, under the direction or with the approval of the Secretary of Commerce and Labor. Medical officers of the United States Public Health Service who have had especial training in the diagnosis of insanity and mental defect shall be detailed for duty or employed at all large ports of entry, and such medical officers shall be provided with suitable facilities for the detention and examination of all arriving aliens in whom insanity or mental defect is suspected, and the services of interpreters shall be provided for such examination. That the inspection, other than the physical and mental examination, of aliens, including those seeking admission or readmission to or the privilege of passing through or residing in the United States, and the examination of aliens arrested within the United States under this act, shall be conducted by immigrant inspectors, except as hereinafter provided in regard to boards of special inquiry. Immigrant inspectors are hereby authorized and empowered to board and search for aliens any vessel, railway car, conveyance, or vehicle in which they believe aliens are being brought into the United States. Said inspectors shall have power to administer oaths and to take and consider evidence touching the right of any alien to enter, reenter, pass through, or reside in the United States, and, where such action may be necessary, to make a written record of such evidence; and any person to whom such an oath has been administered, under the provisions of this act, who shall knowingly or willfully give false evidence or swear to any false statement in any way affecting or in relation to the right of any alien to admission, or readmission to, or to pass through, or to reside in the United States shall be deemed guilty of perjury and be punished as provided by section 125 of the act approved March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States." Any commissioner of immigration or inspector in charge shall also have power to require the attendance and testimony of witnesses before said inspectors and the production of books, papers, and documents touching the right of any alien to enter, reenter, reside in, or pass through the United States, and to that end may invoke the aid of any court of the United States; and any district court within the jurisdiction of which investigations are being conducted by an immigrant inspector may, in the event of neglect or refusal to respond to a subpœna issued by any commissioner of immigration or inspector in charge or refusal to testify before said immigrant inspector, issue an order requiring such person to appear before said immigrant inspector, produce books, papers, and documents if demanded, and testify; and any failure to obey such order of the court shall be punished by the court as a contempt thereof. That any person, including employees, officials, or agents of transportation companies, who shall assault, resist, prevent, impede, or interfere with any immigration official or employee in the performance of his duty under this act shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by imprisonment for a term of not less than six months nor more than two years, or by a fine of not less than two hundred nor more than two thousand dollars; and any person who shall use any deadly or dangerous weapon in resisting any immigration official or employee in the performance of his duty shall be deemed guilty of a felony and shall on conviction

thereof be punished by imprisonment for not less than 1 nor more than 10 years. Every alien who may not appear to the examining immigrant inspector at the port of arrival to be clearly and beyond a doubt entitled to land shall be detained for examination in relation thereto by a board of special inquiry. In the event of rejection by the board of special inquiry, in all cases where an appeal to the Secretary of Commerce and Labor is permitted by this act, the alien shall be so informed and shall have the right to be represented by counsel or other adviser on such appeal. The decision of an immigrant inspector, if favorable to the admission of any alien, shall be subject to challenge by any other immigrant inspector, and such challenge shall operate to take the alien whose right to land is so challenged before a board of special inquiry for its investigation.

SEC. 17. That boards of special inquiry shall be appointed by the commissioner of immigration or inspector in charge at the various ports of arrival as may be necessary for the prompt determination of all cases of immigrants detained at such ports under the provisions of the law. Each board shall consist of three members, who shall be selected from such of the immigrant officials in the service as the Commissioner General of Immigration, with the approval of the Secretary of Commerce and Labor, shall from time to time designate as qualified to serve on such boards. When in the opinion of the Secretary of Commerce and Labor the maintenance of a permanent board of special inquiry for service at any sea or land border port is not warranted, regularly constituted boards may be detailed from other stations for temporary service at such port, or, if that be impracticable, the Secretary of Commerce and Labor shall authorize the creation of boards of special inquiry by the immigration officials in charge at such ports, and shall determine what Government officials or other persons shall be eligible for service on such boards. Such boards shall have authority to determine whether an alien who has been duly held shall be allowed to land or shall be deported. All hearings before such boards shall be separate and apart from the public. Such boards shall keep a complete permanent record of their proceedings and of all such testimony as may be produced before them; and the decision of any two members of a board shall prevail, but either the alien or any dissenting member of the said board may appeal through the commissioner of immigration at the port of arrival and the Commissioner General of Immigration to the Secretary of Commerce and Labor, and the taking of such appeal shall operate to stay any action in regard to the final disposal of any alien whose case is so appealed until the receipt by the commissioner of immigration at the port of arrival of such decision, which shall be rendered solely upon the evidence adduced before the board of special inquiry. In every case where an alien is excluded from admission into the United States, under any law or treaty now existing or hereafter made, the decision of a board of special inquiry if adverse to the admission of such alien shall be final, unless reversed on appeal to the Secretary of Commerce and Labor: *Provided*, That the decision of a board of special inquiry, based upon the certificate of the examining medical officer, shall be final as to the rejection of aliens affected with tuberculosis in any form or with a loathsome or dangerous contagious disease, or with any mental or physical disability which would bring such aliens within any of the classes excluded from admission to the United States under section 3 of this act.

SEC. 18. That all aliens brought to this country in violation of law shall, if practicable, be immediately sent back, in accommodations of the same class in which they arrived, to the country whence they respectively came on the vessels bringing them. The cost of their maintenance while on land, as well as the expense of the return of such aliens, shall be borne by the owner or owners of the vessels on which they respectively came. That it shall be unlawful for any master, purser, person in charge, agent, owner, or consignee of any such vessel to refuse to receive back on board thereof, or on board of any other vessel owned or operated by the same interests, such aliens; or to fail to detain them thereon; or to refuse or fail to return them in the manner aforesaid to the foreign port from which they came; or to pay the cost of their maintenance while on land; or to make any charge for the return of any such alien; or to take any security from him for the payment of such charge; or to take any consideration to be returned in case the alien is landed; or knowingly to bring to the United States at any time within one year from the date of deportation any alien rejected or arrested and deported under any provision of this act, unless prior to reembarkation the Secretary of Commerce and Labor has consented that such alien shall reapply for admission, as required by section 3 hereof; and if it shall appear to the satisfaction of the Secretary of Commerce and Labor that such master, purser, person in charge, agent, owner, or consignee has violated any of the foregoing provisions, such master, purser, person in charge, agent, owner, or consignee shall pay to the collector of customs of the customs district in which the port of arrival is located, or in which any vessel of the line may be found, the sum of $300 for each and every violation of any provision of this section; and no vessel shall have clearance from any port of the United States while any such fine is unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of such question upon the deposit with the collector of customs of a sum sufficient to cover such fine. If the vessel by which any alien ordered deported came has left the United States and it is impracticable for any reason to deport the alien within a reasonable time by another vessel owned by the same interests, the cost of deportation may be paid by the Government and recovered by civil suit from any agent, owner, or consignee of the vessel: *Provided further*, That the Commissioner General of Immigration, with the approval of the Secretary of Commerce and Labor, may suspend, upon conditions to be prescribed by the Commissioner General of Immigration, the deportation of any alien found to have come in violation of any provision of this act if, in his judgment, the testimony of such alien is necessary on behalf of the United States Government in the prosecution of offenders against any provision of this act; and the cost of maintenance of any person so detained resulting from such suspension of deportation, and a witness fee in the sum of $1 per day for each day such person is so detained, may be paid from the appropriation for the enforcement of this act, or such alien may be released under bond, in the penalty of not less than $500, with security approved by the Secretary of Commerce and Labor, conditioned that such alien shall be produced when required as a witness and for deportation. No alien certified, as provided in section 16 of this act, to be suffering from tuberculosis in any form, or from a loathsome or dangerous contagious disease other than one of quarantinable nature, shall be permitted to land for medical treatment thereof in any hospital in the United States, unless with the express permission of the Secretary of Commerce and Labor: *Provided further*, That upon the certificate of a medical officer of the United States Public Health Service to the effect that the health or safety of an insane alien would be unduly imperiled by immediate deportation, such alien may, at the expense of the appropriation for the enforcement of this act, be held for treatment until such time as such alien may, in the opinion of such medical officer, be safely deported: *Provided further*, That upon the certificate of a medical officer of the United States Public Health Service to the effect that a rejected alien is helpless from sickness, mental or physical disability, or infancy, if such alien is accompanied by another alien whose protection or guardianship is required by such rejected alien, such accompanying alien may also be excluded, and the master, agent, owner, or consignee of the vessel in which such alien and accompanying alien are brought shall be required to return said alien and accompanying alien in the same manner as vessels are required to return other rejected aliens.

SEC. 19. That any alien, at any time within three years after entry, who shall enter the United States in violation of law; any alien who within three years after entry becomes a public charge from causes existing prior to the landing; except as hereinafter provided, any alien who is hereafter sentenced to imprisonment for a term of one year or more because of conviction in this country of a crime involving moral turpitude, committed within three years after the entry of the alien to the United States; any alien who shall be found an inmate of or connected with the management of a house of prostitution or practicing prostitution after such alien shall have entered the United States, or who shall receive, share in, or derive benefit from any part of the earnings of any prostitute; any alien who is employed by, in, or in connection with any house of prostitution or music or dance hall or other place of amusement or resort habitually frequented by prostitutes, or where prostitutes gather, or who in any way assists, protects, or promises to protect from arrest any prostitute; any alien who shall import or attempt to import any person for the purpose of prostitution or for any other immoral purpose; any alien who, after being excluded and deported or arrested and deported as a prostitute, or as a procurer, or as having been connected with the business of prostitution or importation for prostitution or other immoral purposes in any of the ways hereinbefore specified, shall return to and enter the United States; any alien convicted and imprisoned for a violation of any of the provisions of section 4 hereof; any alien, at any time within three years after entry, who shall enter the United States by water at any time or place other than as designated by immigration officials, or by land at any place other than one designated as a port of entry for aliens by the Commissioner General of Immigration, or at any time not designated by immigration officials, shall, upon the warrant of the Secretary of Commerce and Labor, be taken into custody and deported: *Provided*, That the provision of this section respecting the deportation of aliens convicted of a crime involving moral turpitude shall not apply to one who has been pardoned, nor shall such deportation be made or directed if the court sentencing such alien for such crime shall, at the time of imposing judgment or passing sentence, make a recommendation to the Secretary of Commerce and Labor that such alien shall not be deported in pursuance of this act; nor shall any alien convicted as aforesaid be deported until after the termination of his imprisonment: *Provided further*, That the provisions of this section, with the exceptions hereinbefore noted, shall be applicable to the classes of aliens therein mentioned irrespective of the time of their entry into the United States. In every case where any person is ordered deported from the United States under the provisions of this act or of any law or treaty now existing, the decision of the Secretary of Commerce and Labor shall be final.

SEC. 20. That the deportation of aliens provided for in this act shall, at the option of the Secretary of Commerce and Labor, be to the country whence they came or to the foreign port at which such aliens embarked for the United States; or, if such embarkation was for foreign contiguous territory, to the foreign port at which they embarked for such territory; or, if such aliens entered foreign contiguous territory from the United States and later entered the United States, or if such aliens are held by the country from which they entered the United States not to be subjects or citizens of such country, and such country refuses to permit their reentry, or imposes any condition upon permitting reentry, then to the country of which such aliens are subjects or citizens, or to the country in which they resided prior to entering the country from which they entered the United States. If effected at any time within five years after the entry of the alien, such deportation, including one-half of the entire cost of removal to the port of deportation, shall be at the expense of the contractor, procurer, or other person by whom the alien was unlawfully induced to enter the United States, or, if that can not be done, then the cost of removal to the port of deportation shall be at the expense of the appropriation for the enforcement of this act, and the deportation from such port shall be at the expense of the owner or owners of such vessels or transportation line by which such aliens respectively came, or, if that is not practicable, at the expense of the appropriation for the enforcement of this act. If such deportation is effected later than five years after the entry of the alien, or, if the deportation is made by reason of causes arising subsequent to entry, the cost thereof shall be payable from the appropriation for the enforcement of this act. A failure or refusal on the part of the masters, agents, owners, or consignees of vessels to comply with the order of the Secretary of Commerce and Labor to take on board, guard safely, and transport to the destination specified any alien ordered to be deported under the provisions of this act shall be punished by the imposition of the penalties prescribed in section 18 of this act: *Provided*, That when, in the opinion of the Secretary of Commerce and Labor, the mental or physical condition of such alien is such as to require personal care and attendance, he may employ a suitable person for that purpose, who shall accompany such alien to his or her final destination, and the expense incident to such service shall be defrayed in like manner. Pending the final disposal of the case of any alien so taken into custody he may be released under a bond in the penalty of not less than $500 with security approved by the Secretary of Commerce and Labor, conditioned that such alien shall be produced when required for a hearing or hearings in regard to the charge upon which he has been taken into custody, and for deportation if he shall be found to be unlawfully within the United States.

SEC. 21. That any alien liable to be excluded because likely to become a public charge or because of physical disability other than tuberculosis in any form or a loathsome or dangerous contagious disease may, if otherwise admissible, nevertheless be admitted in the discretion of the Secretary of Commerce and Labor upon the giving of a suitable and proper bond or undertaking, approved by said Secretary, in such amount and containing such conditions as he may prescribe, to the United States and to all States, Territories, counties, towns, municipalities, and districts thereof, holding the United States and all States, Territories, counties, towns, municipalities, and districts thereof harmless against such alien becoming a public charge. The admission of such alien shall be a consideration for the giving of such bond or undertaking. Suit

may be brought thereon in the name and by the proper law officers either of the United States Government or of any State, Territory, District, county, town, or municipality in which such alien becomes a public charge.

SEC. 22. That wherever an alien shall have taken up his permanent residence in this country, and shall have filed his declaration of intention to become a citizen, and thereafter shall send for his wife or minor children to join him, if said wife or any of said children shall be found to be affected with any contagious disorder, such wife or children shall be held, under such regulations as the Secretary of Commerce and Labor shall prescribe, until it shall be determined whether the disorder will be easily curable or whether they can be permitted to land without danger to other persons; and they shall not be either admitted or deported until such facts have been ascertained; and if it shall be determined that the disorder is easily curable and the husband or father or other responsible person is willing to bear the expense of the treatment, they may be accorded treatment in hospital until cured and then be admitted, or if it shall be determined that they can be permitted to land without danger to other persons, they may, if otherwise admissible, thereupon be admitted.

SEC. 23. That the Commissioner General of Immigration shall perform all his duties under the direction of the Secretary of Commerce and Labor. Under such direction he shall have charge of the administration of all laws relating to the immigration of aliens into the United States, and shall have the control, direction, and supervision of all officers, clerks, and employees appointed thereunder; he shall establish such rules and regulations, prescribe such forms of bond, reports, entries, and other papers, and shall issue from time to time such instructions, not inconsistent with law, as he shall deem best calculated for carrying out the provisions of this act and for protecting the United States and aliens migrating thereto from fraud and loss, and shall have authority to enter into contract for the support and relief of such aliens as may fall into distress or need public aid, and to remove to their native country, at any time within three years after entry, at the expense of the appropriations for the enforcement of this act, such as fall into distress or need public aid from causes arising subsequent to their entry and are desirous of being so removed; he shall prescribe rules for the entry and inspection of aliens along the borders of Canada and Mexico, so as not unnecessarily to delay, impede, or annoy persons in ordinary travel between the United States and said countries, and shall have power to enter into contracts with transportation lines for the said purpose; it shall be the duty of the Commissioner General of Immigration to detail officers of the Immigration Service from time to time as may be necessary, in his judgment, to secure information as to the number of aliens detained in the penal, reformatory, and charitable institutions (public and private) of the several States and Territories, the District of Columbia, and other territory of the United States and to inform the officers of such institutions of the provisions of law in relation to the deportation of aliens who have become public charges. He may, with the approval of the Secretary of Commerce and Labor, whenever in his judgment such action may be necessary to accomplish the purposes of this act, detail immigration officers, and also surgeons of the United States Public Health Service employed under this act for service in foreign countries. The duties of commissioners of immigration and other immigration officials in charge of districts, ports, or stations shall be of an administrative character, to be prescribed in detail by regulations prepared under the direction or with the approval of the Secretary of Commerce and Labor: *Provided*, That for the purpose of making effective the provisions of this section relating to the protection of aliens from fraud and loss, and also the provisions of section 30 of this act, relating to the distribution of aliens, the Secretary of Commerce and Labor shall establish and maintain immigrant stations at such interior places as may be necessary, and, in the discretion of the said Secretary, aliens in transit from ports of landing to such interior stations shall be accompanied by immigrant inspectors.

SEC. 24. That immigrant inspectors and other immigration officers, clerks, and employees shall hereafter be appointed and their compensation fixed and raised or decreased from time to time by the Secretary of Commerce and Labor, upon the recommendation of the Commissioner General of Immigration and in accordance with the provisions of the civil-service act of January 16, 1883: *Provided*, That said Secretary, in the enforcement of that portion of this act which excludes contract laborers, may employ, without reference to the provisions of the said civil-service act, or to the various acts relative to the compilation of the Official Register, such persons as he may deem advisable and from time to time fix, raise, or decrease their compensation. He may draw annually from the appropriation for the enforcement of this act $50,000, or as much thereof as may be necessary, to be expended for the salaries and expenses of persons so employed and for expenses incident to such employment; and the accounting officers of the Treasury shall pass to the credit of the proper disbursing officer expenditures from said sum without itemized account whenever the Secretary of Commerce and Labor certifies that an itemized account would not be for the best interests of the Government: *Provided further*, That nothing herein contained shall be construed to alter the mode of appointing commissioners of immigration at the several ports of the United States as provided by the sundry civil appropriation act approved August 18, 1894, or the official status of such commissioners heretofore appointed.

SEC. 25. That the district courts of the United States are hereby invested with full and concurrent jurisdiction of all causes, civil and and criminal, arising under any of the provisions of this act. That it shall be the duty of the United States district attorney of the proper district to prosecute every such suit when brought by the United States under this act. Such prosecutions or suits may be instituted at any place in the United States at which the violation may occur or at which the person charged with such violation may be found. That no suit or proceeding for a violation of the provisions of this act shall be settled, compromised, or discontinued without the consent of the court in which it is pending, entered of record, with the reasons therefor.

SEC. 26. That all exclusive privileges of exchanging money, transporting passengers or baggage, or keeping eating houses, and all other like privileges in connection with any United States immigrant station, shall be disposed of after public competition, subject to such conditions and limitation as the Commissioner General of Immigration, under the direction or with the approval of the Secretary of Commerce and Labor, may prescribe, and all receipts accruing from the disposal of such exclusive privileges shall be paid into the Treasury of the United States. No intoxicating liquors shall be sold at any such immigrant station.

SEC. 27. That for the preservation of the peace and in order that arrests may be made for crimes under the laws of the States and Territories of the United States where the various immigrant stations are located, the officers in charge of such stations, as occasion may require, shall admit therein the proper State and municipal officers charged with the enforcement of such laws, and for the purpose of this section the jurisdiction of such officers and of the local courts shall extend over such stations.

SEC. 28. That any person who knowingly aids or assists any anarchist or any person who believes in or advocates the overthrow by force or violence of the Government of the United States, or who disbelieves in or is opposed to organized government, or all forms of law, or who advocates the assassination of public officials, or who is a member of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the Government of the United States or of any other organized government, because of his or their official character, to enter the United States, or who connives or conspires with any person or persons to allow, procure, or permit any such anarchist or person aforesaid to enter therein shall be deemed guilty of a felony, and on conviction thereof shall be punished by a fine of not more than $5,000 or by imprisonment for not more than five years, or both.

SEC. 29. That the President of the United States is authorized, in the name of the Government of the United States, to call, in his discretion, an international conference, to assemble at such point as may be agreed upon, or to send special commissioners to any foreign country, for the purpose of regulating by international agreement, subject to the advice and consent of the Senate of the United States, the immigration of aliens to the United States; of providing for the mental, moral, and physical examination of such aliens by American consuls or other officers of the United States Government at the ports of embarkation, or elsewhere; of securing the assistance of foreign Governments in their own territories to prevent the evasion of the laws of the United States governing immigration to the United States; of entering into such international agreements as may be proper to prevent the immigration of aliens who, under the laws of the United States, are or may be excluded from entering the United States, and of regulating any matters pertaining to such immigration.

SEC. 30. That there shall be maintained a division of information in the Bureau of Immigration and Naturalization; and the Secretary of Commerce and Labor shall provide such clerical and other assistance as may be necessary. It shall be the duty of said division to promote a beneficial distribution of aliens admitted into the United States among the several States and Territories desiring immigration. Correspondence shall be had with the proper officials of the States and Territories, and said division shall gather from all available sources useful information regarding the resources, products, and physical characteristics of each State and Territory, and shall publish such information in different languages and distribute the publications among all admitted aliens at the immigrant stations of the United States and to such other persons as may desire the same. When any State or Territory appoints and maintains an agent or agents to represent it at any of the immigrant stations of the United States, such agents shall, under regulations prescribed by the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor, have access to aliens who have been admitted to the United States for the purpose of presenting, either orally or in writing, the special inducements offered by such State of Territory to aliens to settle therein. While on duty at any immigrant station such agents shall be subject to all the regulations prescribed by the Commissioner General of Immigration, who, with the approval of the Secretary of Commerce and Labor, may, for violation of any such regulations, deny to the agent guilty of such violation any of the privileges herein granted.

SEC. 31. That any person, including the owner, agent, consignee, or master of any vessel arriving in the United States from any foreign port or place, who shall knowingly sign on the ship's articles, or bring to the United States as one of the crew of such vessel, any alien, with intent to permit such alien to land in the United States in violation of the laws and treaties of the United States regulating the immigration of aliens, or who shall falsely and knowingly represent to the immigration authorities at the port of arrival that any such alien is a bona fide member of the crew, shall be liable to a penalty not exceeding $5,000, for which sum the said vessel shall be liable and may be seized and proceeded against by way of libel in any district court of the United States having jurisdiction of the offense.

SEC. 32. That no alien excluded from admission into the United States by any law or treaty of the United States regulating the immigration of aliens, and employed on board any vessel arriving in the United States from any foreign port or place, shall be permitted to land in the United States, except temporarily for medical treatment, or pursuant to regulations prescribed by the Secretary of Commerce and Labor providing for the ultimate removal or deportation of such alien from the United States, and the negligent failure of the owner, agent, consignee, or master of such vessel to detain on board any such alien after notice in writing by the immigration officer in charge at the port of arrival, and to deport such alien, if required by such immigration officer or by the Secretary of Commerce and Labor, shall render such owner, agent, consignee, or master liable to a penalty not exceeding $1,000, for which sum the said vessel shall be liable, and may be seized and proceeded against by way of libel in any district court of the United States having jurisdiction of the offense.

SEC. 33. That it shall be unlawful and be deemed a violation of the preceding section to pay off or discharge any alien employed on board any vessel arriving in the United States from any foreign port or place, unless duly admitted pursuant to the laws and treaties of the United States regulating the immigration of aliens: *Provided*, That in case any such alien intends to reship on board any other vessel bound to any foreign port or place he shall be allowed to land for the purpose of so reshipping, and may be paid off, discharged, and permitted to remove his effects, anything in such laws or treaties or in this act to the contrary notwithstanding, providing due notice of such proposed action first be given to the principal immigration officer in charge at the port of arrival.

SEC. 34. That any alien seaman who shall desert his vessel in a port of the United States or who shall land therein contrary to the provisions of this act shall be deemed to be unlawfully in the United States and shall, at any time within three years thereafter, upon the warrant of the Secretary of Commerce and Labor, be taken into custody and brought before a board of special inquiry for examination as to his qualifications for admission to the United States, and if not admitted said alien seaman shall be deported at the expense of the appropriation for this act as provided in section 20 of this act.

SEC. 35. That it shall be unlawful for any vessel carrying passengers between a port of the United States and a port of a foreign country, upon arrival in the United States, to have on board employed thereon any alien afflicted with idiocy, imbecility, insanity, epilepsy, tuberculosis in any form, or a loathsome or dangerous contagious disease, if it appears to the satisfaction of the Secretary of Commerce and Labor,

from an examination made by a medical officer of the United States Public Health Service, and is so certified by such officer, that any such alien was so afflicted at the time he was shipped or engaged and taken on board such vessel and that the existence of such affliction might have been detected by means of a competent medical examination at such time; and for every such alien so afflicted on board any such vessel at the time of arrival the owner, agent, consignee, or master thereof shall pay to the collector of customs of the customs district in which the port of arrival is located the sum of $25; and no vessel shall be granted clearance pending the determination of the question of the liability to the payment of such fine and while it remains unpaid: *Provided*, That clearance may be granted prior to the determination of such question upon the deposit of a sum sufficient to cover such fine: *Provided further*, That such fine may, in the discretion of the Secretary of Commerce and Labor, be mitigated or remitted.

SEC. 36. That upon arrival of any vessel in the United States from any foreign port or place it shall be the duty of the owner, agent, consignee, or master thereof to deliver to the principal immigration officer in charge of the port of arrival lists containing the names of all aliens employed on such vessel, stating the positions they respectively hold in the ship's company, when and where they were respectively shipped or engaged, and specifying those to be paid off and discharged in the port of arrival; or lists containing so much of such information as the Secretary of Commerce and Labor shall by regulation prescribe; and after the arrival of any such vessel it shall be the duty of such owner, agent, consignee, or master to report to such immigration officer, in writing, as soon as discovered, all cases in which any such alien has deserted the vessel, giving a description of such alien, together with any information likely to lead to his apprehension; and before the departure of any such vessel it shall be the duty of such owner, agent, consignee, or master to deliver to such immigration officer a further list containing the names of all alien employees who were not employed thereon at the time of the arrival, but who will leave port thereon at the time of her departure, and also the names of those, if any, who have been paid off and discharged, and of those, if any, who have deserted or landed or been duly admitted; and in case of the failure of such owner, agent, consignee, or master so to deliver either of the said lists of such aliens arriving and departing, respectively, or so to report such cases of desertion, or landing, such owner, agent, consignee, or master shall, if required by the Secretary of Commerce and Labor, pay to the collector of customs of the customs district in which the port of arrival is located the sum of $10 for each alien concerning whom correct lists are not delivered or a true report is not made as above required; and no such vessel shall be granted clearance pending the determination of the question of the liability to the payment of such fine and, in the event such fine is imposed, while it remains unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of such question upon deposit of a sum sufficient to cover such fine.

SEC. 37. The word "person" as used in this act shall be construed to import both plural and the singular, as the case may be, and shall include corporations, companies, and associations. When construing and enforcing the provisions of this act, the act, omission, or failure of any director, officer, agent, or employee of any corporation, company, or association acting within the scope of his employment or office shall in every case be deemed to be the act, omission, or failure of such corporation, company, or association, as well as that of the person acting for or in behalf of such corporation, company, or association.

SEC. 38. That this act, except as otherwise provided in section 3, shall take effect and be enforced from and after July 1, 1913. The act of March 26, 1910, amending the act of February 20, 1907, to regulate the immigration of aliens into the United States; the act of February 20, 1907, to regulate the immigration of aliens into the United States, except section 34 thereof; the act of March 3, 1903, to regulate the immigration of aliens into the United States, except section 34 thereof; and all other acts and parts of acts inconsistent with this act are hereby repealed on and after the taking effect of this act: *Provided*, That this act shall not be construed to repeal, alter, or amend existing laws relating to the immigration or exclusion of Chinese persons or persons of Chinese descent, nor to repeal, alter, or amend section 6, chapter 453, third session, Fifty-eighth Congress, approved February 6, 1905, or the act approved August 2, 1882, entitled "An act to regulate the carriage of passengers by sea," and amendments thereto: *Provided*, That nothing contained in this act shall be construed to affect any prosecution, suit, action, or proceedings brought, or any act, thing, or matter, civil or criminal, done or existing at the time of the taking effect of this act, except as mentioned in the last proviso of section 19 hereof; but as to all such prosecutions, suits, actions, proceedings, acts, things, or matters, the laws or parts of laws repealed or amended by this act are hereby continued in force and effect.

The SPEAKER. The Clerk will read the President's veto message.

The Clerk read as follows:

To the Senate:

I return herewith, without my approval, S. 3175.

I do this with great reluctance. The bill contains many valuable amendments to the present immigration law which will insure greater certainty in excluding undesirable immigrants.

The bill received strong support in both Houses and was recommended by an able commission after an extended investigation and carefully drawn conclusions.

But I can not make up my mind to sign a bill which in its chief provision violates a principle that ought, in my opinion, to be upheld in dealing with our immigration. I refer to the literacy test. For the reasons stated in Secretary Nagel's letter to me, I can not approve that test. The Secretary's letter accompanies this.

WM. H. TAFT.

THE WHITE HOUSE, *February 14, 1913.*

The SPEAKER. The Clerk will read the message from the Senate.

The Clerk read as follows:

The Senate having proceeded, in pursuance of the Constitution, to reconsider the bill entitled "An act to regulate the immigration of aliens to and the residence of aliens in the United States," returned to the Senate by the President of the United States, with his objections, and sent by the Senate to the House of Representatives, with the message of the President returning the bill:

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

Mr. MURRAY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MURRAY. For a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MURRAY. Since the real meat of the veto is in the short letter from Secretary Nagel, is it in order to request a reading of the Secretary's letter as a part of the veto message?

The SPEAKER. The Chair does not think it is a part of the veto.

Mr. MURRAY. Mr. Speaker, may I call the attention of the Chair to the definite reference in the letter of President Taft to the reasons stated in Secretary Nagel's letter to him which is appended to the veto and made a part of it by reference?

The SPEAKER. The Chair knows, but every time the President sends messages in here he refers to some other documents and he might refer to enough documents to take three days to read them.

Mr. MURRAY. I am sure it is not in this case—— [Cries of "Regular order!"]

The SPEAKER. The Chair rules it out.

Mr. MURRAY. Mr. Speaker, I would like to ask unanimous consent that the letter of Secretary Nagel, which takes only two or three pages, be printed for the information of the House.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to have Mr. Nagel's letter printed.

Mr. BURNETT and others. I object.

Mr. MANN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Illinois rise?

Mr. MANN. For a request for unanimous consent. I ask unanimous consent that the previous question may be considered as ordered and that the debate be 30 minutes on a side instead of 20 minutes on a side.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the previous question shall now be considered as ordered and to have 30 minutes of debate to a side instead of 20 minutes.

Mr. MOORE of Pennsylvania. Mr. Speaker, does that mean to dispense with a vote on the previous question?

The SPEAKER. It undoubtedly does.

Mr. MOORE of Pennsylvania. So that we can come directly to a vote on the bill itself?

The SPEAKER. Yes. Is there objection? [After a pause.] The Chair hears none. The previous question is ordered, and the gentleman from Alabama [Mr. BURNETT] is recognized for 30 minutes and the gentleman from Illinois [Mr. SABATH] for 30 minutes.

Mr. BURNETT. Mr. Speaker, this matter has been debated for more than a year, time and time again, and so far as I am concerned and so far as the friends of the bill are concerned I believe we are ready to vote upon this question, and so far as we are concerned we would be willing to waive, if the gentlemen on the other side would, the 30 minutes debate on a side and reach a vote at once, and I ask the gentleman if he will not agree to that proposition.

Mr. SABATH. Mr. Speaker, personally I have no objection and I would be willing to have a vote taken now, but there are some gentlemen who have requested me to yield them some time and if I can secure their consent to waive the time of debate I am willing——

Mr. MANN. This is just a waste of time.

Mr. BURNETT. Well, we will go ahead. [Cries of "Vote!"]

Mr. MOORE of Pennsylvania. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MOORE of Pennsylvania. I would like to know what this proposition is.

The SPEAKER. The proposition is that the gentleman from Alabama [Mr. BURNETT] proposes to waive the 30 minutes if the gentleman from Illinois [Mr. SABATH] will waive his time.

Mr. MOORE of Pennsylvania. And come directly to a vote?

The SPEAKER. Why, of course.

Mr. MOORE of Pennsylvania. On the passage of the bill over the President's veto?

Mr. JAMES. I would suggest to the gentleman that could be done by unanimous consent.

The SPEAKER. If the two gentlemen themselves agree, the Chair will put the unanimous-consent matter.

Mr. SABATH. I desire just one-half a minute in which to consult with the gentleman from Pennsylvania [Mr. MOORE] on this proposition.

Mr. MANN. Mr. Speaker, I ask for the regular order.

The SPEAKER. The regular order is the gentleman from Alabama [Mr. BURNETT].

Mr. SABATH. Mr. Speaker, I will agree to the proposition.

Mr. BURNETT. The gentleman does agree to that. I ask unanimous consent——

Mr. CURLEY. I object.

The SPEAKER. The gentleman from Alabama [Mr. BURNETT] will proceed.

[Mr. BURNETT addressed the House. See Appendix.]

Mr. CLAYTON. Mr. Speaker, I shall vote to override the President's veto and to sustain this legislation because my immediate constituency are in favor of restricted foreign immigration, and because I believe they are right in that view. My objection to this bill is that it does not go as far as I would like it to go in the matter of restricting such immigration. Mr. Speaker, I shall vote for it for the further reason that the industrial organizations throughout the Union are in favor of this legislation. In every department of industrial life where there is an organization, that organization, speaking for the constituency represented by it, has asked for this legislation. That includes the Federation of Labor, the Farmers' Union, and the National Grange, and all like organizations.

Another reason why I shall vote in favor of this legislation is that time after time on this floor Democrats have said that the labor of this country was not protected by high tariff because pauper labor was brought in from Europe from time to time to compete with the honest, skilled labor of America. I believed there was truth in that proposition, and I believe that there ought to be some legislation in behalf of the great industrial workers of this country to protect them against the cheap pauper labor of Europe.

Mr. MURRAY. Mr. Speaker——

The SPEAKER. Does the gentleman from Alabama [Mr. CLAYTON] yield to the gentleman from Massachusetts [Mr. MURRAY]?

Mr. CLAYTON. I can not yield to the gentleman. Some of the very best reasons assigned for overruling the veto of the President is in a letter of Prof. Jenks, dated February 8, 1913, and addressed to the President on this very question. I have not time to read it, but shall ask unanimous consent to print it as a part of my remarks. And I also desire to have printed in the RECORD the statement of Frederick A. Pope, the public prosecutor of Somerset County, N. J.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CLAYTON. Mr. Speaker, the letter of Prof. Jenks is as follows:

FEBRUARY 8, 1913.

MY DEAR MR. PRESIDENT: I have noted in the papers that you have before you for consideration the new immigration bill, and that February 6 you gave a hearing on the bill. As a former member of the Immigration Commission, who gave a great deal of time to the consideration of the subject, I trust that I may express an opinion regarding the bill. The fundamental reason why there should be at the present time a rather widely extended restriction of immigration is the fact that the number of unskilled workers coming in at the present time is sufficient to check decidedly the normal tendency toward an improved standard of living in many lines of industry.

Of course I am well aware of the fact that Mr. Hourwich in his new book, as often before, and many others claim that the bringing in of these laborers simply fills the demand for unskilled workmen and that the American laborers and the earlier immigrants go to higher positions. That was doubtless true earlier; that is doubtless true in part now, but the figures collected by the Immigration Commission, on a sufficient number of industries in different sections of the country to give general conclusions, prove beyond doubt that in a good many cases these incoming immigrants actually drive out into other localities and into other unskilled trades large numbers of American workingmen and workingmen of the earlier immigration who do not get better positions, but, rather, worse ones. My own judgment and that of a number of our investigators when the work of the immigration Commission began was substantially that upheld now by Mr. Hourwich and those who agree with him. But Prof. Lauck, our chief superintendent of investigators in the field, and, so far as I am aware, every single investigator in the field, before the work ended reached the conclusion from personal observation that the tendency of the large percentage of immigration of unskilled workers is clearly to lower the standard of living in a number of industries, and the statistics of the commission support this impression. I therefore changed my earlier views.

I think the illiteracy test is theoretically sound. It is, of course, true that it does not reach the criminal. It is not intended for that purpose. It is also true that at times it excludes the good laborers. The fundamental fact, however, is this—that on the whole it excluded the laborers from southern Italy and Austria-Hungary of the type that the commission unanimously thought ought to be excluded at the present time, especially the single man who comes here to stay only temporarily and who, in consequence, having no permanent interest in the country, eagerly accepts living conditions lower than those which would be accepted by Americans or the earlier immigrants. It should be kept in mind that the Immigration Commission was absolutely unanimous in the opinion that there should be restriction; also unanimous in the further opinion that this class of immigrants whom I have mentioned were the ones who should be excluded, and the illiteracy test would exclude just this class.

Mr. Bennet objected to the illiteracy test and wished to reach the same result by other means, and I should have agreed with him, as I think would Dr. Neill and perhaps other members of the commission, had we believed that it was practicable to reach that result in any other way. Considering the temper of Congress and the other measures proposed, the illiteracy test seemed the only practical way. The present action of Congress seems to confirm that view.

I notice in yesterday's morning paper that Mr. Bennet suggested that, inasmuch as this bill is faulty in certain minor particulars, it would be wise for you to veto it and let the incoming Congress pass another bill to the same effect if it wishes to do so. It strikes me that the argument should rather be that if this bill is in its main principle of exclusion sound, and on that point Mr. Bennet agreed with all the other members of the commission, Republicans and Democrats, it would be wise for you to sign the bill and let the incoming Congress make such minor changes in the laws as it might see fit to make.

I trust that since this bill is in the main in accord with the unanimous opinion of the Immigration Commission, the one body of men that has really made a thoroughly sound, scientific study of the question, you will see your way clear to giving it your approval, even though it may have minor defects.

Very respectfully and sincerely, yours,

JEREMIAH W. JENKS.

The PRESIDENT,
Executive Mansion, Washington, D. C.

And the statement of Mr. Pope is as follows:

My duties as prosecuting attorney of Somerset County, N. J., have given me an excellent opportunity to check up in one important particular the investigations and conclusions of the Immigration Commission with reference to the illiteracy test. During the last two years I have kept a careful record of the last 114 criminal cases that I have prosecuted against aliens, with the following interesting results:

	Illiterate.	Literate.
Homicide	3	
Atrocious assault and battery	34	6
Simple assault and battery	9	2
Larceny	14	2
Sexual crime	7	1
Perjury	2	1
Excise	11	5
Marriage	3	1
Frauds	2	4
Miscellaneous	6	1
Total	91	23

The following conclusions were deducible from the above:

(1) Of the 114 crimes committed by aliens, 54 were acts of personal violence; and of these 54, 46 were committed by illiterates, while only 8 were chargeable to those able to read and write.

(2) Of the 46 committed by illiterates, 3 were homicides, 34 were atrocious assaults (by maiming and wounding with a deadly weapon), and only 9 were simple assaults, showing conclusively that the illiterate alien 37 times out of 46 makes use of a deadly weapon in order to avenge his wrongs, fancied or real.

(3) Out of 16 cases of larceny (stealing of all kinds), 14 defendants were illiterate.

(4) Out of 8 sexual crimes 7 were committed by illiterates, 3 of these being carnal abuse of infants under 10 years of age.

(5) Out of 3 perjury cases, 2 were against illiterates; that is, of those brought to justice.

(6) Out of 16 cases for violation of excise laws, 11 were illiterates, showing an utter disregard for laws.

(7) Of the 4 crimes against the institution of marriage, 3 were illiterates.

(8) Only in cases of fraud did the literate exceed the illiterate.

I am, Mr. President, sincerely, yours,

FREDERICK A. POPE,
Prosecutor of Pleas, Somerset County, N. J.

The SPEAKER. The time of the gentleman has expired.

Mr. BURNETT. Will the gentleman from Illinois [Mr. SABATH] use some of his time?

Mr. SABATH. Mr. Speaker, I yield 15 minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. Mr. Speaker, I yield three minutes to the gentleman from Illinois [Mr. CANNON].

The SPEAKER. The gentleman from Illinois [Mr. CANNON] is recognized for three minutes.

Mr. CANNON. Mr. Speaker, whatever the vote of this House may be, I shall record my vote against this unwise and, in my judgment, unpatriotic legislation. [Applause.]

Oh, Mr. Speaker, they speak of the urban population. Yes; the farmers' sons go to the city; then you turn around and say that the foreign population goes to the city.

The high cost of living is a shibboleth on your side, and yet the farmer, without labor, can not produce what he otherwise would.

It is stated that all federated labor is for this legislation; federated labor, composed in the main of people who have come across the ocean to our country, and have federated, and want to shut out their brethren now that they are here enjoying the blessings of our country.

The literacy test is sought to be imposed, and yet God knows that the people who have cursed this country by coming here from abroad are the Black Handers and the men who can read and write, the men who are accomplished.

I can not in three minutes characterize this bill as I feel I ought to. The gentleman from Alabama [Mr. CLAYTON] glories because the Federation of Labor and his constituents stand for this bill. I would to God that this labor might come and go to

Georgia and Alabama and elsewhere in the South, and you would then feel there the quickening influence from it that the Northland has felt. [Applause.] The gentleman speaks of the farmers' union. Oh, the farmers' union——

Mr. CLAYTON. That labor does not go to the farms. It stays in the towns and cities, and in the South it does not engage in the production of anything in the country.

Mr. CANNON. The gentleman says the farmers' union is for this legislation. What is the farmers' union? Does it represent the farmers of the Northland? No. Your farmers' union down South, abounding in prejudice, cooperates with Mr. Gompers's organization. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Mr. Speaker, I yield three minutes to the gentleman from Missouri [Mr. BARTHOLDT].

The SPEAKER. But the gentleman has not the time to yield.

Mr. MOORE of Pennsylvania. I have 15 minutes. I yielded 3 minutes to the gentleman from Illinois [Mr. CANNON] and I yield 3 minutes to the gentleman from Missouri [Mr. BARTHOLDT].

Mr. BARTHOLDT. Mr. Speaker, no matter what the result of to-day's vote may be, one fact stands out most prominently, and that is the magnificent courage of President Taft and his unswerving loyalty to American ideals and American traditions. [Applause.]

This action in vetoing the immigration bill will be admitted by all, whether they voted for or against it, to be a splendid manifestation of these superb qualities, and will, I believe, challenge the admiration of friend and foe alike.

Speaking of the merits of this bill, who dares say the President is wrong? It is true that a majority can do what it pleases within the limitations of the Constitution; but it is no more true that a majority is always right than that the view which is temporarily popular is always the right view. The President has had the courage to put right and truth and honesty above all other considerations, and in doing so he is teaching a lesson in his plain and unostentatious way that will go down into history and will continue to stand as a true expression of Americanism, even at a time when we shall all be dead and forgotten.

What are the facts in this case, Mr. Speaker? Congress passes a bill with the avowed purpose of restricting immigration, but instead of honestly closing the gates altogether or instead of honestly saying "We want only so and so many to come every year," we hypocritically ride the high-horse of education by providing for a literacy test which will in effect shut out all those we want and admit those we do not want.

And this is not even the whole extent of the mental dishonesty displayed by the advocates of this legislation. By excluding the illiterate we aim to pose before the civilized world as a people actuated by our regard for education, while in reality we do not care for even educated immigrants, but use the educational test only as a mask to hide our real purpose, which is restriction. And then what? Then comes the climax, for after experts have demonstrated by facts and figures that there is not a single economical or political reason for such restriction, we stand unmasked as following the dictates of those who are actuated by racial prejudice and religious intolerance and are know-nothings, pure and simple.

Mr. Speaker, it was charitable on the part of the President that he passed over these objections without enumerating them, but his silence is as eloquent as it is charitable. Those who would read and learn can glean the truth from the masterly report made to the President by one who speaks from practical experience and intimate knowledge of this question, Secretary Nagel. History will justify the President and those who stand with him.

Mr. MOORE of Pennsylvania. I yield three minutes to the gentleman from Massachusetts [Mr. CURLEY].

The SPEAKER. The gentleman from Massachusetts [Mr. CURLEY] is recognized for three minutes.

Mr. CURLEY. Mr. Speaker, the contention has been made here by the chairman of the Committee on Immigration and Naturalization that the President's action was based solely on the report of the Secretary of Commerce and Labor. Mr. Speaker, as one who recognizes the good judgment and the wisdom of taking one's watch to a jeweler when it is out of repair rather than taking it to a blacksmith, I want to say that the action of the President in basing his position on the question of the literacy test on the report of the Secretary of Commerce and Labor bases it upon the most solid possible ground. [Applause.] The man who is charged with the responsibility of enforcing the provisions of statute law with reference to immigration is the man who is best qualified to judge as to what test should be applied and what test should not be applied.

I want to say that the enactment of this bill after the action of this House with reference to the memorial to Abraham Lincoln, the great emancipator, by an almost unanimous vote, within one week, is certainly a singular contradiction of thought upon the part of the membership of this House.

For more than 125 years the agitation has gone on to restrict the illiterate, to shut out the illiterate, and the best basis for the position taken is said to be this organization, the Junior Order of American Mechanics. They have lobbied Members of the House, they have written to Members of the House, they have secured pledges from the Members of the House, to do what? To vote in favor of a sugar-coated pill, the Burnett bill; but those men who promised should realize that their promise did not go to the extent of a bill of the character that is before this body for consideration to-day.

I want to say what I realize, that every man in this House knows that the highly educated man will not do common labor; that the farmers of this country find it difficult, if not impossible, to keep their own sons on the farm; that their own sons go to the cities, and that our net increase on account of immigration has only been one-half of 1 per cent each year for the last 5 years, whereas for the 50 years before it was 10 per cent.

I beg at this point to have incorporated a letter received from the head of the National Polish Alliance and certain telegrams from lovers of liberty.

POLISH NATIONAL ALLIANCE OF THE
UNITED STATES OF NORTH AMERICA,
PRESS AND INFORMATION DEPARTMENT,
Chicago, Ill., February 17, 1913.

Hon. J. M. CURLEY,
House of Representatives, Washington, D. C.

MY DEAR MR. CURLEY: I did all I could to help you in the unequal fight conducted so gallantly against the racial prejudice and bias of the misinformed restrictionists. That I did not do more is not my fault. As you can see from the clippings which I am sending you under separate cover, I have been actively engaged in writing about this matter throughout the entire month of December, just as I did during the last session of the Congress. The trouble with the representatives of our organizations is that they, being recruited from a new branch of immigration, trust implicity to the sense of American fairness and are unable to comprehend the injustice done to them and to act accordingly.

On December 21 last, when I succeeded in calling a joint meeting of the respresentatives of the various Polish organizations, I proposed to nominate at once a conference board or committee to study the immigration question thoroughly and be ready to go at any time to Washington in answer to summons. As a matter of fact, I foresaw this contingency in May of 1912 and wrote accordingly, repeating again my warnings in early December. But, as I said, our leaders did not grasp the situation, and it was very difficult to convince them that I was right. Further, our organizations are not well off financially, and have no special funds to plan and to conduct such a contest effectively. You see, then, the obstacles I had to contend with.

There is no end to arguments against the restriction policy, if only somebody would delve into the enormous piles of official undigested statistics. I suppose that you are acquainted with a book recently published about the immigration "problem" called "The Immigration and Labor," by I. A. Hourwich, Ph. D. You will find therein many valuable assets to the analysis of our neglected statistical matter.

While in Washington I have been delving into the 42 volumes of reports of the Immigration Commission, and have discovered many blunders and inconsistencies. The material collected therein is good and true in many instances, but the conclusions drawn therefrom are wrong and inconsitsent with the data furnished.

When I think of the causes which called this Immigration Commission into existence they remind me of the secret Russian agency called "Ochrana." Whenever there is a Russian citizen who is rather bold in expressing his opinions about the autocratic form of the Government or shows his displeasure at some of the inhuman methods, then "Ochrana" is instructed to collect evidence against him. And "Ochrana," faithful to instructions, does it by sending agents—"provocateurs"—who incite the unsuspecting victim against the Government, draw him into a net of conspiracies, and then give him away to a tribunal to be convicted on evidence thus obtained.

The Immigration Commission was created in 1907 for the express purpose to investigate whether there is any ground to pass a literacy-test law. And although the material collected by the commission, in spite of the prevailing bias and antiforeign feelings, speaks against such a law, her conclusions must naturally tally with the instructions, even though they conflict with the data upon which based and from which drawn.

I have been studying this project very impartially and cooly. Personally, although I realize the almost insurmountable difficulties the Poles of Russia have to acquire the most rudimentary education, I think that such a law would benefit them to a certain extent intellectually, because they would study how to read surreptitiously, even though they would have to spend sleepless nights and risk jail for it. But just think of their economical loss as well as the loss of opportunity to study here and to acquire that God-given love of liberty and human rights which permeates every alien in the United States. Its the environment that makes a man out of him in spite of himself; and to favor such a law a man must cease to be a man and must become deprived of conscience and despoil himself of every vestige of righteousness and justice.

This is the reason why I am fighting this law, not as an alien, but as an American, even though I am a naturalized one. There is an excuse for an alien who is misguided to such an extent by the sophistry of the thing as to believe this law beneficial to his countrymen, but there is no such excuse for an American who boasts of an immaculate record of his country's history who is proud of the time-honored principles of liberty and equality of opportunity.

I noticed in the CONGRESSIONAL RECORD that Mr. BURNETT, in his winding-up speech on the floor of the House, said something about the "swan songs of the Hammerling clans and the rubber-heeled treading of the corridors by the steamship companies' agents * * *." I

would like to answer him that if the upright and honest organizations who oppose this bill had as much money at their disposal as do the Junior Order of American Mechanics, the grange, the misguided leaders of the various labor unions, and the like, there would be, perhaps, a different story to tell. But we are poor; we do not possess sufficient means to gather material and data to rout the flimsy charges against the immigration; in a word, we are unable to defend ourselves, and this is the reason of our summary conviction, passed on us by trampling upon the most fundamental principle of justice, "Audiatur et altera pars." We are not heard; the trial is one-sided, and the verdict is based upon arguments submitted by the restrictionists.

* * * * * * *

Coming to the illiterate, there is a point that has not been fully discussed and properly brought to the front in this contest. Doubtless you have heard about frequent failures of the so-called "foreign banks" and "ticket agencies," wherein the poor, ignorant immigrants keep their savings. Now, these banks and agencies are usually operated by the educated immigrants. The restrictionists do not go deep enough into the psychology of foreign races. An educated man in Europe is brought up in a peculiar way. Thanks to the environment, he considers manual labor as degrading or below his calling. When he comes to the United States and finds himself in a community fundamentally different from his own, and further finds out that without the knowledge of the English language and customs prevailing here he is unable to find a suitable occupation, very frequently from an honest man he turns into a bird of prey, into a social parasite. His prey naturally is his own ignorant countryman. And this is the kind of immigration the restrictionists favor as against the ignorant but sturdy and honest worker.

The remedy for this evil is not in the debarring of the ignorant, honest immigrant, but in protecting him against the unscrupulous, educated bird of prey of his own nationality, and this is a point worthy of the consideration of our legislators.

There is an outcry against the swamping of Americans in the sea of foreigners invading this country. Tommyrot. So far the United States have been able to swallow and to assimilate more foreigners than any other country under the sun. Why? Because of the individual, racial, and social liberties enjoyed here by everybody. But once this country will raise an outcry and tell to certain foreigners that they are inferior and undesirable, or try to assimilate them par force, we will witness a reaction in the ranks of the offended nationalities. The most ignorant alien will naturally ask himself this question: "Why am I really inferior to an American? Let us see what the history of my people tells me." And he will study that history; he is bound to find out, then, of the great achievements and noble deeds of his ancestors, whether he be a Pole or an Italian, and will start to detest Americans for unfairness. Thus we are apt to create a racial problem within this country, because there is no man in this world who is not proud of his or his father's country's history and past greatness. This pride is inborn in us, and we will die with it.

Nine years ago I was in South America, where I was brought up and educated, although I am a native of Poland. From that distance I admired the American progress, institutions, and, above all, the American liberty. Not having a country of my own, I burned with the desire to make this my home. I came here in 1904, and that same year saw me in the ranks of this country's defenders—American Army. I broke the precedent by getting my naturalization papers before the required five years' residence, thanks to my military service.

When I landed in New York and my eyes rested upon the awe-inspiring skyscrapers, I felt an inner pride that many of my countrymen worked and died in their construction. When my eyes wandered upon the wonders of modern engineering, the Brooklyn bridges, I felt again a big man at the thought that one of them was designed by a countryman of mine, Ralf Modrzejewski, son of the famous Polish-American actress of that name.

But, after nine years of close scrutiny of the inner works of this great Republic—my adopted country—after witnessing the naturalization law of 1906, immigration law of 1907, and standing now in front of the most un-American project, my faith in America is shaken.

In 1876 Mr. C. Randolph, of Chicago, at one of the hearings in Congress, called the then newly projected head tax as a "lawless and unjust tariff on human flesh." To-day the same Congress found it advisable to let this income flow freely into the coffers of the Department of Commerce and Labor, without even mentioning the source, although the original intention was to use it to defray the accessory expenses in the regulation of immigration. How do the times change. * * *

There looms large before my vision the fearless figure of Payne, protesting in the name of this young Republic against the dastardly crime of the French Commune, the regicide of Louis XVI; I see further the gigantic form of Lincoln giving liberty to millions of physically and morally oppressed human beings; I vividly recall the latest noble deed of this country, the Spanish War, waged for the oppressed Cubans. But all this traditional love of liberty and justice, this readiness to defend the weak and the oppressed against the strong and the oppressors, is obscured by the latest inhuman project to keep away from this land those that produced this country's wealth, sacrificing to this end their limb, vigor, health, and life, and taking away in exchange a paltry 3 per cent of the fruit of their labors.

Yours, devotedly,

JOS. KAROSIEWICZ.

—

NEW YORK, *February 16, 1913.*

Hon. JAMES M. CURLEY, M. C.,
Washington, D. C.:

The Hebrew Sheltering and Immigrant Aid Society, composed of American citizens in all parts of the country, respectfully prays that you exercise your functions as a representative of the people in Congress and refuse to pass the immigration bill (S. 3175) over the veto of His Excellency William H. Taft, President of the United States. This bill contains uncalled for drastic provisions which are bound to exclude from our shores decent, law-abiding men and women, for no good reason, no matter what the motives of the authors. The bill is based upon false notions. We are convinced, as an organization that has worked among immigrants for a quarter century and is coming in daily contact with every strata of immigration, that our immigrants in this country have made good. In their loyalty to the United States they rank next to none. In their patriotism and devotion to the principles of liberty they occupy the same place as any patriotic native American. They appreciate our glorious institutions more than a great many Americans who can trace their ancestry back for several generations. They have not given cause for the Congress of the United States to legislate the exclusion from our shores of their kind. We are satisfied that the calm judgment of the American people is not in favor of the further restriction of immigration. Our laws provide sufficiently against the incoming of the mentally and physically unsound, and these laws are rigidly enforced by the United States Government. Our country is large enough and there are enormous stretches of land lying bare and awaiting the human hand and brain to develop them. We pray that you do not permit the spirit of "narrow nativism" to override the just veto of the Chief Executive of this Nation.

Respectfully,

LEON SANDERS, *President.*
JACOB MASEEL, *Secretary.*

—

PASSAIC, N. J., *February 17, 1913.*

Hon. JAMES M. CURLEY,
House of Representatives, Washington, D. C.

SIR: We, the undersigned members of the North Jersey Italian Progressive Political Club, do hereby protest against the enactment of the Burnett bill (H. R. 22527), which provides for the educational test, believing that the existing laws are sufficient to bar any undesirable immigrants, such as diseased persons and criminals, from entering this country. We also consider that the educational test and other like measures will only tend to deprive the United States of so many honest, sturdy workers. We can only hope now that the Senate and honorable President Taft will not join the House in its decision, but will come to a better understanding as to wishes of the majority of the American people having always at heart the best interests of the country.

FRANK VITOLE, *President,*
J. KISCIELLA, *Secretary,*
79 Bogart Avenue, Garfield, N. J.

Mr. MOORE of Pennsylvania. Mr. Speaker, I yield three minutes to the gentleman from California [Mr. KAHN].

Mr. KAHN. Mr. Speaker, the gentleman from Alabama [Mr. CLAYTON], in discussing this measure a few minutes ago, said that the skilled labor of the country demanded this legislation. As a matter of fact, the illiteracy test will reach but a very small percentage of skilled labor. The illiterates are unskilled laborers, and it is unskilled labor that this country needs. [Applause.]

The gentleman is probably unaware of the fact that in his own State of Alabama 10⅞ per cent of the native whites of native parentage in that State are illiterates, and yet he, forsooth, would close the door of opportunity to people who would come here to earn their bread in the sweat of their brows; people who probably did not have the opportunity for acquiring an education in their own countries. How can he or his colleague [Mr. BURNETT] explain the great prevalence of illiteracy in their own State? Illiteracy among native-born Americans, if you please. Sweep your own doorsteps, gentlemen, before you complain of illiteracy among foreigners who have not had such opportunities as your own constituents have had for acquiring an education.

We in the West need unskilled labor. Our section is not as well developed as these eastern sections are. We need railroads to bring our products to the markets. The educated man does not care to and will not do the hard work of digging trenches, of laying ties and tracks, of ballasting roads. All over this country this kind of work is being done by illiterate foreigners. The educated, native-born citizens will not do it. In Germany and England, as well as in the United States, uneducated foreigners are depended upon to do this class of work. Educated men do not go onto the farms and work under all the conditions required of farm laborers. We have thousands, yes, hundreds of thousands, of acres of land in the West that would be cultivated if the labor were there to cultivate them. Their cultivation would add materially to the food products of this country. If we could get the labor to cultivate these farms, there is no doubt in my mind that we would be able to solve, in part at least, the question of the high cost of living. We have a demand for unskilled labor in the West far in excess of the supply. I favor many of the provisions of this bill. With the omission of the literacy test I would favor it. But I do not believe that test will keep out a single undesirable immigrant, and therefore I shall vote to sustain the President's veto.

Mr. MOORE of Pennsylvania. Mr. Speaker, the gentleman from Alabama [Mr. BURNETT], who has devoted himself most earnestly to the passage of this measure, and who will be entitled to most of the credit or discredit for it if it passes, has indicated that for months, even for years, we have debated this question in the House. I contend that the bill, as it comes before us now with the President's veto, has never been discussed in the House. We have had one section of the bill here for discussion, that pertaining to the literacy test alone, but all other features of the bill originated in conference, and have been brought here in every instance and forced through the House under the previous question. There has been no fair opportunity to debate the bill in the House.

Gentlemen upon the other side, who are posted upon this measure, have indicated that its passage will shut out of the country 250,000 immigrants per annum who can not read. If that is the effect of the bill, in a monetary sense alone, apart from the

loss of blood and sinew involved, it will mean that we would lose at least $1,000,000 per annum collected now by way of head tax at $4 per head.

But that is not the only side of the question. In shutting these men out and losing the value of their labor, in losing the head tax, which is a reduction of the revenues of the country, I suggest to the economists on the other side who are preparing economical public building bills and economical naval bills, that the Department of Commerce and Labor estimates that the enforcement of this act, if passed, will cost $1,173,000 per annum. You are going to fasten that charge upon the Government while you deduct from it the $1,000,000 in head tax that you would have collected from those who will be shut out. [Applause.]

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Speaker, we are indebted to Secretary Nagel, of the Department of Commerce and Labor, for his clear and forceful letter to the President on this subject. He has indicated the difficulties that will arise in the enforcement of the act and has pointed out the hardship of the literacy test, but he is only one of many of the great thinkers who have enlightened us upon this matter. The distinguished historian-statesman, HENRY CABOT LODGE, in an address before the Boston City Club in March, 1908, discussing the assimilation of aliens, among other things, said:

"Within the last 20 years, however, there has been a great change in the proportion of the various nationalities emigrating from Europe to the United States. The immigrants from Great Britain and Ireland and from Germany and Scandinavia have come down in numbers as compared with immigrants from countries which, until very recent years, sent no immigrants to America. We have never received, and do not now receive, any immigration from Spain or any considerable immigration from France and Belgium. The great growth in recent years in our immigration has been from Italy, from Poland, Hungary, and Russia, from eastern Europe, from subjects of the Sultan, and is now extending to the inhabitants of Asia Minor. With the exception of the Italians, these people have never been amalgamated with or brought in contact with the English-speaking people or with those of France, Germany, Holland, and Scandinavia, who have built up the United States. I except the Italians, not merely because their noble literature and splendid art are a part of our common inheritance, but because they are conspicuously one of the countries which belong to what is known as western civilization. They, like ourselves, are the heirs of the civilization of ancient Rome, and until one has traveled in eastern Europe and studied the people one does not realize how much this signifies.

"I am not concerned here with whether the civilization of Rome was better than that of Byzantium, or of the Orient, or of China. I merely state the fact that the civilization of Rome was a widely different civilization from the others, and that was the civilization whose ideas we have inherited. In eastern Europe the people fell heirs, not to the civilization of Rome, but to that of Byzantium, of the Greeks of the lower empire. As an example of what I mean, the idea of patriotism—that is, of devotion to one's country—is Roman, while the idea of devotion to the emperor, the head of the state, is Byzantine. I point out these differences merely as conditions of the problem of assimilation which we have presented to us."

But the main point of objection which the President points out in his veto message is the literacy test—the barring of the door of hope to the poor and unfortunate immigrants who can not read. To this provision I have been opposed because I can not believe it is patriotic or humane for those of us who are already admitted to the United States to deny the right to others who want to come, simply because they can not read. One of my fellow townsmen, Mr. Louis S. Amonson, has so effectively dealt with this phase of the question in verse that I submit from him the following:

A MESSAGE TO CONGRESS FROM THE MEN AT THE GATE.

We've dug your million ditches,
  We've built your endless roads,
We've fetched your wood and water,
  And bent beneath the loads.
We've done the lowly labor
  Despised by your own breed;
And now you won't admit us
  Because we can not read.

* * * *

We've given honest labor,
  And liked our humble lot;
Our children learn the letters
  Their fathers haven't got.
We've fled from persecution
  And served you in our need,
But now you would debar us
  Because we can not read.

Most crooks are educated,
  And to the manner born;
Their white hands show no callous,
  They look on us with scorn.
Mere learning is not virtue,
  The word is not the deed;
Disdain, then, not your toilers
  Because they can not read.

Good friends, if we are brothers,
  Why do you raise this test?
Will talk, then, till your acres
  And feed your people best?
Your children, trained as idlers,
  Some workers you must need;
Don't bar our only refuge
  Because we can not read.

Your farms are half deserted,
  Up goes the price of bread;
Your boasted education
  Turns men to clerks instead.
We bring our picks and shovels
  To meet your greatest need;
Don't shut the gates upon us
  Because we can not read.

I also submit the following telegram asking that the President's veto be sustained:

PHILADELPHIA, *February 18, 1913.*

J. HAMPTON MOORE,
House of Representatives, Washington, D. C.:

In behalf of the 2,000,000 of members of the National German-American Alliance, I respectfully request you to sutain the President veto of the immigration bill.

C. J. HEXAMER, *President.*

New York, February 18, 1913.

Hon. J. HAMPTON MOORE,
House of Representatives, Washington, D. C.:

At a special meeting of the board of directors of the American Association of Foreign Language Newspapers, representing 20,000,000 naturalized American citizens, I am directed to appeal to you to sustain the President's veto of the immigration bill with its iniquitous literacy-test clause.

LOUIS N. HAMMERLING, *President.*

Mr. BURNETT. Mr. Speaker, I will now ask the gentleman from Illinois to yield some of his time.

[Mr. HAMILL addressed the House. See Appendix.]

Mr. BURNETT. I now yield 3 minutes to the gentleman from Ohio [Mr. BATHRICK].

Mr. BATHRICK. Mr. Speaker, I regret that I can not join my colleague from New Jersey [Mr. HAMILL] in extending profuse compliments to the President of the United States for his action in this matter. I think, on the other hand, that it is entirely proper on this occasion to call attention to the fact that this act of the President in vetoing this bill is the most sublime piece of inconsistency he has inflicted on this country since he has been in that high office.

It is not long since, as we all know, he vetoed a bill designed to reduce the tariff protection upon goods made by manufacturers of this country, and at the same time proclaimed the gospel of the wonderful high standard of American labor.

Now he refuses to give the labor of the country any protection at all against competition. He has plainly stated by his veto of the woolen goods bill and the steel bill that the manufacturers of these necessities of life, shall have high protection for what they sell. He also plainly states in his veto of the immigration bill that he is not in favor of any protection at all for the laborer who has only his labor to sell. He closes our ports against what the labor must buy that it may be sold at higher prices, but opens wide our ports for competitors to what the laborer sells that it may be sold at lower prices.

In his message he refers to Secretary Nagel, Secretary of Commerce and Labor. I say that Secretary Nagel is not secretary of commerce and labor in this matter. He has entirely forgotten that part of his department that has reference to labor. He is secretary for commerce alone; that kind of commerce that has memorialized you and me to vote in such a way as to bring in more competition to the labor that they say should be maintained on the high standard of America and

at the same time request that their tariff shall not be reduced and that they shall not have foreign competition in their business. In the name of consistency, where is the jewel in this case?

Some of the opponents of this bill raise a great hue and cry about the illiteracy test. Is it a hardship to ask a coming citizen of this country to read 40 words of his own language? Men can work as well and a little better who know how to read. It surely will not make them worse laborers.

Members from some States where they require an educational test for voters are against this bill. Do they deem it justice to ask more of their citizens now here than of those to come from abroad? Voting is the exercise of citizenship. Do these Members confess that the illiterates are never to become citizens of this country? If so, are they to be only hewers of wood and drawers of water, to be governed by others?

To vote against this bill is to refuse to strengthen our contract-labor law, which is a mockery to labor. To vote against this bill is to refuse to strengthen the Government's right to export the insane, the criminal, the immoral, and to refuse to aid in tightening our lines against disease.

Read the bill. These are the things you are against if you are against the bill.

Mr. BURNETT. I now yield three minutes to the gentleman from Tennessee [Mr. AUSTIN].

Mr. AUSTIN. Mr. Speaker, I yield to no man in this House in admiration and respect for President Taft. [Applause.] I have always voted to sustain his vetoes in this House, but I can not follow him on this measure. [Applause.] I wish for him success and happiness in his retirement to private life, but I believe it to be my patriotic duty to vote to override his veto in the interest of the American laborer and in the interest of all the American people.

The platform upon which the President was a candidate for reelection carried this plank:

> We pledge the Republican Party to the enactment of appropriate laws to give relief from the constantly growing evil of induced or undesirable immigration which is inimical to the progress and welfare of the people of the United States.

I indorsed that plank in our platform, gave the President my support, and I am acting in absolute good faith in casting my vote to override his veto.

The Republican Party has always stood for the protection of the American wage earner and the American workshop, and it certainly should stand for the protection of the American wage earner from the cheap foreign labor that is flooding the American labor market under the present immigration laws. Every man on this side opposing this measure in the speeches just made stood for and advocated the reelection of President Taft. Our platform was adopted at Chicago by an overwhelming vote of the delegates assembled from every State and congressional district in the United States. The Republican Members of this House owe it to the party and the country to stand here in solid phalanx to keep faith with the promises and pledges written in our platform.

Mr. Speaker, I wish to submit a copy of a letter I sent the President on this bill.

The letter is as follows:

HOUSE OF REPRESENTATIVES,
Washington, D. C., February 8, 1913.

Hon. WILLIAM H. TAFT,
President, Washington, D. C.

DEAR MR. PRESIDENT: I see from the public press that an effort is being made to influence you to veto the bill recently passed by Congress looking to the restriction of undesirable foreign immigration.

I sincerely trust that said bill will receive your approval. Legislation along these lines was approved, as you well know, in the platform upon which you were a candidate for reelection, and was strongly recommended by your worthy and beloved predecessor from Ohio, Hon. William McKinley.

The bill is in line with the recommendation of the commission created by Congress, which expended about $1,000,000 in a thorough and exhaustive investigation, lasting for several years.

I believe that the sentiment of the American people on this subject was demonstrated in the practically unanimous vote the bill received in the Senate and by the overwhelming majority in the lower House of Congress.

I add my cherished hope to the plea of others in favor of this bill and trust that our appeal to you will not be in vain.

This letter is not based upon passion or prejudice, but alone upon my just and impartial opinion and in the interests of our beloved country. With great respect,

Your obedient servant,
R. W. AUSTIN.

In conclusion I submit correspondence between one of my constituents, a prominent and valuable citizen, and myself on the President's veto of the bill now before the House:

THE CALLAHAN CONSTRUCTION CO.,
Knoxville, Tenn., February 15, 1913.

Hon. R. W. AUSTIN, M. C.,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: I see that the President has vetoed the Dillingham-Burnett immigration bill, and his action has immensely pleased me. I would be very proud, indeed, if I could know that you would sustain the President's veto when the effort is made to pass it over his veto in the House, notwithstanding your previous support of the bill.

I don't know of any vote or speech of yours that has pained me more than your support of this measure. I consider the illiteracy test a most vicious provision, and in common with a great many people of the United States believe it is viciously conceived. The greatest Democratic President this country has had, Mr. Cleveland, and he whom I consider one of the greatest Republican Presidents we have had, Mr. Taft, have warned both political parties against this provision.

I was sorry to see in your speech you didn't concur in the claim made by some of the opponents of this bill that it was backed by an organization that was not only unpatriotic but unfair to the illiterate class not only in this country, but in the Old World, who are honest and good citizens, and they are in a deplorable state when they can not look to the able legislators to protect their just rights and their honesty of purpose on account of their forced illiteracy over which they had no control.

Very respectfully, yours,
GEO. W. CALLAHAN.

HOUSE OF REPRESENTATIVES,
Washington, D. C., February 17, 1913.

Mr. GEORGE W. CALLAHAN,
Knoxville, Tenn.

MY DEAR MR. CALLAHAN: I have yours of the 15th, and in reply will state that I regret I can not comply with your wishes in reference to sustaining the President's veto on the immigration bill.

I would be very willing to vote for a modified bill which would even permit an illiterate to come into this country provided he could furnish satisfactory evidence from the land of his birth that he was honest, industrious, law-abiding, and intended to become an American citizen, but this is impossible under the present status of this matter.

The bill before the President was indorsed, with one exception, by every member of the commission appointed by President Roosevelt. This commission was composed of nine persons, who devoted four years of travel and study to the subject and expended a million dollars.

Their report covers over 40 volumes. Legislation along the lines of the restriction of undesirable foreign immigration was approved in the platform upon which President Taft was nominated.

I have absolutely no prejudice against any foreigner, but I am firmly of the opinion that we are getting too many undesirable people. Our eastern cities are overcrowded, and the governor of New York and other officials are appealing for legislation which will take an enormous burden off the taxpayers growing out of the care of the alien insane and criminal classes.

The conditions under which we are receiving foreign immigration is entirely different from what it was many years ago. Then less than 3 per cent of those who came to America were illiterate. Now I believe the estimate is over 30 per cent.

The steamship companies, in order to make money off the immigrants, are encouraging and bringing all classes of people to America, whether desirable or undesirable, and the sentiment in this country is growing rapidly in favor of immediate action on the part of Congress on this subject. This embraces not only public officials, but the farmers' union, labor organizations, and others.

I repeat that I am sorry my views do not meet yours on this subject. With kindest and best wishes to you and yours,

Sincerely,
R. W. AUSTIN.

Mr. BURNETT. Mr. Speaker, I yield three minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, practically every immigrant is either a prospective or a possible citizen. Therefore I view all immigration questions primarily from the standpoint of their possible effect upon our citizenship and our institutions. Some gentlemen view this question largely from economic and industrial standpoints. Those matters are entitled to due consideration, but with me the primary question is, How has and how will immigration affect the institutions and citizenship of the Republic? I have so high a regard for the efficacy of our institutions in the transforming of character and in the building up of citizenship from seemingly undesirable material that I am of the opinion that we would be safe, without any further restriction on immigration, if the immigrants now coming and to come in the future could be widely distributed throughout the land and have the benefit of contact with the entire body of our citizenship.

Mr. CURLEY. Mr. Speaker, will the gentleman yield?

Mr. MONDELL. Mr. Speaker, I have only three minutes, and I can not yield. Unfortunately, Mr. Speaker, such is not the case; at present the burden of assimilation is laid in the present congested condition of our immigration on comparatively few communities least competent to assimilate it. The literacy test is not a perfect restriction, but it is the best that we know of now.

It is to be regretted that it will keep out some good and honest people, but it will also keep out many who, however honest and well-meaning they may be, not being able to read, can not inform themselves as one should to become an American citizen.

The SPEAKER. The time of the gentleman from Wyoming has expired.

Mr. SABATH. Mr. Speaker, I yield two minutes to the gentleman from Wisconsin [Mr. BERGER].

Mr. BERGER. Mr. Speaker, we are all immigrants in this country except my good friend, the gentleman from Oklahoma, Mr. CARTER, and he is nine-sixteenths immigrant and seven-sixteenths Indian. [Laughter.] This country was built up by immigration, and it was built up largely by illiterate immigration. No one dares to say a word against the Irish, German, and Scandinavian immigration. It is considered highly desirable, and why? Not only because it is skilled labor—skilled

immigrants are really the competition our trade-unions fear—but because the Irish, German, and Scandinavian have become a big power in this country. That is the main reason. [Applause.] The educational test will certainly fail to limit the immigration of skilled mechanics.

I remember reading that in 1850 the Irish were shot down by the hundreds in the streets of Louisville, Ky., by the old Know-Nothings. "America for the Americans" was the cry of the so-called American party then, as it is the war cry of the modern Know-Nothings. The same objections were made against the Irish and the Germans in 1850 as are made now against the Jews, the Italians, and the Slavs. It was claimed that the Irish and the "Dutch," as the Germans were called, could not be digested; that they could not make good Americans. Now you are glad you have the Irish and the Germans. Fifty years from now you will be glad you have the Jews and the Italians. [Applause.] They will help to build up this country.

I have heard a great deal here about pauper labor. Gentlemen, I am the president of a trade-union. I have fought for high wages all of my life. But I am not afraid of the so-called pauper labor of Europe if you give us a fair chance to organize it. Do not use the police, the deputy sheriffs, the militia, and the courts against men who are fighting to improve their economic condition. Give the working class a chance in legislation. Your present laws are capitalistic; they are all in favor of one class—the employing class.

That is the reason why you have the conditions which prevailed at Lawrence, Mass. It was upon my resolution that the investigation took place. I know the conditions in Lawrence, Mass., better than any of the gentlemen here, and I say, again, that I am not afraid of the pauper labor of Europe if you give us a fair chance to organize the working class. I am against the bill and in favor of sustaining the President's veto.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

[By unanimous consent Mr. BERGER was granted leave to extend his remarks in the RECORD.]

Mr. SABATH. Mr. Speaker, I yield to the gentleman from Colorado [Mr. MARTIN].

Mr. MARTIN of Colorado. Mr. Speaker, I want only one minute for the purpose of explaining my vote upon the pending question. Owing to the condition of my health I was unable to be present in Congress during the prior stages of this bill upon its passage. Like all other Members, I for a long time have received a great many communications pro and con this proposition. In reply to one very radical letter in favor of the exclusion of foreign immigration I propounded to my constituent this proposition: If your mother had been an immigrant to the shores of the United States, and she was unable to read or write a word in any language, and you were a Member of Congress, and a measure was pending in Congress containing a provision for the exclusion of illiterate immigrants, what would you do? Mr. Speaker, I can only answer that question, with the approval of my conscience and in accord with the deepest sentiments of my heart, by voting to sustain the veto of the President of the United States. [Applause.]

Mr. BURNETT. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman from Alabama has 13 minutes remaining and the gentleman from Illinois 10 minutes.

Mr. BURNETT. Mr. Speaker, I yield eight minutes to the gentleman from Massachusetts, my colleague on the committee [Mr. GARDNER].

Mr. GARDNER of Massachusetts. Mr. Speaker, the most legitimate issue in this whole immigration question comes right down to one point. Ought we to embark on a policy of restriction for the sake of restriction, that is to say, restriction for the sake of lessening the number of immigrants, whether good or bad, or ought we not? That is the legitimate issue, and on that issue the President of the United States takes one side and the House of Representatives has taken the other side.

It is because my beliefs are diametrically opposed to the beliefs of the President of the United States that I ask the House to vote to pass this bill over his veto. But, Mr. Speaker, the fundamental question of restriction has scarcely been discussed at all. In fact, most people hesitate to declare themselves in favor of an open door to all desirable immigrants. People say: "Oh, we are in favor of restriction, but we do not like the illiteracy test. That is not the right way to restrict. Why not make a direct restriction in numbers? Why not provide for a suspension of immigration?"

Mr. BARTHOLDT. That would be honest.

Mr. GARDNER of Massachusetts. Why not put a large head tax on the incoming immigrants, says the next man. The answer is this, Mr. Speaker. All those remedies have been discussed year after year. They were all thrashed out before the Immigration Commission which investigated this question at home and abroad. Many of the members of the Immigration Commission at first believed in methods other than the educational test. I understand that Prof. Jenks, of Cornell, and Dr. Neill, of the Bureau of Labor, were at first inclined toward restrictive policies different from the illiteracy test. Finally every single man on that commission, with the exception of Hon. W. S. Bennet, decided that the illiteracy test was the most practical one to impose. Here are the reasons: First, more people are in favor of this test than are in favor of any other test. Second, the weight of this test happens to fall principally on the less desirable immigration. "Yes," you say, "but we need labor on our farms." That may be true. I do not know, but I notice that the Secretary of Commerce and Labor admits that there is congestion of labor in our cities, although he says that it exists only in a few cities. As a matter of fact, over a period of years all the evidence tells a tale of great congestion of unskilled labor in our cities. Distribution is the remedy which Secretary Nagel prescribes. I am one of those who totally disbelieve in the possibility of effecting a practical system of distribution of immigrants. For six years we have had a distribution bureau in the Immigration Service. It has amounted to nothing at all. The State of South Carolina tried an experiment. She imported between 700 and 800 immigrants a few years ago. I am informed, Mr. Speaker, that not one single one of those immigrants imported into the State of South Carolina can now be found within the confines of that State. So much for trying to distribute immigration against the will of the immigrant and in defiance of economic laws. If you distribute him where he is not wanted, either economically or socially, he will not stay distributed.

Mr. CURLEY. Mr. Speaker——

Mr. GARDNER of Massachusetts. I can not yield now. Mr. Speaker, the principal argument made against the illiteracy test is that it does not keep out the criminals and the anarchists, but that it keeps out honest men. Of course it will not keep out all the criminals and all the anarchists, and, of course, it will exclude some honest men. However, on that point I shall present some interesting evidence. I hold in my hand a copy of a letter written to President Taft on February 8, 1913, by Frederick A. Pope, prosecutor of pleas of Somerset County, N. J. Listen to this extract:

> My duties as prosecuting attorney of Somerset County, N. J., have given me an excellent opportunity to check up in one important particular the investigations and conclusions of the Immigration Commission with reference to the illiteracy test. During the last two years I have kept a careful record of the last 114 criminal cases that I have prosecuted against aliens, with the following interesting results.

Now, let us see what these interesting figures tell us. Mr. Pope has prosecuted 114 cases against aliens. We know that out of every 4 immigrants 3 know how to read and 1 is unable to do so. You would expect this same proportion of illiteracy existing among alien criminals. In other words, out of every 4 alien criminals you would expect to find that 3 could read. The very reverse is the case. Prosecutor Pope's experience shows that aliens who can not read join our criminal classes much more readily than aliens who can read. Out of 114 aliens prosecuted by this official 91 could not read and 23 were able to do so.

Here is the table of Mr. Pope's prosecutions, and also the rest of his letter:

	Illiterate.	Literate.
Homicide	3	
Atrocious assault and battery	34	6
Simple assault and battery	9	2
Larceny	14	2
Sexual crime	7	1
Perjury	2	1
Excise	11	5
Marriage	3	1
Frauds	2	4
Miscellaneous	6	1
Total	91	23

The following conclusions are deducible from the above:

(1) Of the 114 crimes committed by aliens 54 were acts of personal violence; and of these 54, 46 were committed by illiterates, while only 8 were chargeable to those able to read and write.

(2) Of the 46 committed by illiterates, 3 were homicides, 34 were atrocious assaults (by maiming and wounding with a deadly weapon), and only 9 were simple assaults, showing conclusively that the illiterate alien 37 times out of 46 makes use of a deadly weapon in order to avenge his wrongs, fancied or real.

(3) Out of 16 cases of larceny (stealing of all kinds), 14 defendants were illiterate.

(4) Out of 8 sexual crimes, 7 were committed by illiterates, 3 of these being carnal abuse of infants under 10 years of age.

(5) Out of 3 perjury cases, 2 were against illiterates; that is, of those brought to justice.

(6) Out of 16 cases for violation of excise laws, 11 were illiterates, showing an utter disregard for laws.
(7) Of the 4 crimes against the institution of marriage, 3 were illiterates.
(8) Only in cases of fraud did the literate exceed the illiterate.
I am, Mr. President, sincerely yours,

FREDERICK A. POPE,
Prosecutor of Pleas, Somerset County, N. J.

Mr. CURLEY. I was going to ask the gentleman how many illiterates had been arrested and indicted for forgery.

Mr. GARDNER of Massachusetts. How many teeth has a hen?

Mr. CURLEY. I will say my purpose in asking that question is the fact that 90 per cent of the inmates of all prisons are literate.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

Mr. SABATH. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. GOLDFOGLE].

Mr. GOLDFOGLE. Mr. Speaker, believing that the objections of the President of the United States to the immigration bill are founded on sound common sense, that they are conceived in the spirit of humanity and American patriotism, and are in complete accord with American principles, I shall vote to sustain the President's veto. [Applause.]

The legislation proposed is unnecessary, harsh, ill considered, and objectionable. It is at last conceded by its advocates that the literacy test is intended as an exclusion measure and that it furnishes no test of character. It is intended under such a test to exclude, however physically and mentally and morally sound they may be, the illiterate foreigners from entrance to our shores. Such a bill violates the traditions of our Republic. It is opposed to the professions democracy has made in the past. It is undemocratic and, as it comes before us, is unworkable in practice.

Mr. Speaker, the bill attempts to reverse our Nation's sound and wholesome policy of receiving the foreigner healthy in mind and body, law-abiding and self-supporting, coming from abroad, where equal opportunity or educational advantages may have been denied them, and affording them under our beneficent system of constitutional government an asylum against oppression and persecution. [Applause.] It is directed against the foreign born wholly, regardless of the fact that immigration has served in an immense degree to build up the country, and in its marvelous development enrich its towns and cities and contribute to its growth, its welfare, and prosperity.

This bill is opposed by the many who have had ample opportunity to understand to the fullest extent by experience and observation the immigration question. Let me read but a single paragraph from a severe editorial criticism published in this morning's New York American upon the action of Congress in passing the immigration bill. There it is said:

A reading of the roll call of Congress makes us wonder how many of the parents of the lawmakers of this Nation would have been excluded under the very bill that is now so dangerously near becoming a law. * * *

I read that particularly because the well-timed and well-expressed remarks of the gentleman from Colorado [Mr. MARTIN] only emphasize the truth of that editorial statement.

Mr. Speaker, I too as much as any man am opposed to the admission to our land of the bad, the vicious, the pauper, and the really undesirable classes. But merely because a man, woman, or child, coming from abroad, happens to be illiterate, does not imply he or she belongs to either of these classes. Indeed I have in debate in this House heretofore pointed out how the illiteracy decreases of those who come over and avail themselves, some in a large degree, some in a small way, of the opportunity to learn to read and write. As for their children, they make wonderful progress in our schools, they advance in education with rapidity, they are eager to store their minds with knowledge, and in exceedingly large numbers they win, through brightness of mind and great aptitude for study, their way upward in school, in college, and university.

The gentleman from Wyoming [Mr. MONDELL] said in substance that the illiterates made most undesirable immigrants and he feared the flood of illiterate immigration. Let me point out to the Members of this House that in one of the most congested districts in New York—in a district filled and abounding with the foreign born, whose arrival in this country was comparatively recent, the circulation of books in a branch of the great Public Library was greater than that in any other of the 35 or 40 other branches in other parts of the city. [Applause.] In last night's New York Globe, in a well written and pithy editorial, that subject is thus accurately alluded to:

THE EAST SIDE READERS.

The Seward Park branch of the Public Library is in East Broadway, on the lower east side, where the population is dense, and where the proportion of recent immigrants is comparatively very high. And it is this branch among all the 35 to 40 branches of the Public Library that has the heaviest total circulation.

At the present day this is an old story. Hereabout we are all more or less used to the annual discovery that on the lower east side, judged by this library circulation test, the passion for reading is exceptionally strong. We wish these facts could be put every day in front of the Congressmen who are so keen about tests of literacy for immigrants.

Mr. Speaker, as I and others have frequently remarked on this floor, this demand for exclusion of immigration is not new. It is as old as the Republic itself. It is born of narrowness of views, often of prejudice, and in some cases of want of understanding immigration and its conditions. Gentlemen who are wholly unacquainted with immigration conditions, in whose districts no immigration has come, whose constituencies are mainly, and in some cases almost wholly, native born, are most zealous in their advocacy of this measure. It was so, too, with many who once loudly cried out against the entrance to the country of the Irish, the German, the Austrian, and the Scandinavian. Now the cry goes up against the Russian, the Italian, the Roumanian, the Pole, and the Slav. The country has grown and prospered despite the cries and lamentations of those who in the days of knownothingism demanded that the gates of the Republic be closed to the foreign born. So, too, in the future, though you admit a few illiterates who seek the God-given right of freedom and equal opportunity, the fears and alarms proclaimed on this floor by some of the advocates of this measure will vanish as thin air, and this country will go on, ever increasing in its prosperity and unparalleled greatness and its national glory. [Applause.]

The SPEAKER. The time of the gentleman from New York has expired.

Mr. SABATH. Mr. Speaker, it is not my desire to detain the House for any length of time, and were it not for the fact that I wish to call the attention of the Members to a few statements I would not delay the House even for this brief space of time. In the first place, I wish to congratulate the President upon his wise and humane act in vetoing this harsh and unreasonable measure; however, he was only following the example set him by a Democratic President, when, on March 2, 1897, Grover Cleveland vetoed a similar measure, stating in his message that—

A radical departure from our national policy relating to immigration is here presented. Heretofore we have welcomed all who came to us from other lands except those whose moral or physical condition or history threatened danger to our national welfare and safety. Relying upon the jealous watchfulness of our people to prevent injury to our political and social fabric, we have encouraged those coming from foreign countries to cast their lot with us and join in the development of our vast domain, securing in return a share in the blessings of American citizenship.

A century's stupendous growth, largely due to the assimilation and thrift of millions of sturdy and patriotic adopted citizens, attests the success of this generous and free-handed policy, which, while guarding the people's interests, exacts from our immigrants only physical and moral soundness and a willingness and ability to work.

* * * * * * * *

It is said, however, that the quality of recent immigration is undesirable. The time is quite within recent memory when the same thing was said of immigrants who, with their descendants, are now numbered among our best citizens.

As bearing out the last portion of President Cleveland's message relative to the quality of the immigration I desire to call your attention to some extracts from the report of the Immigration Commission, which has investigated the immigration problem and which commission certainly can not be charged with being overfriendly to the cause of immigration. On page 16 they say—

The new immigration has for the most part been carefully regulated so far as health and likelihood of pauperism are concerned, and, although drawn from classes low in the economic scale, the new immigrants as a rule are the strongest, the most enterprising, and the best of their class.

And again, on page 26, we find these words:

The effective administration of the present immigration law insures the admission to the United States of physically healthy immigrants, so that there is no adequate cause for concern in this regard.

On page 27 appears the following statement:

In the earlier days of unregulated immigration pauperism among newly admitted immigrants was one of the most serious phases of the problem. * * * At the present time, however, pauperism among newly admitted immigrants is relatively at a minimum, owing to the fact that the present immigration law provides for the admission only of the able-bodied, or dependents whose support by relatives is assured.

In speaking of the congestion of immigrants in the large cities we find the report contains the following:

On the whole, however, the average conditions were found materially better than had been anticipated.

* * * * * * * *

In many instances, too, where deplorable conditions were found they were due in part, at any rate, to circumstances over which the inhabitants have little direct control, such as a poor water supply or unsanitary drainage—matters that should be attended to by the city authorities.

These statements very clearly indicate that the findings of the commission do not justify their recommendations, and they should satisfy the most skeptical that the reports circulated by the Junior Order of American Mechanics, the so-called Farmers' Educational and Cooperative Union, the Order of Independent Americans, the Patriotic Order of Sons of America, and other similar organizations, to the effect that the law is not being enforced and that the present immigration is composed of paupers and degenerates, have been disseminated with a view of prejudicing the minds of the American people. I say without fear of successful contradiction that the prejudice against immigration and the demand for its restriction have been artificially created by false statements and doctored statistics which in the main have been circulated and distributed broadcast by professional patriots and by the lobbyists of the abovementioned organizations.

At this point I wish to read an extract from an editorial by Miss Jane Addams in the Survey of January 4, 1913, which is as follows:

After all, literacy is neither a test of character nor of ability; it is merely an index of the educational system of the community in which a man has been reared. The literacy test will always work in favor of the man from the city and discriminate against the man from the country. On the face of it, it would seem safer to admit a sturdy peasant from the mountains of Calabria than a sophisticated Neapolitan.

I also wish to call your attention to an editorial in the New York World of January 13, 1913, which is in part as follows:

But the greatest force of all back of the bill is that of secretly organized race and religious prejudice, which would thus use a misfortune of the illiterate millions of southern and eastern Europe to deny them an American opportunity of escaping the forces which keep them down. At its best such a bill is un-American. At its worst it is heartless in its denial of opportunity to honest and industrious but unfortunate men and women who seek a chance to better their lot in life.

In the editorial columns of the New York Independent, December 26, 1912, we find the following:

We can not approve the bill which has passed the House of Representatives, denying admission at our ports of immigrants who can not read, with certain minor exceptions, as of elderly parents and grandparents of immigrants who are literate. The persons excluded are mostly honest, hard-working men who would do the coarse labor of our industries. They will not learn to read, but their children will have to, will be compelled to.

The New York Evening Journal of December 23, 1912, has the following to say:

We beg to tell the Congressmen that it is not reading that makes useful citizens, but thinking. And many a man and woman in Europe, unable to read, but able to think, and longing for opportunity in a free country, would make better citizens for America than the man with all possibilities within himself and no energy to make him utilize it.

Then in the Philadelphia Public Ledger of January 10, 1913, there appears this statement:

The sole purpose of the regulation of immigration by the United States is to prevent the abuse of the asylum offered by this "land of the free" to the poor and oppressed of the Old World. Whenever regulation or restriction goes beyond this it becomes itself oppressive, and it is to be hoped that there will always be voices in America raised in protest against a policy that is both impolitic and inhumane.

The editorial columns of the Chicago Record-Herald for December 20, 1912, contain the following comment:

A reading test may admit forgers, blackmailers, "Black Handers," procurers, and other criminals, while excluding from the land of opportunity honest, industrious, willing workers who can not read simply because their respective countries failed to offer them educational facilities. Education is highly desirable, but in Europe, even to-day, its lack does not argue either shiftlessness or moral delinquency.

The extract which I shall next read is from the Milwaukee (Wis.) Wisconsin, for December 6, 1912, and it states that:

This country is the last in the world that should insist on literacy as a test of character. Americans have had one President of whom it was popularly asserted that he never knew how to write until his wife taught him, and he was not married till he had arrived at the age of 28. Literacy has no bearing whatever upon morality. It is not reliable as a test of intelligence.

Then I wish to call attention to the opinion of this problem as voiced by the Waterloo (Iowa) Times-Tribune, December 29, 1912. It says:

Congress has begun to wrestle again with the problem of how to keep out undesirable immigrants. So far the sentiment of that body has not crystallized about any definite policy, but it seems slowly to be centering upon education as one test. This would not seem entirely fair, for many of our best people are the near descendants of those to whom the American language was a sealed book. Yet these men and women made a vast contribution to the life and energy of this country. Some of the children of immigrants have become Presidents, while every department of private life is adorned with the same class.

Under date of December 18, 1912, the Detroit (Mich.) Free Press says:

With many persons the immigration question has become a bugaboo to frighten native-born children o' nights. Some apparently have an idea that the countries of Europe are deliberately shipping their peasants and undesirables and outcasts to the United States at the rate of several millions a year, and that in a very brief period there will be no more "real" Americans.

Then, still another paper, the Newark (N. J.) Star, in its issue of December 20, 1912, has the following to say:

The illiterate immigrant is no menace to our country. The educated or half-educated anarchist and criminal is. While the illiterate one is helping us produce wealth, he can learn to read and write much more readily than the educated immigrant can unlearn the lessons of anarchy.

And for the benefit of my friends from the South I wish to call particular attention to the following excerpt from an editorial appearing in the Charleston (S. C.) News-Courier December 9, 1912, which follows:

We do not favor a test of literacy for immigrants. While illiteracy is still largely present among our own people, many excellent citizens being unable to read and write, it is unfair to expect of foreigners, whose educational opportunities have been limited, even a fundamental knowledge of books. If this country means anything in the world's concept of opportunity, it is that it stands for freedom in a large sense, freedom to work for a living, freedom to learn, freedom to rise to wealth and power, freedom to go into the fields and take from them a living. America means a chance to get an education. Must we keep those out who have never had a chance of that kind anywhere else? How many of the men who fought in the Revolution were literate? Literacy is not yet a test of character. We can protect ourselves against ignorant voters, as we should, by an educational qualification in the suffrage laws. The illiterate immigrant is not dangerous to the Nation except as a voter. Let the reasons for prohibiting entry be based on character, on physical condition, not on a failure of previous opportunity. The literacy test would let many criminals in; it would keep many desirable immigrants out.

The injustice of this proposed legislation is fittingly portrayed in verse by Mr. Louis S. Amonson, of Newtown, Pa., and I now submit his "Message to Congress from the men at the gate":

A MESSAGE TO CONGRESS FROM THE MEN AT THE GATE.

We've dug your million ditches,
  We've built your endless roads.
We've fetched your wood and water,
  And bent beneath the loads.
We've done the lowly labor
  Despised by your own breed—
And now you won't admit us
  Because we can not read!

Oh, statesmen, high in Congress,
  From East, West, North, and South—
You render valued service,
  But mostly with the mouth.
The sons are like the fathers,
  Hard work is not their creed;
They won't swing picks and shovels,
  But then—they all can read!

We've given honest labor
  And liked our humble lot;
Our children learn the letters
  Their fathers haven't got.
We've fled from persecution
  And served you in our need,
But now you would debar us
  Because we can not read!

Most crooks are educated
  And to the manner born;
Their white hands show no callous,
  They look on us with scorn.
Mere learning is not virtue,
  The word is not the deed;
Disdain, then, not your toilers
  Because they can not read!

Good friends, if we are brothers,
  Why do you raise this test?
Will talk then till your acres
  And feed your people best?
Your children trained as idlers—
  Some workers you must need;
Don't bar our only refuge
  Because we can not read!

Your farms are half deserted—
  Up goes the price of bread!
Your boasted education
  Turns men to clerks instead.
We bring our picks and shovels
  To meet your greatest need;
Don't shut the gates upon us
  Because we can not read!

LOUIS S. AMONSON.

NEWTON, PA., *February, 1913.*

In connection with these comments of the press upon this proposed legislation I wish to read a few brief extracts from articles from the pen of Mr. Frederic J. Haskin, a writer who has devoted a great deal of careful study to the problem of immigration. He says:

Yet all authorities agree that in the "new" immigrant, as a rule, we have a diamond in the rough, a human being just as capable of transformation into a good citizen as his more fortunate brother from northwestern Europe.

And then again:

The comforting thought about the "new" immigration is that it has not much to unlearn. It is often easier to build a new house than to remodel an old one, and likewise it might be easier to make a good citizen of an illiterate villager from the lands of the Slovaks, the Italians, and the Finns than of their better-educated brethren who must first unlearn some fixed notions.

With reference to their ability as agriculturists we find him stating the following:

It is pointed out that the thing to do is to plant the immigrant where he can obtain a plot of ground and build a house on it, because there goes on most rapidly the process of Americanization. Go to Brown Park, Omaha, which has been improved by the Bohemians, Poles, and Lithuanians. What was a few years ago a rolling prairie is to-day studded with neat, well-kept homes, schools, and churches, having well-cultivated gardens and flowers and conforming to the best American standards among wage earners. Go to the Italian settlements in Rockland County, N. Y., Providence, R. I., and Rosetta, Pa. There the immigrants have their gardens, no matter what the soil is, and sometimes in striking contrast with adjacent homes of the neighboring Americans. The Poles on the abandoned farms of New England, the Italians on the swamps of New Jersey, and the Portuguese on Cape Cod have shown what they can do under conditions that have driven out older Americans, have shown that they can rehabilitate worn-out soil and build up a competence in waste places.

Mr. Speaker, the time does not permit, or I could read thousands of similar statements from people who have gone into this question with great care, and with a very few exceptions we would find that they have come to the conclusion that immigration has greatly benefited our Nation. The advocates of restriction place great stress upon the fact that the majority of the present immigrants come from southern Europe. To these gentlemen I again desire to state that the present immigration will demonstrate, in fact it is now demonstrating, that it is as good as the old, against which the same objections were raised in the years gone by.

Indeed, it is strange how much solicitude the gentlemen from the rural districts are showing for the people of the large centers. To them I desire to say that the city of New York, the city of Chicago, the city of Philadelphia, the city of Boston, and all the other large cities have managed to worry along in the past—in fact, have made wonderful progress—without the aid and advice of these gentlemen, and in the future they will be entirely capable of caring for their inhabitants without calling on the gentleman from Alabama [Mr. BURNETT], the gentleman from Georgia [Mr. RODDENBERY], the gentleman from California [Mr. HAYES], the gentleman from Kentucky [Mr. POWERS], the gentleman from Tennessee [Mr. AUSTIN], and the gentleman from Texas [Mr. DIES].

Mr. Speaker, the people from these large centers, who come in contact with the present-day immigration, are not here demanding its restriction; they are not seeking relief; and I defy anyone to successfully assert that he has been requested by the inhabitants of any city or section of the country in which these immigrants are living in large numbers to vote for this restrictive measure. Every advocate of this measure seems to reside in a section of the country to which immigration does not go, and to which it will not go unless the representatives from these sections change their methods.

Mr. Speaker, it has been stated by several gentlemen that the immigrants do not go to the farm. The statistics will show that the majority of the farms in the Middle West are tilled by foreign-born people or those of foreign parentage. It is true that the new arrivals may not at once secure a farm or a position on one; but as soon as they accumulate a few dollars and acquaint themselves with the conditions, their greatest desire is to secure a home and future for themselves and their children on the farm.

Mr. Speaker, I again deny the statement that the new immigrant lowers the standard of wages or the standard of living; never in the entire history of this country have wages and the standard of living been so high as they are at the present day. To these gentlemen who desire better inspection and better protection from those who might enter our doors through inadequate examinations I wish to say that we have passed a bill which is now in the Senate, and which, if it becomes a law, will strengthen the existing laws so that it will be absolutely impossible for anyone to be admitted who suffers with insanity or contagious diseases of any kind. The stowaway bill has also been passed and is also in the Senate, so the main features in this bill have already been covered by the bills that this House has unanimously passed and which are now pending in the Senate. The main thing that remains, outside of some administrative features, is the educational test, and as to that I desire to read part of the minority report on this bill, signed by five members of the Immigration Committee:

The illiteracy test provided in the bill will not serve to keep out the viciously inclined, the criminal, or the otherwise really undesirable alien.

Experience has demonstrated the fact that, with the educational facilities afforded in this land, thousands of illiterates who, unhappily, were denied educational opportunities in their native lands have learned to read and write here, and have shown an eagerness to acquire knowledge and fit themselves to become good citizens. It will also be noted that the exceptions provided in the bill are not broad enough to fully guard against the separation of families, though the majority of the committee admit that on humane and moral grounds separation of families should, as far as possible, be avoided and prevented. In our opinion the desirable immigrant is the healthy, law-abiding worker, who comes to this country in good faith, and the undesirable immigrant is the clever and educated schemer, who, immediately upon arrival, begins to find fault with our institutions.

And in conclusion I take pleasure in reading an extract from a letter which I know will be of great interest to all the Members of this House. It was addressed to Dr. Cyrus Adler, of Philadelphia, on October 21 last, by the Hon. Woodrow Wilson, and is as follows:

* * * I am in substantial agreement with you about the immigration policy which the country ought to observe. I think that this country can afford to use and ought to give opportunity to every man and woman of sound morals, sound mind, and sound body who comes in good faith to spend his or her energies in our life, and I should certainly be inclined, so far as I am concerned, to scrutinize very jealously any restrictions that would limit that principle in practice. * * *

Cordially and sincerely, yours, WOODROW WILSON.

There is nothing that I need to add to this broad and liberal expression of the views of the President elect on this vital question. [Applause.]

Mr. Speaker, I ask unanimous consent that all those who have spoken or may speak on this matter have the privilege of extending their remarks in the RECORD.

The SPEAKER. The gentleman from Illinois [Mr. SABATH] asks unanimous consent that all those who have spoken, or may speak, on this matter have the privilege of extending their remarks in the RECORD. Is there objection?

Mr. MANN. I object.

Mr. SABATH. Then I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Illinois [Mr. SABATH] asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to revise my remarks.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] asks unanimous consent to revise his remarks. Is there objection?

There was no objection.

[Mr. HAMILL, Mr. BURNETT, and Mr. GARDNER of Massachusetts, by unanimous consent, were granted leave to extend their remarks in the RECORD.]

Mr. SABATH. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has three minutes remaining.

Mr. SABATH. Mr. Speaker, I yield the remainder of my time to the gentleman from Massachusetts [Mr. MURRAY].

Mr. MURRAY. Mr. Speaker, first, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. MURRAY. Mr. Speaker, I shall print in the RECORD the report of Secretary Nagel to the President of the United States on the legislation on which we are about to vote. I believe that report should have been read, because in this matter I believe the President of the United States has tried to act, not as an Executive, not as a legislator, but as a judge taking testimony and hearing witnesses, and then rendering a judicial decision on the facts presented to him. He has been a President, Mr. Speaker, for four years, but he was a judge on the Federal bench for eight years, and before this time he had judicial training that equipped him to present a judicial opinion to anybody, even to this House of Representatives.

I have thought, as I have seen the senior Senator from Massachusetts [Mr. LODGE] on the floor of this House to-day and the gentleman, my colleague from Massachusetts [Mr. GARDNER], trying to override the veto of the President of the United States, that they both expressed great horror last spring when one of their erstwhile close companions in public life stood for the principle of the recall of judicial decisions. It is to-day an actual recall of a judicial decision to override this veto, just as it was a theory of government when Theodore Roosevelt in his preliminary campaign last year stood for that doctrine. [Applause.] And I say to my colleague [Mr. GARDNER] that it is well for him to be careful lest the fears of disorder he expressed last spring in Massachusetts with such strong feeling may find a real place in the public life of our Nation.

The gentleman from Pennsylvania [Mr. MOORE] tried to give the credit or blame for this legislation to the chairman of this committee, Mr. BURNETT, of Alabama. Mr. Speaker, I hope that no Democrat will take nor be allowed to have the credit nor the blame of this legislation. I know that the senior Senator from Massachusetts [Mr. LODGE] and the gentleman who happens to be his son-in-law, my colleague from Massachusetts [Mr. GARDNER], are entitled to such credit and will get such blame as this legislation, if adopted, will carry with it. They have made it their earnest purpose for many years, and the fact has been a frequent cause of complaint in our local campaigns

in Massachusetts, to put legislation of this kind upon the statute books.

I know little, if anything, of public sentiment in 47 States, but I know that the judgment of my own Commonwealth will be against it, and I predict that the verdict of our people will be overwhelmingly against this legislation. [Applause.]

The letter is as follows:

DEPARTMENT OF COMMERCE AND LABOR,
Washington, February 12, 1913.

MY DEAR MR. PRESIDENT: On the 4th instant Mr. Hilles, by your direction, sent me Senate bill 3175, "An act to regulate the immigration of aliens to and the residence of aliens in the United States," with the request that I inform you at my earliest convenience if I know of any objection to its approval. I now return the bill with my comments.

In view of the number of hearings and the general discussion that have been had no more than a brief reference to many of the points will be necessary. The following are some of the objections that have been raised:

First. No exception has been made in behalf of Hawaii. You have been assured that it is proposed to meet this objection by joint resolution. Even if this plan should not be carried out, I do not regard the objection as sufficiently serious to affect the merits of the bill.

Second. The provision that persons shall be excluded who can not become eligible under existing law to become citizens of the United States by naturalization is obscure, because it leaves unsettled the question as to who are to be regarded as white persons. But this is merely a perpetuation of the uncertainty which is now to be found in the naturalization law.

Third. The provision that the Secretary may determine in advance, upon application, whether it is necessary to import skilled labor in any particular instance, that this decision shall be held in abeyance for 30 days, and that in the meantime anyone objecting may appeal to the district court to try de novo such question of necessity is unsatisfactory. The provision for the appeal to the courts is probably unconstitutional, but even if the entire provision proves ineffective the law will be left substantially where it is, and so this does not constitute a grave objection to the bill.

Fourth. The provision that the Secretary may detail immigrant inspectors and matrons for duty on vessels carrying immigrants or immigrant passengers is objected to by foreign countries, but inasmuch as this is left to the discretion of the Secretary, and it is understood, for illustration, that Italy insists upon such practice with respect to all steamship companies taking immigrants from her shores, it does not seem to me that this is a controlling objection.

Fifth. The provision in section 7, with respect to the soliciting of immigration by steamship companies, vests the Secretary with somewhat drastic authority by way of imposing fines and denying the right of a steamship company to land alien immigrant passengers. Again, this is not mandatory, and therefore does not go to the heart of the bill.

It appears to me that all these and similar objections might well have been considered in committee and may become the subject of future consideration by Congress, but, fairly considered, they are of incidental importance only and furnish no sufficient reason for disapproving this bill.

With respect to the literacy test, I feel compelled to state a different conclusion. In my opinion, this is a provision of controlling importance, not only because of the immediate effect which it may have upon immigration and the embarrassment and cost it may impose upon the service, but because it involves a principle of far-reaching consequence with respect to which your attitude will be regarded with profound interest.

The provision as it now appears will require careful reading. In some measure the group system is adopted—that is, one qualified immigrant may bring in certain members of his family—but the effect seems to be that a qualified alien may bring in members of his family who may themselves be disqualified, whereas a disqualified member would exclude all dependent members of his family, no matter how well qualified they might otherwise be. In other words, a father who can read a dialect might bring in an entire family of absolutely illiterate people, barring his sons over 16 years of age, whereas a father who can not read a dialect would bring about the exclusion of his entire family, although every one of them can read and write.

Furthermore, the distinction in favor of the female members of the family as against the male members does not seem to me to rest upon sound reason. Sentimentally, of course it appeals, but industrially considered it does not appear to me that the distinction is sound. Furthermore, there is no provision for the admission of aliens who have been domiciled here, and who have simply gone abroad for a visit. The test would absolutely exclude them upon return.

In the administration of this law very considerable embarrassment will be experienced. This at least is the judgment of members of the immigration force, upon whose recommendations I rely. Delay will necessarily ensue at all ports, but on the borders of Canada and Mexico that delay will almost necessarily result in great friction and constant complaint. Furthermore, the force will have to be very considerably increased, and the appropriation will probably be in excess of present sums expended by as much as a million dollars. The force of interpreters will have to be largely increased and, practically speaking, the bureau will have to be in a position to have an interpreter for any kind of language or dialect of the world at any port at any time. Finally, the interpreters will necessarily be foreigners, and with respect to only a very few of the languages or dialects will it be possible for the officials in charge to exercise anything like supervision.

Apart from these considerations, I am of the opinion that this provision can not be defended upon its merits. It was originally urged as a selective test. For some time recommendations in its support upon that ground have been brought to our attention. The matter has been considered from that point of view, and I became completely satisfied that upon that ground the test could not be sustained. The older argument is now abandoned, and in the later conferences, at least, the ground is taken that the provision is to be defended as a practical measure to exclude a large proportion of undesirable immigrants from certain countries. The measure proposes to reach its result by indirection, and is defended purely upon the ground of practical policy, the final purpose being to reduce the quantity of cheap labor in this country. I can not accept this argument. No doubt the law would exclude a considerable percentage of immigration from southern Italy, among the Poles, the Mexicans, and the Greeks. This exclusion would embrace probably in large part undesirable but also a great many desirable people, and the embarrassment, expense, and distress to those who seek to enter would be out of all proportion to any good that can possibly be promised for this measure.

My observation leads me to the conclusion that, so far as the merits of the individual immigrant are concerned, the test is altogether overestimated. The people who come from the countries named are frequently illiterate because opportunities have been denied them. The oppression with which these people have to contend in modern times is not religious, but it consists of a denial of the opportunity to acquire reading and writing. Frequently the attempt to learn to read and write the language of the particular people is discouraged by the Government, and these immigrants in coming to our shores are really striving to free themselves from the conditions under which they have been compelled to live.

So far as the industrial conditions are concerned, I think the question has been superficially considered. We need labor in this country, and the natives are unwilling to do the work which the aliens come over to do. It is perfectly true that in a few cities and localities there are congested conditions. It is equally true that in very much larger areas we are practically without help. In my judgment, no sufficiently earnest and intelligent effort has been made to bring our wants and our supply together, and so far the same forces that give the chief support to this provision of the new bill have stubbornly resisted any effort looking to an intelligent distribution of new immigration to meet the needs of our vast country. In my judgment no such drastic measure, based upon a ground which is untrue and urged for a reason which we are unwilling to assert, should be adopted until we have at least exhausted the possibilities of a rational distribution of these new forces.

Furthermore, there is a misapprehension as to the character of the people who come over here to remain. It is true that in certain localities newly arrived aliens live under deplorable conditions. Just as much may be said of certain localities that have been inhabited for a hundred years by natives of this country. These are not the general conditions, but they are the exceptions. It is true that a very considerable portion of immigrants do not come to remain, but return after they have acquired some means, or because they find themselves unable to cope with the conditions of a new and aggressive country. Those who return for the latter reason relieve us of their own volition of a burden. Those who return after they have acquired some means certainly must be admitted to have left with us a consideration for the advantage which they have enjoyed. A careful examination of the character of the people who come to stay and of the employment in which a large part of the new immigration is engaged will, in my judgment, dispel the apprehension which many of our people entertain. The census will disclose that with rapid strides the foreign-born citizen is acquiring the farm lands of this country. Even if the foreign-born alone is considered, the percentage of his ownership is assuming a proportion that ought to attract the attention of the native citizens. If the second generation is included, it is safe to say that in the Middle West and West a majority of the farms are to-day owned by foreign-born people or they are descendants of the first generation. This does not embrace only the Germans and the Scandinavians, but is true in large measure, for illustration, of the Bohemians and the Poles. It is true in surprising measure of the Italians; not only of the northern Italians, but of the southern.

Again, an examination of the aliens who come to stay is of great significance. During the last fiscal year 838,172 aliens came to our shores, although the net immigration of the year was only a trifle above 400,000. But, while we received of skilled labor 127,016, and only 35,808 returned; we received servants 116,529, and only 13,449 returned; we received farm laborers 184,154, and only 3,978 returned, it appears that laborers came in the number of 135,726, while 209,279 returned. These figures ought to demonstrate that we get substantially what we most need, and what we can not ourselves supply, and that we get rid of what we least need and what seems to furnish, in the minds of many, the chief justification for the bill now under discussion.

The census returns show conclusively that the importance of illiteracy among aliens is overestimated, and that these people are prompt after their arrival to avail of the opportunities which this country affords. While, according to the reports of the Bureau of Immigration, about 25 per cent of the incoming aliens are illiterate, the census shows that among the foreign-born people of such States as New York and Massachusetts, where most of the congestion complained of has taken place, the proportion of illiteracy represents only about 13 per cent.

I am persuaded that this provision of the bill is in principle of very great consequence, and that it is based upon a fallacy in undertaking to apply a test which is not calculated to reach the truth and to find relief from a danger which really does not exist. This provision of the bill is new, and it is radical. It goes to the heart of the measure. It does not permit of compromise, and, much as I regret it, because the other provisions of the measure are in most respects excellent and in no respect really objectionable, I am forced to advise that you do not approve this bill.

Very sincerely, yours, CHARLES NAGEL, *Secretary.*

THE PRESIDENT.

The SPEAKER. The time of the gentleman has expired.

Mr. BURNETT. Mr. Speaker, I yield to the gentleman from Georgia [Mr. ADAMSON].

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] is recognized.

[Mr. ADAMSON addressed the House. See Appendix.]

Mr. BURNETT. Mr. Speaker, I yield to the gentleman from Texas [Mr. SLAYDEN].

The SPEAKER. The gentleman from Texas [Mr. SLAYDEN] is recognized.

Mr. SLAYDEN. Mr. Speaker, I supported this bill when it was before the House and I shall support it now, despite the veto of the President.

Gentlemen have been telling us for the last hour what induced them to give support to this and other immigration measures. I shall follow that example and give my reasons.

I vote for this bill because I believe that in doing so I am serving the best interests of the American people and the Republic. Being entirely convinced that the Republic can not

survive if we do not have a homogeneous people, I shall now, and on every occasion which may hereafter offer, do what I can to reestablish the homogeneity we have lost through excessive and unregulated immigration, and the loss of which endangers institutions that a large part of such immigrants neither comprehend nor sympathize with.

It is very generally admitted that we would be vastly better off if there were no alien races in the United States. One such race we have in large numbers. They came involuntarily and manifest no desire to leave. Asiatics, fleeing the hard conditions of overpopulated countries, where men are always cheap and wages low, have been shut out by law. They are declared to be unassimilable, and therefore undesirable. It has been often said in discussing the immigration question that they were not desirable because they did not merge with our people, did not intermarry; that they worked hard, saved their earnings, and went back to the countries from which they came. Those all seem to me excellent reasons for admitting them in preference to any other alien races, if any are to be admitted.

Certainly no white American ought to want social assimilation with any other race. A hybrid, mule or mulatto, is a less desirable part of our social and political fabric than a thoroughbred.

There is a wide difference even in the different families of the white race. Some strains are better and more desirable than others. If we are to have immigration, I want the best. I want those only whose ancestors have shown themselves to be in sympathy with free, representative institutions. But it is not possible to make a law which will admit them and altogether shut out the less advanced, less desirable people; therefore I shall support this measure because in a slight way it does impede the flow of immigration.

It has been abundantly shown that crime and literacy are not as intimately associated as crime and illiteracy, which, it seems to me, is a good enough reason for supporting the literacy test.

If this country were the last and only refuge for oppressed people in other parts of the world, I might, in the name of humanity, consent to waive my views and keep down the bars. But that is not the situation. South and Central America, Australia, and New Zealand offer all the advantages of climate, virgin soil, and democratic institutions that can be found in North America. In those countries, which are comparatively unpopulated, emigrants from Europe can find opportunities for material prosperity just as great as in the United States. My conscience is not troubled by these appeals to the "traditional American policy."

No policy, traditional or other sort, commands my respect or sympathy when I see that it is hurtful to the best interests of my country. I would not hesitate to abandon on Tuesday a policy adopted on Monday if I ceased to believe in it.

We have people enough in this country for the present. We can safely rely upon natural increase to fill up the unoccupied places. Density of population is not my standard of civilization. If it were, the conditions in India and China would make special appeal, which they do not. Nor am I fully persuaded that big export tables infallibly indicate happiness and prosperity among the people. The sweatshop output is great, but it comes from rooms fetid, unwholesome, and the abode of misery, and is not a feature of our commerce to which we can point with pride.

Better not develop too rapidly than to develop along the wrong lines. Leave some chances for Americans who have not been born. They will need all the land we have, and all too soon the time will come to our people, as it has to others, when the cry will be heard that there are too many people for the territory and that we must go out into the world and find a weaker people and take away from them their lands and sovereignty.

The gentleman from Illinois [Mr. CANNON] says he would like to see some of the quickening spirit of the North spread to the South so that—this is inferential—our people might get over their laziness and produce more and so lessen the cost of living.

Let me say a word for my own State. Last year Texas produced more than 4,500,000 bales of cotton, which, with by-products, were worth well up to $300,000,000. She produced large crops of grain and fruit and great quantities of cattle. As much as 85 per cent of these crops were entirely the products of white labor. Our young men are not flocking to the cities; they are cultivating the land and prospering, and they neither need nor desire help from any other country in the world.

The gentleman from New York [Mr. GOLDFOGLE] sets himself up as a guardian of "true Americanism." Great heavens! Think what a calamity it would be to "true Americanism" if he should go to sleep on his post!

Mr. Speaker, ours is an American country. I mean the South. I do not mean to say that other sections are not, but I do affirm that ours is, and we want to keep it so.

Free, representative government as we know it, as we enjoy it, had its origin among the ancient peoples who resided on or near the shores of the Baltic. The Witenagemot of the Germanic people, who there nourished the germ of liberty, was the progenitor of the British Parliament and the American Congress. Not all the people of Europe, highly civilized and advanced as they are, have shown comprehension of or sympathy for our scheme of government. But for us it is a valued possession, and we maintain it in its ancient purity in the South, no matter what the gentleman from New York may think. We have the true Apostolic Succession in this particular matter and we mean to hold on to it if possible.

Wide open and unguarded stand our gates,
And through them press a wild, motley throng,
Men from the Volga and the Tartar steppes,
Featureless figures of the Hoang Ho,
Malayan, Scithian, Teuton, Kelt, and Slav,
Flying the Old World's poverty and scorn,
These bringing with them unknown Gods and rites
Those tiger passions, here to stretch their claws.
* * * * *
O Liberty, White Goddess, is it well
To leave thy gates unguarded?
* * * * *
For so of old
The thronging Goth and Vandal trampled Rome,
And where the temple of the Caesars stood
The lean wolf unmolested made her lair.

Mr. BURNETT. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. FARR].

The SPEAKER. The gentleman from Pennsylvania [Mr. FARR] is recognized.

Mr. FARR. Mr. Speaker, every effort has been made here to put forth a defense for the foreigner in this country. The foreigner in this country needs no defense. His handiwork has been and is being wrought in every phase of this great country and Government, and the attempt to inject that kind of prejudice into this debate is unfortunate and uncalled for.

I come from a region in which the people of foreign birth and their children are in the majority, all earnestly working out their careers in good faith and in good conduct and with splendid results.

If any benefit follows the restriction intended by the provisions of this measure, it will help alike those who have come here from the old countries and those who are natives of this country. Indeed, the greater advantage would go to those who have come from foreign countries, because the investigation made by the Immigration Commission in 37 of the principal industries in the United States east of the Rocky Mountains shows that 60 per cent of the employees are foreign born.

The investigation of this commission also shows that, extending over a period of years, the large industrial centers have become overcrowded with unskilled labor; that the immigration does not go to the agricultural fields to till the soil and to produce, but in very large part to the big cities and the labor centers, adding to the congestion and to the consumption, thus increasing the cost of living and at the same time lessening the individual opportunities, particularly for full time, so essential to maintain the proper standard of living and right moral and intellectual development. The real question before us is whether some restriction of immigration is necessary and what method shall be adopted to lessen it.

The SPEAKER. The time of the gentleman has expired.

Mr. FARR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. BURNETT. Mr. Speaker, have gentlemen on the other side used all their time?

The SPEAKER. Their time is all exhausted.

Mr. BURNETT. Then, Mr. Speaker, I yield the remainder of my time to the gentleman from Alabama [Mr. HEFLIN].

The SPEAKER. The gentleman from Alabama [Mr. HEFLIN] is recognized.

Mr. HEFLIN. Mr. Speaker, in closing this debate I want to say that—

Once to every man and nation
Comes the moment to decide
In the strife of truth with falsehood
For the good or evil side.

The highest and best interest of my country is on the side of restricted immigration. The evil side of the question now under

consideration is the dangerous and indefensible side of unrestricted immigration. In defense of American ideals and institutions, aye, in defense of American civilization I shall vote to pass this bill over the veto of the President. [Applause.]

When will the American people wake up to the dangers that threaten us from the coming into our country of undesirable immigrants? Tramp, tramp, they come. Every year a large number of foreigners pour into our country, and under the present immigration law those are admitted who are absolutely unfit for American citizenship. Every year in the mass of a million people who come here from foreign countries there are thugs, degenerates, Black Handers, anarchists, and criminals. [Applause.]

The unfit and undesirable foreigner is the man that we desire to keep out of our country. The foreigner already here who is a good citizen, the man who came across the waters of his own volition to make this country his home, ought not to be opposed to the enactment of a law that would protect this country—which is his country as well as mine—from the influx of unfit and criminal classes from foreign countries.

The steamship companies are opposed to any measure that looks to the restriction of foreign immigration. Why? Because they make millions of money bringing these foreigners into our country. Time was when the industrious, deserving foreigner wanted to come to our country he went to work and secured funds and paid for his own transportation. Then, as a rule, but few undesirables and criminals came over to our country. Then it was harder for the unfit element to gain admission into the United States, but now the steamship companies do not inquire whether the foreigner is desirable or not. All they want to know is, Can he pay the transportation charges? They have excursions, and they advertise the glorious opportunities and possibilities in America, and they urge the foreigner to come to the United States. They have agents to hunt up any and all kinds of people and to tell them of the advantages afforded in America, and, Mr. Speaker, we are getting through this traffic in human beings by the steamship companies some of the very scum of the earth. [Applause.]

I hold in my hand the Washington Times of to-day, and it very strongly intimates that the steamship companies have been the cause of hundreds of telegrams being sent to Members, urging them not to vote to pass this immigration bill over the President's veto.

Mr. Speaker, when will this traffic in human beings stop? When will we pass a law in the interest of the American people on the subject of foreign immigration? [Applause.]

A few years ago, when the new King of Denmark took the throne, he immediately pardoned 700 criminals—degenerates, swindlers, thieves, and murderers. The people of Denmark did not want these criminals to remain in their country, and they made up money and purchased a ticket for every one of these criminals and put them on board a steamship headed for New York. Mr. Speaker, I believe that 85 per cent of the voters of America would this very hour vote to-day to pass this bill over the President's veto, and I appeal to the representatives of the American people to say by their votes to-day that this country shall not become a refuge and dumping ground for the refuse and criminal hordes of other countries. [Loud applause.]

The SPEAKER. The time of the gentleman from Alabama has expired. All time has expired. The question is, Will the House on reconsideration pass this bill, the objections of the President of the United States to the contrary notwithstanding? Under the Constitution this vote must be taken by the yeas and nays. Those in favor of passing this bill over the President's veto will, when their names are called, answer aye, those opposed will answer no, and the Clerk will call the roll.

The question was taken; and there were—yeas 213, nays 114, answered "present" 2, not voting 52, as follows:

YEAS—213.

ANSWERED "PRESENT"—2.

Barnhart	Farr

NOT VOTING—52.

Ainey	Davenport	Hawley	Morgan, La.
Ames	Davidson	Hughes, Ga.	Morgan, Okla.
Ansberry	Dickson, Miss.	Korbly	Olmsted
Ayres	Donohoe	Lafean	Reyburn
Brantley	Evans	Lamb	Roberts, Nev.

Conry	George	McMorran	Taggart
Copley	Hamilton, W. Va.	Matthews	Talbott, Md.
Crumpacker	Harris	Mays	Vreeland
Danforth	Hart	Moon, Pa.	Wood, N. J.

So, two-thirds not having voted therefor, the House upon reconsideration refused to pass the bill, notwithstanding the veto of the President.

The following additional pairs were announced:

Until further notice:

Mr. TAGGART with Mr. BROWNING.

Mr. LITTLEPAGE with Mr. WOOD of New Jersey.

Mr. AYRES with Mr. FAIRCHILD.

Mr. EVANS with Mr. HAWLEY.

Mr. KORBLY with Mr. LAFEAN.

Mr. LITTLETON with Mr. OLMSTED.

Mr. MORGAN of Louisiana with Mr. MCMORRAN.

Mr. STACK with Mr. VREELAND.

Mr. LAMB with Mr. MOON of Pennsylvania.

Mr. BRANTLEY with Mr. J. M. C. SMITH.

On this vote:

Mr. LINDSAY (to sustain veto) with Mr. ROBERTS of Nevada and Mr. DIXON of Mississippi (against).

Mr. CONRY (to sustain veto) with Mr. AINEY and Mr. TALBOTT of Maryland (against).

Mr. DONOHOE (to sustain veto) with Mr. HUGHES of Georgia and Mr. FARR (against).

Mr. FORNES (to sustain veto) with Mr. MCKINNEY and Mr. FERRIS (against).

Mr. COPLEY (to sustain veto) with Mr. CARTER and Mr. DAVENPORT (against).

Mr. FARR. I would like to ask the Chair if the gentleman from Pennsylvania, Mr. DONOHOE, voted?

The SPEAKER. He did not.

Mr. FARR. I am paired with the gentleman from Pennsylvania, and I desire to withdraw my vote of "aye" and vote "present."

Mr. FLOOD of Virginia. Mr. Speaker, I desire to be recorded.

The SPEAKER. Was the gentleman in the Hall and listening for his name when it should have been called?

Mr. FLOOD of Virginia. I was at the door.

The SPEAKER. Was the gentleman in the Hall?

Mr. FLOOD of Virginia. I think I was.

The SPEAKER. If the gentleman was simply at the door and not in the door or not inside, he does not qualify himself.

Mr. FLOOD of Virginia. I was coming in the door.

The SPEAKER. The Chair thinks the gentleman brings himself within the rule, and the Clerk will call his name.

The Clerk called the name of Mr. FLOOD of Virginia, and he answered "Yea," as above recorded.

Mr. GARDNER of Massachusetts. Mr. Speaker, is it in order to move to reconsider the vote?

Mr. MANN. I ask for the regular order.

The SPEAKER. The regular order is to complete this roll call, and the Chair will cross that bridge when he comes to it.

Mr. GARDNER of Massachusetts. Mr. Speaker, a parliamentary inquiry. I asked before the vote was announced whether anyone who voted in the majority had a right to move to reconsider.

Mr. MANN. The gentleman from Massachusetts knows that it is not in order to make a parliamentary inquiry before the announcement of the vote.

Mr. GARDNER of Massachusetts. Mr. Speaker, I desire to change my vote. I voted "aye," and I want to change my vote to "no."

Mr. MURRAY. Mr. Speaker, is it necessary for a Member to vote with the majority in order to move to reconsider?

The SPEAKER. It is required that he vote with the majority.

The result of the vote was then announced as above recorded.

Mr. GARDNER of Massachusetts. Mr. Speaker, I move to reconsider the vote by which the House refused upon reconsideration to pass the immigration bill, the President's objections notwithstanding.

Mr. MANN. And I make the point of order that the motion is not in order.

Mr. GARDNER of Massachusetts. Mr. Speaker, I should like to be heard on the point of order.

The SPEAKER. The Chair will hear the gentleman.

Mr. GARDNER of Massachusetts. Mr. Speaker, so far as I can discover, there has been no ruling on this question since 1844. A little before the middle of the last century this question came up, and the Chair at that time ruled that it was not in order to reconsider under circumstances such as confront us at this moment. But, Mr. Speaker, very many Members of the House voted to overrule the decision of the Chair, among them John Quincy Adams, one of the best parliamentarians of his day. The vote sustaining the Chair was very close indeed.

Now, I invite the Speaker's attention to the fact that he himself to-day ordered that this bill be read in full, and thereby put it distinctly in the position of a bill on its passage. He applied the rule of the House requiring a bill on its passage to be read. If it was sound to rule that this bill should be read in full, it must be in order to reconsider the vote by which it was rejected. The vote taken to-day differed in no way from a second vote on the passage of the bill, except that a two-thirds vote was necessary to pass it.

Mr. MANN. Mr. Speaker, we are proceeding under a constitutional mandate. A motion was made to reconsider the vote by which the bill was passed when the bill passed the House. That motion was laid on the table. The House, under the rules, had no way of getting at that bill again unless at the end of the regular order of the House it had taken the motion to reconsider from the table. But the Constitution steps in and says upon a veto of a bill the House shall take a vote. It is not optional with the House whether it then reconsiders the bill, although it was so stated the other day in a distinguished body at the other end of the Capitol. The House is not called upon to vote whether it will reconsider the bill at that time, but the Constitution says that the House shall, upon reconsideration, determine whether it will pass the bill; and the Speaker correctly stated the question under the constitutional mandate, Shall the House, upon reconsideration, pass the bill, the objections of the President to the contrary notwithstanding? That is a final vote, so held early in the history of the country. No one has ever before pretended that you could keep the thing bobbing back and forth, because under the contention of the gentleman from Massachusetts [Mr. GARDNER], if upon a reconsideration, which can be ordered by a majority of the House, the House again fails to pass the bill over the President's veto, then the gentleman from Massachusetts can again move to reconsider the vote; and the majority of the House—not a two-thirds vote—could keep the House voting upon that question from now until the end of doom or the expiration of the session. That is not the constitutional provision. The constitutional mandate has been complied with. The House has voted, upon reconsideration, not to pass the bill over the President's veto, and any other action which the House takes is invalid and without constitutional warrant. [Applause.]

The SPEAKER. The Chair is ready to rule. This vote was taken under the second subdivision of section 7 of Article I of the Constitution, which reads in this way:

> Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve he shall sign it, but if not he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their Journal and proceed to reconsider it. If, after reconsideration, two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered, and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the Journal of each House, respectively.

The Chair thinks that the motion to reconsider does not apply. This question, so far as the Chair has found, has never been raised but once, and that was on June 12, 1844, when the Hon. John W. Jones, of Virginia, was Speaker. The Chair will read the syllabus:

> The motion to reconsider may not be applied to the vote on reconsideration of a bill returned with the objections of the President.
>
> On June 12, 1844, a motion was made by Mr. Orville Hungerford, of New York, to reconsider the vote by which the House on the previous day refused, on reconsideration, to pass the bill (No. 203), entitled "An act making appropriations for the improvement of certain harbors and rivers," which had been returned with the objections of the President.
>
> The Speaker decided that inasmuch as the vote now proposed to be reconsidered was taken in a manner expressly provided for by the Constitution of the United States, and having been thus taken, the decision must be considered final, and no motion to reconsider was in order.
>
> From this decision Mr. John Quincy Adams, of Massachusetts, appealed. After debate the Chair was sustained by a vote of 97 to 85.

The footnote is fully as illuminating as the text, and the Chair will read that:

> On June 13, Mr. Adams gave his reasons for the appeal. He said the Constitution provided that the bill should be reconsidered with the President's objections. Reconsideration implied deliberation. But the vote had been taken under the operation of the previous question, which allowed no deliberation. Therefore the provision of the Constitution had been violated.
>
> The Speaker, replying, asked how it was that a motion to reconsider was ever entertained? It was only in virtue of the rules of the House. The bill was passed some days ago, and it was no sooner passed than a motion was made to reconsider it. That motion was rejected; all power under the rule was exhausted. Had it ever been heard of that a motion to reconsider, being once rejected, could be renewed? There was, however, a power higher than the rules which provided that whenever a bill was returned by the President of the United States with objections it was the duty of the House to proceed to reconsider it. Without that provision of the Constitution the House could never again have touched the bill; and the requirement of the Constitution having been complied with, there was no power in the House to touch the subject again.

The fact that that decision has never been raised since and has been acquiesced in for a period of 66 years is very persuasive.

A motion to reconsider is carried by a simple majority vote, but a bill can be passed over the presidential veto only by a two-thirds majority. If any other view were taken than the one held by Mr. Speaker Jones, quoted above, we might go on in a circle to the end of the session, never getting anywhere.

Another thing, under a suspension of the rules, also requiring a two-thirds majority, the motion to reconsider does not apply. For the reasons above stated the point of order raised by the gentleman from Illinois [Mr. MANN] is sustained.

Mr. GARDNER of Massachusetts. Mr. Speaker, with all due deference to the Chair, who I know intends to be absolutely fair in the matter, this being a very important question, I most respectfully appeal from the decision of the Chair.

Mr. UNDERWOOD. Mr. Speaker, I move to lay the appeal on the table.

The SPEAKER. The gentleman from Massachusetts [Mr. GARDNER] appeals from the decision of the Chair, and the gentleman from Alabama [Mr. UNDERWOOD] moves to lay the

appeal on the table. The Chair will ask the gentleman from Kentucky [Mr. SHERLEY] to take the chair on this vote.

Mr. SHERLEY assumed the chair as Speaker pro tempore.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Alabama [Mr. UNDERWOOD] to lay on the table the appeal of the gentleman from Massachusetts [Mr. GARDNER].

The question was taken, and the appeal was laid on the table.

Mr. GREENE of Massachusetts. Mr. Speaker, I desire to change my vote, I intended to vote aye on sustaining the Speaker.

The SPEAKER. The gentleman had his chance to vote. The Chair will recognize the gentleman from Maryland [Mr. COVINGTON].

BONNIWELL AGAINST BUTLER. p. 3215-3221.

Mr. COVINGTON. Mr. Speaker, I offer the following privileged resolution from the Committee on Elections No. 1.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 849 (H. Rept. 1523).

Resolved, That the memorial of Eugene C. Bonniwell against THOMAS S. BUTLER, dated December 14, 1912, and addressed to and filed with the Speaker of this House, be laid upon the table.

Mr. COVINGTON. Mr. Speaker, this resolution is based upon a unanimous report from the Committee on Elections No. 1, disposing of the paper in the nature of a memorial filed by Eugene C. Bonniwell against the gentleman from Pennsylvania [Mr. BUTLER], and referred to the committee by the Speaker some weeks ago. The resolution is not contested, and I move its adoption.

Mr. GOLDFOGLE. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. GOLDFOGLE. I would like to ask the gentleman from Maryland whether the proper practice would not be to dismiss the memorial instead of laying it upon the table. I understand the Committee on Elections No. 1 has, of course, not entertained the memorial, but disregarded it after looking it over carefully. Now, the proper practice, I think, should be to dismiss the memorial. I simply mention that as a matter of practice.

Mr. COVINGTON. I will inform the gentleman from New York that in view of the equivocal character of the paper filed by Mr. Bonniwell the committee thinks the proper thing to do is to lay it on the table. We entertained it as a memorial, and we report that in so far as this House is concerned it contains nothing which warrants the committee in presenting a resolution to vacate the seat of Representative BUTLER in this House. We had nothing to do with whether or not there is pending any contest, and thought it proper to provide simply that the memorial do lie upon the table.

Mr. GOLDFOGLE. I only made the suggestion as a matter of parliamentary procedure; that is all, nothing more.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

On motion of Mr. COVINGTON, a motion to reconsider the vote by which the resolution was agreed to was laid on the table.

ORDER OF BUSINESS.

Mr. HENRY of Texas. Mr. Speaker, I submit the following privileged resolution from the Committee on Rules.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 852 (H. Rept. 1549).

Resolved, That immediately upon the adoption of this resolution the House shall be resolved into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 28775, a bill making appropriations for sundry civil expenses of the Government, and that without first reading the bill general debate shall be had thereon for not exceeding one hour, to be confined to the bill, one-half to be controlled by the chairman of the Committee on Appropriations and one-half by the senior minority member thereof.

Mr. HENRY of Texas. Mr. Speaker, the resolution is plain and speaks for itself. It is to the effect that immediately upon its adoption the House shall be resolved into the Committee of the Whole House on the state of the Union for the purpose of taking up the sundry civil bill, described in the rule, and then, without first reading the bill, there shall be had one hour of general debate, confined to the bill. That is all there is to the resolution.

Mr. DALZELL. Mr. Speaker, there is no disposition to discuss this rule on this side of the House, but I desire to yield two minutes to the gentleman from Kentucky [Mr. SHERLEY].

Mr. HENRY of Texas. I will yield the gentleman two minutes.

Mr. MANN. May I ask the gentleman before he does that—I was engaged and did not hear the rule read—what does this rule provide?

Mr. HENRY of Texas. The rule provides to dispense with the first reading of the bill in the Committee of the Whole House on the state of the Union, and then have one hour's general debate.

Mr. MANN. It is rather an unusual procedure for the Committee on Rules to provide for dispensing with the first reading of the bill.

Mr. HENRY of Texas. It is going to be read at length under the five-minute rule. It will be read; it is not unusual; I think this has been done before.

Mr. MANN. I think I never remember it ever having been done except under suspension.

Mr. COOPER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. COOPER. Does this rule contain a provision limiting general debate to the bill?

Mr. HENRY of Texas. Yes; it limits it to the bill.

Mr. COOPER. Mr. Speaker, reserving the right to object, will the gentleman permit me to say a word?

Mr. HENRY of Texas. The gentleman has no right to object under the present parliamentary situation.

Mr. MANN. Let me ask the gentleman, if this rule passes, general debate will be limited to one hour, and, of course, that hour is wholly within the control of the Democratic side of the House?

Mr. HENRY of Texas. Oh, no. One-half to that side and one-half to this side.

Mr. COOPER. Will the gentleman from Texas yield to me one minute?

Mr. HENRY of Texas. I will yield to you a minute later. First I yield to the gentleman from Georgia [Mr. RODDENBERY] two minutes.

Mr. RODDENBERY. I want to inquire of the gentleman if those Members opposed to the bill can have something like 10 minutes on the question of the adoption of the rule?

Mr. HENRY of Texas. I yield to the gentleman 10 minutes.

Mr. RODDENBERY. I will be glad to take it.

The SPEAKER. To which gentleman does the gentleman from Texas [Mr. HENRY] desire to yield first?

Mr. HENRY of Texas. I desire that the gentleman from Georgia shall proceed now.

The SPEAKER. The gentleman from Georgia [Mr. RODDENBERY] is recognized for 10 minutes.

Mr. RODDENBERY. Mr. Speaker, before proceeding would it not meet the pleasure of the gentleman from Texas [Mr. HENRY], on account of the length of the rule, and it not having been available to the Members, to permit it to be read again so that Members may better understand it?

The SPEAKER. Without objection, the rule will be again read, and gentlemen will please refrain from conversation while it is being read.

The rule was again read.

The SPEAKER. The gentleman from Georgia [Mr. RODDENBERY] is recognized.

Mr. RODDENBERY. Mr. Speaker, I appreciate the 10 minutes the gentleman from Texas [Mr. HENRY] so kindly yielded to me to submit any views that I may entertain antagonistic to this rule, but I take this occasion to observe that, so far as I can recall, it is the first rule or the first measure in three years of service which I have seen presented to the House by the mover of it, where time was had for debate, that the mover of the proposition in control of the time has placed a restriction upon the opponents of the resolution requiring the opponents of the rule or bill to submit their objections before its advocates have given their reasons for its adoption.

Here is a bill of 184 pages, and it is proposed to change the standing rule of this House and put the committee to its consideration without the second reading provided by the rules. I have hastily examined Hinds' Precedents containing the rulings of previous Speakers on this question, and there runs throughout them a note without discord, but in perfect harmony, that the second reading, which is the reading in full of the bill, is one of the salutary rules for a deliberative body to enforce and exercise so that orderly and intelligent legislation may be enacted.

I find that prior to the adoption of the rules of the House, and in the Parliament of England, it was the custom to read the bill the first time in full, and in the earlier days of American legislation it was the practice to read the bill to the House in full, and in full before it was submitted to a committee for its consideration. And uniformly, therefore, before the bill was

considered, it was read in full a second time. For reasons that 10 minutes will not permit me to discuss that rule was abrogated. The first reading of the bill was later had by caption, but the decisions of the Speakers uniformly have justified that change in the rules on the ground that the right to have a bill read in full a second time would be preserved inviolate in legislation and in the deliberation of the House. But what is now proposed? This rule is without precedent as to any bill of great length in the history of our deliberations. It provides that we read a 184-page bill by caption only, and when we come to consider it in the Committee of the Whole House on the state of the Union this rule is reported to dispense entirely with its reading and bring it at once to reading for amendment.

Gentlemen may say, "You will read it paragraph by paragraph and amend it." But the fundamental principle involved in the scheme of legislation is that before the measure is taken up for amendment paragraph by paragraph the Members shall have had the entire bill read, so that their amendments may be submitted in the light of the entire legislation.

I presume, because I exercised my right under the rule on yesterday to ask that this bill be read, the gentlemen say it is necessary to do away with the arbitrary exercise and power of one fractious Member. If such be your judgment, exercise your powers in accordance with your sense of public duty; but as for me, sir, I shall not consent to charging the Treasury of the American people with $113,000,000 and violate the rule or suspend the rule and deny to Members a full reading of that legislation. Just this morning, on demand, the immigration bill was read in full, although it had been read in full before.

Here is what is behind that rule—you may see it in the newspapers of this morning: It is the great naval program which is being framed up to rush through in the final hours of this Congress. Those who want to raid the Treasury for the battleships know that if you take up the time for orderly consideration of this legislation we may not be able to legislate for Carnegie, for Morgan, for Cramp & Co., for the New York Steel Construction Co., so that they may further lay tribute on the American people in the building of fake naval armament.

Mr. GARRETT. Mr. Speaker, will the gentleman yield?

Mr. RODDENBERY. If the gentleman from Texas [Mr. HENRY] will give me more time, I shall be glad to yield.

The SPEAKER. Does the gentleman yield?

Mr. RODDENBERY. I can not yield. I wish I could.

I see from the daily papers where yesterday the Newport News Shipbuilding Co., the Dry Dock Co. of New York, the Fore River Shipbuilding Co., the New York Shipbuilding Co., the Cramp & Sons Co., the Midvale Steel Co., the Carnegie Steel Co., and the rest of them are laying a charge on the Federal Government for the construction of a great battleship, and the object of this rule is nothing more nor less than to run recklessly through this House a vast charge on the Public Treasury in order that in a day or two you may come to the naval bill and again put a burden of $150,000,000 more on the backs of the American people. [Applause.] I do not say that that is the object of the movers of this rule nor the object of the Rules Committee, because they act in obedience to what they consider their duty to the chairman of the great Committee on Appropriations, who gave notice yesterday that he would ask for the rule; but——

Mr. GARRETT. Mr. Speaker, will the gentleman yield for a question?

The SPEAKER. Does the gentleman yield?

Mr. RODDENBERY. I must yield to my colleague.

Mr. GARRETT. Did not the gentleman vote to suspend the rules and pass the public-buildings bill the other day, without even a chance of amendment?

Mr. RODDENBERY. I did; and the bill was read, item by item, in full. There is no case on record where that bill in toto has been considered otherwise. No item goes into that bill except upon the personal application and personal hearing of each Member. More than that, it does not appropriate a dollar out of the Public Treasury, and unless the Committee on Appropriations sees fit to bring in an appropriation it never will. And more than that still, the Democratic caucus on two occasions last year directed that committee to defer the bringing in of the bill then, with the universal understanding to bring it in at this session of Congress. Our committee know how to pass legislation; we did not ask for a gag rule. We fetched her in, and we passed her under the regular rules. [Laughter and applause.] But Carnegie is not in that bill; Cramp construction trust is not in this bill; the great New York port is not in here; and therefore there is a trust-bred row raised. [Laughter.] But, gentlemen, the great masses of the people are in the public-buildings bill. [Applause.] The taxpayers are considered and cared for in that bill. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. RODDENBERY. I am against the rule. It is revolutionary. It is undemocratic, and it is unnecessary. [Applause.]

Mr. HENRY of Texas rose.

The SPEAKER. The gentleman from Texas agreed to yield one minute to the gentleman from Wisconsin [Mr. COOPER]. The gentleman from Wisconsin does not seem to be here.

Mr. HENRY of Texas. I will yield 10 minutes to the gentleman from Alabama [Mr. UNDERWOOD]. [Applause.]

The SPEAKER. The gentleman from Alabama is recognized for 10 minutes.

Mr. UNDERWOOD. Mr. Speaker, there is a great distinction between doing business for the American people and attempting to take away the rights of any Member of this House. The time has come, Mr. Speaker, when some gentlemen on this side of the House as well as gentlemen on the other side of the House should realize their responsibility to the American people. [Applause.]

We are charged with the control of this great Government. This bill carries on its pages the necessary appropriations to sustain the courts of the land and to pay the salaries of the men who collect the customs taxes that go to support and carry on this Government. Is there any man in this House that can stand before his constituens and say that he is willing to filibuster against a great supply bill like this and thus destroy the courts——

Mr. RODDENBERY. Mr. Speaker, will the gentleman yield?

Mr. UNDERWOOD. Not right at this moment. Is there any man who can stand before his constituency and say that he is willing by a filibuster to destroy the courts and tear down the machinery by which the Government must be supplied with sufficient revenue? [Applause.]

Mr. RODDENBERY. Mr. Speaker, will the gentleman yield now?

Mr. UNDERWOOD. I can not now.

The SPEAKER. The gentleman from Alabama declines to yield.

Mr. UNDERWOOD. Now, Mr. Speaker, I understand that on yesterday the demand was made that this bill on its second reading should be read in full from the Speaker's desk. Now, if the denial of this right deprived any man in this House of a privilege or a right that he would be entitled to, in order to protect his constituents or to protect his rights in this House, I would be the last man to deny it to him. But this idea of a second reading of a bill in the House is merely a relic of an age that is past and gone. It is true in the early history of the English Parliament and in the early history of this Congress, when it is was not customary to print bills in advance of their presentation to the House, in order that every Member might be protected in his rights and know what the bill contained before it came before this House for final consideration, it was the rule that it should be read from the desk, to put him on notice. But, Mr. Speaker, this bill was read from the desk by its caption when the gentleman from New York [Mr. FITZGERALD] reported it to this House. Every Member of this House was given notice days ago that a sundry civil bill was to come before the House, and every Member of this House, including the gentleman from Georgia [Mr. RODDENBERY], knew that on the next morning he could go to the document room and get this bill in full and know every item in it from the first page to the last page. So that our relic of the past—a second reading of the bill—is manifestly unnecessary, protects no man's rights, interferes with no man's privileges; but the reading of that bill from the desk, demanded under a rule that is no longer necessary, meant the consumption of between four and five hours' time of this House, practically a legislative day, when we are within 11 days of the close of this session, when this calendar is filled with meritorious bills that are entitled to consideration; and to demand the idle reading of a bill, to consume four or five hours of the time of this House is, I think, indefensible at this stage of the proceedings. [Applause.]

Mr. RODDENBERY. Will the gentleman yield?

Mr. UNDERWOOD. I yield.

Mr. RODDENBERY. Are there any items in this bill that are required or authorized to be expended before July 1 of this year?

Mr. UNDERWOOD. I will say to you, sir, that this Congress, not the next Congress of the United States, is responsible for this bill. [Applause.]

Mr. RODDENBERY. I will ask the gentleman does he assert that the Republican Senate ought to shape this bill, or a Democratic Senate empowered to convene in less than two weeks?

Mr. UNDERWOOD. I will say to the gentleman that I think I am as intense a partisan about partisan politics as any man in this House, but when it comes to the great appropriation

bills—the supply bills to take care of our Government and support our Republic—I am not willing to drag them in the mire of partisan politics. [Applause.]

Mr. RODDENBERY. Does not the gentleman know that when this bill, like every other bill, comes back here from the Senate in the dying hours of this Congress, it will have vast pieces and species of imposition on the taxpayers of this country in the form of millions of dollars that he himself will not indorse?

Mr. UNDERWOOD. Well, I do not know whether it will or will not.

Mr. RODDENBERY. Has it not always contained them in the last three years?

Mr. UNDERWOOD. No; I do not say it always has.

Mr. RODDENBERY. I challenge the gentleman to point out a bill that has not—in the Senate amendments.

Mr. FITZGERALD. It did not in the current law.

Mr. UNDERWOOD. It did not in the law that was enacted this last year, and the gentleman himself did not raise any objection to the Senate amendments.

Mr. RODDENBERY. I fought it to a finish, but had mighty little help.

Mr. UNDERWOOD. Not on the last sundry civil appropriation bill.

Now, Mr. Speaker, all I have to say in conclusion is this: I think it would be manifestly foolish for this House to demand a second reading of a bill that is already published and before the Members of the House, when, under this rule, it will be read paragraph by paragraph and will be open to amendment and consideration by any Member of this House. I say, Mr. Speaker, that I think every Member of this House is entitled to have an opportunity fairly to consider these great supply bills, but that no man in this House is entitled to block the legislative wheels with the foolish and unnecessary invoking of a decadent and useless rule, and I hope this House will adopt this special rule and let the public business proceed.

Mr. HENRY of Texas. I yield 10 minutes to the gentleman from Illinois [Mr. MANN].

The SPEAKER. The gentleman from Illinois [Mr. MANN] is recognized for 10 minutes.

Mr. MANN. Mr. Speaker, my distinguished friend from Alabama [Mr. UNDERWOOD] has shed many tears because he says some one demanded the second reading of the sundry civil appropriation bill from the Speaker's desk last night. When some gentleman undertook to correct him as to what the reading of the bill was, he insisted, upon full consideration, that he was correct and that the request was to dispense with the second reading of the bill from the Speaker's table; and yet the Journal, which has been approved by the House, will show that on February 17 the gentleman from New York [Mr. FITZGERALD], chairman of the Committee on Appropriations, by direction of that committee, reported the bill H. R. 28775, making appropriations for sundry civil expenses of the Government, and so forth, which was read a first and second time, referred to the Committee of the Whole House, and so forth.

So even our distinguished friends on the other side of the aisle, so disintegrated that they can not do business, do not even know enough about the rules of procedure to know what reading of a bill is in order.

A second reading of this bill has been had, and the Journal so shows. At least the Journal so showed, and it is not required to be read a second time in the House. What was asked was to dispense with the first reading of the bill in committee. And what is the situation? The Democratic Party is so demoralized that it pleads with its own Members that the rules of the House, which it made under a reform administration of the House, are so antiquated and decadent, as said by the gentleman from Alabama, that they ought not to be enforced at this stage of the proceedings.

Why at this stage of the proceedings? Why was not the sundry civil bill brought before the House before now? They bring it in at the last minute and say, "Gentlemen, please do not ask us to enforce the reform rules we made; excuse us from applying the rules. We have not brought in a bill soon enough to pass it under the rules, and we must pass it by unanimous consent." Why do you not reform your rules, or reform your practice, or, better still, reform both rules and your practice?

Bring your bill before the House at the proper time and then have some leadership on your side of the House. I am delighted to see the gentleman from Alabama back from his arduous duties at hearings and assume the leadership on the Democratic side of the House once more. He has been away, and he will excuse me if I say to him that I never saw such a demoralized lot of followers as he has had in his absence. [Laughter and applause.]

You can not run the House of Representatives on the principles of a town meeting. You thought you could, but you are finding out you can not. You are getting now to the point where you are begging this side of the House to let you violate the rules which you made and which when you made you said, "Here are rules which will enable the people through their chosen Representatives to do business, as compared with the old régime"; and you have reached the point now, which we did not even reach under the Cannon administration, where you have to bring in a rule to dispense with the reading of a bill which we are required to vote upon. [Applause on the Republican side.]

Mr. HENRY of Texas. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, I am sorry that my distinguished friend from Illinois [Mr. MANN] on the other side of the aisle looks at this question as he does. Whether this reading of the bill is called a first reading or a second reading is immaterial; it is a reading of the bill that in nine hundred and ninety-nine cases out of every thousand is dispensed with, and always has been dispensed with in this House since he and I have been Members of it, by unanimous consent. He knows, as well as I do, and the country knows, that the only time when this reading of the bill has ever been demanded in this House has been at times when some one desired to filibuster against a bill and destroy it.

Now, as to the speed of these appropriation bills. I recall that four years ago at this very time, when a new administration was coming in, and the gentleman's party was in power, not only this sundry civil bill but many of the other great supply bills were trembling in the balance as to whether they would become laws or not, not up to the eleventh day before adjournment but up to the very hour of adjournment, and the gentleman's party was in control of the House at the time. [Applause on the Democratic side.]

I am only appealing to this House not to demand unreasonable procedure that we are not accustomed to use. Let us consider these bills in an orderly way, giving everybody a chance to consider them, because, I will say to the gentleman from Illinois, if this side of the House is willing to follow what motions I make, these supply bills to support the Government of the United States will become a law. If we can not support the Government and pass them in an orderly way, by reason of filibustering tactics coming from any source, then I am willing to stand for a rule, no matter how drastic, that will supply the necessary funds to support the Government of the United States. [Applause.]

Mr. MANN. Will the gentleman yield for a question?

Mr. UNDERWOOD. Certainly.

Mr. MANN. Of course the gentleman knows that any filibustering is from that side of the House, and it has been the understanding on this side of the House that various gentlemen on the Democratic side of the House at the inspiration, supposedly, of the President elect, were endeavoring to prevent the passage of the supply bills at this Congress in order that they may be carried through the next Congress. Is the gentleman able to say what the attitude of the President elect is on this question?

Mr. UNDERWOOD. Mr. Speaker, I will say to the gentleman that I am not here by authority or with authority to speak for the next President of the United States, but I will say to the gentleman from Illinois, without having authority to say so, that I am firmly convinced that any such statement as to the attitude of the next President of the United States with reference to these supply bills is absolutely erroneous. [Applause on the Democratic side.]

Mr. MANN. Mr. Speaker, I hope that is true, and that the gentleman will convince his side of the House that it is true.

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. HENRY of Texas. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has 25 minutes.

Mr. HENRY of Texas. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, the gentleman from Illinois [Mr. MANN] is very ingenious, but he knows, as every other Member of the House who is familiar with the rules and the method of making up the Journal knows, that the only time reference in the Journal will be made to the second reading of a bill is when it is referred to the Committee of the

Whole House on the state of the Union, before the actual reading, and not after it has been read the second time.

Mr. MANN. Does the gentleman know of any other second reading of this bill in the House?

Mr. FITZGERALD. The only time the bill will be referred to in the Journal as having been read a second time is when it is referred to the Committee of the Whole House on the state of the Union, and, whether it be read in full before amendment or not, the Journal will not note the fact that it has or has not been read a second time after the bill is reported to the House.

Mr. MANN. Does the gentleman know of any other second reading of the bill in the House except of the second reading to which the Journal refers?

Mr. FITZGERALD. There is in effect a second reading. It is the reading of the bill under the five-minute rule.

Mr. MANN. But that is in Committee of the Whole House.

Mr. FITZGERALD. It is in effect a reading.

Mr. Speaker, the gentleman from Georgia [Mr. RODDENBERY] has been present when 10 of the appropriation bills have been considered in the House at this session, and he has not objected to dispensing with the second reading of any of those bills. His only purpose in this instance is to delay unnecessarily the business of the House. It comes with poor grace from the gentleman from Georgia [Mr. RODDENBERY] to criticize the committee in charge of this bill for requesting that this reading be omitted. He is a member of the Committee on Public Buildings and Grounds. That committee on Saturday last reported a bill making authorizations for public buildings to cost $25,000,000. The bill was not available until Monday morning, and the gentleman, as a member of the Committee on Public Buildings and Grounds, voted for a motion directing the chairman of that committee to make, on behalf of that committee, a motion to suspend the rules and pass the bill through the House, without opportunity for amendment, without a second reading, and without opportunity for more than 40 minutes' time in which to discuss the items in the bill.

Mr. RODDENBERY. Mr. Speaker, will the gentleman yield?

Mr. FITZGERALD. No; I have only five minutes. The gentleman is mistaken about the practice of his own committee. The gentleman stated that the committee did not put items in the public buildings bill unless requested so to do by the Member in whose district the building was to be located and upon a personal appearance and appeal for such an item. Yet the committee put an item in the bill affecting a building in my district without my appearance, without my request, and they took it out when I protested against the item.

Mr. RODDENBERY. Mr. Speaker, the gentleman is mistaken. The facts are not in accordance with his statement.

Mr. FITZGERALD. The gentleman is not mistaken. The gentleman bases the statement upon a conversation with the chairman of the Committee on Public Buildings and Grounds, and he said, after a statement which I made about it, that he would ask the committee to take the item out.

Mr. RODDENBERY. The gentleman is entirely mistaken.

Mr. FITZGERALD. Mr. Speaker, I decline to yield.

The SPEAKER. The gentleman from Georgia must not interrupt the gentleman from New York without his permission.

Mr. FITZGERALD. Mr. Speaker, perhaps something will account for the desire of the gentleman from Georgia not to have discussion, not to have debate, not to have opportunity for amendment on the public building bill. He states that Members had to ask for items in that bill. He is a member of that committee. He has two items in the bill.

There was an item for a site and public building at Moultrie, Ga., with a limit of cost of $65,000. In 1900 the postal receipts at Moultrie were $3,090.08. The population was 2,221. The amount expended for accommodations necessary for the public service, including light and heat, was $96 a year. In 1912 the population had increased from 2,221 to 3,349 and the postal receipts had increased to $13,892.37. The cost to the Government for the accommodations necessary, including the heat and light, was $360 a year.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. HENRY of Texas. Mr. Speaker, I yield five minutes more to the gentleman.

Mr. RODDENBERY. Mr. Speaker, will the gentleman yield?

Mr. FITZGERALD. In a minute. The interest at 3 per cent on $65,000 fixes a permanent charge on the Government of $1,950 a year, without taking into consideration the cost of service, heating and lighting the building.

At Dawson, Ga., also in the gentleman's district, is an item for a site and building to cost $60,000. In 1900 the postal receipts were $4,027.08; cost to the Government for accommodations was $270 annually; population, 2,926. In 1912 the receipts were $10,978.83; cost to the Government for necessary accommodations now, $400 a year; population, 3,827. The permanent charge upon the revenues, exclusive of maintenance and service, as a result of this investment will be $1,800 a year. I am not surprised, Mr. Speaker, that the gentleman serving on a committee reporting bills with such items, in which the members of the committee are vitally interested, insist that a bill carrying authorizations for public buildings aggregating $25,000,000 shall be considered and passed without opportunity for discussion or scrutiny of those items. The gentleman says that the bill did not appropriate any money. No; but this bill, the sundry civil bill, carries $14,000,000 to pay for the construction of buildings authorized in just as indefensible bills in the past, and in three or four or five years from now some other chairman of the Committee on Appropriations will be carrying appropriations in the sundry civil bill to construct buildings in these insignificant communities which when completed will make the people of the community ashamed of the town in which they live because the character of the public building will overshadow everything within 100 miles of the building.

Mr. Speaker, I believe it is necessary for this House to transact its business. I believe the gentleman from Alabama [Mr. UNDERWOOD] is correct when he asked the House to adopt this rule. The gentleman from Illinois [Mr. MANN] referred to the fact that this bill is not brought in at the proper time. Two years ago the sundry civil bill was brought in on the 23d day of February, one week later than this one was reported, and the attempt was made to pass the bill under suspension of the rules.

Mr. MANN. But the naval bill was not hung up as high as the columns of the roof.

Mr. RODDENBERY. Will the gentleman yield?

Mr. FITZGERALD. Not now. Whatever may have been the status of the naval bill the sundry civil bill was not ready to report; this one is. I now yield to the gentleman from Georgia.

Mr. RODDENBERY. Mr. Speaker, will the gentleman furnish me with a number of the copies of the statement he has made touching the buildings I have secured for my district, so I can circulate them in my district to show what a capable legislator I am?

Mr. FITZGERALD. Mr. Speaker, I decline to yield further. If the gentleman is so anxious to circulate that information in his district, let him purchase the requisite number of copies of the CONGRESSIONAL RECORD and do it at his own expense. [Applause.] He should not ask me to pay for the distribution as well as the cost of printing them. That is economizing too far to suit me. I hope the gentleman himself will not repeat the suggestion——

Mr. MANN. Agreeing, as we all do, upon the stress of conditions, would it not be well for the House to-day to remain in continuous session until pretty late to-night, so as to carry on the work of this House if there is any filibuster offered?

Mr. FITZGERALD. I hope the House will stay here until early to-morrow morning if the attempt is made to filibuster against this bill. I am prepared to do it, and if 100 Members will stay in the committee I am willing to keep the House in continuous session to transact the public business and to demonstrate to gentlemen that they can not prevent the House of Representatives doing the business required to be done under the Constitution.

The SPEAKER. The time of the gentleman has expired.

Mr. HENRY of Texas. Mr. Speaker, I yield 10 minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I am a Member of this House until the 4th of March next, a member of the minority with a great majority on the other side. It is usual to make the appropriations at the short session of Congress. I do not recollect of their having failed but once during my service, and that was way back, I believe, in 1878. Now, I am not responsible, and this side of the House is not responsible, directly for this bill, and yet after all is said and done we are Representatives, and as one member of the minority I feel that it is my duty to assist as best I can in the passage of these supply bills. Ah, say gentlemen occasionally on this side to gentlemen on that, wait until the saints come in. Well, the saints when they come in will have their hands full enough to keep the country hung up for week after week and month after month to enact the revenue legislation.

You may say, "What have we as partisan Republicans to gain by that?" The question is larger than that. I would, if in my power, pursue that policy which would enable your side of the House to work your will touching the revenues, and I have no desire to contribute directly or indirectly to a very long session of the first session of the Sixty-third Congress.

Now, gentlemen upon that side have given notice of an intention to filibuster. I do not believe there will be any assist-

ance from this side, but I want to say to the gentleman from New York [Mr. FITZGERALD], in charge of the bill, and the gentleman, the leader of the majority [Mr. UNDERWOOD], that the sundry civil bill has, as I roughly estimate, 2,000 items in it, each one of which is subject to amendment under the five-minute rule, and an amendment to the amendment, and subject, at least, to five minutes debate on each paragraph for and against, as well as a vote. And unless you are very severe as to amendments, and amendments to amendments, or substitutes for amendments, if two men or three men on that side desire to filibuster, under the rules of this House it will take from now to the 4th of March to pass this bill.

I trust that they will not filibuster. I would like to see this bill considered in an orderly way. As far as it goes, in my judgment, after examination, it is a good bill, and I am going to help pass it as best I can. But it is said you are going to run up against the buzz saw of one man or two men, or a half dozen men on the majority side in the endeavor to prevent your passing this bill under the rules of this House. Now this effort, if it shall be made, will defeat the bill unless you shall from time to time make such special rules by a majority of the House as you have the wisdom and courage to make.

I yield back the balance of my time.

ENROLLED BILL SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 18787. An act relating to the limitation of the hours of daily service of laborers and mechanics employed upon a public work of the United States and of the District of Columbia and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 1589. An act to authorize the exchange of conveyances between the Florida East Coast Railway Co. and the United States;

S. 8090. An act permitting the building of a railroad bridge across the Missouri River from a point on the east bank in section 14, Mountrail County, N. Dak., to a point on the west bank of said river in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west, of the fifth principal meridian; and

S. 8089. An act permitting the building of a railroad bridge across the Yellowstone River from a point on the east bank in section 15 to a point on the west bank in section 16, township 151 north, of range 104 west, of the fifth principal meridian, in McKenzie County, N. Dak.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 19191. An act for the relief of Christian Hedges;

H. R. 22939. An act for the relief of John K. Wren; and

H. R. 16127. An act for the relief of William Kaiser.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. MCKINNEY, indefinitely, on account of illness.

To Mr. MORGAN of Oklahoma, for seven days, on account of important business.

ORDER OF BUSINESS.

Mr. HENRY of Texas. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. RODDENBERY. Division, Mr. Speaker.

The House divided; and there were—ayes 156, noes 3.

Mr. RODDENBERY. Mr. Speaker, I make a point of order that there is no quorum present.

The SPEAKER. The Chair will count. [After counting.] Two hundred and one Members are present—a quorum. [Applause.]

So the resolution was agreed to.

The SPEAKER. Under the rules, the House automatically resolves itself into the Committee of the Whole House on the state of the Union.

SUNDRY CIVIL APPROPRIATION BILL.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, with Mr. HAY in the chair.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] is recognized.

Mr. FITZGERALD. Mr. Chairman, this is the bill making appropriations for the sundry civil expenses of the Government. The estimates upon which the bill is framed aggregate $128,357,629.43, as they appear in the regular Book of Estimates. In addition, in various House documents supplementary estimates have been submitted aggregating $10,433,005.55, making a total of estimates considered by the committee of $138,790,634.98. The bill as reported recommends appropriations aggregating $113,271,614.66, which sum is a reduction of $25,519,020.32 under the estimates submitted by the departments. The reduction, as recommended by the committee, is $4,855,368.30 less than the bill for the current year.

To appreciate, Mr. Chairman, what had to be done in order to reduce this bill under the appropriations for the current year, it is necessary to recall that at the last session of Congress the estimates found in the regular Book of Estimates for consideration in the sundry civil appropriation bill aggregated $142,006,303.25, and certain supplementary estimates were transmitted in various House documents recommending additional sums aggregating $9,984,803.62, the total of estimates submitted to Congress at its last session for consideration in the sundry civil bill being $151,991,106.87.

The bill as reported to the House recommended $109,577,414.40, which was a reduction of $42,413,692.47 under the estimates submitted by the departments, and a reduction of $33,060,629.74 under the appropriations for the fiscal year ending June 30, 1912, so that this bill recommends appropriations of approximately $28,000,000 less than the sundry civil bill carried for the fiscal year 1912.

This has been done without the elimination of any items essential for the proper conduct of the public service, and it has also enabled the committee to include in this bill many items imperatively required to improve the public service, the enactment of which will very greatly tend to increase the efficiency of the various services and to promote their economical conduct.

This bill covers so wide a range of subjects wholly unrelated and disconnected that it is not possible to make a review of the various items of the bill, in the time at the disposal of the committee, so as to exhibit such a picture as would be of very great service to the Members in the consideration of the bill. The report of the committee, however, sets forth certain suggestions that have been made in the nature of limitations or legislation, and gives in tabular form the appropriations for the current year, the estimates submitted by the departments, the amounts recommended in this bill, and the pages of the bill upon which the various matters are found, so that Members by turning to the report can inform themselves fully in regard to any matters in the bill about which they may be interested.

Mr. SAMUEL W. SMITH. Mr. Chairman, will the gentleman submit to a question?

The CHAIRMAN. Does the gentleman yield?

Mr. FITZGERALD. I yield.

Mr. SAMUEL W. SMITH. How much money has been expended by the various investigating committees thus far during this Congress?

Mr. FITZGERALD. Mr. Chairman, the appropriations for the contingent fund of the House are carried in the legislative appropriation act, and the amounts expended by the various committees of the House come under the scrutiny of the Committee on Accounts. I have not had my attention called to the figures showing the totals expended for these purposes, nor have I recently made any inquiry regarding them, and I have not the information at hand which the gentleman seeks.

Mr. BARTLETT. I want to state, Mr. Chairman, that that information was given when we passed the legislative bill.

Mr. SAMUEL W. SMITH. Can the gentleman tell in round numbers what the total is?

Mr. BARTLETT. I am not on that committee and I can not recall the figures, and I do not suppose the gentleman, if he were present, would recall them.

Mr. SAMUEL W. SMITH. From the way the gentleman spoke I thought he had the figures.

Mr. BARTLETT. It was all gone into in detail heretofore, when the same question was asked and answered.

Mr. FITZGERALD. The only substantial increase of salary carried in this bill is one for the assistants to the plate printers in the Bureau of Engraving and Printing. In the Bureau of Engraving and Printing there are approximately 900 young women employed as assistants to the plate printers and en-

gravers. They are now receiving $1.50 a day. Their work is very onerous, the conditions under which they labor are very severe, and the testimony before the committee is to the effect that the young women engaged in this work, or great numbers of them, break down physically after three or four years of service in it. The committee has included in this bill a sufficient sum to enable their compensation to be raised 25 cents a day—from $1.50 to $1.75, or about $75 a year each.

This matter, Mr. Chairman, has been called to the attention of Congress on several occasions. From my experience and observation and knowledge of the Government service I am convinced that it is the most meritorious request for increase of compensation that has been submitted to Congress during my service in this House. These young women have no votes. They have no political influence. They are engaged in an arduous, difficult, and severe service for the Government, and the committee was unanimously of the opinion that whatever else might be done in this bill this particular increase was not only justified, but imperatively required by the conditions under which they serve.

One other important item in the bill I desire to call to the attention of the committee. The committee recommends the construction of a central power, heating, and lighting plant, to serve 20 Government buildings in the District of Columbia.

Its cost is limited to $1,494,000, and its operation will mean an annual saving to the Government for light, heat, and power of $173,000. A committee of engineers connected with various services under the control of the Treasury Department have been working upon the project for two years. They have gone into the matter very exhaustively, and when they presented the case to the Committee on Appropriations the committee invited the representatives of the local lighting company to appear with their engineers and to question, dispute, or challenge any of the assertions made by the engineers in the service of the Government. After an exhaustive hearing, based upon the information obtained at that time, and with the knowledge of what has been accomplished by the erection of the Capitol heating and lighting plant which is now under the control of the House commission in charge of the House Office Building, and which supplies light and heat to the Capitol, to the Senate and House Office Buildings, and to the Library of Congress, the committee were unanimously of the opinion that this was one of the most desirable projects that could be recommended at this time. Provision is made for a cross connection between the present Capitol plant and this new central heating and lighting plant, so that in the event of breakdown of one the other can act as a reserve. No private industry owning 20 great buildings scattered within an area susceptible of being served by a single heating, lighting, and power plant would consider purchasing its heat, light, and power from a private company. Not only as a matter of administration, but as a matter of economy such a private enterprise would have a plant of its own. In view of all the circumstances it seemed to the committee that a wise, economical, and proper administration of the public service demanded that this plant be authorized at this time.

Not only will it provide for the buildings now erected, but it will have sufficient capacity to heat and light the three buildings proposed for the Departments of State, Justice, and Commerce and Labor under the legislation enacted a few years since, and will also have sufficient capacity to provide for the proposed building for the Geological Survey, which is authorized in the public building bill that passed the House Monday.

Mr. STEPHENS of Texas. I desire to ask the gentleman if any steps have been taken to produce power and light from the Great Falls of the Potomac above this city? If that is true, would it not be better to use that power than to erect a great central plant, as is proposed by this bill? My understanding is that some appropriations have been made and some steps taken toward developing this water power.

Mr. FITZGERALD. An appropriation has been made to investigate the feasibility of utilizing the power at the Great Falls for the purpose of furnishing light, heat, and power to the city of Washington; but regardless of what the report of the engineers may be as to the amount of power that can be developed at that point, many difficult questions will arise if the Federal Government attempts to acquire the sites and the control of the power for the purpose of supplying the Government itself and the municipality in that way. And even if such a project can be carried out and power generated in that way, the testimony of those with whom I have conferred on the matter during several years is to the effect that it would be essential to have a plant with sufficient capacity to meet whatever demands might be made upon it in a period of drought and low water or of accident or breakdown at the plant at the Great Falls. So that even if the report of the engineers who are investigating this matter be to the effect that it is desirable to develop the power at the Great Falls, the information I have is to the effect that either the Government or some private enterprise must necessarily provide a plant of about the capacity of this one.

Mr. RODDENBERY. Mr. Chairman, would the gentleman like to have a quorum present?

Mr. FITZGERALD. I think there is a quorum present.

Mr. RODDENBERY. I will not make the point.

Mr. FITZGERALD. And I much prefer a quorum that is attentive than a larger number who might not be interested in what is said about the bill.

The matter of this plant, Mr. Chairman, was looked into at the last session of Congress by the committee, and the committee made no recommendation at that time, because it desired an opportunity to make the fullest and most complete investigation possible; and it seemed to the committee, after a consideration of all the circumstances, in view of our experience with the plant erected and now under the control of the Congress, that it was highly desirable to establish this plant, which will result in an annual saving of about $173,000.

Mr. Chairman, during the consideration of the bill it is hoped that it may be possible to give such explanation of the various items as Members may desire, and to have the bill considered in that way which will justify the recommendations made by Congress.

The gentleman from Georgia [Mr. RODDENBERY] during the discussion of the rule, called attention to what at times has been the practice of another body in the treatment of these bills.

I desire to insert in the RECORD a statement of what transpired in the last Congress, in so far as the sundry civil appropriation bill was affected, and trace its course from the day it was reported until final enactment.

The bill was reported to the House carrying $119,577,414.40. When it passed the House it carried $109,567,974.40, or a reduction of $10,000,000 under the amount recommended by the committee. The bill, as reported to the Senate, carried $115,021,989.70, an increase of less than $6,000,000. It passed the Senate carrying $116,322,730.20, an increase over the amount of the bill as passed by the House of about $6,800,000.

In view of the fact that the bill had passed the House $42,000,000 less than the estimates submitted to Congress, it can be seen that in a bill carrying $109,000,000 an increase of $7,000,000 was not a very large sum. Indeed, if that ratio had been followed in the increase made to the Indian appropriation bill, the task of the gentleman from Texas [Mr. STEPHENS] would have been much lighter. My recollection is that the Indian appropriation bill passed the House carrying about $7,000,000 and it passed the Senate carrying $14,000,000. So the Senate added to the Indian appropriation bill, which passed the House carrying $7,000,000, more than it added to the sundry civil bill, which carried $109,000,000 when it left the House, although it was $42,000,000 less than the estimates.

As finally enacted into law the bill carried $112,039,184.40, an increase over the bill as it passed the House of about $2,500,000. So that I feel justified in saying that considering the Senate is a coordinate body with the House in the legislative department of the Government, that while I differed with the representatives of the Senate as to some of the items in the adjustment of conditions upon these bills, it could hardly be said that to the sundry civil bill such an amount had been added as could not be justified from any standpoint.

The committee has inserted one other important provision in the bill. It is a provision requiring the head of each department or bureau prior to the beginning of each fiscal year to designate some official through whom all estimates or appropriations will pass, and the duty is imposed upon him of arranging and classifying the estimates, striking out useless and unnecessary verbiage, and couching them in the form usual in appropriating money for specified purposes. These persons are charged with the responsibility of carrying out the various acts of Congress enacted regarding the submission of estimates.

The object is to make as uniform as possible the submission of estimates and to standardize as far as possible the language in which the appropriations are couched, and to save the Congress the unnecessary and tremendous toil that is essential to rewriting the simplest item submitted, which, if some one in the departments were charged with that duty, would be done before they come here. It is a very desirable and important provision, and the committee hope that it will be carried into law.

Mr. Chairman, how much time have I used?

The CHAIRMAN. The gentleman has used 24 minutes.

Mr. RAKER. Will the gentleman yield right there?

Mr. FITZGERALD. I will yield to the gentleman from California.

Mr. RAKER. Outside of those matters mentioned by the gentleman, is there much new legislation in this bill?

Mr. FITZGERALD. The report sets forth in italics from page 5 to page 10 every item in this bill that is a change of existing law or new legislation. So Members can take the report and see for themselves exactly what is proposed.

Mr. LONGWORTH. Will the gentleman yield?

Mr. FITZGERALD. Certainly.

Mr. LONGWORTH. This bill carries the sum which may be expended in the discretion of the Secretary of the Treasury for the repairs of various Federal buildings?

Mr. FITZGERALD. It does; $650,000.

Mr. LONGWORTH. Is that a larger sum than was carried in the last bill?

Mr. FITZGERALD. It is an increase of $25,000. That is due to the fact that every year there is an increase in the number of buildings going into commission, and as they are authorized and go into commission there is a permanent charge on the Government for their maintenance and upkeep, and it is necessarily increased. Under no system can the appropriation be reduced unless we abandon the buildings.

Mr. LONGWORTH. This is expended entirely in the discretion of the Secretary of the Treasury?

Mr. FITZGERALD. Yes; the Treasury Department determines the places where it shall be expended.

Mr. NORRIS. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. NORRIS. Mr. Chairman, I notice in this bill a large number of appropriations for public buildings in different parts of the country. Some of the appropriations are for the completion of public buildings within the authorization heretofore authorized by law, and others are for the continuation of work. There are some public buildings where the limit of cost was increased by the recent bill that passed the House, and which I presume will pass the Senate also.

Mr. FITZGERALD. I hope not.

Mr. NORRIS. That may be, but the gentleman will probably be disappointed.

Mr. FITZGERALD. I am not so sure about that, from the latest information.

Mr. NORRIS. I would like to ask the gentleman if he will have any objection to the proper change being made as we reach the different items, so that it will not say for the completion of a building when in fact an authorization has already been passed that would increase the authorization in that particular case?

Mr. FITZGERALD. If that bill becomes a law, wherever the authorization has been increased, this language, "to complete," would not affect it at all.

Mr. NORRIS. While the other bill is nothing but an authorization, it does not follow that Congress must appropriate all of the money that is authorized.

Mr. FITZGERALD. That is true.

Mr. NORRIS. If we appropriated a certain amount which should be for the completion of a certain building, the department would have no authority to go beyond that appropriation, even though there had been another authorization just prior to that.

Mr. FITZGERALD. It is completely within the authorization now made, and besides the gentleman from Nebraska would hardly expect me to conduct this bill upon the assumption that that public-building bill is likely to become a law.

Mr. NORRIS. I certainly do; and I think the gentleman's intelligence is such that he will be offended if any man for a moment intimated that the public-building bill, at least, would not pass the Senate; but be that as it may——

Mr. FITZGERALD. This thing has happened in the past time and again, and there has never been any difficulty.

Mr. NORRIS. There are a number of cases where even the gentleman would concede, or the principal officials in the department would concede, that a prior authorization was insufficient, and they were unable to get bids.

The CHAIRMAN. The time of the gentleman from New York has expired. The gentleman from Illinois [Mr. CANNON] is recognized for 30 minutes.

Mr. CANNON. Mr. Chairman, this bill is, in my judgment, as far as it goes, a proper bill. I want to say that I have never known a bill prepared with greater care, under the leadership of the gentleman from New York [Mr. FITZGERALD], with the able assistance on the majority side of the subcommittee of the Representative from North Carolina, Mr. PAGE, and the Representative from Kentucky, Mr. SHERLEY. I will be perfectly willing, speaking as to the whole bill, that it should be enacted into law. I think it is subject to criticism, not, however, for what it contains, but for something that it does not contain. I shall not seek to point out those things now nor do I know that I shall seek to bring them before the Committee of the Whole House on the state of the Union, because if matters are omitted when it goes to the Senate, perchance, if the Senate should have the same view that I have, the House later on will have an opportunity to consider amendments that the Senate may make.

The House is jealous and always has been touching the origin of appropriation bills as well as revenue bills. I hope it will continue to be so. Yet with the power of amendment in the Senate, which is plenary and has been in substantially all the past, it is well with that in view for the House to send the Senate a substantially good appropriation bill. Otherwise the Senate is liable to amend, and we are liable to be deprived practically near the close of the session of consideration of Senate amendments to the extent that we would consider them if they were reported in the House bill and passed by the House in the first instance. This power of amendment on the part of the Senate, especially as to revenue bills, has been exercised in the main so that the Senate may be said to originate revenue bills, from one standpoint, as well as the House. They can not originate in the Senate in the first instance, but the practice has grown up by which they strike out all after the enacting clause and put a bill of their own in in the shape of an amendment. I see before me the gentleman from Nebraska [Mr. NORRIS] and the gentleman from Kentucky [Mr. JAMES], who will soon enter the other Chamber. I hope they will be as competent there as they have been on this side, and I would be very glad, as I pass out of public life, to have them work a reform in the Senate. [Laughter.]

Now, I do not want to talk much about this bill. It does show an apparent reduction of nearly $5,000,000 from the bill of last year, and yet it is apparent and not real in fact, for the reason that the Panama Canal, including its fortifications, in this bill carries a reduction of ten and a half million dollars, in round numbers, from the appropriations of last year. And that is easily explained. The canal approaches completion, and it was not necessary to appropriate more than that carried by the bill. Now, if you exclude the reduction in the appropriations for the Panama Canal for the coming year over the appropriations for the current year, then the bill would show an increase, in round numbers, of five million seven hundred and ninety-six thousand and odd dollars. So that in fact this bill, excluding the Panama Canal, does show an increase over the current sundry civil law of almost $6,000,000.

Now, that is about all I want to say. It is very proper it should show no larger increase. I think it might be well increased to the extent of from three to five million dollars, and I should not be surprised if, after we get the Senate amendments and the House considers the amendments, and when it is finally enacted into law, it will not be increased over what this bill carries by from three to five million dollars.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. CANNON. I will.

Mr. STEPHENS of Texas. I desire to call the gentleman's attention to the fact that they have repealed a provision in the Indian appropriation act of last year in this language:

> The appropriation of $17,500, made in the Indian appropriation act for the fiscal year 1913, for construction of a sanitary sewer system in Platt National Park, Okla., to be expended under the direction of the Secretary of the Interior, is repealed.

Now, from the gentleman's long experience in this House at the head of this important committee, and also as Speaker of the House, Does he know of any instance where an act was repealed in this way?

Mr. CANNON. Oh, yes; in many instances; in several instances.

Mr. STEPHENS of Texas. It is certainly new legislation, is it not?

Mr. CANNON. Oh, whether it would be in order under the Holman rule, for which I am not responsible, I will not say. It probably would, because it would be legislation that reduces expenditures, but that will come up when the item is reached. As to the propriety of that repeal I will let the gentleman in charge of the bill and the gentleman from North Carolina [Mr. PAGE] or Mr. SHERLEY speak of that when it is reached. That is an appropriation, however, I will say in passing, that was made upon the Indian appropriation bill touching an item over which that committee had no jurisdiction and that comes from the sin of dividing these supply bills among several committees instead of having them in one committee to prepare the bills. There are six or seven of those appropriating committees, and each committee, in the rush of passing bills, looks after its real or supposed jurisdiction and frequently gets jurisdiction that

does not belong to it. In other words, and I will drop it there, under the rules dividing these bills, we are at sea, leading to great extravagance in my judgment and to much of improper appropriations. Some time or other the rules will be amended from necessity. Gentlemen, you have seen a hen with one chicken, and she makes more fuss about that poor little chicken than a hen which has 17 chickens as she struts and clucks and leads her brood after her. [Laughter.] Yet I did not intend to refer to that matter. Now, I want to say again what I said touching the adoption of the rule. In my service upon this Appropriations Committee this short session I have said to the majority of the committee, you come into full power on the 4th of March next, you will have the President as well as the House and the Senate—you now have the House, and the Senate as it is organized now when you bid for it—so that you are responsible there as you are responsible here, and now that you are to have the President after the 4th of March I wish you God's speed, and I desire merely that you prosper and that the country will prosper.

As I said once before, I can hardly say I hope, because hope when defined is desire crossed on expectation, but you have had a free hand, so far as I am concerned, in making this bill. You are responsible. It is your Executive, soon to be, and if you do not provide for the public service it is your fault, and if you are extravagant in providing for it, it is your fault, and I shall adhere, so far as I am concerned as a member of this committee and of such conference committees as I may serve upon, to that policy. I believe in majority rule, and I measure my words when I say so; majority rule and majority responsibility, and in all perfectly good faith, without criticizing any Member of either side of the House, to use an expression on the Wabash, "You have got to hump yourself" if you pass these bills. I say again, as I said a little bit ago, it is in the power of any one man under the present rules of the House, or under the general rules of the House as they formerly existed, to take up the time from now until the 4th of March in the House in Committee of the Whole House on the state of the Union in the consideration of this bill.

You may say, "What are we going to do? Is there somebody on either side of the House who is going to pursue that policy?" Well, I do not know. If somebody desires to consume the time, you will have to adopt a rule here to pass this bill, saying nothing about the deficiency bill and the naval bill.

I am a believer, I say again, in the majority ruling. I do not believe that 1 man representing 1 district, or 10 men representing 10 districts, or a large minority of this House representing their respective districts, have the right to block the will of the majority. You may say, "Is not the majority wicked from time to time?" Well, the minority always thinks so, or professes to think so, but, after all, there comes the responsibility every two years—and sometimes majorities become minorities. That is the condition now, so far as the Republican Party is concerned. And while some of you gentlemen, now in the majority, think you will be old men, and, if you continue long in the service, you will be buried in the end at the public expense while in the majority, though I am not a prophet, or the son of a prophet, I guess that, perhaps, something will happen so that you may become a minority.

I will not take further time. I believe there is no member of the committee on this side who desires to talk about this bill and, so far as I am concerned, I am willing to yield the balance of my time.

Mr. PAGE. Does the gentleman yield the balance of his time?

Mr. MONDELL. Will the gentleman yield to me?

Mr. CANNON. Mr. Chairman, how much time have I left?

The CHAIRMAN. The gentleman has 13 minutes remaining.

Mr. CANNON. Does the gentleman from Wyoming [Mr. MONDELL] desire some time on the bill?

Mr. MONDELL. I did desire some time, and under the arrangement, which it was proposed to make, I was to have 15 minutes. I do not care now to take the time from other gentlemen who are anxious to speak, but I would like to have a few minutes.

Mr. CANNON. As I understood the gentleman, he wanted some time in connection with an item in the bill.

Mr. MONDELL. I wanted to talk on an item in the bill.

Mr. CANNON. How much time does the gentleman from North Carolina [Mr. PAGE] want?

Mr. PAGE. I wanted no time myself, but the chairman of the committee promised the gentleman from Mississippi [Mr. SISSON] 10 minutes, if he could give it.

Mr. CANNON. How much time has the gentleman from New York [Mr. FITZGERALD]?

Mr. PAGE. His time is exhausted.

Mr. SISSON. I have no desire to take the time from the other side. I am willing the gentleman from Wyoming should consume all the time, if he desires.

Mr. CANNON. Then, I yield all my time to the gentleman from Wyoming [Mr. MONDELL], and he can make such arrangement as he wishes with the gentleman from Mississippi [Mr. SISSON].

Mr. SISSON. I do not desire to ask the gentleman to yield time that belongs to his side.

The CHAIRMAN. The gentleman from Wyoming [Mr. MONDELL] is recognized.

Mr. MONDELL. Mr. Chairman, this bill carries appropriations amounting to something over $113,000,000. As the gentleman from Illinois [Mr. CANNON] has just stated, this is a seeming reduction below the appropriations for the current fiscal year of nearly $5,000,000, but, by reason of the fact that the appropriations for construction at Panama are reduced by upward of $10,000,000, the fact is the bill carries appropriations, exclusive of Panama construction, of nearly $6,000,000 in excess of the current law. I think the bill was very carefully considered by the subcommittee. I am frank to say that, as a member of the committee, I did not have time enough to thoroughly digest all its items, but, from what I know of the bill, I think it has been carefully prepared and that in the main its items are fair.

The faults of the bill, so far as it has faults, are mainly, as the gentleman from Illinois [Mr. CANNON] suggested, by reason of the fact that some of the items are too small or that entirely meritorious items have been left out. However, the committee has, under the circumstances and with an earnest desire to keep appropriations as low as possible, brought in, I think, a very excellent bill.

I want to call attention, however, to one item in the bill of nearly $5,000,000 I think wholly unnecessary, and I want every Member of the House who is not satisfied because some item that he is interested in has been left out, or because some item in which he is interested has been cut down, as well as all who believe in reasonable economy in public expenditures, and, beyond that, all those who are not favorable to wasteful and useless expenditures for war, to give some thought to this item.

We appropriate in this bill almost $5,000,000 for the fortification of the Panama Canal. This follows an appropriation of $3,000,000 heretofore made for the same purpose. No man knows, no estimate has been made or can be made which will give us any reasonably accurate information as to the ultimate cost of the proposed fortifications at Panama.

There is an estimate of $15,000,000, which was scaled down from another estimate of $25,000,000, which estimate of $25,000,000 did not, in my opinion, cover half of the ultimate cost of fortifications, and the items the bill carries are in a way related to that estimate of $15,000,000. But there is nothing in the bill, there is nothing in any law on the statute books, that in anywise controls or limits the ultimate or final expenditure for fortifications at Panama. In my opinion it will cost at least $50,000,000 to carry out the plan now in contemplation. Col. Goethals recently stated to the Committee on Naval Affairs and also to this committee that in his opinion it will require 25,000 men of all arms to protect the canal against an expeditionary force; 8,000 men to protect the canal against an ordinary landing force from a hostile fleet.

He further stated that in his opinion 25,000 men, which we must have there to meet an expeditionary force unloaded from transports, could not permanently hold the canal without reenforcements. He stated that in his opinion it might be possible for 25,000 men to hold the canal as long as the Russians held Port Arthur, which was nearly eight months. However that may be, in view of the fact that no such expeditionary force could be landed until the enemy had control of the sea, it would not be very material whether we could hold it for eight weeks or eight months, in view of the fact that at the end of that time the canal would fall.

Now, I mention all of this to illustrate how—in the calm judgment of the men who are advising us to pour out the people's money like water for the fortification of the canal and the upkeep of military establishment there—in the final analysis, against an enemy holding the sea, a power of the first magnitude, we can not hold the canal, no matter how much we may expend in fortifications.

If we place upon the canal 25,000 men, it is going to cost us $30,000,000 annually to maintain them. Think of it! Think of it, you who represent peace-loving, economy-demanding constituencies! This bill carries an item of $5,000,000, which has rendered impossible the granting of many appropriations that you desire, and it is only the beginning of an expenditure of

$50,000,000, necessitating an annual outlay of at least $30,000,000 for the military establishment to follow. My estimate is not high. It costs a thousand dollars a man to keep a soldier in the continental boundaries of the United States. It costs at least a third more than that to keep a man in the Tropics. But I am only adding 20 per cent to the cost of maintaining men here when I say that the force that Col. Goethals says must be held at Panama will cost us $30,000,000 every year. That means that you must face the certainty of an increase in the military bill of $30,000,000. In all the years during which we discussed the prospect of piercing the Isthmus, during all the years of survey preparation up to the time when the treaty which rendered the canal under our control possible was made, and afterwards, and until the canal was well under way, it never entered the mind of anyone that the canal would be fortified. Every President and every great statesman who discussed the matter from the earliest times down to Roosevelt emphasized the fact that the canal should be built in the interest of the commerce of the world and neutralized; and it was not until the country was shaken with a temporary spasm of jingoism, following the Spanish War, that anyone suggested that it would be necessary after building this great canal to spend a vast sum of money so long as it is in operation in the hopeless task of attempting to defend it. All the world stands ready to neutralize it. Great Britain is already pledged to see that no act of war is committed there, and yet we foolishly contemplate fortifying it and spending every 15 years enough for its protection to build it.

The CHAIRMAN. All time has expired. The Clerk will read the bill.

The Clerk, proceeding with the reading of the bill, read as follows:

Amarillo, Tex., post office and courthouse: For continuation of building under present limit, $12,000.

Mr. STEPHENS of Texas. I move to strike out the last word, for the purpose of inquiring with reference to the appropriation of $12,000 for continuation of the post-office and courthouse building at Amarillo, Tex. Is that the estimate of the department as to the amount of money that should be expended during the next year?

Mr. FITZGERALD. That is the amount of money that will be required until June 30, 1914. It is the estimate of the department. The limit of cost is $200,000, and up to date there has been appropriated $40,000. That amount, as I recall it, was for the acquisition of the site. The plans are in course of preparation, and contracts will be made between the 4th of March and the 30th of June, 1914, and $12,000 will be required on the contract.

Mr. STEPHENS of Texas. That is the estimate by the Department of the amount of money that they can use up to that time.

Mr. FITZGERALD. That is all the money they can use up to June 30, 1914.

Mr. STEPHENS of Texas. That is the information I desire.

The Clerk read as follows:

For rent of temporary quarters at Charlotte, N. C., for the accommodation of Government officials and moving expenses incident thereto, $6,000; and the Secretary of the Treasury is authorized to use the assay office building at Charlotte, N. C., for the occupancy of certain Federal officials when the building has been placed in condition to accommodate them.

Mr. CULLOP. I move to strike out the last word, for the purpose of asking the chairman of the committee a question concerning lines 16 to 22, on page 6, and I also desire to ask the same question with reference to lines 20 and 21, on page 2. The provision is for the rent of buildings for the use of Government officials during the completion of the Federal building at Charlotte, N. C., $6,000. In the other item the amount, as I recall it, is $7,500. How long a period does that cover? Is it for one year?

Mr. FITZGERALD. Usually it is to the end of the next fiscal year.

Mr. CULLOP. That would be to June 30, 1914.

Mr. FITZGERALD. Yes; but frequently an estimate of an appropriation for rent is submitted before the accommodations are acquired. The estimate is based upon the best information that can be furnished by the local authorities, and frequently there is a surplus in the appropriation or the appropriation is inadequate.

Mr. CULLOP. Have the Government officials already made a contract for the rental in this case, or is this an appropriation under which Government officials are authorized to make contracts or provisions for the employees of the Government?

Mr. FITZGERALD. In some instances the rent items are to make payments under leases already made, and in other instances they are for the purpose of enabling the department to make leases when they arrive at the point where it is necessary to move the Government business out of the building to be remodeled into rented quarters.

Mr. CULLOP. Does this give Government officials the discretion to rent upon any such terms as they may be able, provided they do not exceed the appropriation? Or are they required to make a rental irrespective of the appropriation?

Mr. FITZGERALD. This is an estimate of the amount of money that will be required to pay for the accommodations that can be secured. Very frequently they are unable to tell, and the estimate is based upon information sent in from these places after in most cases an inspector has been sent there.

Mr. CULLOP. Sometimes I think great abuses are perpetrated upon the Government through these rental contracts, in which excessive charges are extorted, when they could be very easily avoided if so much favoritism, perhaps, was not shown. I think there are some instances in the bill of last year, as well as in this, where in a city of the population, perhaps, of this one the rentals were excessive. I have only made this inquiry for the purpose of calling attention to a practice that has grown up in that respect, which is not only injurious to the Government, but also to the public who have property around these buildings. In many instances they do not leave the matter open to competition, but through influences of some kind the renting is unfairly made, and excessive prices are paid. In places of perhaps not more than 7,000 or 8,000 people a rental of $6,000 a year would be a very excessive amount; and, as the gentleman very properly pointed out the other day when the public-building bill was under consideration, in many of these cities where public buildings are being located the Government could rent quarters sufficiently convenient for the dispatch of the public business for less than one-fourth of what the interest on the investment in the building would amount to. These abuses should not be tolerated, and a correction of them is most earnestly desired.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CULLOP. I withdraw the pro forma amendment.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. RAKER having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Curtiss, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 18787) relating to the limitation of the hours of daily service of laborers and mechanics employed upon a public work of the United States and of the District of Columbia, and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Corpus Christi, Tex., post office and customhouse: For completion of building under present limit, $10,000.

Mr. GARNER. Mr. Chairman, I move to strike out the last word for the purpose of making an inquiry of the chairman of the Appropriations Committee. The item on line 18, page 7, is an appropriation of $10,000 for the completion of building under present limit at Corpus Christi, Tex. This building has not even been contracted for. The reason for it was that the appropriation originally was authorized for $70,000 to construct a post office at Corpus Christi. In the meantime Congress established a court at Corpus Christi and that necessitated an additional appropriation.

The matter was submitted to me as a Representative from that district, and I thought it was in the interest of economy not to build now, when later on a courthouse would have to be built, and in the interest of economy to build all the Government offices in one building. So it was held up. Now, in the bill which passed last Monday there was an additional appropriation authorizing $70,000 for that place. The site cost at the time it was purchased $9,000, so that there is $61,000 of the $70,000 left. The $70,000 with the $61,000 makes $131,000 which is available in case we get the $70,000 that was appropriated for yesterday. This building will not be constructed unless it is constructed under the $70,000 limit by this appropriation. Unless the public building bill becomes a law no contract can be made; and I may state for the information of the gentleman from New York that that city has increased since the site was purchased until now we can sell the site for $40,000 which only cost $9,000.

The Treasury estimates that $320,000 will be necessary to build a proper building at that point. I myself believe that it can be built for $175,000 or $200,000, and I believe it would be

in the interest of economy to provide now a sufficient amount of money to build such a building.

Mr. SHERWOOD. Will the gentleman state the size of the city—the population?

Mr. GARNER. It is a city of about 15,000 people.

Mr. FOSTER. This $10,000 appropriated for is the limit under the authorization. Of course the Committee on Appropriations is not authorized to make any larger appropriation than what has been authorized.

Mr. GARNER. I am aware of that fact; I am making this statement for the benefit of the committee that they may take such action as may be in the interest of economy. As far as I am individually concerned, I am anxious to see the building constructed, but I do believe it to be in the interest of economy not to build a post office now, when we shall need a courthouse later on. If we can not secure at this session a greater authorization than $70,000, I believe it will be my duty to these people to tell the architect to go ahead and draw the plans and build on the site, their building to cost $59,000; and when I do that I will come back to Congress, and Congress later will give to me, as it should do, a sufficient amount of money to build a courthouse.

Mr. SISSON. Mr. Chairman, I move to strike out the last word, for the purpose of asking the gentleman from Texas a question. The gentleman from Texas would have no objection, would he, to this item going out of the bill at this time?

Mr. GARNER. I certainly would.

Mr. SISSON. The gentleman can not tell whether or not the public building bill is going to pass and whether this would be money wisely spent or not.

Mr. GARNER. I can not; but Congress having authorized an appropriation for a building, I am not willing to stand in the way of the demand of my constituents that this building shall be constructed within the limit. I have taken the responsibility of holding the contract up, and I did it in opposition to criticism from my own constituents, because I believed it to be in the interest of economy.

Mr. SISSON. I am in sympathy with the gentleman from Texas. Would the gentleman hold up the expenditure of this money until he could get an authorization for plans and specifications of the courthouse proposed, provided for in the bill which has passed the House and may pass the Senate?

Mr. GARNER. I will state that if my constituents will take my view of it they will do it. But the gentleman understands that where a man represents a city where there are such congested conditions from a post-office standpoint, where you have free deliveries and the receipts are near $35,000, with a large number of employees—and no longer than to-day I received a letter from the man renting the premises to the Government saying that he could not put in additional improvements they asked him to do—that under such pressure it may be too strong for me to ask the Treasury Department to hold it up longer.

Mr. SISSON. My purpose in asking the gentleman the question is to find out whether it would in any way embarrass the situation if this item went out of the bill.

Mr. GARNER. I think it would. I would not want to be in the position of asking the committee to cut out the appropriation, but I feel it my duty to call to the attention of the committee the situation. I am willing to have the thing go on, unless the committee thinks that in the interest of economy it ought to add $70,000 at this time. Let me say that although the Treasury Department estimates that $320,000 is necessary to build a building here, I only asked it to give $100,000, which made $159,000 for the entire building.

Mr. FITZGERALD. Mr. Chairman, this item illustrates the condition about which I have made complaint in discussing public-building bills. This building was authorized May 30, 1908, and five years after the authorization its construction is being held up at the request of the gentleman representing the district, because he states the building will be inadequate for the public service in the community. The same thing will be true five years from now in other instances, and gentlemen will be complaining that buildings authorized in the bill now pending in Congress will be inadequate to care for the public service in the communities for which they are authorized. If gentlemen do not wish to find themselves in such a position they should not support public-building bills authorizing buildings that can not possibly be put under construction for five years beyond the time the law is passed.

Mr. GARNER. Mr. Chairman, the gentleman should not shake his gory locks at me. I am not responsible for that.

Mr. FITZGERALD. I did not say the gentleman. What is the situation about this building? Bids were invited and submitted and were in excess of the amount of money available and were rejected. Plans were then arranged for the purpose of getting a building within the limit of cost. At the suggestion of the gentleman representing the district it was stated that the work has been held in suspense, and he intends to take the matter up with Congress at this session in the hope of obtaining an increase in the authorization; but the department is prepared to go ahead on this project if no additional authorization is made, and this amount of money will be necessary to carry on that work. The committee has followed the uniform rule of recommending the sum the department says will be necessary to enable it to proceed under the law. If the gentleman from Texas [Mr. GARNER] believes this to be unwise, that it is not economical, that it would be improvident, with the possession of all the facts, I shall welcome a motion to be submitted by him to strike the item out of the bill. It is unreasonable, however, to expect me to assume that responsibility.

Mr. ASHBROOK. Is it not a fact that the gentleman from Texas has asked to have this building held up on account of the great growth of that city and because of the further fact that the courts have been established there since the first authorization was made?

Mr. FITZGERALD. But, Mr. Chairman, in five years from the time that gentlemen have obtained items in the present public-building bill they hope their communities will go ahead and not retrograde, and that perhaps the public business will require the courts to be established there.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. NORRIS. Mr. Chairman, I move to strike out, on page 7, line 19, the word "completion" and insert the word "continuation."

Mr. FITZGERALD. Mr. Chairman, on that I reserve the point of order.

Mr. NORRIS. Mr. Chairman, I do this, I will say to the gentleman from New York, and particularly to the gentleman from Texas [Mr. GARNER], to have settled here a matter of construction that I think ought to appear affirmatively in the RECORD. If there is no doubt in regard to the construction, I expect to withdraw my motion. I interrogated the gentleman from New York [Mr. FITZGERALD] in general debate on the point I want to bring out now, but his time expired before we got through with the colloquy, and I do not want any doubt about the matter. The gentleman from Texas has a case here where there is not any doubt but what there ought to be an additional authorization. There are several items in this bill of which that same thing can be truly said, where, for instance, the department, under authorization, has advertised for bids, and is not able to get any bids. The recent public buildings bill that passed this House contained quite a number of items of authorization to fit this case and the others that are appropriated for in this bill. The question I raise here is, assuming that the public buildings bill passes and becomes a law, and that subsequent to that date this bill becomes a law, will the Comptroller of the Currency hold as to this item here, for instance, that this bill, passing last and being the last law on the statute, will be considered as an amendment to the authorization provided for in the public buildings bill, and hold that the part of the public buildings bill applying to this particular building has in fact by this appropriation bill been repealed?

Now, I would like to ask the gentleman from New York——

Mr. FITZGERALD. Mr. Chairman, I am informed that the uniform practice has been in these instances where the sundry civil bill carries a provision such as this for completion under a present limit of cost so much money, and within a few days in the closing days of the session a public buildings bill becomes the law which increases the limit of cost on a project, the Comptroller of the Treasury takes into consideration all the circumstances——

Mr. NORRIS. Has he done that in the past?

Mr. FITZGERALD. That has been done in the past—and has held that the intent of Congress is in such instances to make provision for a building of a different character than that for which this appropriation is made, and the Treasury Department prepares its plans in accordance therewith.

Mr. NORRIS. I understand in a case like this and in other cases in this bill that these words "within the present limit of cost" would be held to mean that this would not repeal, even though it were passed last, the provision in a bill authorizing an increase for a public building in these various places.

Mr. FITZGERALD. My information is that the comptroller looks to the record and the intent of Congress, and that being clear that the authorization was to be increased, plans are prepared accordingly.

Mr. NORRIS. I believe that is correct, but I wanted to have no doubt of it. I withdraw my amendment.

Mr. FITZGERALD. There is no doubt of it.

Mr. SHERWOOD. How much money has already been made available in this case?

Mr. FITZGERALD. What case is that?

Mr. SHERWOOD. Of Corpus Christi?

Mr. FITZGERALD. Sixty thousand dollars has been already appropriated.

Mr. SHERWOOD. And this will make a $70,000 building.

Mr. FITZGERALD. It will make the building and site to cost $70,000.

The Clerk read as follows:

Hopkinsville, Ky., post office: For continuation of building under present limit, $45,000.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I ask unanimous consent to print in the RECORD an editorial that appears in the current issue of the Scientific American on the problems of the Mississippi River.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD by printing an article which appears in the Scientific American on the subject of the Mississippi River. Is there objection? [After a pause.] The Chair hears none.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

Riverside, Cal., post office: For completion of building under present limit, $25,000.

Mr. FOSTER. Mr. Chairman, I move to strike out the last word. I would like to get some information from the chairman of the Committee on Appropriations. In 1910 there was an authorization made for a public building at Robinson, Ill., and providing $70,000 for a building and site. The site has been secured, I think possibly a year ago, but this bill does not carry any appropriation for the commencement of this building, and I would like to know if the department considers that it is not possible to prepare plans and let a contract for the beginning of this building before Congress meets again next fall and makes another appropriation.

Mr. FITZGERALD. Mr. Chairman, no estimate was submitted for a building at Robinson, Ill. There are about 289 buildings authorized which have not been started. Ninety buildings will be started in the next fiscal year, and it will take nearly three years before all of those already authorized will be reached. Robinson, Ill., was provided with an authorization for a public building three years ago, in 1910, and apparently it will be a year or two, or perhaps three, before plans are prepared and the department is ready to enter into contract. This emphasizes what I have heretofore called to the attention of the House, that it is absolutely futile to obtain authorizations for public buildings far in advance of the time when it is possible to construct them. It has been stated to me, however, by reliable authorities that there is a great public necessity for accommodations for the governmental service at Robinson, and I regret that so many other projects have been authorized as to delay the completion of this worthy project.

Mr. FOSTER. Let me say to the gentleman from New York that Robinson, Ill., is in the center of one of the largest oil-producing sections of the country and is a place of considerable importance, as is every town in the district that your humble servant has the honor to represent.

I fully agree that authorizations should not be made on public buildings long in advance of when they can be constructed, but I desire to say to the chairman of the committee that, like other Members upon the floor who have authorizations for public buildings, we are asked when our public building is to be commenced and when it will be completed. Of course, if there can be no part of this money used for two or three years, why, of course, it is wiser not to appropriate it now, but I just wanted to understand the situation. I am not in sympathy either with passing public building bills five or six years in advance of the time when they can be commenced or even be completed, so I simply wanted to get the information that I may have it for the people whom I have the honor to represent.

Mr. FITZGERALD. Gentlemen understand that these buildings are given a number in the Treasury Department as soon as the site is acquired, and then the buildings are taken up in the regular order. Robinson, Ill., is not sufficiently high on the list to be reached within the next fiscal year.

Mr. FOSTER. Until after another appropriation is made?

The CHAIRMAN. The time of the gentleman from Illinois [Mr. FOSTER] has expired.

Mr. FOSTER. Mr. Chairman, I withdraw the pro forma amendment.

Mr. SISSON. Mr. Chairman, I move to strike out the last word. I simply want to say to the gentleman from Illinois [Mr. FOSTER] that there is a town in my district which is in exactly the same situation as his, and in order to assure the gentleman from Illinois that the Committee on Appropriations is absolutely fair with him, I will say that I am a member of that committee and I received exactly the same treatment from the committee that the gentleman from Illinois has received. I would like very much, of course, to have the project in my own district carried out at once, but in view of the fact that the Supervising Architect assures us they are being taken up by numbers, ours will be taken up in regular order.

Mr. FOSTER. Let me suggest to my friend from Mississippi, it is not a complaint upon my part that I am making. I simply wanted to get the information in reference to this matter, so that it could appear in the RECORD.

Mr. HAMILTON of Michigan. May I ask the gentleman a question? You say these projects are taken up by numbers. What is the process of numbering?

Mr. SISSON. They are numbered on the date of the acquisition of the site.

Mr. HAMILTON of Michigan. The date of the conveyance?

Mr. SISSON. The date the Government gets title to the site and the title is approved. Then it is given in the Supervising Architect's office.

Mr. HAMILTON of Michigan. Exactly. I thought if it depended on when the inspectors inspected the ground, the inspectors might begin to inspect some sites earlier than others.

Mr. SISSON. You will find there is some delay in acquiring the titles, and some of these appropriations are delayed for that reason.

Mr. CAMPBELL. I would like to ask if there has ever been any disposition on the part of the Committee on Appropriations not to furnish sufficient money to the Supervising Architect's Office to hurry the work?

Mr. SISSON. We have always given the Supervising Architect all he has asked for. The Committee on Appropriations, however, believe that if they would standardize these buildings, they could facilitate the work and turn out three or four times as many buildings by the same plans for different buildings, costing the same amount of money, in different portions of the country.

Mr. CAMPBELL. I quite agree with that.

Mr. AUSTIN. I will say to the gentleman from Mississippi [Mr. SISSON] that that is the policy of the Supervising Architect's Office now.

Mr. SISSON. I understand that in the last year they adopted that plan, but heretofore they had not done so.

Mr. COLLIER. I would like to ask my colleague a question: Are you advised how many of these public buildings are being turned out now each month? In other words, what progress they are making?

Mr. SISSON. My information is they are turning out about 90 buildings every 12 months. In some months they turn out more buildings than in others—of course, depending on the size of the buildings and the extent of the plans and specifications.

Mr. COLLIER. But the general average is about 90 a year?

Mr. SISSON. About 90 a year. That is my information.

Mr. COLLIER. I have one which has been on the roll for some time.

The Clerk read as follows:

For establishing new life-saving stations and lifeboat stations on the sea and lake coasts of the United States, authorized by law, $20,000, to be available until expended.

Mr. MANN. Mr. Chairman, I move to strike out the last word. Just what can be done under this provision for new life-saving stations carried in the bill?

Mr. FITZGERALD. What can be done?

Mr. MANN. Yes.

Mr. FITZGERALD. I do not know just how much can be done. Three or four stations have been authorized, and the Superintendent of the Life-Saving Service requested an appropriation of $20,000 to enable the service to do such work as was possible. They have an unexpended balance available of $17,000, and the $17,000 and $20,000 is to enable them to commence one or two stations.

Mr. MANN. Do they not, as a matter of fact, build new stations out of this item, without any regard as to whether they have been authorized by law or not?

Mr. FITZGERALD. It says "stations authorized by law."

Mr. MANN. I know that is what it says. I think possibly they construe this as sufficient authorization. However, I have no doubt they need new stations.

Mr. FITZGERALD. There are a number of stations authorized that have not been built. Within a year or two such stations have been authorized.

Mr. GARNER. The crux of the question of the gentleman from Illinois [Mr. MANN] is whether they will be authorized to build out of this appropriation a station that has not been authorized by law.

Mr. FITZGERALD. The appropriation itself specifies "stations authorized by law."

Mr. GARNER. Has it been the custom to build out of this appropriation stations that have not been authorized by law?

Mr. FITZGERALD. I do not see how they could be built unless they are authorized by law. The Secretary of the Treasury will not approve the expense unless they are authorized.

Mr. MANN. I am inclined myself to think that the item making the appropriation is a sufficient authorization by law and that it is so construed. If you would say "specifically authorized by law," or "heretofore authorized by law," that might cover it.

Mr. FITZGERALD. If any instance such as the gentleman from Illinois refers to has taken place it was probably before these words were inserted in the appropriation.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

REVENUE-CUTTER SERVICE.

For expenses of the Revenue-Cutter Service: For pay and allowances of captain commandant and officers of that rank, senior captains, captains, lieutenants, engineer in chief and officers of that rank, captains of engineers, lieutenants of engineers, 2 constructors, not exceeding 7 cadets and cadet engineers, 2 civilian instructors, and pilots employed, and rations for pilots; for pay of warrant and petty officers, ships' writers, buglers, seamen, oilers, firemen, coal heavers, water tenders, stewards, cooks, and boys, and for rations for the same; for allowance for clothing for enlisted men; for fuel for vessels, and outfits for the same; ship chandlery and engineers' stores for the same; actual traveling expenses or mileage, in the discretion of the Secretary of the Treasury, for officers traveling on duty under orders from the Treasury Department; commutation of quarters; for maintenance of vessels in the protection of the seal fisheries in Bering Sea and the other waters of Alaska, and the enforcement of the provisions of law in Alaska; for maintenance of vessels in enforcing the provisions of the acts relating to the anchorage of vessels in the ports of New York and Chicago, and in the Kennebec River, and the movements and anchorage of vessels in St. Marys River; for temporary leases and improvement of property for revenue-cutter purposes; not exceeding $5,000 for the improvement of the depot for the service at Arundel Cove, Md.; not exceeding $150 for medals for excellence in marksmanship; contingent expenses, including wharfage, towage, dockage, freight, advertising, surveys, labor, and all other necessary miscellaneous expenses which are not included under special heads, $2,300,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] moves to strike out the last word.

Mr. MANN. I see this item carries provision for revenue-cutter cadets. Can they have more cadets under the existing provision of law?

Mr. FITZGERALD. Last year Congress provided that no more additional cadets should be appointed without specific authority by Congress. This is to provide for the appointment of seven cadets.

Mr. MANN. The committee thinks this a sufficient authorization?

Mr. FITZGERALD. This is the number requested.

Mr. MANN. I do not remember the exact language of last year's bill.

Mr. FITZGERALD. It was the opinion of the committee that this is a sufficient authorization.

Mr. MANN. The provision last year was that "no additional appointments as cadets or cadet engineers shall be made in the Revenue-Cutter Service unless hereafter authorized by Congress." Now, this is merely an appropriation, and it seems to me there ought to be added to that provision an authorization. Why not, in line 17, page 37, after the words "cadet engineers" insert the words "who are hereby authorized"?

Mr. FITZGERALD. There will be no objection to that. The department asked for it in a different form, and the committee inserted it in this way.

Mr. MANN. I understand.

Mr. FITZGERALD. There will be no objection to that amendment, because that is the number that it is desired shall be appointed.

Mr. MANN. Mr. Chairman, I move to insert, in line 17, page 37, after the words "cadet engineers," the words "who are hereby authorized."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. MANN].

The Clerk read as follows:

After the word "engineers," in line 17, page 37, insert the words "who are hereby authorized."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For wages of plate printers, at piece rates to be fixed by the Secretary of the Treasury, not to exceed the rates usually paid for such work, including the wages of printers' assistants, when employed, including increase of grade rate of printers' assistants, to $1.75 per day, $1,437,475, to be expended under the direction of the Secretary of the Treasury: *Provided*, That no portion of this sum shall be expended for printing United States notes or Treasury notes of larger denominations than those that may be canceled or retired, except in so far as such printing may be necessary in executing the requirements of the act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900.

Mr. FOSTER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. FOSTER] moves to strike out the last word.

Mr. FOSTER. I understand that the plate printers' assistants now receive $1.25 per day, paid by the Government out of the wages earned by the plate printers, and that this amount was increased to $1.50 a day, and the extra 25 cents is now paid out of the fund which is appropriated by Congress.

Now, as I understand, this provision proposes to increase the wages of the assistants to the plate printers to $1.75 per day, and in this appropriation, as I understand, the committee has added an amount something like $63,000. I am not sure as to the amount. This increases it from $1.50 to $1.75 a day. What I wanted to ask of the chairman of the committee is whether this language is in such shape that it may be understood that this extra 25 cents which they are to receive if this bill becomes a law will be paid out of the extra amount that is appropriated in this bill, or whether it might be construed to take the extra 25 cents out of the wages of the plate printers?

Mr. FITZGERALD. I do not believe there is any doubt that the extra 25 cents will be paid from the appropriation and not be deducted from the plate printers' pay. The plate printers have a contract with the bureau, and in that contract their compensation is fixed, and provision is made that $1.25 a day shall be deducted and paid to the assistants.

In 1900 there was an increase of 25 cents to the assistants, and the amount was not deducted from the pay of the plate printers, but was paid from the appropriation.

Mr. FOSTER. Let me suggest to the gentleman from New York that in that appropriation, when the wages were increased to $1.50 per day, there was no provision in the law saying that their wages should be increased to $1.50 per day, but it was left as it was, $1.25, in the bill, and the Secretary of the Treasury fixed the amount at $1.50, and the extra 25 cents was paid by the Government.

Mr. FITZGERALD. I am informed that prior to 1900 the bill carried a provision that the compensation should be $1.25 a day. In that year the limitation was stricken out and the additional money was given. The committee inserted this language in this way, so that the House would understand that the bill was proposing to make this increase of 25 cents a day. And further, although the Secretary of the Treasury has the power to make the increase if the appropriation be given, it is doubtful whether he would care to exercise it, unless Congress expressed its intention that the increase should be made.

I might add that I requested that the Director of the Bureau of Engraving and Printing be communicated with about the matter; and this particular matter was called to his attention, but he does not appear to have replied to it.

Mr. FOSTER. Let me suggest to the gentleman from New York that in 1900 the appropriation bill provided for the payment of $1.25 to the plate printers' assistants, but after that year all reference to the $1.25 was dropped out of the bill. That is, it was dropped out in 1901, 1902, and so on.

Mr. FITZGERALD. That is true.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOSTER. I should like to have five minutes more.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. FITZGERALD. The plate printers have a very effective organization. They are among the highest-paid mechanics in the Government service, and they are very thoroughly organized. One of their officers called at the committee room to-day or yesterday, and his attention was called to this provision, and no criticism or objection was made to the manner in which it was proposed to be done. These men are thoroughly informed as to the effect of the legislative provisions relating to them, and they undoubtedly would have called the attention of the committee to any change necessary to prevent the additional money being taken from the plate printers.

Mr. FOSTER. Does the gentleman from New York think that in order to secure this increase of 25 cents per day, making it $1.75 for these assistants, it is necessary to put in this language—

Including increase of grade rate of printers' assistants to $1.75 per day—

Or if the amount estimated for by the Secretary of the Treasury to pay this extra 25 cents per day is allowed by the committee, and if the House and Senate agree to it, would the Secretary give this extra 25 cents a day without this provision being in the bill? Or would it create some doubt in the mind of the comptroller or auditor whether this extra amount was to be deducted from the pay of the plate printers, or whether it should be taken out of this $63,000 additional which is proposed to be appropriated?

Mr. FITZGERALD. The estimate of the bureau was increased the exact sum required to pay this additional compensation. This provision is inserted:

Including increase of grade rate of printers' assistants to $1.75 per day.

I do not see that there can be any misunderstanding that the purpose and intention of Congress is to appropriate sufficient money to pay the additional 15 cents a day in the grade rate of operators and 25 cents a day in the pay of plate printers' assistants out of the funds appropriated by the Government.

Mr. FOSTER. I understand the Secretary of the Treasury has the right to fix the amount to be paid these plate printers' assistants. That is, he could fix it at $1.75 a day or $2 a day if he so desired.

Mr. FITZGERALD. If he so desired, and had the money.

Mr. FOSTER. If he had the money. Now, if this has been dropped out of the bill up to this time, and you have given the amount necessary to pay this additional 25 cents, what is the objection to leaving out that language—

Including increase of grade rate of printers' assistants?

Mr. FITZGERALD. Because I want this money used for that purpose and not a different purpose, and it might be.

Mr. FOSTER. I certainly hope the same may be done. The gentleman thinks this makes that available for that purpose and nothing else?

Mr. FITZGERALD. Yes.

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

The Clerk read as follows:

During the fiscal year 1914 all proceeds derived from work performed by the Bureau of Engraving and Printing, by direction of the Secretary of the Treasury, not covered and embraced in the appropriation for said bureau for the said fiscal year, instead of being covered into the Treasury as miscellaneous receipts, as provided by the act of August 4, 1886 (24 Stat., p. 227), be credited when received to the appropriation for said bureau for the fiscal year 1914.

Mr. FOWLER. Mr. Chairman, I move to strike out the last word. I desire to ask the chairman of the committee why should this money not go back to the Treasury as provided by law?

Mr. FITZGERALD. The Bureau of Engraving and Printing in competition was awarded three years ago the contract for printing the postage stamps by the Post Office Department. It amounts to $700,000 or $800,000 a year. The Post Office Department pays for that work out of appropriations made for that department, and under the law that money would be covered into the Treasury as miscellaneous receipts. In order to do the work the bureau utilizes the appropriation made to enable it to print the notes that are necessary, and it reimburses that appropriation with the appropriation from the Post Office Department. It is a difficult matter to arrange, and it has been suggested at various times that the matter be made permanent, but the committee continues it from year to year to keep track of it and not to forget that the appropriation is made in this way.

Mr. FOWLER. Has this been the custom in years past?

Mr. FITZGERALD. It has for several years—ever since the Bureau of Engraving and Printing was awarded the contract for the printing of the stamps.

Mr. FOWLER. It was not on the bill of last year?

Mr. PAGE. Oh, yes; it is not new; it was in the bill a year ago.

Mr. FITZGERALD. The gentleman from Illinois is referring to the item with reference to the work performed by the Bureau of Engraving and Printing under direction of the Secretary of the Treasury?

Mr. FOWLER. Yes.

Mr. PAGE. The gentleman will find that was in the bill of last year and has been for several years.

Mr. FITZGERALD. It has been in the bill since the bureau was awarded this contract for the printing of postage stamps, and the bureau is doing it for less money—I think there is a saving of about $90,000 to the Government.

Mr. FOWLER. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

Miscellaneous objects, Treasury department.

Mr. GARNER. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amend page 40, between lines 16 and 17, by inserting the following: "To enable the Secretary of the Treasury to purchase one motor boat as provided in the act of Congress approved February 10, 1913, $6,000."

Mr. FITZGERALD. That ought to go in another part of the bill relating to customs.

Mr. GARNER. Mr. Chairman, at the suggestion of the members of the committee that it is not offered at the proper place, I will withdraw the amendment for the present.

The Clerk read as follows:

Expenses of national currency: For distinctive paper, including transportation, traveling, mill, laundry, and other necessary expenses, and expenses of officer detailed from the Treasury, salaries for not more than two months of not exceeding 1 register, 2 assistant registers, 5 counters, 5 watchmen, and 1 skilled laborer; in all, $66,345.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. I ask unanimous consent to have printed in the RECORD a resolution passed by the Legislature of the State of California relative to the fourth internal-revenue district, covered by amendment 68 of the legislative, executive, and judicial appropriation bill.

The CHAIRMAN. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The following is the matter referred to:

SACRAMENTO, CAL., *February 18, 1913.*

Hon. JOHN E. RAKER,
House of Representatives, Washington, D. C.:

I am forwarding herewith, as per instructions embodied therein, the following resolution. Kindly acknowledge receipt.

Resolution by Senator Boynton.

Whereas the fourth international revenue district of California, with headquarters in Sacramento and serving all the counties north of San Francisco to the Oregon line, and also the entire State of Nevada, was abolished on the 1st day of October last; and

Whereas said district did an annual business of nearly $800,000; and

Whereas said district was also consolidated with the first collection district of California, with headquarters in San Francisco, which district was so large that the Los Angeles district was separated from it two years ago; and

Whereas the loss of the fourth district will work injury to this section of California and Nevada without any corresponding benefit to the first district; and

Whereas an amendment known as Senate amendment No. 68 to the House of Representatives bill No. 26680, providing for the reestablishment of the aforesaid fourth revenue collection district of the State of California, has been approved by the Senate of the United States Congress, and now goes to conference: Therefore be it

Resolved by the senate and assembly jointly, That the Legislature of the State of California approves all of the provisions of said amendment, and our Senators in Congress are hereby instructed and our Representatives requested to vote for and use every honorable means to secure the passage of said amendment to said bill; and be it

Resolved further, That copies of this resolution be sent by telegraph to each of our Senators and Representatives in the Congress of the United States.

WALTER N. PARRISH,
Secretary of State.

Mr. RAKER. Mr. Chairman, I also ask unanimous consent to insert a resolution of the Legislature of the State of California relative to House bill 13500.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The resolution is as follows:

SACRAMENTO, CAL., *February 18, 1913.*

Hon. JOHN E. RAKER,
House of Representatives, Washington, D. C.:

I am forwarding you herewith, as per instructions embodied therein, the following resolution. Kindly acknowledge receipt.

Resolution by Senator Sanford.

Whereas there is pending in the Congress of the United States House bill No. 13500, by Congressman JOHN E. RAKER, of California; and

Whereas House bill No. 13500 has for its object the extension of the Chinese exclusion act, so as to include all Asiatic (laborers); and

Whereas there is a misapprehension in the East as to California's position regarding oriental immigration: Therefore be it

Resolved by the senate and assembly jointly of the State of California, That we approve of the passage of House bill No. 13500, and request Congress to pass the same.

Resolved, That the secretary of the senate be instructed to send a copy of this resolution to the Vice President of the United States, to the Speaker of the House of Representatives, and to each of our Senators and Representatives in Congress.

WALTER N. PARRISH,
Secretary of State.

The Clerk read as follows:

Operating supplies for public buildings: For fuel, steam, light, water, ice, lighting supplies, electric current for lighting and power purposes, telephone service for custodian forces; removal of ashes and rubbish, snow, and ice; cutting grass and weeds, washing towels, and for miscellaneous items for the use of the custodian forces in the care and maintenance of completed and occupied public buildings and the grounds thereof under the control of the Treasury Department; and in the care and maintenance of the equipment and furnishing in such buildings; and for miscellaneous supplies, tools and appliances required in the operation (not embracing repairs) of the mechanical equipment, including heating, plumbing, hoisting, gas piping, ventilating, vacuum cleaning and refrigerating apparatus, electric-light plants, meters, interior pneumatic-tube and intercommunicating telephone systems, conduit wiring, call-bell and signal systems in such buildings, including the customhouse at Washington, D. C., but excluding any other public building under the control of the Treasury Department within the District of Columbia, and excluding also marine hospitals and quarantine stations, mints, branch mints, and assay offices, and personal services, except for work done by contract or for temporary job labor under exigency not exceeding at one time the sum of $100 at any one building, $1,600,000. And the appropriation herein made for gas shall include the rental and use of gas governors, when ordered by the Secretary of the Treasury in writing: *Provided*, That no sum shall be paid as rental for such gas governors greater than 35 per cent of the actual value of the gas saved thereby, which saving shall be determined by such tests as the Secretary of the Treasury shall direct.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. What is the purpose of the provision in the bill which authorizes the Secretary of the Treasury to put in gas governors for saving gas, and how much is to be gained by the introduction of the governors?

Mr. FITZGERALD. The committee went into the matter last year quite fully, and my recollection is that the governors were put in in very few places. The clause provides that they shall not be put in unless the rental paid for them is not greater than 35 per cent of the value of the gas saved.

Mr. MADDEN. How do they gauge the amount of gas saved, and what is the total amount of money paid for gas under this item?

Mr. FITZGERALD. I can give the gentleman the information in a moment. In the majority of the buildings now being constructed they use electric light, substituting it for the gas wherever possible.

Mr. MADDEN. The only point I wanted to ascertain was whether the chairman of the committee or any other member of the committee knew how much each governor cost, and if you knew exactly how much gas they saved?

Mr. FITZGERALD. The estimates for next year for gas and gas governors was $65,000. In 1912 there was expended $58,395 for gas and gas governors out of an appropriation of $1,580,000. For electric current and light and power purposes the estimate is that they will expend $545,000 in the next fiscal year. In 1912 there was expended $516,604. The amount expended for gas is about 10 per cent of the amount expended for light.

Mr. MADDEN. Mr. Chairman, I have no disposition to take up any time of the committee at all, but I wish the chairman of the committee would request the Secretary of the Treasury, or whoever has jurisdiction of this, to make some kind of a report showing the percentage of saving made by the expenditure of this money for governors. If they have not such information, it ought to be supplied.

Mr. FITZGERALD. I will turn to that in a moment.

Mr. MADDEN. Mr. Chairman, I do not care to take up the time of the committee at all.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Suppressing counterfeiting and other crimes: For expenses incurred under the authority or with the approval of the Secretary of the Treasury in detecting, arresting, and delivering into the custody of the United States marshal having jurisdiction dealers and pretended dealers in counterfeit money and persons engaged in counterfeiting Treasury notes, bonds, national-bank notes, and other securities of the United States and of foreign governments, as well as the coins of the United States and of foreign governments, and other felonies committed against the laws of the United States relating to the pay and bounty laws, and for no other purpose whatever, except in the protection of the person of the President and of the person chosen to be President of the United States, $135,000: *Provided*, That no part of this amount be used in defraying the expenses of any person subpœnaed by the United States courts to attend any trial before a United States court or preliminary examination before any United States commissioner, which expenses shall be paid from the appropriation for "Fees of witnesses, United States courts."

Mr. MANN. Mr. Chairman, I move to strike out the last word. I notice this item which, I suppose, is for the maintenance of the so-called secret service, authorizes the protection of the President and the person chosen to be President. There is another item in the bill that may be used also for the protection of the President. I notice it did not provide in the other item that it might be used for the protection of the person chosen to be President.

Mr. FITZGERALD. An item is carried under the Department of Justice where the language is used, for the "protection of the President," but that has never been used for that purpose except on one occasion. It is out of this appropriation that the expenses are paid, and it was in this item that it was thought desirable to insert this provision.

Mr. MANN. As a matter of fact, if it is inserted in this item, ought it not to be inserted in the other item?

Mr. FITZGERALD. All of the services, so far as can be ascertained, will be paid from this item. This is the Secret Service Division of the Treasury Department. The other item is for special agents in the service of the Department of Justice, and there was some doubt as to the wisdom of putting the language in the other item.

Mr. MANN. When will this item take effect, so far as the protection of the person chosen to be President is concerned? Is it to take effect after the election in November, after the electoral college meets, after the canvass of the result, or after the meeting of the next Republican convention?

Mr. FITZGERALD. Mr. Chairman, perhaps I can make a statement that will cover this proposition. After the last election the question of making some provision for the President elect, the person chosen to be President, came up. There was no authority for it. Four years ago under similar circumstances the administration detailed some of the Secret Service men to guard the then President elect, Mr. Taft, and the situation was such that the administration assumed the responsibility of detailing men for the same purpose at this time. This bill will not be effective until after the President elect is inaugurated; but the committee believed that it was desirable to initiate at this time the practice of inserting this language in the item, so that it would not come up as a new proposition in the session of Congress immediately preceding the presidential election, when gentlemen might believe to insert it at that time, for the first time, would be a confession that their party would not succeed.

Mr. MANN. Mr. Chairman, I quite agree with the gentleman that it is perfectly proper to put in the item, although it can not be effective during the fiscal year for which this appropriation is made; but I think at the same time, owing to the form of the language used, that there ought to be some statement as to when it becomes operative in the opinion of the committee reporting it.

Mr. FITZGERALD. The intention is to make a provision to guard the person of the candidate who by the returns on election night apparently is to be chosen by the electoral college as the President of the United States.

Mr. MANN. Mr. Chairman, does the gentleman think that this language does that?

Mr. FITZGERALD. There was considerable controversy as to what particular language should be used. Personally, I believe that that person is popularly known as the President elect, and that such an expression would adequately describe the person and would be sufficient. There was a difference of opinion as to that, and finally this particular expression was adopted.

Mr. NORRIS. The language is subject to a point of order, is it not, or would have been if it had been made?

Mr. MANN. Oh, I think so.

Mr. NORRIS. What I want to ask is this: It will be subject to a point of order next year if it goes on the bill?

Mr. MANN. Very likely.

Mr. NORRIS. Therefore it will be subject to a point of order the year following and every year, and the very year you will want to use it, four years from now, it is still subject to the point of order.

Mr. FITZGERALD. That is a provision for the protection of the President himself, and the authority for that——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Probably the point of order would not be made, but when it comes to the comptroller the comptroller must decide. Now, of course, no person is chosen to be President, in one sense, at the November election, but if it is the intention of the committee, as far as they are concerned—and that is the understanding of the House—that this specially provides immediately after the November election when we vote indirectly for President, possibly the comptroller would so construe it from the debate, and that is the reason I asked the question.

Mr. NORRIS. The point I want to bring out, I want to say, is this: That everybody knows this appropriation will not be used unless there should be a death, or something of that kind, of the President or Vice President——

Mr. MANN. It would not be used then.

Mr. NORRIS. And probably not then. It will not be used next year, but it ought to be in the appropriations by virtue of a law, and it seems to me as long as this is subject to a point of order the committee might just as well have put it in, or we ought to amend this so it would be the law.

Mr. FITZGERALD. This is the situation: The law authorizes the suppression of counterfeiting, and there has been built up in the Treasury Department what is known as the Secret Service force. Some years ago an occasion arose when it became desirable to afford some personal attendance upon the President for his protection, and from that has grown up a detail of the members of this force to guard the President at all times. There is no statute authorizing that, but this provision provides that this money shall be used for suppressing counterfeiting, guarding the person of the President, and for no other purpose.

Mr. NORRIS. I understand that; but there ought to be a law that would permit a detail of these men for guarding not only the President but the President elect. That ought to be the law. When it becomes material, in a few years from now, some one man may make a point of order, and at the particular time when it is desirable to use it we will not be able to get it.

Mr. FITZGERALD. I doubt, if it is carried now as well as the other provision, that an occasion will ever arise when the Congress will not be able to——

Mr. NORRIS. But I think it ought to be the law.

Mr. MANN. The objection will be obviated if you amend this language by inserting after the word "States," in line 3, page 48, "which is hereafter authorized."

Mr. NORRIS. But the amendment is not in order.

Mr. MANN. It is subject to the point of order.

Mr. NORRIS. The provision itself is subject to the point of order, so I understand.

Mr. MANN. I offer this amendment, after the word "States," in line 3, page 48, insert the words "which is hereafter authorized."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 48, line 3, after the word "States," insert the words "which is hereafter authorized."

Mr. OLMSTED. Mr. Chairman, just a moment. Would it not be better to put it in after the word "protection," in the first line at the top of the page?

Mr. MANN. My amendment would make it read "protection of the person of the President and of the person of the person chosen to be President of the United States, which is hereafter authorized."

Mr. OLMSTED. "Protection which is hereafter authorized."

The CHAIRMAN. The question is on the amendment——

Mr. FITZGERALD. How is that reported?

The CHAIRMAN. The Clerk will report the amendment again.

The Clerk read as follows:

Page 48, line 3, after the word "States," insert the words "which is hereafter authorized."

Mr. FITZGERALD. I would suggest to insert the word "protection," so it would read, "which protection is hereafter authorized."

Mr. MANN. That is right, and I ask to modify the amendment.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Page 48, line 3, after the word "States," insert the words "which protection is hereafter authorized."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

To defray the expenses of collecting the revenue from customs, $10,150,000. And the provisions of the act of March 3, 1879 (20 Stat., p. 386), as amended by the act of April 27, 1904 (33 Stat., p. 396), authorizing the Secretary of the Treasury to expend out of the appropriation for defraying the expenses of collecting the revenue from customs such amount as he may deem necessary, not exceeding $150,000 per annum, for the detection and prevention of frauds upon the customs revenue, are hereby further amended so as to increase the amount to be so expended for the fiscal year 1914 to $200,000.

Mr. GARNER. Mr. Chairman, I offer the amendment which I sent to the Clerk's desk a moment ago to be inserted between lines 9 and 10, page 49.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 49, between lines 9 and 10, by inserting the following:

"To enable the Secretary of the Treasury to purchase one motor boat, as provided in the act of Congress approved February 10, 1913, $6,000."

Mr. GARNER. Mr. Chairman, I might explain, for the benefit of the committee, that this item was not submitted to the Appropriations Committee for consideration until the bill had been partly made up, for want of time of the Treasury Department to make an estimate. It has been authorized at this session of Congress. It is necessary for the service down there, and I hope that the members of the Appropriations Committee will accept the amendment.

Mr. FITZGERALD. Mr. Chairman, a bill was passed one day on the unanimous-consent calendar providing for a motor boat for use in the customs service at Corpus Christi, and it has become a law. It authorized the Secretary of the Treasury to acquire such a motor boat. On the 14th of February, after hearings had been concluded and the bill practically made up, an estimate was transmitted to Congress for this item in accordance with the authorization. For a number of years requests have been made at various times for motor boats for the customs service. I have never yet looked into one of these cases critically and been convinced that there was any necessity for such motor boat. Had this estimate been submitted to the committee sufficiently early, proper officials of the Treasury Department would have been summoned before the committee, and if they had demonstrated there was actual necessity for a boat in the service, the committee would have reported the item, as it was authorized by law. Under the circumstances, without any knowledge as to the necessity, without having had an opportunity to examine into it, the committee declined to recommend the appropriation and can not support the amendment.

Mr. MANN. Mr. Chairman, what the gentleman from New York [Mr. FITZGERALD] says is, of course, in the main correct, or all correct in one way. And yet we have had the practice in the House when certain legislative committees report bills for authorization for certain purposes. It has never been considered, I think, that the Committee on Appropriations, immediately after such an appropriation passed by Congress, was entitled to any veto of the proposition. Sometimes when an omnibus bill is passed the Committee on Appropriations may conclude that certain items ought to be delayed; but Congress looked into the necessity of this motor boat. Congress determined that it was necessary. The House and the Senate and the President passed a law at this session providing for that boat. I do not think that under circumstances like that it rests with the Committee on Appropriations to say that there is no necessity for it.

Mr. CULLOP. Will the gentleman permit an interruption?

Mr. MANN. Certainly.

Mr. CULLOP. In the bill that authorized the purchase of this boat for use at Corpus Christi there is also a provision that it may be detailed for use at or ordered to other places, whenever the Government may need it, and in the committee it was shown by the authorities of the Treasury Department that there was a necessity for this boat to be employed in that service, not only at that one place, but at other places where the Treasury Department might direct it to be used.

Mr. FITZGERALD. At what other places?

Mr. CULLOP. At such other places as in the discretion of the Treasury officials it might be needed and required.

Mr. FITZGERALD. It might be needed and required at Santiago, where they have been requesting to go for some years, but it could not be detailed there very well.

Mr. CULLOP. At such other places as the Treasury Department desire to employ it in the service. No objection certainly can be urged against this matter.

Mr. MANN. Mr. Chairman, unless we put in an authorization under such circumstances the result will be that the bills themselves will carry the appropriation. I have never thought it desirable, when these authorizations were made, appropriations should be carried in the bill, but unless the Committee on Appropriations can show some reason why this motor boat should not be authorized, certainly right after Congress has authorized it, there is presumption it is needed.

Mr. PAGE. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. PAGE. If the Appropriations Committee making up this bill had been given sufficient time and opportunity they might have been able to show it. The gentleman says we should claim no power of veto, yet we do claim we ought to have the right to investigate, and that was not given us in this instance.

Mr. MANN. Oh, the Committee on Appropriations and all the members of it had the right to investigate, when this bill was on the calendar, the necessity of this motor boat, and the House passed the authorization recently, determining the necessity of it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARNER. Mr. Chairman, I ask for five minutes in which to explain the necessity of this amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. GARNER. Mr. Chairman, for the information of the gentleman from New York [Mr. FITZGERALD] and his associates on the committee, I want to call attention to a letter received by the Committee on Interstate and Foreign Commerce, which committee had occasion to consider this bill and report it to the House. This bill was reported unanimously from the Committee on Interstate and Foreign Commerce after that committee had investigated the subject. A letter was written by the Acting Secretary of Commerce and Labor, in which he called the attention of the Secretary of the Treasury to the fact that this boat was very much needed, and he uses this language:

Through the Division of Special Agents, this department has received complete reports regarding the conditions in the Texas districts, including that of Corpus Christi. There are 21 documented vessels and 150 undocumented motor boats in the district, and this number is rapidly increasing. The district has a water frontage of 227 miles. As one of the most important of his duties, the collector is required by statute to enforce, under the direction of this department, the navigation laws. He now has a sailboat nearly 40 years old and practically useless for this purpose.

Vessels can not be inspected from the shore, and for a proper enforcement of the navigation laws it will be necessary for the collector to be furnished with a suitable vessel either by hire or purchase.

Now, I call the attention of the gentleman from New York to this statement:

It costs from $15 to $20 a day to hire such a vessel, and as it can be used the year round a purchase would be more economical and much more effective, especially if the present bill may be amended so as to permit of its use at Port Lavaca and on Matagorda Bay, where there are no customs officers or facilities for enforcing the laws, and on connecting waters.

Mr. PAGE. Mr. Chairman, will the gentleman yield?

Mr. GARNER. Yes.

Mr. PAGE. It says the boat "can be used." Is there a necessity for its use every day in the year?

Mr. GARNER. He says there is.

This boat is for use at Port Lavaco and Matagorda Bay, where there are no customs officers or facilities for enforcing the laws, and on connecting waters.

In addition to that, the Secretary of the Treasury has written this letter recommending the purchase of the motor boat:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, January 10, 1913.

Hon. WILLIAM C. ADAMSON,
Chairman Committee on Interstate and Foreign Commerce,
House of Representatives.

SIR: I acknowledge the due receipt of your letter of the 6th ultimo, referring to this department for an expression of its views thereon a copy of bill H. R. 26549, "to provide for the construction or purchase of motor boat for customs service."

This bill provides for the purchase or construction of a gasoline motor boat for service in the customs collection district of Corpus Christi, Tex., at a cost not to exceed $6,000.

The department has carefully looked into the matter of such a boat in this district and is satisfied that the best interest of the service there and in that vicinity will be served by such a boat. I have, therefore, to inform you that I approve the proposed purchase or construction of a boat and recommend that the bill pass.

* * * * * * *

Respectfully,

FRANKLIN MACVEAGH, *Secretary.*

Now, here is the situation, gentlemen: I have had requests from that customs district for $200,000 for the purpose of erecting an office for the collection of customs at that port. There is more than $2,000,000 of exports at that port annually, and they have an old sailboat down there that is 30 years old. It is economy to purchase this motor boat. Has the Committee on Appropriations got to the point where it can ignore the wishes of this House? The gentleman from New York [Mr. FITZGERALD], the chairman of the committee, not 20 minutes ago stated to the House that he had carried appropriations in this bill that were not justified by their merits, although there had been authorizations of them by Congress.

Mr. FITZGERALD. The gentleman from New York made no such statement as that.

Mr. GARNER. The gentleman made the statement that there were items in the bill that were no better than those in the one passed yesterday, and he said the one carried yesterday was not justified.

Mr. FITZGERALD. I said that some of the buildings in the bill carried yesterday were not justified.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. Mr. Chairman, I ask that I may have five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] is recognized for five minutes.

Mr. FITZGERALD. I wish to call this fact to the attention of the gentleman, Mr. Chairman, that if we proceeded on his theory and appropriated at the request of the departments for everything that are authorized by law the gentleman would ask us to add to this bill the $25,000,000 that we eliminated from it.

Mr. GARNER. I call the attention of the gentleman to the fact that this is a specific authorization of Congress, authorized on the 5th day of this month. Congress investigated this matter. The Committee on Appropriations is not the only committee of this House that has the interests of the country at heart. I submit that the Committee on Interstate and Foreign Commerce is composed of men as patriotic as those on the Committee on Appropriations. I submit that this House, having passed this bill by unanimous consent, after inquiry had been made as to the necessity of this boat and after the bill has gone to the Senate and been acted upon there and has been approved by the President, it little behooves the Members or the chairman of the Committee on Appropriations on the floor of the House to object to it, especially when the Secretary of the Treasury recommends its passage.

Mr. FITZGERALD. Mr. Chairman, I desire to say, if the gentleman from Texas or anybody else believes that the Committee on Appropriations is simply going to work as automatons, to recommend appropriations authorized by law, without investigation or judgment, he is mistaken. We are going to exercise the best judgment we can, and we are going to follow that judgment and make recommendations in accordance with that judgment. There are life-saving stations that were authorized as far back as 30 or 40 years ago for which appropriations have not been made and will not be made. The money for them has been refused year after year.

Mr. GARNER. Will the gentleman yield just there?

Mr. FITZGERALD. I have only a few minutes left. The committee had no opportunity to make any investigation of this matter, and, so far as I am concerned, I will not vote to report or to include in this bill items, no matter how meritorious the gentleman from Texas or any other gentleman may assert them to be, unless I have an opportunity to satisfy myself that they are justified.

I know that nearly all the departments of the Government during the past two years have suddenly become possessed of a desire to accumulate as many gasoline launches as they can squeeze out of the Government. I have no doubt it will be a very delightful acquisition for the collector of the port on the southern coast of Texas. The gentleman read a statement in which he said, I believe, that there are about 160 or 170 vessels to be inspected. Anybody who is familiar with conditions at seaports knows that the launch would be used but a very little part of the time.

The Committee of the Whole are in possession of the facts and can dispose of this matter as they please.

Mr. RODDENBERY. Mr. Chairman, I move to strike out the last word. A question arises just here in connection with this item and in connection with the previous statement made by the chairman of the committee [Mr. FITZGERALD] that this sundry civil appropriation bill carries now appropriations for items authorized in the public-building bill for 1910 that were just as indefensible as items carried in the public-building authorization bill which passed the House this week.

I submit that it is not within the province of the Appropriations Committee to determine whether or not an authorization passed by Congress is defensible or indefensible, but it is up to the Committee on Appropriations, when they go to make up a budget for these items, to consider the state of the Public Treasury, and if the Public Treasury at a particular time does not justify the items that we provided for in a public-building authorization bill or any other authorization bill it is the duty of the Appropriations Committee not to carry it.

Furthermore the Appropriations Committee is not the judge of whether an authorization made by Congress is wise or unwise; but I take it that the Appropriations Committee, in considering the authorizations in the 1910 bill and in the bill which passed this House this week, will not permit an appropriation to go into its bill if it is not warranted by the state of the Public Treasury, and as the chairman of a Democratic Appropriations Committee in a Democratic House I presume he will not provide any appropriation for any authorization if it is against the fixed and definite pledges of the party to keep our appropriations down to a figure less than the extravagance of the Republicans.

Mr. FITZGERALD. Will the gentleman yield?

Mr. RODDENBERY. Yes.

Mr. FITZGERALD. The chairman of the Committee on Appropriations has only one vote, and without the support of the

gentleman and his associates he will be able to do nothing to keep the pledges of the Democratic Party.

Mr. RODDENBERY. I think the chairman is exactly correct; and I should have said that the Appropriations Committee under the lead of its chairman.

Mr. Chairman, I shall ask a little indulgence when my time is up.

With reference to the indefensibility of the items in the public-building bill of 1910, I call attention to the fact that in that bill, to which the gentleman from New York [Mr. FITZGERALD] refers, there was carried an appropriation for Yonkers, N. Y., of $35,000; for Auburn, N. Y., $50,000; that that indefensible bill carried $80,000 for Cortland, N. Y.; for Fulton, N. Y., $75,000; for Johnstown, N. Y., $75,000; for Mount Vernon, N. Y., $100,000; for North Tonawanda, N. Y., $80,000; for Oneonta, N. Y., $75,000; that indefensible bill carried for Great Falls, N. Y., $100,000.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CULLOP. I ask unanimous consent that the time of the gentleman from Georgia [Mr. RODDENBERY] be extended five minutes.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that the time of the gentleman from Georgia be extended five minutes. Is there objection?

There was no objection.

Mr. RODDENBERY. That indefensible bill carried for Gouverneur, N. Y., $70,000; for New Rochelle, N. Y., $125,000; for Port Jervis, N. Y., $80,000. That indefensible 1910 bill carried for Bronx, N. Y., $125,000, in addition to $100,000 heretofore authorized; for Dunkirk, N. Y., $20,000; for Nyack, N. Y., $15,500; for Syracuse, N. Y., $100,000, in addition to $225,000 heretofore authorized. It authorized for the United States post office at Utica, N. Y., $100,000; for Waterloo, N. Y., $11,000, in addition to the amounts heretofore authorized.

And those are not all the New York items.

Mr. FITZGERALD. Will the gentleman yield?

Mr. RODDENBERY. I yield.

Mr. FITZGERALD. That bill came before the House under suspension of the rules, and I denounced it just as vigorously and opposed it just as strenuously as I did the bill on Monday. I am not responsible either for that one or this one.

Mr. RODDENBERY. Yes; and I make the same observation on that that I did on the bill which passed this week, that when an authorization has come in for the Brooklyn Navy Yard and other great public interests in which the gentleman from New York is interested he has not fought them.

Mr. FITZGERALD. The gentleman has not found me advocating any items for that either.

Mr. RODDENBERY. The gentleman has never found any necessity for it. The House upon great public improvements for the navy yards and for public buildings walks up and provides for them. The gentleman from New York, however, when he sees in his mind's eye two great battleships in process of construction and catches a vision of the contracts for steel for the hulls, the contracts for the bodies of them, the contracts for the powerful engines, the expensive boilers and turbines, the contracts for the equipment of them, the contracts for the brass and the gold trimmings, the contracts for the great volume of glass that adorns these wonderful palatial constructions, when he sees a chance for the vast millions of money for these things to be placed with the various construction companies, supply companies, and steel-trust companies, when he sees a chance that they may sell to the Government a type of steel for $100 a ton more than they sell it in the market in other places, I do not see him doing anything to save the onslaught on the Treasury for $20,000,000 for these battleships.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. SISSON. Mr. Chairman, I want to do what is necessary to get the floor.

Mr. FITZGERALD. Mr. Chairman, I move that all debate on this item and amendment be closed in five minutes.

Mr. SISSON. Will the gentleman let me have my five minutes first?

Mr. FITZGERALD. I want to close debate before the gentleman starts.

Mr. SISSON. I would like to know, Mr. Chairman, whether I have been recognized?

The CHAIRMAN. The gentleman from Mississippi has been recognized.

Mr. SISSON. I want to state that I do not believe there is a man in the House who will charge that I have been one of the extravagant Members of this House. On the contrary, I have been frequently laughed at on account of my penuriousness because I do believe in conserving the public funds.

Mr. Chairman, I do not believe the criticism of the gentleman from Georgia is at all deserved in reference to the gentleman from New York. I have served on the Committee on Appropriations with him for nearly two years. He is not only faithful and patient and hard working, looking after all the details of these bills, but if the other Democratic committees in this House had accomplished one-half as much as the committee over which he presides has accomplished, then we would have been able to save $250,000,000 over the appropriations of the last Republican Congress.

Mr. RODDENBERY. Mr. Chairman, I am in thorough accord with the gentleman, but I wish he would go further and designate the committees by name that have prevented the saving of this $250,000,000.

Mr. SISSON. Mr. Chairman, I do not at this time care to enumerate the various committees, nor do I care to reflect upon those committees. I want to make these remarks in defense of the three Democrats of this committee that brought in this sundry civil bill. They are the gentleman from New York [Mr. FITZGERALD], the gentleman from North Carolina [Mr. PAGE], and the gentleman from Kentucky [Mr. SHERLEY]. The gentleman from Illinois stated that the minority Members were willing that the majority Members might make up this bill.

The last bill that they brought into this House saved $33,000,000 over the $142,000,000 provided by the last Republican committee. This bill was criticized on the floor by some Republican Members as a cheese-paring measure for the purposes of election, but when this bill comes before the House after the election it comes with $4,800,000 less than the former bill, and yet no man can say that anybody or any department in the public service has suffered by the treatment it has received at the hands of this committee. Instead of criticizing this committee and its distinguished chairman, who has worked almost day in and night out for 30 days endeavoring to carry out the pledges of the party, he ought to receive the commendation of every Democrat here.

I do not believe there is a more violent enemy to extravagance on this floor than I am. I voted against the river and harbor bill, I voted against the public-building bill, and I will vote against the naval bill unless it is reduced in amount. Not only that, but I have voted against the pension bill. I deserve no credit for that because there are very few pensioners in my district, but I should have done so had there been in my district. I am not criticizing the men who voted for it, but I do say that no criticism should be made of the distinguished chairman of this committee, who has performed such valuable services for the public and for the country.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. I ask for two minutes more.

The CHAIRMAN. The gentleman from Mississippi asks that his time be extended two minutes. Is there objection?

There was no objection.

Mr. RODDENBERY. Will the gentleman yield for a moment?

Mr. SISSON. I will.

Mr. RODDENBERY. Did the gentleman have an item in the public buildings bill?

Mr. SISSON. I did.

Mr. RODDENBERY. Mr. Chairman, does not the gentleman know that, notwithstanding the general rule of the committee requiring $10,000 of postal receipts, that the postal receipts for his town for which he introduced a bill amounted to only $9,348? Yet the Public Building Committee approved his bill and authorized his building. Now he boasts that he voted against the bill.

Mr. SISSON. Then, Mr. Chairman, I am in an infinitely better position than many were who were put into the bill. I say this—and I mean what I say: When these bills come in, and I receive the same treatment that other Members receive, I am satisfied. But notwithstanding the fact that I had an item in the bill, I voted against the bill, because we are going to spend, at the rate we are going now, $121,000,000 more than the last Republican Congress spent. Not only that, but we are going now into a revision of the tariff within the next few months, and we do not know whether or not we are going to affect the revenues, nor how much, and yet the Democratic Congress is expending at the present rate $121,000,000 more than the last Republican Congress; and if it were not for the fact that the Constitution had been amended with respect to an income tax, we would face a deficit in the Treasury the very first year that Mr. Wilson comes into office.

Mr. RODDENBERY. Mr. Chairman, I thoroughly agree with my colleague.

Mr. SISSON. And for that reason I have been a consistent Democrat in the fact that I have opposed all of the extravagances.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. RODDENBERY. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for three minutes more.

Mr. SISSON. One minute more is all that I ask.

The CHAIRMAN. Is there objection to the gentleman from Mississippi proceeding for one minute?

There was no objection.

Mr. RODDENBERY. Mr. Chairman, I ask that the gentleman may proceed for three minutes more.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the gentleman from Mississippi may continue for three minutes. Is there objection?

Mr. SHERLEY. Mr. Chairman, I object. The gentleman asks for only one minute.

Mr. RODDENBERY. Then, Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Georgia makes the point of order that there is no quorum present.

Mr. DYER. Mr. Chairman, I ask unanimous consent that the gentleman from Mississippi may proceed for three minutes——

The CHAIRMAN. The Chair did not hear anybody object to the gentleman having three minutes.

Mr. DYER. Because the gentleman is making a very good speech from a Republican standpoint.

Mr. RODDENBERY. Mr. Chairman, the gentleman from Kentucky [Mr. SHERLEY] objected, and I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Georgia makes the point of order that there is no quorum present. The Chair will count. [After counting.] Sixty-two Members present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Aiken, S. C.	Fergusson	Kopp	Riordan
Ainey	Ferris	Korbly	Roberts, Mass.
Akin, N. Y.	Finley	Lafean	Roberts, Nev.

Evans	Kinkead, N. J.	Reyburn	
Fairchild	Konig	Richardson	

The SPEAKER. The Clerk will call my name.

The name of Mr. CLARK of Missouri was called, and he answered "Present."

The SPEAKER resumed the chair, and Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee finding itself without a quorum he had directed the roll to be called, and 136 Members had responded to their names, and he reported herewith the absentees.

The SPEAKER. The Chairman of the Committee of the Whole House on the state of the Union reports that that committee finding itself without a quorum he had caused the roll to be called and 136 Members, a quorum, responded to their names, and he reports herewith the absentees. The committee will resume its sitting.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas——

Mr. SISSON. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. SISSON. I think I had some time coming to me when the point of no quorum was made.

The CHAIRMAN. The gentleman objected and there is no time remaining. The question is on the amendment proposed by the gentleman from Texas.

The question was taken and the Chair announced the ayes seemed to have it.

Mr. FITZGERALD. A division, Mr. Chairman—I withdraw the demand for a division.

The question was taken, and the amendment was adopted.

The Clerk read as follows:

Scales for customs service: For construction and installation of special automatic and recording scales for weighing merchandise, and so forth, in connection with imports, at the various ports of entry under direction of the Secretary of the Treasury, of which $60,000 shall be immediately available, $125,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. I would like to have the attention of the gentleman from New York. Last year the sundry civil bill carried a provision for a reorganization of the customs service.

Mr. SHERLEY. What is the request of the gentleman?

Mr. MOORE of Pennsylvania. Last year the sundry civil bill carried a provision for the reorganization of the customs service, and I would like to know what has become of it?

Mr. SHERLEY. Well, the law that was passed last year is still the law, and I understand that there is a proposed program of reorganization submitted by one of the Assistant Secretaries, and that it is now before the Secretary of the Treasury for either approval or rejection.

Mr. MOORE of Pennsylvania. It was indicated by the gentleman from New York, chairman of the Committee on Appropriations, that this reorganization was in the interest of economy, and the appropriation was cut from $10,500,000 to $10,150,000. I should like to know whether during the current year they have been able to get along with the $10,150,000?

Mr. SHERLEY. I understand there is a deficiency pending of some $750,000 for the current year.

Mr. MOORE of Pennsylvania. Seven hundred and fifty thousand dollar deficiency pending?

Mr. SHERLEY. Pending.

Mr. MOORE of Pennsylvania. Then the $10,150,000, which was a reduced appropriation from the $10,500,000 previously allowed, has not been sufficient during the current year to conduct the customs service?

Mr. SHERLEY. That would seem to be so if the deficiency estimate is a warrantable one. It has not yet been passed upon by the Committee on Appropriations.

Mr. MOORE of Pennsylvania. Well, this bill now before us provides for an appropriation equal in amount to the appropriation of last year, an economy appropriation, a reduced appropriation, of $10,150,000, and if there is a deficiency of $750,000 on the current year's bill, is it not a fair presumption that there will be a deficiency of $700,000 next year unless the reorganization is effected?

Mr. SHERLEY. Well, we assume the reorganization will be effected and we are assuming the law will be obeyed. In my judgment it was the duty of the Secretary of the Treasury to have made his report to Congress at the meeting of Congress, and I think that was what was intended, but unfortunately the law was so worded that while it required him to make his report to the Congress it did not say at the beginning of the Congress, and up to this time we have not had his report.

Mr. MOORE of Pennsylvania. The committee having started out to economize on the customs service, intending to save money, and having incurred upon the new plan a deficiency of $700,000, is it not fair to ask the committee whether it is likely to stand by its guns or whether there is to be a change in its reorganization plans?

Mr. SHERLEY. I suggest to the gentleman that his statement is hardly accurate. The committee has incurred no deficiency at all. The department has incurred the deficiency, and they have not yet adopted a plan which they find requisite. The committee still insists the law is in the interest of economy, and in the face of that fact the committee felt it was only proper it should appropriate the amount which they say was sufficient for the current year.

Mr. MOORE of Pennsylvania. Is not the deficiency due entirely to the fact that not enough money was appropriated for the current year to cover the ordinary expenses of collecting customs?

Mr. SHERLEY. No; I should say it is due to the fact they did not reorganize the customs service and run it in a more economical manner.

Mr. MOORE of Pennsylvania. Does the gentleman think, in view of the situation now existing, and the ascertainment of a deficiency of $700,000, that it is sufficient to appropriate in this bill $10,150,000 for the year to come?

Mr. SHERLEY. The committee thought so, and therefore recommended that amount, and the Treasury officials seemed to think that would be a sufficient amount.

Mr. MOORE of Pennsylvania. Notwithstanding that the deficiency exists?

Mr. SHERLEY. That is all they ask.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. MOORE] has expired.

Mr. OLMSTED. Mr. Chairman, I would like to call the attention of my colleague from Pennsylvania [Mr. MOORE] to the testimony of the Assistant Secretary of the Treasury, which he will find in the hearings. Of course, if a plan is to be put into operation for the reorganization of the customs service, the plan must first have the approval of the Secretary of the Treasury. Then it is the custom to have it approved by the President. Now, the Assistant Secretary of the Treasury has prepared a plan and all the items that go to make up the plan for such reorganization. He submitted it to the Secretary of the Treasury, and the Secretary has not yet passed upon it, and therefore it has not passed up to the President. The Assistant Secretary, however, estimates that there will be a saving of approximately $330,000 in one item and $230,000 in another as the result of this reorganization when it shall have been carried into effect and if it is carried into effect according to the plans he has submitted.

Mr. MOORE of Pennsylvania. I will say to the gentleman that I have been informed that this deficiency exists. It was a question in my mind whether it was safe to go on permitting this deficiency to occur from year to year, unless, of course, there was a reorganization. Let me ask the gentleman from Pennsylvania [Mr. OLMSTED] whether the reorganization was to have been reported at this session of Congress?

Mr. OLMSTED. It is expected that it will be reported at this session of Congress. As the gentleman from Kentucky [Mr. SHERLEY] has said, the expectation, or at least the hope, was that it would be reported at the beginning of the session, so that it might be considered in connection with the preparation of this bill.

Mr. SHERLEY. If the gentleman will permit, the law says:

Such reorganization shall be communicated to Congress at its next regular session, and shall constitute for the fiscal year 1914, and until otherwise provided by Congress, the permanent organization of the customs service.

Mr. MOORE of Pennsylvania. Does that mean the present session of Congress?

Mr. SHERLEY. I am reading the law of last year, and unquestionably it meant this session of Congress.

Mr. MANN. I do not think it was contemplated it would be reported at the beginning of the session.

Mr. OLMSTED. I said it was hoped that it would be.

Mr. SISSON. If the gentlemen of the committee will look in the hearings, they will see that Mr. Curtis says the plan is in the President's hands and they do not know what the President will do with it; and on the preceding page you will find that Mr. Curtis states the estimate asked for, including a stationery account, is $10,150,000, and the committee gave them what they asked for.

Mr. MOORE of Pennsylvania. In spite of the fact that the deficiency exists?

Mr. SISSON. In spite of the fact that they expect to reorganize the entire department and expect to save this appropriation from a deficiency.

Mr. MOORE of Pennsylvania. The gentleman has the testimony in his hands. Was the estimate predicated upon the reorganization?

Mr. SISSON. Upon the reorganization.

Mr. PAGE. Mr. Chairman, for the information of the gentleman from Pennsylvania [Mr. MOORE], who emphasizes the fact that there is a deficit of $700,000 to cover the appropriation for this service during the present fiscal year, I would like to call his attention to the fact that there have been deficiency appropriations covering this item running back through all the years. For instance, in the year 1912 there was a deficiency of $5,315,000; in 1911, $5,500,000; and in 1910, $5,518,000. So the deficiency under the current law is very much less than it has been for several years past, and the committee in making up the appropriation bill for the current year can not be charged, certainly, with appropriating a less amount for this service than the committee that preceded it did in the preceding years, because the deficiency is very much less than it has been for a number of years, and in this bill, as has already been stated, the appropriation for the service is all that the service asked for.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For pay, allowance, and commutation of quarters for commissioned medical officers and pharmacists, $547,640; at least six of the assistant surgeons provided for hereunder shall be required to have had a special training in the diagnosis of insanity and mental defect for duty in connection with the examination of arriving aliens with special reference to the detection of mental defection.

Mr. FOWLER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] moves to strike out the last word.

Mr. FOWLER. Mr. Chairman, I desire to inquire of the gentleman in charge of the bill why it is that this item is so much larger than the amount appropriated for the same purpose in the last bill? I discovered that it is about $110,000 more.

Mr. SHERLEY. It is by virtue of an act that was passed by Congress last year increasing the pay of all these officers. In accordance with that act it is necessary to appropriate the sum now stated.

Mr. FOWLER. Is this amount for the purpose of paying salaries?

Mr. SHERLEY. It is.

Mr. FOWLER. Altogether?

Mr. SHERLEY. It is for pay, allowances, and commutation of quarters in accordance with the law passed last year.

Mr. FOWLER. Mr. Chairman, I withdraw my pro forma amendment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Hygienic Laboratory, Washington, D. C.: For additional building for research work, disinfection, experiments, and housing animals, $25,000.

Mr. SISSON. Mr. Chairman, I desire to reserve a point of order on this item. Where is this building to be located here, mentioned at the top of page 53, the Hygienic Laboratory? I reserve a point of order on the paragraph.

Mr. SHERLEY. I understand it is out by the old Naval Observatory, where the Naval Hospital is now located.

Mr. SISSON. It struck me that it was a considerable amount. My attention was not called to it in the committee. It seems to me to be a considerable amount to pay for a building for the housing of animals.

Mr. SHERLEY. It is not only for the housing of animals, but it is for a building for carrying on research work, disinfection, and experiments.

Mr. SISSON. It is all on account of animals, is it not?

Mr. SHERLEY. The animals kept there are animals that are experimented upon.

Mr. MANN. Rabbits and guinea pigs.

Mr. SHERLEY. I want to say that there is no more important work in behalf of human kind than the work that is being done there in the way of experiments on guinea pigs and other animals incident to the study of diseases.

Mr. RODDENBERY. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Georgia reserves a point of order.

Mr. SHERLEY. Mr. Chairman, the item is not subject to a point of order. It is work in progress. It is an institution that is established, and the item is in order on the appropriation bill.

Mr. RODDENBERY. Mr. Chairman, I make a point of order; and on the point of order, if the Chair is in doubt, I would like to be heard.

Mr. MANN. Does the gentleman make the point of order or reserve it?

Mr. RODDENBERY. I reserved it, Mr. Chairman, and the gentleman propounds the question whether I made it. I am willing to reserve it, but if the question is propounded by the Chair I will make it.

Mr. PAGE. I ask the gentleman to reserve it.

Mr. RODDENBERY. I will reserve it.

The CHAIRMAN. The gentleman from Georgia reserves his point of order.

Mr. RODDENBERY. The gentleman says this is for an additional building for research work, disinfection, experiments, and so forth. What buildings are these?

Mr. MANN. It is a building up there where the Lincoln Memorial is to be, belonging to the Public Health Service, and if there is a gentleman here who has not been up there and examined the work that is being done, he ought to go up there and see it, and it will be a liberal education to him. That is where they discovered the hookworm and the methods of its prevention. That is where the research work of the Public Health Service is being carried on. It is the most valuable work now being carried on for the benefit of the health of man anywhere in the world.

Mr. OLMSTED. This department has discovered a way of controlling Brill's disease and typhus fever.

Mr. RODDENBERY. Was that done in this new building?

Mr. MANN. Not in this new building, but this is to be in addition to the buildings already there.

Mr. FITZGERALD. This building is to take the place of certain wooden structures that are so located as to be a great fire menace. Secondly, it will furnish more suitable quarters for the laboratory work of the Public Health Service. On page 360 of the hearings it appears that at the present time we have three frame buildings, constructed when the laboratory was first established in 1904. It is proposed that this new building shall by 30 by 90 feet, and to be of cement or brick construction, two stories and a basement or a part basement. This statement is contained in the testimony of Dr. Anderson, who is connected with the Hygienic Laboratory.

Mr. RODDENBERY. The construction of the additional building does not mean that it is an improvement or addition to the old building, but it is to be a separate building.

Mr. SHERLEY. It is a separate building, but it is in addition to the buildings that they now have, in which they have been carrying on the work they have been doing since 1904.

Mr. MANN. Will the gentleman from Kentucky yield?

Mr. SHERLEY. Certainly.

Mr. MANN. We have had before Congress for a number of years two distinct propositions concerning the Public Health Service. One was the creation of a department of health and one was the enlargement of the work that had been carried on by what was known as the Public Health and Marine-Hospital Service. I think it is safe to say that the House was opposed to the creation of a new department in the Government, to be called the department of health; but at the same time it was quite willing to increase the research work being done by the Government in connection with public-health affairs, and at the last session of Congress there was passed a bill enlarging the work done by the Public Health Service. One of the purposes of this action was to forestall the creation of a new department of health. The item just preceding this item in the bill is in conformity with that act, and this item is the result of that legislation. It authorizes research work in connection with the Public Health Service, which was given the new title of the Public Health Service in place of the old title of the Public Health and Marine-Hospital Service, and in my judgment will avoid the necessity of even urging the creation of a department of health.

Mr. SHERLEY. If the gentleman will permit——

Mr. MANN. Certainly.

Mr. SHERLEY. There is no isolation room there now, and as a result of the lack of one three of the attendants who were there in connection with the work contracted disease, one of them the foot-and-mouth disease and two of them contracted measles from animals inoculated in these experiments. On page 360 of the hearings it will be found that these buildings are also liable to fire. They are heated by stoves, and are very close to other buildings of value. The committee felt that, on the showing made, we were warranted in proposing the appropriation.

Mr. RODDENBERY. This all goes to show the great importance of proper public buildings in the country. Under the statement of the gentleman from Illinois [Mr. MANN] and of the gentleman from Kentucky [Mr. SHERLEY], this is clearly subject to a point of order, but I quite agree that it is proper wherever public buildings are necessary or economical for the public service that they should be constructed, and so I do not make the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CENTRAL HEATING AND POWER PLANT.

The Secretary of the Treasury is authorized and directed to have constructed, under the direction of the Supervising Architect of the Treasury, upon the land and wharf property of the United States hereinafter described, a central heating, lighting, and power plant, to furnish heat, light, and power for the buildings, old and new, of the Bureau of Engraving and Printing, the buildings of the Department of Agriculture, the Treasury Building, the White House and the buildings on the grounds thereof, the State, War, and Navy Building, the Winder Building, the Mills Building, the Court of Claims Building, the buildings, old and new, of the National Museum, the Smithsonian Institution Building, the Army Medical Museum Building, the Fish Commission Building, the Washington Monument, the District Building, the Post Office Department Building, and the buildings, when constructed on the site heretofore acquired, for each of the Departments of State, Justice, and Commerce and Labor.

Mr. LANGLEY. Mr. Chairman, I make the point of order on this paragraph.

Mr. FITZGERALD. I ask that the paragraph which has just been read, and the succeeding paragraphs down to and including the paragraph ending in line 7, page 56, be treated as one item. They all relate to the same subject.

Mr. LANGLEY. That is all right. I reserve the point of order against all the paragraphs indicated by the gentleman.

Mr. HOWARD. Let the Clerk read all the paragraphs.

The Clerk read as follows:

The total limit of cost of such central heating, lighting, and power plant, including all necessary buildings, boilers, engines, generators, pumps, machinery appliances and equipment, tunnels, ducts, etc., is fixed at not to exceed the sum of $1,494,104, and the Secretary of the Treasury is authorized to enter into contracts to the full limit of cost hereby fixed.

Mr. MANN. Was unanimous consent given to consider all these paragraphs together?

Mr. FITZGERALD. I asked unanimous consent that they be considered as one paragraph.

Mr. MANN. I am not sure that the request was submitted.

Mr. LANGLEY. It was not submitted by the Chair.

The CHAIRMAN. If there be no objection, the request of the gentleman from New York [Mr. FITZGERALD] will be considered as agreed to, that all these paragraphs be treated as one, down to line 7, on page 56.

Mr. LANGLEY. I desire to reserve a point of order on all of the paragraphs.

The Clerk, proceeding with the reading of the bill, read as follows:

Authority is given for making a cross connection between the central heating, lighting, and power plant aforesaid and the Capitol power plant, so that either plant may supply to the other electric energy in case of a breakdown or other emergency, such connection to be equipped with the necessary meters so that reimbursement may be made for the amount of current actually supplied by either of said plants to the other.

The lease dated April 8, 1908, between the Commissioners of the District of Columbia and John Miller for wharf property in the District of Columbia, situated on the Potomac River and described as structures Nos. 24, 25, 26, and 27, section 3, as shown on the official map placed in evidence by the United States in the case of the United States v. Martin F. Morris et al. (174 U. S., p. 196), for a period of five years ending March 15, 1913, and any interest thereunder, is terminated without compensation under the covenant contained in said lease that it may be terminated at any time without compensation by act of Congress, and the land and property covered by said lease, being land owned by the United States fronting on Water Street between Thirteenth and Thirteenth-and-a-half Streets SW., together with land owned by the United States on the Potomac River, fronting on Water Street, between Thirteenth-and-a-half and Fourteenth Streets SW., are hereby designated as the site for said heating, lighting, and power plant: *Provided*, That the building or buildings of said central heating, lighting, and power plant shall be so located upon said site as to reserve a sufficient area for an asphalt plant for the District of Columbia in the event of such asphalt plant being hereafter authorized.

For the commencement of said plant the sum of $150,000 is appropriated.

The Secretary of the Treasury is further authorized and empowered to employ on a salary basis in the Office of the Supervising Architect such technical services as may be deemed necessary in connection with the plans, specifications, and construction of the power plant herein provided for and to pay for such services at such price or rates of compensation as he may consider just and reasonable from the appropriation hereinbefore made: *Provided*, That not to exceed $35,000 shall be available from said appropriation for such technical services: *And provided further*, That the foregoing authorization for securing the services of specially qualified persons shall be in addition to and independent of the authorizations and appropriations for personal services in the Office of the Supervising Architect otherwise made.

Mr. LANGLEY. Mr. Chairman, I reserve a point of order to all these paragraphs. I desire to make one or two inquiries about it. Is not this a matter which should have been considered by the Committee on the District of Columbia?

Mr. RODDENBERY. Mr. Chairman, so that it may be clearly understood, the point of order is reserved to all of these paragraphs?

The CHAIRMAN. They are to be considered as one paragraph. The gentleman from Kentucky reserves a point of order to all of the paragraphs as one.

Mr. FITZGERALD. Mr. Chairman, the gentleman from Kentucky is mistaken; the supplying of heat and light and power to these buildings in the District of Columbia is within the jurisdiction of the Committee on Appropriations. The results of a very exhaustive investigation originating in the last session of Congress, based upon information, plans, and detailed specifications and estimates prepared by three of the most competent engineers in the Government service, were submitted to the committee, and representatives of the local company were invited, with their engineers, to point out errors or mistakes or inaccuracies in the report based upon the investigation of the Government engineers—one the chief engineer of the Revenue-Cutter Service, one the chief engineer in charge of the Treasury Building, and the chief engineer of the Bureau of Engraving and Printing. Their records were checked up by the engineer in charge of the Capitol power and lighting plant and demonstrated that the erection of this power plant would result in an annual saving of $173,000.
